

2008 Annual Report

The security of experience. The power of innovation.

To Our Shareholders:

In the midst of the turbulent financial markets of 2008, a watershed transaction for RGA took place, when MetLife split off its majority ownership of RGA to its shareholders. The transaction included a recapitalization of RGA shares into two classes of securities, 'low vote' and 'high vote', making RGA a widely held, publicly traded company with no majority owner. RGA traded with two classes of shares for a short period following this transaction, after which the Board of Directors recommended, and the shareholders of each class approved, a consolidation back into a single class of stock, which occurred late in the year. While RGA flourished under the eight years of MetLife's ownership, we look forward to this next phase of RGA history, standing on our own as one of the leading global life reinsurers. The major ratings agencies – Moody's, Standard & Poor's, and A.M. Best – reaffirmed RGA's ratings after the split-off.

Another important event for RGA occurred late in 2008, when we raised almost \$332 million of equity capital despite an extremely difficult market. RGA raised this capital to take advantage of the numerous opportunities we currently identify to increase our reinsurance business. We believe we will have opportunities to deploy this capital over time at returns that will be accretive to RGA's shareholders; however, we will be selective in deploying this capital given the evolving financial landscape. In the meantime, until the capital has been deployed, RGA enjoys an even stronger balance sheet.

The preservation and bolstering of capital levels have become primary concerns for our customers, the direct writing insurers. At the end of 2008, many of our clients experienced severely restricted access to capital, whether equity, debt or bank credit – more so than at any time in memory. Many insurers have turned their thinking to using

reinsurance to achieve balance sheet objectives. Reinsurance can be fast and flexible, and, in today's world, less expensive than other types of capital, so RGA found itself working on a number of capital-motivated transactions in the latter part of 2008. We believe that RGA remains uniquely positioned to entertain such requests, which have come to us from all over the globe.

RGA posted good operating earnings per share results of \$6.12¹ in 2008, within the range of expectations we had communicated at the beginning of the year. In fact, without the dilution of additional shares, something not anticipated at the outset of 2008, RGA would have achieved operating earnings in the middle of the guidance range we had provided.

Net income for RGA in 2008, however, fell by nearly 40% from 2007 levels. We impaired assets of \$131 million and saw asset valuations fall across our entire portfolio. Book value per share fell from \$51.42 at the end of 2007 to \$36.03 at the end of 2008, a drop of 30%. Not only did asset valuations fall considerably during this tumultuous year, but they deteriorated further in the fourth quarter, with no signs of this trend abating soon. RGA generates strong cash flow and does not bear a run-on-the-bank risk but, nevertheless, is fortunate to have held a much larger cash balance at year-end than usual.

During 2008, RGA saw premiums increase by 9%, the smallest increase in many years. We have seen our premium increases trend downward in recent years and expect this to continue as the overall reinsurance market moderates. A significant strengthening of the U.S. dollar, compared with other currencies important to RGA, also contributed to the decrease in premium growth rate for 2008. RGA, of course, has no ability to predict how currency valuations will fluctuate in the future.

¹ Operating earnings is a non-GAAP financial measure. See page VI for a reconciliation of earnings per share from continuing operations to operating earnings per share.

Our facultative business continued to grow in 2008. We now underwrite more than 100,000 cases in the U.S. market and more than 270,000 globally. Underwriting strength has long been a hallmark of RGA's operations and we continuously strive to improve our capabilities.

RGA enjoyed outstanding results in Canada in 2008. The weakening of the Canadian dollar in relation to the U.S. dollar substantially reduced fourth quarter results in U.S. dollar terms from what they would have been, making the excellent results even more remarkable. The trend of impressive results that began in 2007, due primarily to substantially better-than-expected mortality, continues. New business has flowed strongly in Canada until now, but we believe cession rates may decline in the future, in a pattern similar to that experienced in the U.S. Our team in Canada will work hard to maintain RGA's strong position in that important market.

RGA International's operations also posted a very solid 2008, continuing their robust growth and development track. Premiums for our Asian segment increased by 16%, while premiums for our European segment increased by 4% over the previous year. Meanwhile, operating profit rose by 43%² in Asia and by 50%³ in Europe. Not only have RGA's international operations shown strong earnings growth, but their larger and maturing base of business presents a platform for a continuing, predictable flow of earnings in the future. In the coming years, much of our overall earnings growth will come from RGA International's operations. While already producing excellent bottom-line results, RGA continues to develop and reinforce its International operations, opening several new offices over the last few years to market reinsurance in continental Europe.

² Pre-tax operating profit, a non-GAAP financial measure, for the Asia Pacific operating segment was \$88.2 million and \$61.6 million during 2008 and 2007, respectively. These amounts exclude investment-related losses of \$2.7 million and \$1.5 million during 2008 and 2007, respectively.

³ Pre-tax operating profit, a non-GAAP financial measure, for the Europe & South Africa operating segment was \$74.4 million and \$49.7 million during 2008 and 2007, respectively. These amounts exclude investment-related losses of \$8.7 million and \$2.2 million during 2008 and 2007, respectively.

We expect premium growth in our European segment to pick up and RGA's International Division overall to see double-digit growth for 2009.

RGA's U.S. mortality business suffered through difficult mortality experience in 2008. RGA's mortality results have been stable and predictable over long periods, but can exhibit volatility over calendar quarters. In 2008, the first and fourth quarters saw significant upward deviations from anticipated mortality. This book of business produced better-than-expected results in 2006 and 2007, and RGA's market position remains strong, with a large market share and an unrivaled reputation in the industry. The recently published Flaspöhler customer satisfaction survey once again named RGA as the "Best Overall Reinsurer" in the U.S. market. The U.S. life insurance industry is undergoing a wrenching transition in these difficult times. Insurers are likely to redesign products, slash costs and look for other ways to survive. We expect them to turn to reinsurers like RGA for support and we have already seen this process begin to take shape.

RGA's annuity operations experienced a difficult year in 2008. While contributing operating income, this business generated net income losses over the year, as asset values depreciated. Unless and until markets stabilize and improve, annuities will continue to show strain. We believe this sector will produce solid returns in the long term; in the meantime, although difficult, we anticipate it will be manageable.

We believe underlying insurance activity will slow down in most, if not all, of our markets, given the stresses on world economies. Nevertheless, at the same time, we expect life insurers to reinsure at slightly increased rates, so that growth in the reinsurance market, while soft, may not be as slow as for the direct insurers.

At the end of 2008, RGA closed its discontinued Accident and Health line. We exited these businesses in the late 1990s and they have been in run-off since. With all

the disputes and arbitrations now behind us and the quarterly flow dwindling to very little, we will not show this discontinued line in the future.

While 2008 will go down as the most difficult year the financial markets have experienced in generations, we see 2009 as a time of both challenge and opportunity. We believe that RGA associates have the expertise and experience, as well as the creativity and intelligence, to perform successfully through this period so that RGA's operations will emerge stronger than ever.

A. Greig Woodring

President and Chief Executive Officer

This 2008 Annual Report contains forward-looking statements within the meaning of the Private Securities Litigation Reform Act of 1995 including, among others, statements relating to projections of the strategies, earnings, revenues, income or loss, ratios, future financial performance, and growth potential of the Company. The words "intend," "expect," "project," "estimate," "predict," "anticipate," "should," "believe," and other similar expressions also are intended to identify forward-looking statements. Forward-looking statements are inherently subject to risks and uncertainties, some of which cannot be predicted or quantified. Future events and actual results, performance, and achievements could differ materially from those set forth in, contemplated by, or underlying the forward-looking statements. See "Item 7 - Management's Discussion and Analysis of Financial Condition and Results of Operations – Forward Looking and Cautionary Statements" of the Company's Annual Report on Form 10-K, included herein.

Item 1. BUSINESS

A. Overview

Reinsurance Group of America, Incorporated ("RGA") is an insurance holding company that was formed on December 31, 1992. Immediately prior to September 12, 2008 ("the Divestiture Date"), General American Life Insurance Company ("General American"), a Missouri life insurance company, directly owned 32,243,539 shares, or approximately 51.7%, of the outstanding shares of common stock of RGA. General American is a wholly-owned subsidiary of MetLife, Inc. ("MetLife"), a New York-based insurance and financial services holding company. On the Divestiture Date, MetLife disposed of the majority of its interest in RGA by exchanging 29,243,539 of its shares of RGA common stock to MetLife shareholders for shares of MetLife common stock. As of December 31, 2008, MetLife has a retained interest of 4.1% of RGA common stock.

The consolidated financial statements herein include the assets, liabilities, and results of operations of RGA, RGA Reinsurance Company ("RGA Reinsurance"), Reinsurance Company of Missouri, Incorporated ("RCM"), RGA Reinsurance Company (Barbados) Ltd. ("RGA Barbados"), RGA Americas Reinsurance Company, Ltd. ("RGA Americas"), RGA Life Reinsurance Company of Canada ("RGA Canada"), RGA Reinsurance Company of Australia, Limited ("RGA Australia"), RGA Reinsurance UK Limited ("RGA UK") and RGA Atlantic Reinsurance Company, Ltd. ("RGA Atlantic") as well as several other subsidiaries subject to an ownership position of greater than fifty percent (collectively, the "Company").

The Company is primarily engaged in traditional individual and group life, asset-intensive, critical illness and financial reinsurance. RGA and its predecessor, the Reinsurance Division of General American, have been engaged in the business of life reinsurance since 1973. The Company's more established operations in the U.S. and Canada contributed approximately 68.0% of its consolidated net premiums during 2008. In 1994, the Company began expanding into international markets and now has subsidiaries, branch operations, or representative offices in Australia, Barbados, Bermuda, China, France, Germany, Hong Kong, India, Ireland, Italy, Japan, Mexico, Poland, South Africa, South Korea, Spain, Taiwan and the United Kingdom ("UK"). RGA is considered to be one of the leading life reinsurers in the North American market based on premiums and the amount of life reinsurance in force. As of December 31, 2008, the Company had approximately \$2.1 trillion of life reinsurance in force and \$21.7 billion in consolidated assets.

Reinsurance is an arrangement under which an insurance company, the "reinsurer," agrees to indemnify another insurance company, the "ceding company," for all or a portion of the insurance risks underwritten by the ceding company. Reinsurance is designed to (i) reduce the net liability on individual risks, thereby enabling the ceding company to increase the volume of business it can underwrite, as well as increase the maximum risk it can underwrite on a single life or risk; (ii) stabilize operating results by leveling fluctuations in the ceding company's loss experience; (iii) assist the ceding company in meeting applicable regulatory requirements; and (iv) enhance the ceding company's financial strength and surplus position.

Life reinsurance primarily refers to reinsurance of individual or group-issued term life insurance policies, whole life insurance policies, universal life insurance policies, and joint and last survivor insurance policies. Asset-intensive reinsurance primarily refers to reinsurance of annuities and corporate-owned life insurance. Critical illness reinsurance provides a benefit in the event of the diagnosis of a pre-defined critical illness. Financial reinsurance primarily involves assisting ceding companies in meeting applicable regulatory requirements while enhancing the ceding companies' financial strength and regulatory surplus position. Financial reinsurance transactions do not qualify as reinsurance under accounting principles generally accepted in the United States of America ("GAAP"). Due to the low risk nature of financial reinsurance transactions they are reported based on deposit accounting guidelines. Ceding companies typically contract with more than one reinsurance company to reinsure their business.

Reinsurance may be written on an indemnity or an assumption basis. Indemnity reinsurance does not discharge a ceding company from liability to the policyholder. A ceding company is required to pay the full amount of its insurance obligations regardless of whether it is entitled or able to receive payments from its reinsurers. In the case of assumption reinsurance, the ceding company is discharged from liability to the policyholder, with such liability passed directly to the reinsurer. Reinsurers also may purchase reinsurance, known as retrocession reinsurance, to cover their risk exposure. Reinsurance companies enter into retrocession agreements for reasons similar to those that drive primary insurers to purchase reinsurance.

Reinsurance generally is written on a facultative or automatic treaty basis. Facultative reinsurance is individually underwritten by the reinsurer for each policy to be reinsured, with the pricing and other terms established at the time the policy is underwritten based upon rates negotiated in advance. Facultative reinsurance normally is purchased by insurance

companies for medically impaired lives, unusual risks, or liabilities in excess of the binding limits specified in their automatic reinsurance treaties.

An automatic reinsurance treaty provides that the ceding company will cede risks to a reinsurer on specified blocks of policies where the underlying policies meet the ceding company's underwriting criteria. In contrast to facultative reinsurance, the reinsurer does not approve each individual policy being reinsured. Automatic reinsurance treaties generally provide that the reinsurer will be liable for a portion of the risk associated with the specified policies written by the ceding company. Automatic reinsurance treaties specify the ceding company's binding limit, which is the maximum amount of risk on a given life that can be ceded automatically and that the reinsurer must accept. The binding limit may be stated either as a multiple of the ceding company's retention or as a stated dollar amount.

Facultative and automatic reinsurance may be written as yearly renewable term, coinsurance, or modified coinsurance. Under a yearly renewable term treaty, the reinsurer assumes only the mortality or morbidity risk. Under a coinsurance arrangement, depending upon the terms of the contract, the reinsurer may share in the risk of loss due to mortality or morbidity, lapses, and the investment risk, if any, inherent in the underlying policy. Modified coinsurance and coinsurance with funds withheld differs from coinsurance in that the assets supporting the reserves are retained by the ceding company while the risk is transferred to the reinsurer.

Generally, the amount of life reinsurance ceded under facultative and automatic reinsurance agreements is stated on an excess or a quota share basis. Reinsurance on an excess basis covers amounts in excess of an agreed-upon retention limit. Retention limits vary by ceding company and also may vary by age and underwriting classification of the insured, product, and other factors. Under quota share reinsurance, the ceding company states its retention in terms of a fixed percentage of the risk that will be retained, with the remainder up to the maximum binding limit to be ceded to one or more reinsurers.

Reinsurance agreements, whether facultative or automatic, may provide for recapture rights, which permit the ceding company to reassume all or a portion of the risk formerly ceded to the reinsurer after an agreed-upon period of time (generally 10 years) or in some cases due to changes in the financial condition or ratings of the reinsurer. Recapture of business previously ceded does not affect premiums ceded prior to the recapture of such business, but would reduce premiums in subsequent periods. The potential adverse effects of recapture rights are mitigated by the following factors: (i) recapture rights vary by treaty and the risk of recapture is a factor that is considered when pricing a reinsurance agreement; (ii) ceding companies generally may exercise their recapture rights only to the extent they have increased their retention limits for the reinsured policies; and (iii) ceding companies generally must recapture all of the policies eligible for recapture under the agreement in a particular year if any are recaptured, which prevents a ceding company from recapturing only the most profitable policies. In addition, when a ceding company increases its retention and recaptures reinsured policies, the reinsurer releases the reserves it maintained to support the recaptured portion of the policies.

Reinsurers may place assets in trust to satisfy collateral requirements for certain treaties. As of December 31, 2008, the Company held securities in trust for this purpose with amortized costs of \$1,217.6 million and \$1,560.1 million for the benefit of certain subsidiaries and third-party reinsurance treaties, respectively. Under certain conditions, RGA may be obligated to move reinsurance from one RGA subsidiary to another RGA subsidiary or make payments under a given treaty. These conditions include change in control or ratings of the subsidiary, insolvency, nonperformance under a treaty, or loss of the reinsurance license of such subsidiary. If RGA were ever required to perform under these obligations, the risk to the consolidated company under the reinsurance treaties would not change; however, additional capital may be required due to the change in jurisdiction of the subsidiary reinsuring the business and may create a strain on liquidity.

During 2006, RGA's subsidiary, Timberlake Financial, L.L.C. ("Timberlake Financial"), issued \$850.0 million of Series A Floating Rate Insured Notes due June 2036 in a private placement. The notes were issued to fund the collateral requirements for statutory reserves required by the U.S. Valuation of Life Policies Model Regulation (commonly referred to as Regulation XXX) on specified term life insurance policies reinsured by RGA Reinsurance. Proceeds from the notes and the Company's direct investment in Timberlake Financial have been deposited into a series of trust accounts as collateral and are not available to satisfy the general obligations of the Company. As of December 31, 2008, the Company held assets in trust of \$875.7 million for this purpose, which is not included above. In addition, the Company held \$9.7 million in custody as of December 31, 2008. See Note 16 - "Collateral Finance Facility" in the Notes to Consolidated Financial Statements for additional information on the Timberlake Financial notes.

Some treaties give the ceding company the right to force the reinsurer to place assets in trust for the ceding company's benefit to provide collateral for statutory reserve credits taken by the ceding company, in the event of a downgrade of the reinsurer's ratings to specified levels, generally non-investment grade levels. As of December 31, 2008, the Company

had approximately \$751.5 million in statutory reserves associated with these types of treaties. Assets placed in trust continue to be owned by the Company, but their use is restricted based on the terms of the trust agreement.

B. Corporate Structure

RGA is an insurance holding company, the principal assets of which consist of the common stock of RCM, RGA Barbados, RGA Americas, RGA Canada, RGA UK and RGA Atlantic as well as investments in several other wholly-owned subsidiaries. Potential sources of funds for RGA to make stockholder dividend distributions and to fund debt service obligations are dividends paid to RGA by its operating subsidiaries, securities maintained in its investment portfolio, and proceeds from securities offerings and borrowings. RCM's primary sources of funds are dividend distributions paid by RGA Reinsurance Company, whose principal source of funds is derived from current operations. Dividends paid by the Company's reinsurance subsidiaries are subject to regulatory restrictions of the respective governing bodies where each reinsurance subsidiary is domiciled.

The Company has five main geographic-based operational segments: U.S., Canada, Europe & South Africa, Asia Pacific and Corporate and Other. These operating segments write reinsurance business that is wholly or partially retained in one or more of the Company's reinsurance subsidiaries. See "Segments" for more information concerning the Company's operating segments.

Intercorporate Relationships

General American and MetLife have historically provided certain administrative services to RGA and RGA Reinsurance. Such services include risk management and corporate travel. The cost of these services for the years ended December 31, 2008, 2007 and 2006 was approximately \$1.8 million (through the Divestiture Date), \$2.8 million and \$2.4 million, respectively, included in other expenses. Management does not believe that the various amounts charged for these services would have been materially different if they had been incurred from an unrelated third party.

RGA Reinsurance also has a product license and service agreement with MetLife. Under this agreement, RGA has licensed the use of its electronic underwriting product to MetLife and provides internet hosting services, installation and modification services for the product. The Company recorded revenue under the agreement for the years ended December 31, 2008, 2007 and 2006 of approximately \$0.6 million (through the Divestiture Date), \$0.6 million and \$0.7 million, respectively.

The Company also had arms-length direct policies and reinsurance agreements with MetLife and certain of its subsidiaries. These direct policies and reinsurance agreements with MetLife and certain of its subsidiaries continue to be in place after the Divestiture Date. As of December 31, 2007, the Company had reinsurance-related assets, excluding investments allocated to support the business, and liabilities from these agreements totaling \$105.9 million and \$277.6 million, respectively. Additionally, the Company reflected net premiums from these agreements of approximately \$163.5 million (through the Divestiture Date), \$250.9 million, and \$227.8 million in 2008, 2007 and 2006, respectively. The premiums reflect the net of business assumed from and ceded to MetLife and its subsidiaries. The pre-tax income, excluding investment income allocated to support the business, was approximately \$15.8 million (through the Divestiture Date), \$16.0 million, and \$10.9 million in 2008, 2007 and 2006, respectively.

Ratings

Insurer financial strength ratings, sometimes referred to as claims paying ratings, represent the opinions of rating agencies regarding the financial ability of an insurance company to meet its obligations under an insurance policy. Credit ratings represent the opinions of rating agencies regarding an entity's ability to repay its indebtedness. The Company's insurer financial strength ratings and credit ratings as of the date of this filing are listed in the table below for each rating agency that meets with the Company's management on a regular basis:

<i>Insurer Financial Strength Ratings</i>	A.M. Best Company (1)	Moody's Investors Service (2)	Standard & Poor's (3)
RGA Reinsurance Company	A+	A1	AA-
RGA Life Reinsurance Company of Canada	A+	Not Rated	AA-
RGA International Reinsurance Company	Not Rated	Not Rated	AA-
RGA Global Reinsurance Company	Not Rated	Not Rated	AA-
<i>Credit Ratings</i>			
Reinsurance Group of America, Incorporated:			
Senior Unsecured	a-	Baa1	A-
Junior Subordinated Debentures	bbb	Baa3	BBB-
RGA Capital Trust I (Preferred Securities)	bbb	Baa2	BBB
Timberlake Financial Floating Rate Insured Notes	Not Rated	Baa1	A

(1) An A.M. Best Company ("A.M. Best") insurer financial strength rating of "A+ (superior)" is the second highest out of fifteen possible ratings and is assigned to companies that have, in A.M. Best's opinion, a superior ability to meet their ongoing obligations to policyholders. Financial strength ratings range from "A++ (superior)" to "F (in liquidation)".

A credit rating of "a-" is in the "strong" category and is the seventh highest rating out of twenty-two possible ratings. A credit rating of "bbb" is in the "adequate" category and is the ninth highest rating.

(2) A Moody's Investors Service ("Moody's") insurer financial strength rating of "A1" (good) is the fifth highest rating out of twenty-one possible ratings and indicates that Moody's believes the insurance company offers good financial security; however, elements may be present which suggest a susceptibility to impairment sometime in the future.

Moody's credit ratings of "Baa1", "Baa2" and "Baa3" are in the "medium-grade" category and represent the eighth, ninth and tenth highest ratings, respectively, out of twenty-two possible ratings. According to Moody's, obligations with these ratings are subject to moderate credit risk.

(3) A Standard & Poor's ("S&P") insurer financial strength rating of "AA-" (very strong) is the fourth highest rating out of twenty-one possible ratings. According to S&P's rating scale, a rating of "AA-" means that, in S&P's opinion, the insurer has very strong financial security characteristics.

S&P credit ratings of "A" (strong) and "A-" (strong), "BBB" (good) and "BBB-" (good) represent the sixth, seventh, ninth, and tenth highest ratings, respectively, out of twenty-two possible ratings. According to S&P, an obligation rated "A" or "A-" is somewhat more susceptible to the adverse effects of changes in circumstances and economic conditions than obligations in higher-rated categories. However, the obligor's capacity to meet its financial commitment of the obligation is still strong. According to S&P, an obligation rated "BBB" or "BBB-" exhibit adequate protection parameters. However, adverse economic conditions or changing circumstances are more likely to lead to a weakened capacity of the obligor to meet its financial commitment on the obligation.

The ability to write reinsurance partially depends on an insurer's financial condition and its financial strength ratings. These ratings are based on an insurance company's ability to pay policyholder obligations and are not directed toward the protection of investors. Each of the Company's credit ratings is considered investment grade. RGA's ability to raise capital for its business and the cost of this capital is influenced by its credit ratings. A security rating is not a recommendation to buy, sell or hold securities. It is subject to revision or withdrawal at any time by the assigning rating organization, and each rating should be evaluated independently of any other rating.

Regulation

RGA Reinsurance, Parkway Reinsurance Company ("Parkway Re") and RCM; Timberlake Reinsurance Company II ("Timberlake Re"); RGA Canada; General American Argentina Seguros de Vida, S.A. ("GA Argentina"); RGA Barbados, RGA Americas, RGA Atlantic and RGA Worldwide Reinsurance Company, Ltd. ("RGA Worldwide"); RGA Global Reinsurance Company, Ltd.; RGA Australia; RGA International Reinsurance Company ("RGA International"); RGA Reinsurance Company of South Africa, Limited ("RGA South Africa"); and RGA UK are regulated by authorities in Missouri, South Carolina, Canada, Argentina, Barbados, Bermuda, Australia, Ireland, South Africa, and the United Kingdom, respectively. RGA Reinsurance is also subject to regulations in the other jurisdictions in which it is licensed or authorized to do business. Insurance laws and regulations, among other things, establish minimum capital requirements and limit the amount of dividends, distributions, and intercompany payments affiliates can make without prior regulatory approval.

Additionally, insurance laws and regulations impose restrictions on the amounts and type of investments that insurance companies may hold.

General

The insurance laws and regulations, as well as the level of supervisory authority that may be exercised by the various insurance departments, vary by jurisdiction, but generally grant broad powers to supervisory agencies or regulators to examine and supervise insurance companies and insurance holding companies with respect to every significant aspect of the conduct of the insurance business, including approval or modification of contractual arrangements. These laws and regulations generally require insurance companies to meet certain solvency standards and asset tests, to maintain minimum standards of business conduct, and to file certain reports with regulatory authorities, including information concerning their capital structure, ownership, and financial condition, and subject insurers to potential assessments for amounts paid by guarantee funds.

The Company's reinsurance subsidiaries are required to file statutory financial statements in each jurisdiction in which they are licensed and may be subject to periodic examinations by the insurance regulators of the jurisdictions in which each is licensed, authorized, or accredited. To date, none of the regulator's reports related to the Company's periodic examinations have contained material adverse findings.

Although some of the rates and policy terms of U.S. direct insurance agreements are regulated by state insurance departments, the rates, policy terms, and conditions of reinsurance agreements generally are not subject to regulation by any regulatory authority. However, the National Association of Insurance Commissioners ("NAIC") Model Law on Credit for Reinsurance, which has been adopted in most states, imposes certain requirements for an insurer to take reserve credit for risk ceded to a reinsurer. Generally, the reinsurer is required to be licensed or accredited in the insurer's state of domicile, or security must be posted for reserves transferred to the reinsurer in the form of letters of credit or assets placed in trust. The NAIC Life and Health Reinsurance Agreements Model Regulation, which has been passed in most states, imposes additional requirements for insurers to claim reserve credit for reinsurance ceded (excluding yearly renewable term reinsurance and non-proportional reinsurance). These requirements include bona fide risk transfer, an insolvency clause, written agreements, and filing of reinsurance agreements involving in force business, among other things.

The Valuation of Life Insurance Policies Model Regulation, commonly referred to as Regulation XXX, was implemented in the U.S. for various types of life insurance business beginning January 1, 2000. Regulation XXX significantly increased the level of reserves that U.S. life insurance and life reinsurance companies must hold on their statutory financial statements for various types of life insurance business, primarily certain level premium term life products. The reserve levels required under Regulation XXX increase over time and are normally in excess of reserves required under GAAP. In situations where primary insurers have reinsured business to reinsurers that are unlicensed and unaccredited in the U.S., the reinsurer must provide collateral equal to its reinsurance reserves in order for the ceding company to receive statutory financial statement credit. Reinsurers have historically utilized letters of credit for the benefit of the ceding company, or have placed assets in trust for the benefit of the ceding company, or have used other structures as the primary forms of collateral. The increasing nature of the statutory reserves under Regulation XXX will likely require increased levels of collateral from reinsurers in the future to the extent the reinsurer remains unlicensed and unaccredited in the U.S.

In order to manage the effect of Regulation XXX on its statutory financial statements, RGA Reinsurance has retroceded a majority of Regulation XXX reserves to unaffiliated and affiliated unlicensed reinsurers. RGA Reinsurance's statutory capital may be significantly reduced if the unaffiliated or affiliated reinsurer is unable to provide the required collateral to support RGA Reinsurance's statutory reserve credits and RGA Reinsurance cannot find an alternative source for the collateral.

RGA Reinsurance, Parkway Re and RCM prepare statutory financial statements in conformity with accounting practices prescribed or permitted by the State of Missouri. Timberlake Re prepares statutory financial statements in conformity with accounting practices prescribed or permitted by the State of South Carolina. Both states require domestic insurance companies to prepare their statutory financial statements in accordance with the NAIC Accounting Practices and Procedures manual subject to any deviations prescribed or permitted by each state's insurance commissioner. The Company's non-U.S. subsidiaries are subject to the regulations and reporting requirements of their respective countries of domicile.

Capital Requirements

Risk-Based Capital ("RBC") guidelines promulgated by the NAIC became effective for U.S. insurance companies in 1993. These guidelines, applicable to RGA Reinsurance and RCM, identify minimum capital requirements based upon business levels and asset mix. RGA Reinsurance and RCM maintain capital levels in excess of the amounts required by the

applicable guidelines. Regulations in international jurisdictions also require certain minimum capital levels, and subject the companies operating there to oversight by the applicable regulatory bodies. The Company's operations meet the minimum capital requirements in their respective jurisdictions. The Company cannot predict the effect that any proposed or future legislation or rule making in the countries in which it operates may have on the financial condition or operations of the Company or its subsidiaries.

Insurance Holding Company Regulations

RGA Reinsurance, RCM and Parkway Re are subject to regulation under the insurance and insurance holding company statutes of Missouri. The Missouri insurance holding company laws and regulations generally require insurance and reinsurance subsidiaries of insurance holding companies to register and file with the Missouri Department of Insurance, Financial Institutions and Professional Registration ("MDI"), certain reports describing, among other information, their capital structure, ownership, financial condition, certain intercompany transactions, and general business operations. The Missouri insurance holding company statutes and regulations also require prior approval of, or in certain circumstances, prior notice to the MDI of certain material intercompany transfers of assets, as well as certain transactions between insurance companies, their parent companies and affiliates.

Under Missouri insurance laws and regulations, unless (i) certain filings are made with the MDI, (ii) certain requirements are met, including a public hearing, and (iii) approval or exemption is granted by the Director of the MDI, no person may acquire any voting security or security convertible into a voting security of an insurance holding company, such as RGA, which controls a Missouri insurance company, or merge with such an insurance holding company, if as a result of such transaction such person would "control" the insurance holding company. "Control" is presumed to exist under Missouri law if a person directly or indirectly owns or controls 10% or more of the voting securities of another person.

In addition to RGA Reinsurance, RCM and Parkway Re, other insurance subsidiaries of RGA are subject to various regulations in their respective jurisdictions.

Restrictions on Dividends and Distributions

Current Missouri law, applicable to RCM, and its wholly-owned subsidiary, RGA Reinsurance, permits the payment of dividends or distributions which, together with dividends or distributions paid during the preceding twelve months, do not exceed the greater of (i) 10% of statutory capital and surplus as of the preceding December 31, or (ii) statutory net gain from operations for the preceding calendar year. Any proposed dividend in excess of this amount is considered an "extraordinary dividend" and may not be paid until it has been approved, or a 30-day waiting period has passed during which it has not been disapproved, by the Director of the MDI. Additionally, dividends may be paid only to the extent the insurer has unassigned surplus (as opposed to contributed surplus). Pursuant to these restrictions, RCM's and RGA Reinsurance's allowable dividends without prior approval for 2009 are approximately \$110.4 million and \$110.4 million, respectively. Any dividends paid by RGA Reinsurance would be paid to RCM, which in turn has the ability to pay dividends to RGA. The MDI allows RCM to pay a dividend to RGA to the extent RCM received the dividend from RGA Reinsurance, without limitation related to the level of unassigned surplus. Historically, RGA has not relied upon dividends from its subsidiaries to fund its obligations. However, the regulatory limitations described here could limit the Company's financial flexibility in the future should it choose to or need to use subsidiary dividends as a funding source for its obligations.

In contrast to current Missouri law, the NAIC Model Insurance Holding Company Act (the "Model Act") defines an extraordinary dividend as a dividend or distribution which, together with dividends or distributions paid during the preceding twelve months, exceeds the lesser of (i) 10% of statutory capital and surplus as of the preceding December 31, or (ii) statutory net gain from operations for the preceding calendar year. The Company is unable to predict whether, when, or in what form Missouri will enact a new measure for extraordinary dividends.

Missouri insurance laws and regulations also require that the statutory surplus of RCM and RGA Reinsurance following any dividend or distribution be reasonable in relation to its outstanding liabilities and adequate to meet its financial needs. The Director of the MDI may call for a rescission of the payment of a dividend or distribution by RGA Reinsurance or RCM that would cause its statutory surplus to be inadequate under the standards of the Missouri insurance regulations.

Pursuant to the South Carolina Director of Insurance, Timberlake Re may declare dividends after June 15, 2012 subject to a minimum Total Adjusted Capital threshold, as defined by the NAIC's RBC regulation. Timberlake Re may pay dividends in accordance with any filed request to make such payments if the South Carolina Director of Insurance has approved such request. Dividend payments from other subsidiaries are subject to the regulations in the country of domicile.

Default or Liquidation

In the event that RGA defaults on any of its debt or other obligations, or becomes the subject of bankruptcy, liquidation, or reorganization proceedings, the creditors and stockholders of RGA will have no right to proceed against the assets of any of the subsidiaries of RGA. If any of RGA's reinsurance subsidiaries were to be liquidated or dissolved, the liquidation or dissolution would be conducted in accordance with the rules and regulations of the appropriate governing body in the state or country of the subsidiary's formation. The creditors of any such reinsurance company, including, without limitation, holders of its reinsurance agreements and state guaranty associations (if applicable), would be entitled to payment in full from such assets before RGA, as a direct or indirect stockholder, would be entitled to receive any distributions or other payments from the remaining assets of the liquidated or dissolved subsidiary.

Federal Regulation

Discussions continue in the Congress of the United States concerning the future of the McCarran-Ferguson Act, which exempts the "business of insurance" from most federal laws, including anti-trust laws, to the extent such business is subject to state regulation. Judicial decisions narrowing the definition of what constitutes the "business of insurance" and repeal or modification of the McCarran-Ferguson Act may limit the ability of the Company, and RGA Reinsurance in particular, to share information with respect to matters such as rate setting, underwriting, and claims management. Likewise, discussions continue in the Congress of the United States concerning potential future regulation of insurance and reinsurance at the Federal level. It is not possible to predict the effect of such decisions or changes in the law on the operation of the Company.

Underwriting

Facultative. The Company has developed underwriting policies, procedures and standards with the objective of controlling the quality of business written as well as its pricing. The Company's underwriting process emphasizes close collaboration between its underwriting, actuarial, and operations departments. Management periodically updates these underwriting policies, procedures, and standards to account for changing industry conditions, market developments, and changes occurring in the field of medical technology. These policies, procedures, and standards are documented in electronic underwriting manuals made available to all the Company's underwriters. The Company regularly performs both internal and external reviews of its underwriters and underwriting process.

The Company's management determines whether to accept facultative reinsurance business on a prospective insured by reviewing the application, medical information and all underwriting requirements based on age and the face amount of the application. An assessment of medical and financial history follows with decisions based on underwriting knowledge, manual review and consultation with the Company's medical directors as necessary. Many facultative applications involve individuals with multiple medical impairments, such as heart disease, high blood pressure, and diabetes, which require a complex underwriting/mortality assessment. To assist its underwriters in making these assessments, the Company employs 10 full-time medical directors as well as 16 medical consultants.

Automatic. The Company's management determines whether to write automatic reinsurance business by considering many factors, including the types of risks to be covered; the ceding company's retention limit and binding authority, product, and pricing assumptions; and the ceding company's underwriting standards, financial strength and distribution systems. For automatic business, the Company ensures that the underwriting standards, procedures and guidelines of its ceding companies are priced appropriately and consistent with the Company's expectations. To this end, the Company conducts periodic reviews of the ceding companies' underwriting and claims personnel and procedures.

Operations

Generally, the Company's life business has been obtained directly, rather than through brokers. The Company has an experienced marketing staff that works to provide responsive service and maintain existing relationships.

The Company's administration, auditing, valuation and accounting departments are responsible for treaty compliance auditing, financial analysis of results, generation of internal management reports, and periodic audits of administrative practices and records. A significant effort is focused on periodic audits of administrative and underwriting practices, records, and treaty compliance of reinsurance clients.

The Company's claims departments review and verify reinsurance claims, obtain the information necessary to evaluate claims, and arrange for timely claims payments. Claims are subjected to a detailed review process to ensure that the risk was properly ceded, the claim complies with the contract provisions, and the ceding company is current in the payment

of reinsurance premiums to the Company. In addition, the claims departments monitor both specific claims and the overall claims handling procedures of ceding companies.

Competition

Reinsurers compete on the basis of many factors, including financial strength, pricing and other terms and conditions of reinsurance agreements, reputation, service, and experience in the types of business underwritten. The U.S. and Canadian life reinsurance markets are served by numerous international and domestic reinsurance companies. The Company believes that its primary competitors in the North American life reinsurance market are currently the following, or their affiliates: Transamerica Occidental Life Insurance Company, a subsidiary of Aegon N.V., Swiss Re Life and Munich Reinsurance Company. However, within the reinsurance industry, this can change from year to year. The Company believes that its major competitors in the international life reinsurance markets are Swiss Re Life and Health Ltd., General Re, Munich Reinsurance Company, Hannover Reinsurance, and SCOR Global Reinsurance.

Employees

As of December 31, 2008, the Company had 1,222 employees located throughout the world. None of these employees are represented by a labor union.

C. Segments

The Company obtains substantially all of its revenues through reinsurance agreements that cover a portfolio of life insurance products, including term life, credit life, universal life, whole life, joint and last survivor insurance, critical illness, as well as annuities, financial reinsurance, and direct premiums which include single premium pension annuities, universal life, and group life. Generally, the Company, through various subsidiaries, has provided reinsurance for mortality, morbidity, and lapse risks associated with such products. With respect to asset-intensive products, the Company has also provided reinsurance for investment-related risks.

The following table sets forth the Company's premiums attributable to each of its segments for the periods indicated on both a gross assumed basis and net of premiums ceded to third parties:

Gross and Net Premiums by Segment (in millions)

	Year Ended December 31,					
	<u>2008</u>		<u>2007</u>		<u>2006</u>

Total	\$2,108.1	100.0	\$2,119.9	100.0	\$1,941.4	100.0

Reinsurance business in force reflects the addition or acquisition of new life reinsurance business, offset by terminations (e.g., voluntary surrenders of underlying life insurance policies, lapses of underlying policies, deaths of insureds, and the exercise of recapture options), changes in foreign exchange, and any other changes in the amount of insurance in force. As a result of terminations and other changes, assumed in force amounts at risk of \$316.8 billion, \$123.9 billion, and \$146.4 billion were released in 2008, 2007 and 2006, respectively.

The following table sets forth selected information concerning assumed new business volume by segment for the indicated periods. (The term "volume" refers to insurance policy face amounts or net amounts at risk.)

New Business Volume by Segment

(in billions)

	Year Ended December 31,					
	2008		2007		2006	
	<u>Amount</u>	<u>%</u>	<u>Amount</u>	<u>%</u>	<u>Amount</u>	<u>%</u>

Total	\$305.0	100.0	\$302.4	100.0	\$374.6	100.0

Additional information regarding the operations of the Company's segments and geographic operations is contained in Note 17 – "Segment Information" in the Notes to Consolidated Financial Statements.

U.S. Operations

The U.S. operations represented 58.0%, 58.6% and 61.1% of the Company's net premiums in 2008, 2007 and 2006, respectively. The U.S. operations market traditional life reinsurance, reinsurance of asset-intensive products and financial reinsurance, primarily to large U.S. life insurance companies.

Traditional Reinsurance

The U.S. Traditional sub-segment provides life reinsurance to domestic clients for a variety of life products through yearly renewable term agreements, coinsurance, and modified coinsurance. This business has been accepted under many different rate scales, with rates often tailored to suit the underlying product and the needs of the ceding company. Premiums typically vary for smokers and non-smokers, males and females, and may include a preferred underwriting class discount. Reinsurance premiums are paid in accordance with the treaty, regardless of the premium mode for the underlying primary insurance. This business is made up of facultative and automatic treaty business.

Automatic business, including financial reinsurance treaties, is generated pursuant to treaties which generally require that the underlying policies meet the ceding company's underwriting criteria, although a number of such policies may be rated substandard. In contrast to facultative reinsurance, reinsurers do not engage in underwriting assessments of each risk assumed through an automatic treaty.

Because the Company does not apply its underwriting standards to each policy ceded to it under automatic treaties, the U.S. operations generally require ceding companies to keep a portion of the business written on an automatic basis, thereby increasing the ceding companies' incentives to underwrite risks with due care and, when appropriate, to contest claims diligently.

The U.S. facultative reinsurance operation involves the assessment of the risks inherent in (i) multiple impairments, such as heart disease, high blood pressure, and diabetes; (ii) cases involving large policy face amounts; and (iii) financial risk

cases, i.e., cases involving policies disproportionately large in relation to the financial characteristics of the proposed insured. The U.S. operations' marketing efforts have focused on developing facultative relationships with client companies because management believes facultative reinsurance represents a substantial segment of the reinsurance activity of many large insurance companies and also serves as an effective means of expanding the U.S. operations' automatic business. In 2008, 2007 and 2006, approximately 19.5%, 19.9%, and 20.0%, respectively, of the U.S. gross premiums were written on a facultative basis. The U.S. operations have emphasized personalized service and prompt response to requests for facultative risk assessment.

Only a portion of approved facultative applications ultimately result in reinsurance. This is because applicants for impaired risk policies often submit applications to several primary insurers, which in turn seek facultative reinsurance from several reinsurers. Ultimately, only one insurance company and one reinsurer are likely to obtain the business. The Company tracks the percentage of declined and placed facultative applications on a client-by-client basis and generally works with clients to seek to maintain such percentages at levels deemed acceptable. Because the Company applies its underwriting standards to each application submitted to it facultatively, it generally does not require ceding companies to retain a portion of the underlying risk when business is written on a facultative basis.

In addition, several of the Company's U.S. clients have purchased life insurance policies insuring the lives of their executives. These policies have generally been issued to fund deferred compensation plans and have been reinsured with the Company. As of both December 31, 2008 and 2007, interest-sensitive contract reserves of \$1.1 billion and policy loans of \$1.1 billion associated with this business were included on the Company's consolidated balance sheets.

Asset-Intensive Reinsurance

Asset-intensive reinsurance primarily concentrates on the investment risk within underlying annuities and corporate-owned life insurance policies. Most of these agreements are coinsurance, coinsurance funds withheld, or modified coinsurance of primarily investment risk such that the Company recognizes profits or losses primarily from the spread between the investment earnings and the interest credited on the underlying annuity contract liabilities. As of December 31, 2008, reinsurance of such business was reflected in interest-sensitive contract liabilities of approximately \$6.5 billion.

Annuities are normally limited by the size of the deposit from any single depositor. The Company also reinsures certain variable annuity products that contain guaranteed minimum death or living benefits. Corporate-owned life insurance normally involves a large number of insureds associated with each deposit, and the Company's underwriting guidelines limit the size of any single deposit. The individual policies associated with any single deposit are typically issued within pre-set guaranteed issue parameters. A significant amount of this business is written on a modified coinsurance or coinsurance with funds withheld basis. See "Management's Discussion and Analysis of Financial Condition and Results of Operations--Investments" and Note 4 – "Investments" in the Notes to Consolidated Financial Statements for additional information.

The Company targets highly-rated, financially secure companies as clients for asset-intensive business. These companies may wish to limit their own exposure to certain products. Ongoing asset/liability analysis is required for the management of asset-intensive business. The Company performs this analysis internally, in conjunction with asset/liability analysis performed by the ceding companies.

Financial Reinsurance

The Company's U.S. Financial Reinsurance sub-segment assists ceding companies in meeting applicable regulatory requirements while enhancing the ceding companies' financial strength and regulatory surplus position. The Company commits cash or assumes regulatory insurance liabilities from the ceding companies. Generally, such amounts are offset by receivables from ceding companies that are repaid by the future profits from the reinsured block of business. The Company structures its financial reinsurance transactions so that the projected future profits of the underlying reinsured business significantly exceed the amount of regulatory surplus provided to the ceding company.

The Company primarily targets highly-rated insurance companies for financial reinsurance due to the credit risk associated with this business. A careful analysis is performed before providing any regulatory surplus enhancement to the ceding company. This analysis is intended to ensure that the Company understands the risks of the underlying insurance product and that the transaction has a high likelihood of being repaid through the future profits of the underlying business. If the future profits of the business are not sufficient to repay the Company or if the ceding company becomes financially distressed and is unable to make payments under the treaty, the Company may incur losses. A staff of actuaries and accountants tracks experience for each treaty on a quarterly basis in comparison to expected models. This sub-segment also retrocedes most of its financial reinsurance business to other insurance companies to alleviate the strain on regulatory surplus created by this business.

Customer Base

The U.S. reinsurance operation markets life reinsurance primarily to the largest U.S. life insurance companies. The Company estimates that approximately 88 of the top 100 U.S. life insurance companies, based on premiums, are clients. These treaties generally are terminable by either party on 90 days written notice, but only with respect to future new business. Existing business generally is not terminable, unless the underlying policies terminate or are recaptured. In 2008, the U.S. reinsurance operation's largest client generated approximately \$391.0 million or 11.8% of U.S. operations gross premiums. In addition, 67 other clients each generated annual gross premiums of \$5.0 million or more, and the aggregate gross premiums from these clients represented approximately 86.4% of U.S. operations gross premiums. For the purpose of this disclosure, companies that are within the same insurance holding company structure are combined.

Canada Operations

The Canada operations represented 10.0%, 9.9%, and 9.9% of the Company's net premiums in 2008, 2007 and 2006, respectively. In 2008, the Canadian life operations assumed \$51.2 billion in new business, predominately representing recurring new business, as opposed to in force transactions. Approximately 85.8% of the 2008 recurring new business was written on an automatic basis.

The Company operates in Canada primarily through RGA Canada, a wholly-owned subsidiary. RGA Canada is a leading life reinsurer in Canada, based on new individual life insurance production, assisting clients with capital management and mortality and morbidity risk management and is primarily engaged in traditional individual life reinsurance, as well as creditor, critical illness, and group life and health reinsurance. Creditor insurance covers the outstanding balance on personal, mortgage or commercial loans in the event of death, disability or critical illness and is generally shorter in duration than traditional life insurance.

Clients include most of the life insurers in Canada, although the number of life insurers is much smaller compared to the U.S. During 2008, the three largest clients represented \$297.8 million, or 39.6%, of gross premiums. Two other clients individually represented more than 5% of Canada's gross premiums. Together, these two clients represented 13.2% of Canada's gross premiums.

As of December 31, 2008, RGA Canada had two offices and maintained a staff of 99 people at the Montreal office and 20 people at the office in Toronto. RGA Canada employs its own underwriting, actuarial, claims, pricing, accounting, systems, marketing and administrative staff.

Europe & South Africa Operations

The Europe & South Africa operations represented 13.2%, 13.8%, and 13.5% of the Company's net premiums in 2008, 2007 and 2006, respectively. This segment primarily provides life reinsurance to clients located in Europe, mainly in the UK and Spain, South Africa, Mexico and India. The principal types of business have been reinsurance of life products through yearly renewable term and coinsurance agreements and the reinsurance of critical illness coverage that provides a benefit in the event of the diagnosis of a pre-defined critical illness. These agreements may be either facultative or automatic agreements. Premiums earned from critical illness coverage represented 31.6% of the total gross premiums for this segment in 2008. The segment's five largest clients, all part of the Company's UK operations, generated approximately \$473.4 million, or 63.3%, of the segment's gross premiums in 2008.

During 2000, RGA established a UK regulated reinsurer and began operating in the UK, where an increasing number of insurers were ceding the mortality and accelerated critical illness risks of individual life products on a quota share basis. During the years since, RGA has grown its UK operations significantly and is now recognized as an established participant in this market with significant market share. During 2008, RGA realized opportunities to expand its product offering to reinsuring the longevity risk from annuities in payment and reinsurance of bulk annuities and individually underwritten impaired life annuities. The reinsurers present in the market include the large global companies with which the Company also competes in other markets. In 2008, the UK operations generated approximately 73.1% of the segment's gross premiums.

In 1998, the Company established RGA South Africa, with offices in Cape Town and Johannesburg, to provide life reinsurance in South Africa. In South Africa, the Company's subsidiary has managed to establish a substantial position in the individual facultative market, through excellent service and competitive pricing, and has gained an increasing share in the automatic market. Life reinsurance is also provided on group cases. The Company is concentrating on the life insurance market, as opposed to competitors that are also in the health market.

In Spain, the Company has business relationships with more than 40 companies covering both individual and group

life business; in 2007 this operation became a branch. A representative office was opened in 1998 in Mexico City to directly assist clients in this market. In 2002, RGA opened an office in India which markets life reinsurance support on individual and group business. During 2006, RGA opened a representative office in Poland to directly assist clients in the central and eastern European market. During 2007, RGA opened a branch office in France and a representative office in Italy to directly assist clients in those markets. In 2008, RGA opened a branch office in Germany to directly assist clients in the region.

RGA's subsidiaries in the UK and South Africa employ their own underwriting, actuarial, claims, pricing, accounting, marketing, and administration staff with additional support provided by the Company's corporate staff in the U.S. Divisional management through RGA International Corporation (Nova Scotia ULC), based in Toronto, also provides services for these and other international markets. As of December 31, 2008, this segment employed 63 people in Toronto, 67 people in the UK, 56 people in South Africa, 32 people in mainland Europe and Ireland, 11 people in Mexico, 34 people in India and 36 people in St. Louis.

Asia Pacific Operations

The Asia Pacific operations represented 18.7%, 17.6%, and 15.5% of the Company's net premiums in 2008, 2007 and 2006, respectively. The Company has a presence in the Asia Pacific region with licensed branch offices and/or representative offices in Hong Kong, Japan, South Korea, Taiwan, New Zealand and China. The Company also established a reinsurance subsidiary in Australia in January 1996.

During 2008, the ten largest clients, six in Australia, two in Korea and two in Japan, generated approximately \$578.7 million, or 56.3% of the total gross premiums for the Asia Pacific operations. The Australian business, as a whole, generated approximately \$421.3 million, or 41.0% of the total gross premiums for the Asia Pacific operations in 2008.

The principal types of reinsurance for this segment include life, critical illness, disability income, superannuation, and non-traditional reinsurance. Superannuation is the Australian government mandated compulsory retirement savings program. Superannuation funds accumulate retirement funds for employees, and in addition, offer life and disability insurance coverage. Reinsurance agreements may be either facultative or automatic agreements covering primarily individual risks and in some markets, group risks.

Within the Asia Pacific segment, as of December 31, 2008, 30 people were on staff in the Hong Kong office, 52 people were on staff in the Japan office, 19 people were on staff in the Taiwan office, 25 people were on staff in the South Korean office, nine people were on staff in the Beijing office, one person was on staff in the New Zealand office, 34 people were on staff in the Sydney regional office, ten were on staff at the St. Louis office, and RGA Australian Holdings maintained a staff of 74 people. The Hong Kong, Japan, Taiwan, Beijing and South Korea offices primarily provide marketing and underwriting services to the direct life insurance companies with other service support provided directly by the Company's U.S. and Sydney regional operations. RGA Australia employs its own underwriting, actuarial, claims, pricing, accounting, systems, marketing, and administration service with additional support provided by the Company's U.S. and Sydney regional operations.

Corporate and Other

Corporate and Other operations include investment income from invested assets not allocated to support segment operations and undeployed proceeds from the Company's capital raising efforts, in addition to unallocated investment related gains or losses. Corporate expenses consist of the offset to capital charges allocated to the operating segments within the policy acquisition costs and other insurance expenses line item, unallocated overhead and executive costs, and interest expense related to debt and the \$225.0 million of 5.75% Company-obligated mandatorily redeemable trust preferred securities. Additionally, the Corporate and Other operations segment includes results from RGA Technology Partners, Inc. ("RTP"), a wholly-owned subsidiary that develops and markets technology solutions for the insurance industry, the Company's Argentine privatized pension business, which is currently in run-off, the investment income and expense associated with the Company's collateral finance facility and an insignificant amount of direct insurance operations in Argentina. The Company has maintained its ownership of the direct insurance operations in Argentina but transferred the majority of the underlying insurance policies to an unrelated third party in the first quarter of 2007. Total future policy benefits and other liabilities associated with this transfer totaled approximately \$6.9 million. The Company also recognized a \$10.5 million foreign currency translation loss in the first quarter of 2007 related to its decision to sell its ownership interest in the operation and does not expect to incur a significant gain or loss upon the ultimate sale of its ownership interest.

Discontinued Operations

As of December 31, 1998, the Company formally reported its accident and health division as a discontinued operation. More information about the Company's discontinued accident and health division may be found in Note 21 – "Discontinued Operations" in the Notes to Consolidated Financial Statements.

D. Financial Information About Foreign Operations

The Company's foreign operations are primarily in Canada, the Asia Pacific region, and Europe & South Africa. Revenue, income (loss) before income taxes, which include investment related gains (losses), interest expense, depreciation and amortization, and identifiable assets attributable to these geographic regions are identified in Note 17 – "Segment Information" in the Notes to Consolidated Financial Statements. Although there are risks inherent to foreign operations, such as currency fluctuations and restrictions on the movement of funds, as described in Item 1A – "Risk Factors", the Company's financial position and results of operations have not been materially adversely affected thereby to date.

E. Available Information

Copies of the Company's Annual Report on Form 10-K, Quarterly Reports on Form 10-Q, Current Reports on Form 8-K, and amendments to those reports are available free of charge through the Company's website (www.rgare.com) as soon as reasonably practicable after the Company electronically files (www.sec.gov) such reports with the Securities and Exchange Commission. Information provided on such websites does not constitute part of this Annual Report on Form 10-K.

Item 1A. RISK FACTORS

In the Risk Factors below, we refer to the Company as "we," "us," or "our". Investing in our securities involves certain risks. Any of the following risks could materially adversely affect our business, results of operations, or financial condition and could result in a loss of your investment.

Risks Related to Our Business

Adverse capital and credit market conditions may significantly affect our ability to meet liquidity needs, access to capital and cost of capital.

The capital and credit markets have been experiencing extreme volatility and disruption. In recent months, the volatility and disruption have reached unprecedented levels. In some cases, the markets have exerted downward pressure on availability of liquidity and credit capacity for certain issuers.

We need liquidity to pay our operating expenses, interest on our debt and dividends on our capital stock and to replace certain maturing liabilities. Without sufficient liquidity, we will be forced to curtail our operations, and our business will suffer. The principal sources of our liquidity are reinsurance premiums under reinsurance treaties and cash flow from our investment portfolio and other assets. Sources of liquidity in normal markets also include proceeds from the issuance of a variety of short- and long-term instruments, including medium- and long-term debt, junior subordinated debt securities, capital securities and common stock.

In the event current resources do not satisfy our needs, we may have to seek additional financing. The availability of additional financing will depend on a variety of factors such as market conditions, the general availability of credit, the volume of trading activities, the overall availability of credit to the financial services industry, our credit ratings and credit capacity, as well as the possibility that customers or lenders could develop a negative perception of our long- or short-term financial prospects if we incur large investment losses or if the level of our business activity decreased due to a market downturn. Similarly, our access to funds may be impaired if regulatory authorities or rating agencies take negative actions against us. Our internal sources of liquidity may prove to be insufficient, and in such case, we may not be able to successfully obtain additional financing on favorable terms, or at all.

Disruptions, uncertainty or volatility in the capital and credit markets may also limit our access to capital required to operate our business, most significantly our reinsurance operations. Such market conditions may limit our ability to replace, in a timely manner, maturing liabilities; satisfy statutory capital requirements; generate fee income and market-related revenue to meet liquidity needs; and access the capital necessary to grow our business. As such, we may be forced to delay raising capital, issue shorter tenor securities than we prefer, or bear an unattractive cost of capital which could decrease our profitability and significantly reduce our financial flexibility. Recently our credit spreads have widened considerably. Further, our ability to finance our statutory reserve requirements is limited in the current marketplace. If capacity continues to be limited for a prolonged period of time, our ability to obtain new funding for such purposes may be hindered and, as a result, it may limit or adversely affect our ability to write additional business in a cost-effective manner. Our results of

operations, financial condition, cash flows and statutory capital position could be materially adversely affected by disruptions in the financial markets.

Difficult conditions in the global capital markets and the economy generally may materially adversely affect our business and results of operations.

Our results of operations are materially affected by conditions in the global capital markets and the economy generally, both in the United States and elsewhere around the world. Fixed income markets are experiencing a period of extreme volatility which has negatively affected market liquidity conditions. Fixed income instruments have experienced decreased liquidity, increased price volatility, credit downgrade events, and increased probability of default. Many fixed income securities are less liquid and more difficult to value and sell. Domestic and international equity markets also have been experiencing heightened volatility and turmoil, with issuers (such as us) that have exposure to the mortgage and credit markets particularly affected. These events and the continuing market upheavals may have an adverse effect on us, in part because we have a large investment portfolio and are also dependent upon customer behavior. Our revenues may decline in such circumstances and our profit margins may erode. In addition, in the event of extreme prolonged market events, such as the global credit crisis, we could incur significant investment-related losses. Even in the absence of a market downturn, we are exposed to substantial risk of loss due to market volatility.

The demand for financial and insurance products could be adversely affected in an economic downturn. Adverse changes in the economy could affect earnings negatively and could have a material adverse effect on our business, results of operations and financial condition. The current financial crisis has also raised the possibility of future legislative and regulatory actions in addition to the recent enactment of the Emergency Economic Stabilization Act of 2008 (the “EESA”) that could further impact our business. There can be no assurance as to what impact the EESA or other such actions, if any, will have on the financial markets, including the extreme levels of volatility currently being experienced. Continued volatility could materially and adversely affect our business, financial condition and results of operations, or the trading price of our common stock.

The liquidity and value of some of our investments has significantly diminished as volatility has increased.

We hold certain investments that may lack liquidity, such as privately placed fixed maturity securities; mortgage loans; policy loans; and equity real estate. Even some of our very high quality assets have been more illiquid as a result of the recent challenging market conditions.

If we require significant amounts of cash on short notice in excess of normal cash requirements or are required to post or return collateral in connection with our investment portfolio, derivatives transactions or securities lending activities, we may have difficulty selling these investments in a timely manner, be forced to sell them for less than we otherwise would have been able to realize, or both.

The impairment of other financial institutions could adversely affect us.

We have exposure to many different industries and counterparties, and routinely execute transactions with counterparties in the financial services industry, including brokers and dealers, insurance companies, commercial banks, investment banks, investment funds and other institutions. Many of these transactions expose us to credit risk in the event of default of our counterparty. In addition, with respect to secured and other transactions that provide for us to hold collateral posted by the counterparty, our credit risk may be exacerbated when the collateral we hold cannot be liquidated at prices sufficient to recover the full amount of our exposure. We also have exposure to these financial institutions in the form of unsecured debt instruments, derivative transactions and equity investments. There can be no assurance that any such losses or impairments to the carrying value of these assets would not materially and adversely affect our business and results of operations.

Our requirements to post collateral or make payments related to declines in market value of specified assets may expose us to counterparty risk and adversely affect our liquidity.

Some of our transactions with financial and other institutions specify the circumstances under which the parties are required to post collateral. The amount of collateral we may be required to post under these agreements may increase under certain circumstances, which could adversely affect our liquidity. In addition, under the terms of some of our transactions we may be required to make payment to our counterparties related to any decline in the market value of the specified assets.

Defaults on our mortgage loans and volatility in performance may adversely affect our profitability.

Our mortgage loans face default risk and are principally collateralized by commercial properties. Mortgage loans are stated on our balance sheet at unpaid principal balance, adjusted for any unamortized premium or discount, deferred fees

or expenses, and are net of valuation allowances. We establish valuation allowances for estimated impairments as of the balance sheet date. Such valuation allowances are based on the excess carrying value of the loan over the present value of expected future cash flows discounted at the loan's original effective interest rate, the value of the loan's collateral if the loan is in the process of foreclosure or otherwise collateral dependent, or the loan's market value if the loan is being sold. At December 31, 2008, we had valuation allowances of \$0.5 million related to our mortgage loans. The performance of our mortgage loan investments, however, may fluctuate in the future. An increase in the default rate of our mortgage loan investments could have a material adverse effect on our results of operations and financial condition.

Further, any geographic or sector concentration of our mortgage loans may have adverse effects on our investment portfolios and consequently on our consolidated results of operations or financial condition. While we seek to mitigate this risk by having a broadly diversified portfolio, events or developments that have a negative effect on any particular geographic region or sector may have a greater adverse effect on the investment portfolios to the extent that the portfolios are concentrated. Moreover, our ability to sell assets relating to such particular groups of related assets may be limited if other market participants are seeking to sell at the same time.

Our investments are reflected within the consolidated financial statements utilizing different accounting bases and accordingly we may not have recognized differences, which may be significant, between cost and fair value in our consolidated financial statements.

Our principal investments are in fixed maturity and equity securities, short-term investments, mortgage loans, policy loans, funds withheld at interest and other invested assets. The carrying value of such investments is as follows:

- Fixed maturity and equity securities are classified as available-for-sale and are reported at their estimated fair value. Unrealized investment gains and losses on these securities are recorded as a separate component of accumulated other comprehensive income or loss, net of related deferred acquisition costs and deferred income taxes.
- Short-term investments include investments with remaining maturities of one year or less, but greater than three months, at the time of acquisition and are stated at amortized cost, which approximates fair value.
- Mortgage and policy loans are stated at unpaid principal balance. Additionally, mortgage loans are adjusted for any unamortized premium or discount, deferred fees or expenses, net of valuation allowances.
- Funds withheld at interest represent amounts contractually withheld by ceding companies in accordance with reinsurance agreements. The value of the assets withheld and interest income are recorded in accordance with specific treaty terms.
- We primarily use the cost method of accounting for investments in real estate joint ventures and other limited partnership interests since we have a minor equity investment and virtually no influence over the joint ventures or the partnership's operations. These investments are reflected in other invested assets on the balance sheet.

Investments not carried at fair value in our consolidated financial statements — principally, mortgage loans, policy loans, real estate joint ventures, and other limited partnerships — may have fair values which are substantially higher or lower than the carrying value reflected in our consolidated financial statements. Each of such asset classes is regularly evaluated for impairment under the accounting guidance appropriate to the respective asset class.

Our valuation of fixed maturity and equity securities and derivatives include methodologies, estimations and assumptions which are subject to differing interpretations and could result in changes to investment valuations that may materially adversely affect our results of operations or financial condition.

Fixed maturity, equity securities and short-term investments which are reported at fair value on the consolidated balance sheet represent the majority of our total cash and invested assets. We have categorized these securities into a three-level hierarchy, based on the priority of the inputs to the respective valuation technique. The fair value hierarchy gives the highest priority to quoted prices in active markets for identical assets or liabilities (Level 1) and the lowest priority to unobservable inputs (Level 3). An asset or liability's classification within the fair value hierarchy is based on the lowest level of significant input to its valuation. For example, a Level 3 fair value measurement may include inputs that are observable (Levels 1 and 2) and unobservable (Level 3). Therefore, gains and losses for such assets and liabilities categorized within Level 3 may include changes in fair value that are attributable to both observable market inputs (Levels 1 and 2) and unobservable market inputs (Level 3).

The determination of fair values in the absence of quoted market prices is based on: (i) valuation methodologies; (ii) securities we deem to be comparable; and (iii) assumptions deemed appropriate given the circumstances. The fair value estimates are made at a specific point in time, based on available market information and judgments about financial

instruments, including estimates of the timing and amounts of expected future cash flows and the credit standing of the issuer or counterparty. Factors considered in estimating fair value include: coupon rate, maturity, estimated duration, call provisions, sinking fund requirements, credit rating, industry sector of the issuer, and quoted market prices of comparable securities. The use of different methodologies and assumptions may have a material effect on the estimated fair value amounts.

During periods of market disruption including periods of significantly rising or high interest rates, rapidly widening credit spreads or illiquidity, it may be difficult to value certain of our securities, for example alternative residential mortgage loan (“Alt-A”) securities and sub-prime mortgage-backed securities, if trading becomes less frequent and/or market data becomes less observable. There may be certain asset classes that were in active markets with significant observable data that become illiquid due to the current financial environment. In such cases, more securities may fall to Level 3 and thus require more subjectivity and management judgment. As such, valuations may include inputs and assumptions that are less observable or require greater estimation as well as valuation methods which are more sophisticated or require greater estimation thereby resulting in values which may be less than the value at which the investments may be ultimately sold. Further, rapidly changing and unprecedented credit and equity market conditions could materially impact the valuation of securities as reported within our consolidated financial statements and the period-to-period changes in value could vary significantly. Decreases in value may have a material adverse effect on our results of operations or financial condition.

The reported value of our relatively illiquid types of investments, our investments in the asset classes described in the paragraph above and, at times, our high quality, generally liquid asset classes, do not necessarily reflect the lowest current market price for the asset. If we were forced to sell certain of our assets in the current market, there can be no assurance that we will be able to sell them for the prices at which we have recorded them and we may be forced to sell them at significantly lower prices.

The determination of the amount of allowances and impairments taken on our investments is highly subjective and could materially impact our results of operations or financial position.

The determination of the amount of allowances and impairments vary by investment type and is based upon our periodic evaluation and assessment of known and inherent risks associated with the respective asset class. Such evaluations and assessments are revised as conditions change and new information becomes available. Management updates its evaluations regularly and reflects changes in allowances and impairments in operations as such evaluations are revised. There can be no assurance that our management has accurately assessed the level of impairments taken, allowances reflected in our financial statements and potential impact on regulatory capital. Furthermore, additional impairments may need to be taken or allowances provided for in the future. Historical trends may not be indicative of future impairments or allowances.

For example, the cost of our fixed maturity and equity securities is adjusted for impairments in value deemed to be other-than-temporary in the period in which the determination is made. The assessment of whether impairments have occurred is based on management’s case-by-case evaluation of the underlying reasons for the decline in fair value. Our management considers a wide range of factors about the security issuer and uses their best judgment in evaluating the cause of the decline in the estimated fair value of the security and in assessing the prospects for near-term recovery. Inherent in management’s evaluation of the security are assumptions and estimates about the operations of the issuer and its future earnings potential. Considerations in the impairment evaluation process include, but are not limited to: (i) the length of time and the extent to which the market value has been below cost or amortized cost; (ii) the potential for impairments of securities when the issuer is experiencing significant financial difficulties; (iii) the potential for impairments in an entire industry sector or sub-sector; (iv) the potential for impairments in certain economically depressed geographic locations; (v) the potential for impairments of securities where the issuer, series of issuers or industry has suffered a catastrophic type of loss or has exhausted natural resources; (vi) our ability and intent to hold the security for a period of time sufficient to allow for the recovery of its value to an amount equal to or greater than cost or amortized cost; (vii) unfavorable changes in forecasted cash flows on mortgage-backed and asset-backed securities; and (viii) other subjective factors, including concentrations and information obtained from regulators and rating agencies.

Defaults, downgrades or other events impairing the value of our fixed maturity securities portfolio may reduce our earnings.

We are subject to the risk that the issuers, or guarantors, of fixed maturity securities we own may default on principal and interest payments they owe us. At December 31, 2008, the fixed maturity securities of \$8.5 billion in our investment portfolio represented 52% of our total cash and invested assets. The occurrence of a major economic downturn (such as the current downturn in the economy), acts of corporate malfeasance, widening risk spreads, or other events that adversely affect the issuers or guarantors of these securities could cause the value of our fixed maturity securities portfolio

and our net income to decline and the default rate of the fixed maturity securities in our investment portfolio to increase. A ratings downgrade affecting issuers or guarantors of particular securities, or similar trends that could worsen the credit quality of issuers, such as the corporate issuers of securities in our investment portfolio, could also have a similar effect. With economic uncertainty, credit quality of issuers or guarantors could be adversely affected. Any event reducing the value of these securities other than on a temporary basis could have a material adverse effect on our business, results of operations and financial condition. Levels of write down or impairment are affected by our assessment of the intent and ability to hold securities which have declined in value until recovery. If we determine to reposition or realign portions of the portfolio where we determine not to hold certain securities in an unrealized loss position to recovery, then we will incur an other-than-temporary impairment.

A downgrade in our ratings or in the ratings of our reinsurance subsidiaries could adversely affect our ability to compete.

Ratings are an important factor in our competitive position. Rating organizations periodically review the financial performance and condition of insurers, including our reinsurance subsidiaries. These ratings are based on an insurance company's ability to pay its obligations and are not directed toward the protection of investors. Rating organizations assign ratings based upon several factors. While most of the factors considered relate to the rated company, some of the factors relate to general economic conditions and circumstances outside the rated company's control. The various rating agencies periodically review and evaluate our capital adequacy in accordance with their established guidelines and capital models. In order to maintain our existing ratings, we may commit from time to time to manage our capital at levels commensurate with such guidelines and models. If our capital levels are insufficient to fulfill any such commitments, we could be required to reduce our risk profile by, for example, retroceding some of our business or by raising additional capital by issuing debt, hybrid, or equity securities. Any such actions could have a material adverse impact on our earnings or materially dilute our shareholders' equity ownership interests.

Any downgrade in the ratings of our reinsurance subsidiaries could adversely affect their ability to sell products, retain existing business, and compete for attractive acquisition opportunities. Ratings are subject to revision or withdrawal at any time by the assigning rating organization. A rating is not a recommendation to buy, sell or hold securities, and each rating should be evaluated independently of any other rating. We believe that the rating agencies consider the ratings of a parent company when assigning a rating to a subsidiary of that company. The ability of our subsidiaries to write reinsurance partially depends on their financial condition and is influenced by their ratings. In addition, a significant downgrade in the rating or outlook of RGA, among other factors, could adversely affect our ability to raise and then contribute capital to our subsidiaries for the purpose of facilitating their operations and growth. A significant downgrade could increase our own cost of capital. For example, the facility fee and interest rate for our credit facilities are based on our senior long-term debt ratings. A decrease in those ratings could result in an increase in costs for the credit facilities. Accordingly, we believe a ratings downgrade of RGA, or of our affiliates, could have a negative effect on our ability to conduct business.

We cannot assure you that actions taken by our ratings agencies would not result in a material adverse effect on our business and results of operations. In addition, it is unclear what effect, if any, a ratings change would have on the price of our securities in the secondary market.

We make assumptions when pricing our products relating to mortality, morbidity, lapsation and expenses, and significant deviations in experience could negatively affect our financial results.

Our reinsurance contracts expose us to mortality risk, which is the risk that the level of death claims may differ from that which we assumed in pricing our life, critical illness and annuity reinsurance contracts. Some of our reinsurance contracts expose us to morbidity risk, which is the risk that an insured person will become critically ill or disabled. Our risk analysis and underwriting processes are designed with the objective of controlling the quality of the business and establishing appropriate pricing for the risks we assume. Among other things, these processes rely heavily on our underwriting, our analysis of mortality and morbidity trends, lapse rates, expenses and our understanding of medical impairments and their effect on mortality or morbidity.

We expect mortality, morbidity and lapse experience to fluctuate somewhat from period to period, but believe they should remain fairly constant over the long term. Mortality, morbidity or lapse experience that is less favorable than the mortality, morbidity or lapse rates that we used in pricing a reinsurance agreement will negatively affect our net income because the premiums we receive for the risks we assume may not be sufficient to cover the claims and profit margin. Furthermore, even if the total benefits paid over the life of the contract do not exceed the expected amount, unexpected increases in the incidence of deaths or illness can cause us to pay more benefits in a given reporting period than expected,

adversely affecting our net income in any particular reporting period. Likewise, adverse experience could impair our ability to offset certain unamortized deferred acquisition costs and adversely affect our net income in any particular reporting period.

RGA is an insurance holding company, and our ability to pay principal, interest and/or dividends on securities is limited.

RGA is an insurance holding company, with our principal assets consisting of the stock of our reinsurance company subsidiaries, and substantially all of our income is derived from those subsidiaries. Our ability to pay principal and interest on any debt securities or dividends on any preferred or common stock depends in part on the ability of our reinsurance company subsidiaries, our principal sources of cash flow, to declare and distribute dividends or to advance money to RGA. We are not permitted to pay common stock dividends or make payments of interest or principal on securities which rank equal or junior to our subordinated debentures, until we pay any accrued and unpaid interest on our subordinated debentures. Our reinsurance company subsidiaries are subject to various statutory and regulatory restrictions, applicable to insurance companies generally, that limit the amount of cash dividends, loans and advances that those subsidiaries may pay to us. Covenants contained in some of our debt agreements and regulations relating to capital requirements affecting some of our more significant subsidiaries also restrict the ability of certain subsidiaries to pay dividends and other distributions and make loans to us. In addition, we cannot assure you that more stringent dividend restrictions will not be adopted, as discussed below under “—Our reinsurance subsidiaries are highly regulated, and changes in these regulations could negatively affect our business.”

As a result of our insurance holding company structure, in the event of the insolvency, liquidation, reorganization, dissolution or other winding-up of one of our reinsurance subsidiaries, all creditors of that subsidiary would be entitled to payment in full out of the assets of such subsidiary before we, as shareholder, would be entitled to any payment. Our subsidiaries would have to pay their direct creditors in full before our creditors, including holders of any class of common stock, preferred stock or debt securities of RGA, could receive any payment from the assets of such subsidiaries.

If our investment strategy is unsuccessful, we could suffer losses.

The success of our investment strategy is crucial to the success of our business. In particular, we structure our investments to match our anticipated liabilities under reinsurance treaties to the extent we believe necessary. If our calculations with respect to these reinsurance liabilities are incorrect, or if we improperly structure our investments to match such liabilities, we could be forced to liquidate investments prior to maturity at a significant loss.

Our investment guidelines also permit us to invest up to 10% of our investment portfolio in non-investment grade fixed maturity securities. While any investment carries some risk, the risks associated with lower-rated securities are greater than the risks associated with investment grade securities. The risk of loss of principal or interest through default is greater because lower-rated securities are usually unsecured and are often subordinated to an issuer’s other obligations. Additionally, the issuers of these securities frequently have high debt levels and are thus more sensitive to difficult economic conditions, individual corporate developments and rising interest rates which could impair an issuer’s capacity or willingness to meet its financial commitment on such lower-rated securities. As a result, the market price of these securities may be quite volatile, and the risk of loss is greater.

The success of any investment activity is affected by general economic conditions, which may adversely affect the markets for interest-rate-sensitive securities and equity securities, including the level and volatility of interest rates and the extent and timing of investor participation in such markets. Unexpected volatility or illiquidity in the markets in which we directly or indirectly hold positions could adversely affect us.

Interest rate fluctuations could negatively affect the income we derive from the difference between the interest rates we earn on our investments and interest we pay under our reinsurance contracts.

Significant changes in interest rates expose reinsurance companies to the risk of reduced investment income or actual losses based on the difference between the interest rates earned on investments and the credited interest rates paid on outstanding reinsurance contracts. Both rising and declining interest rates can negatively affect the income we derive from these interest rate spreads. During periods of rising interest rates, we may be contractually obligated to increase the crediting rates on our reinsurance contracts that have cash values. However, we may not have the ability to immediately acquire investments with interest rates sufficient to offset the increased crediting rates on our reinsurance contracts. During periods of falling interest rates, our investment earnings will be lower because new investments in fixed maturity securities will likely bear lower interest rates. We may not be able to fully offset the decline in investment earnings with lower crediting rates on underlying annuity products related to certain of our reinsurance contracts. While we develop and maintain asset/liability

management programs and procedures designed to reduce the volatility of our income when interest rates are rising or falling, we cannot assure you that changes in interest rates will not affect our interest rate spreads.

Changes in interest rates may also affect our business in other ways. Lower interest rates may result in lower sales of certain insurance and investment products of our customers, which would reduce the demand for our reinsurance of these products.

The availability and cost of collateral, including letters of credit, asset trusts and other credit facilities, could adversely affect our operations and financial condition.

Regulatory reserve requirements in various jurisdictions in which we operate may be significantly higher than the reserves required under GAAP. Accordingly, we reinsure, or retrocede, business to affiliated and unaffiliated reinsurers to reduce the amount of regulatory reserves and capital we are required to hold in certain jurisdictions. A regulation in the U.S., commonly referred to as Regulation XXX, has significantly increased the level of regulatory, or statutory, reserves that U.S. life insurance and life reinsurance companies must hold on their statutory financial statements for various types of life insurance business, primarily certain level term life products. The reserve levels required under Regulation XXX increase over time and are normally in excess of reserves required under GAAP. The degree to which these reserves will increase and the ultimate level of reserves will depend upon the mix of our business and future production levels in the United States. Based on the assumed rate of growth in our current business plan, and the increasing level of regulatory reserves associated with some of this business, we expect the amount of required regulatory reserves to grow significantly.

In order to reduce the effect of Regulation XXX, our principal U.S. operating subsidiary, RGA Reinsurance, has retroceded Regulation XXX-related reserves to affiliated and unaffiliated reinsurers. Additionally, some of our reinsurance subsidiaries in other jurisdictions enter into various reinsurance arrangements with affiliated and unaffiliated reinsurers from time to time in order to reduce their statutory capital and reserve requirements. As a general matter, for us to reduce regulatory reserves on business that we retrocede, the affiliated or unaffiliated reinsurer must provide an equal amount of collateral. Such collateral may be provided through a capital markets securitization, in the form of a letter of credit from a commercial bank or through the placement of assets in trust for our benefit.

In connection with these reserve requirements, we face the following risks:

- The availability of collateral and the related cost of such collateral in the future could affect the type and volume of business we reinsure and could increase our costs.
- We may need to raise additional capital to support higher regulatory reserves, which could increase our overall cost of capital.
- If we, or our retrocessionaires, are unable to obtain or provide sufficient collateral to support our statutory ceded reserves, we may be required to increase regulatory reserves. In turn, this reserve increase could significantly reduce our statutory capital levels and adversely affect our ability to satisfy required regulatory capital levels that apply to us, unless we are able to raise additional capital to contribute to our operating subsidiaries.
- Because term life insurance is a particularly price-sensitive product, any increase in insurance premiums charged on these products by life insurance companies, in order to compensate them for the increased statutory reserve requirements or higher costs of insurance they face, may result in a significant loss of volume in their life insurance operations, which could, in turn, adversely affect our life reinsurance operations.

We cannot assure you that we will be able to implement actions to mitigate the effect of increasing regulatory reserve requirements.

We could be forced to sell investments at a loss to cover policyholder withdrawals, recaptures of reinsurance treaties or other events.

Some of the products offered by our insurance company customers allow policyholders and contract holders to withdraw their funds under defined circumstances. Our reinsurance subsidiaries manage their liabilities and configure their investment portfolios so as to provide and maintain sufficient liquidity to support anticipated withdrawal demands and contract benefits and maturities under reinsurance treaties with these customers. While our reinsurance subsidiaries own a significant amount of liquid assets, a portion of their assets are relatively illiquid. Unanticipated withdrawal or surrender activity could, under some circumstances, require our reinsurance subsidiaries to dispose of assets on unfavorable terms, which could have an adverse effect on us. Reinsurance agreements may provide for recapture rights on the part of our insurance company customers. Recapture rights permit these customers to reassume all or a portion of the risk formerly ceded to us after an agreed upon time, usually ten years, subject to various conditions.

Recapture of business previously ceded does not affect premiums ceded prior to the recapture, but may result in immediate payments to our insurance company customers and a charge for costs that we deferred when we acquired the business but are unable to recover upon recapture. Under some circumstances, payments to our insurance company customers could require our reinsurance subsidiaries to dispose of assets on unfavorable terms.

Changes in the equity markets, interest rates and/or volatility affects the profitability of variable annuities with guaranteed living benefits that we reinsure; therefore, such changes may have a material adverse effect on our business and profitability.

We reinsure variable annuity products that include guaranteed minimum living benefits. These include guaranteed minimum withdrawal benefits (“GMWB”), guaranteed minimum accumulation benefits (“GMAB”) and guaranteed minimum income benefits (“GMIB”). The amount of reserves related to these benefits is based on their fair value and is affected by changes in equity markets, interest rates and volatility. Accordingly, strong equity markets, increases in interest rates and decreases in volatility will generally decrease the fair value of the liabilities underlying the benefits.

Conversely, a decrease in the equity markets along with a decrease in interest rates and an increase in volatility will generally result in an increase in the fair value of the liabilities underlying the benefits, which has the effect of increasing the amount of reserves that we must carry. Such an increase in reserves would result in a charge to our earnings in the quarter in which we increase our reserves. We maintain a customized dynamic hedge program that is designed to mitigate the risks associated with income volatility around the change in reserves on guaranteed benefits. However, the hedge positions may not be effective to exactly offset the changes in the carrying value of the guarantees due to, among other things, the time lag between changes in their values and corresponding changes in the hedge positions, high levels of volatility in the equity markets and derivatives markets, extreme swings in interest rates, contract holder behavior different than expected, and divergence between the performance of the underlying funds and hedging indices. We also must consider our own credit spreads, which are not hedged, in the valuation of certain of these liabilities. A decrease in our own credit spread could cause the value of these liabilities to increase, resulting in a reduction to net income. These factors, individually or collectively, may have a material adverse effect on our net income, financial condition or liquidity.

We are exposed to foreign currency risk.

We are a multi-national company with operations in numerous countries and, as a result, are exposed to foreign currency risk to the extent that exchange rates of foreign currencies are subject to adverse change over time. The U.S. dollar value of our net investments in foreign operations, our foreign currency transaction settlements and the periodic conversion of the foreign-denominated earnings to U.S. dollars (our reporting currency) are each subject to adverse foreign exchange rate movements. Approximately 43% of our revenues and 32% of our fixed maturity securities available for sale were denominated in currencies other than the U.S. dollar as of and for the year ended December 31, 2008.

We depend on the performance of others, and their failure to perform in a satisfactory manner would negatively affect us.

In the normal course of business, we seek to limit our exposure to losses from our reinsurance contracts by ceding a portion of the reinsurance to other insurance enterprises or retrocessionaires. We cannot assure you that these insurance enterprises or retrocessionaires will be able to fulfill their obligations to us. As of December 31, 2008, the reinsurers participating in our retrocession facilities that have been reviewed by A.M. Best Company, were rated “A-”, the fourth highest rating out of fifteen possible ratings, or better. We are also subject to the risk that our clients will be unable to fulfill their obligations to us under our reinsurance agreements with them.

We rely upon our insurance company clients to provide timely, accurate information. We may experience volatility in our earnings as a result of erroneous or untimely reporting from our clients. We work closely with our clients and monitor their reporting to minimize this risk. We also rely on original underwriting decisions made by our clients. We cannot assure you that these processes or those of our clients will adequately control business quality or establish appropriate pricing.

For some reinsurance agreements, the ceding company withholds and legally owns and manages assets equal to the net statutory reserves, and we reflect these assets as funds withheld at interest on our balance sheet. In the event that a ceding company were to become insolvent, we would need to assert a claim on the assets supporting our reserve liabilities. We attempt to mitigate our risk of loss by offsetting amounts for claims or allowances that we owe the ceding company with amounts that the ceding company owes to us. We are subject to the investment performance on the withheld assets, although we do not directly control them. We help to set, and monitor compliance with, the investment guidelines followed by these ceding companies. However, to the extent that such investment guidelines are not appropriate, or to the extent that the ceding companies do not adhere to such guidelines, our risk of loss could increase, which could materially adversely affect our

financial condition and results of operations. During 2008, interest earned on funds withheld represented 3.1% of our consolidated revenues. Funds withheld at interest totaled \$4.5 billion at December 31, 2008 and \$4.7 billion as of December 31, 2007.

We use the services of third-party investment managers to manage certain assets where our investment management expertise is limited. We rely on these investment managers to provide investment advice and execute investment transactions that are within our investment policy guidelines. Poor performance on the part of our outside investment managers could negatively affect our financial performance.

As with all financial services companies, our ability to conduct business depends on consumer confidence in the industry and our financial strength. Actions of competitors, and financial difficulties of other companies in the industry, and related adverse publicity, could undermine consumer confidence and harm our reputation.

Natural and man-made disasters, catastrophes, and events, including the threat of terrorist attacks, epidemics and pandemics, may adversely affect our business and results of operations.

Natural disasters and terrorist attacks, as well as epidemics and pandemics, can adversely affect our business and results of operations because they accelerate mortality and morbidity risk. Terrorist attacks on the United States and in other parts of the world and the threat of future attacks could have a negative effect on our business.

We believe our reinsurance programs are sufficient to reasonably limit our net losses for individual life claims relating to potential future natural disasters and terrorist attacks. However, the consequences of further natural disasters, terrorist attacks, armed conflicts, epidemics and pandemics are unpredictable, and we may not be able to foresee events that could have an adverse effect on our business.

We operate in a competitive industry which could adversely affect our market share.

The reinsurance industry is highly competitive, and we encounter significant competition in all lines of business from other reinsurance companies, as well as competition from other providers of financial services. Our competitors vary by geographic market. We believe our primary competitors in the North American life reinsurance market are currently the following, or their affiliates: Transamerica Occidental Life Insurance Company, a subsidiary of Aegon, N.V., Swiss Re Life and Munich Reinsurance Company. We believe our primary competitors in the international life reinsurance markets are Swiss Re Life and Health Ltd., General Re, Munich Reinsurance Company, Hannover Reinsurance and SCOR Global Reinsurance. Many of our competitors have greater financial resources than we do. Our ability to compete depends on, among other things, our ability to maintain strong financial strength ratings from rating agencies, pricing and other terms and conditions of reinsurance agreements, and our reputation, service, and experience in the types of business that we underwrite. However, competition from other reinsurers could adversely affect our competitive position.

Our target market is generally large life insurers. We compete based on the strength of our underwriting operations, insights on mortality trends based on our large book of business, and responsive service. We believe our quick response time to client requests for individual underwriting quotes and our underwriting expertise are important elements to our strategy and lead to other business opportunities with our clients. Our business will be adversely affected if we are unable to maintain these competitive advantages or if our international strategy is not successful.

Tax law changes or a prolonged economic downturn could reduce the demand for insurance products, which could adversely affect our business.

Under the Internal Revenue Code, income tax payable by policyholders on investment earnings is deferred during the accumulation period of some life insurance and annuity products. To the extent that the Internal Revenue Code is revised to reduce the tax-deferred status of life insurance and annuity products, or to increase the tax-deferred status of competing products, all life insurance companies would be adversely affected with respect to their ability to sell such products, and, depending on grandfathering provisions, by the surrenders of existing annuity contracts and life insurance policies. In addition, life insurance products are often used to fund estate tax obligations. Congress has adopted legislation to reduce, and ultimately eliminate, the estate tax. Under this legislation, our U.S. life insurance company customers could face reduced demand for some of their life insurance products, which in turn could negatively affect our reinsurance business. We cannot predict what future tax initiatives may be proposed and enacted that could affect us.

In addition, a general economic downturn or a downturn in the equity and other capital markets could adversely affect the market for many annuity and life insurance products. Because we obtain substantially all of our revenues through reinsurance arrangements that cover a portfolio of life insurance products, as well as annuities, our business would be harmed

if the market for annuities or life insurance was adversely affected. In addition, the market for annuity reinsurance products is currently not well developed, and we cannot assure you that such market will develop in the future.

Our reinsurance subsidiaries are highly regulated, and changes in these regulations could negatively affect our business.

Our reinsurance subsidiaries are subject to government regulation in each of the jurisdictions in which they are licensed or authorized to do business. Governmental agencies have broad administrative power to regulate many aspects of the insurance business, which may include premium rates, marketing practices, advertising, policy forms, and capital adequacy. These agencies are concerned primarily with the protection of policyholders rather than shareholders or holders of debt securities. Moreover, insurance laws and regulations, among other things, establish minimum capital requirements and limit the amount of dividends, tax distributions, and other payments our reinsurance subsidiaries can make without prior regulatory approval, and impose restrictions on the amount and type of investments we may hold. The State of Missouri also regulates RGA as an insurance holding company.

Recently, insurance regulators have increased their scrutiny of the insurance regulatory framework in the United States and some state legislatures have considered or enacted laws that alter, and in many cases increase, state authority to regulate insurance holding companies and insurance companies. In light of recent legislative developments, the National Association of Insurance Commissioners, or “NAIC”, and state insurance regulators have begun re-examining existing laws and regulations, specifically focusing on insurance company investments and solvency issues, guidelines imposing minimum capital requirements based on business levels and asset mix, interpretations of existing laws, the development of new laws, the implementation of non-statutory guidelines, and the definition of extraordinary dividends, including a more stringent standard for allowance of extraordinary dividends. We are unable to predict whether, when or in what form the State of Missouri will enact a new measure for extraordinary dividends, and we cannot assure you that more stringent restrictions will not be adopted from time to time in other jurisdictions in which our reinsurance subsidiaries are domiciled, which could, under certain circumstances, significantly reduce dividends or other amounts payable to us by our subsidiaries unless they obtain approval from insurance regulatory authorities. We cannot predict the effect that any NAIC recommendations or proposed or future legislation or rule-making in the United States or elsewhere may have on our financial condition or operations.

Acquisitions and significant transactions involve varying degrees of risk that could affect our profitability.

We have made, and may in the future make, strategic acquisitions, either of selected blocks of business or other companies. Acquisitions may expose us to operational challenges and various risks, including:

- the ability to integrate the acquired business operations and data with our systems;
- the availability of funding sufficient to meet increased capital needs;
- the ability to fund cash flow shortages that may occur if anticipated revenues are not realized or are delayed, whether by general economic or market conditions or unforeseen internal difficulties; and
- the possibility that the value of investments acquired in an acquisition, may be lower than expected or may diminish due to credit defaults or changes in interest rates and that liabilities assumed may be greater than expected (due to, among other factors, less favorable than expected mortality or morbidity experience).

A failure to successfully manage the operational challenges and risks associated with or resulting from significant transactions, including acquisitions, could adversely affect our financial condition or results of operations.

Our international operations involve inherent risks.

In 2008, approximately 31.9% of our net premiums and \$151.2 million of income from continuing operations before income taxes came from our operations in Europe & South Africa and Asia Pacific. One of our strategies is to grow these international operations. International operations subject us to various inherent risks. In addition to the regulatory and foreign currency risks identified above, other risks include the following:

- managing the growth of these operations effectively, particularly given the recent rates of growth;
- changes in mortality and morbidity experience and the supply and demand for our products that are specific to these markets and that may be difficult to anticipate;
- political and economic instability in the regions of the world where we operate;
- uncertainty arising out of foreign government sovereignty over our international operations; and
- potentially uncertain or adverse tax consequences, including the repatriation of earnings from our non-U.S. subsidiaries.

We cannot assure you that we will be able to manage these risks effectively or that they will not have an adverse effect on our business, financial condition or results of operations.

Unanticipated events in our disaster recovery systems and management continuity planning could impair our ability to conduct business.

In the event of a disaster such as a natural catastrophe, an industrial accident, a blackout, a computer virus, a terrorist attack or war, unanticipated problems with our disaster recovery systems could have a material adverse impact on our ability to conduct business and on our results of operations and financial position, particularly if those problems affect our computer-based data processing, transmission, storage and retrieval systems and destroy valuable data. We depend heavily upon computer systems to provide reliable service, data and reports. Despite our implementation of a variety of security measures, our servers could be subject to physical and electronic break-ins, and similar disruptions from unauthorized tampering with our computer systems. In addition, in the event that a significant number of our managers were unavailable in the event of a disaster, our ability to effectively conduct business could be severely compromised. These interruptions also may interfere with our clients' ability to provide data and other information and our employees' ability to perform their job responsibilities.

Risks Related to Ownership of Our Common Stock

We may not pay dividends on our common stock.

Our shareholders may not receive future dividends. Historically, we have paid quarterly dividends ranging from \$0.027 per share in 1993 to \$0.09 per share in 2008. All future payments of dividends, however, are at the discretion of our board of directors and will depend on our earnings, capital requirements, insurance regulatory conditions, operating conditions, and such other factors as our board of directors may deem relevant. The amount of dividends that we can pay will depend in part on the operations of our reinsurance subsidiaries. Under certain circumstances, we may be contractually prohibited from paying dividends on our common stock due to restrictions in certain debt and trust preferred securities.

RGA's anti-takeover provisions may delay or prevent a change in control of RGA, which could adversely affect the price of our common stock.

Certain provisions in our articles of incorporation and bylaws, as well as Missouri law, may delay or prevent a change of control of RGA, which could adversely affect the price of our common stock. Our articles of incorporation and bylaws contain some provisions that may make the acquisition of control of RGA without the approval of our board of directors more difficult, including provisions relating to the nomination, election and removal of directors, the structure of the board of directors and limitations on actions by our shareholders. In addition, Missouri law also imposes some restrictions on mergers and other business combinations between RGA and holders of 20% or more of our outstanding common stock.

Furthermore, our articles of incorporation are intended to limit stock ownership of RGA stock (other than shares acquired through the divestiture by MetLife or other exempted transactions) to less than 5% of the value of the aggregate outstanding shares of RGA stock during the restriction period. We have also adopted a Section 382 shareholder rights plan designed to deter shareholders from becoming a "5-percent shareholder" (as defined by Section 382 of the Internal Revenue Code and the related Treasury regulations) without the approval of our board of directors.

These provisions may have unintended anti-takeover effects. These provisions of our articles of incorporation and bylaws and Missouri law may delay or prevent a change in control of RGA, which could adversely affect the price of our common stock.

Applicable insurance laws may make it difficult to effect a change of control of RGA.

Before a person can acquire control of a U.S. insurance company, prior written approval must be obtained from the insurance commission of the state where the domestic insurer is domiciled. Missouri insurance laws and regulations provide that no person may acquire control of us, and thus indirect control of our Missouri reinsurance subsidiaries, including RGA Reinsurance Company, unless:

- such person has provided certain required information to the Missouri Department of Insurance; and
- such acquisition is approved by the Director of Insurance of the State of Missouri, whom we refer to as the Missouri Director of Insurance, after a public hearing.

Under Missouri insurance laws and regulations, any person acquiring 10% or more of the outstanding voting securities of a corporation, such as our common stock, is presumed to have acquired control of that corporation and its subsidiaries.

Canadian federal insurance laws and regulations provide that no person may directly or indirectly acquire “control” of or a “significant interest” in our Canadian insurance subsidiary, RGA Life Reinsurance Company of Canada, unless:

- such person has provided information, material and evidence to the Canadian Superintendent of Financial Institutions as required by him, and
- such acquisition is approved by the Canadian Minister of Finance.

For this purpose, “significant interest” means the direct or indirect beneficial ownership by a person, or group of persons acting in concert, of shares representing 10% or more of a given class, and “control” of an insurance company exists when:

- a person, or group of persons acting in concert, beneficially owns or controls an entity that beneficially owns securities, such as our common stock, representing more than 50% of the votes entitled to be cast for the election of directors and such votes are sufficient to elect a majority of the directors of the insurance company, or
- a person has any direct or indirect influence that would result in control in fact of an insurance company.

Prior to granting approval of an application to directly or indirectly acquire control of a domestic or foreign insurer, an insurance regulator may consider such factors as the financial strength of the applicant, the integrity of the applicant’s board of directors and executive officers, the applicant’s plans for the future operations of the domestic insurer and any anti-competitive results that may arise from the consummation of the acquisition of control.

Future stock sales, including sales by any selling shareholders, may dilute the value or affect the price of our common stock.

Our board of directors has the authority, without action or vote of the shareholders, to issue any or all authorized but unissued shares of our common stock, including securities convertible into or exchangeable for our common stock and authorized but unissued shares under our stock option and other equity compensation plans. In the future, we may issue such additional securities, through public or private offerings, in order to raise additional capital. Any such issuance will dilute the percentage ownership of shareholders and may dilute the per share projected earnings or book value of the common stock. In addition, option holders may exercise their options at any time when we would otherwise be able to obtain additional equity capital on more favorable terms.

MetLife retained an approximate 4.1% interest in RGA through the retention of 3,000,000 shares of common stock, and agreed that it will sell, exchange or otherwise dispose of its remaining recently acquired stock by September 12, 2013. Any disposition by MetLife of its remaining shares of common stock could result in a substantial amount of RGA equity securities entering the market, which may adversely affect the price of such common stock.

The price of our common stock may fluctuate significantly.

The overall market and the price of our common stock may continue to fluctuate as a result of many factors in addition to those discussed in the preceding risk factors. These factors, some or all of which are beyond our control, include:

- actual or anticipated fluctuations in our operating results;
- changes in expectations as to our future financial performance or changes in financial estimates of securities analysts;
- success of our operating and growth strategies;
- investor anticipation of strategic and technological threats, whether or not warranted by actual events;
- operating and stock price performance of other comparable companies; and
- realization of any of the risks described in these risk factors or those set forth in any subsequent Annual Report on Form 10-K or Quarterly Reports on Form 10-Q.

In addition, the stock market has historically experienced volatility that often has been unrelated or disproportionate to the operating performance of particular companies. These broad market and industry fluctuations may adversely affect the trading price of our common stock, regardless of our actual operating performance.

Certain provisions in our agreement with MetLife relating to the tax-free distribution, or “split-off”, could result in potentially significant limitations on our ability to execute certain aspects of our business plan and could potentially result in significant tax-related liabilities.

In connection with the split-off of our capital stock by MetLife, RGA agreed to certain tax-related restrictions and indemnities set forth in our recapitalization and distribution agreement with MetLife dated as of June 1, 2008. Under that agreement, we may be restricted or deterred from (i) redeeming or purchasing our stock in excess of certain agreed-upon amounts, (ii) issuing any equity securities in excess of certain agreed upon amounts, or (iii) taking any other action that would be inconsistent with the representations and warranties made in connection with the IRS ruling and the tax opinion (as those terms are defined in the agreement). Except in specified circumstances, we have agreed to indemnify MetLife for taxes and tax-related losses it incurs as a result of the divestiture failing to qualify as tax-free, if the taxes and related losses are attributable solely to any breach of, or inaccuracy in, any representation, covenant or obligation of RGA under the recapitalization and distribution agreement or that will be made in connection with the tax opinion. This indemnity could result in significant liabilities to RGA.

The acquisition restrictions contained in our articles of incorporation and our Section 382 shareholder rights plan, which are intended to help preserve RGA and its subsidiaries’ net operating losses (“NOLs”) and other tax attributes, may not be effective or may have unintended negative effects.

We have recognized and may continue to recognize substantial NOLs, and other tax attributes, for U.S. federal income tax purposes, and under the Internal Revenue Code, we may “carry forward” these NOLs, in certain circumstances to offset any current and future taxable income and thus reduce our federal income tax liability, subject to certain requirements and restrictions. To the extent that the NOLs do not otherwise become limited, we believe that we will be able to carry forward a substantial amount of NOLs and, therefore, these NOLs are a substantial asset to RGA. However, if RGA and its subsidiaries experience an “ownership change,” as defined in Section 382 of the Internal Revenue Code and related Treasury regulations, their ability to use the NOLs could be substantially limited, and the timing of the usage of the NOLs could be substantially delayed, which consequently could significantly impair the value of that asset.

To reduce the likelihood of an ownership change, in light of MetLife’s recent divestiture of most of its RGA stock, we have established acquisition restrictions in our articles of incorporation and our board of directors adopted a Section 382 shareholder rights plan. The Section 382 shareholder rights plan is designed to protect shareholder value by attempting to protect against a limitation on the ability of RGA and its subsidiaries to use their existing NOLs and other tax attributes. The acquisition restrictions in our articles of incorporation are also intended to restrict certain acquisitions of RGA stock to help preserve the ability of RGA and its subsidiaries to utilize their NOLs and other tax attributes by avoiding the limitations imposed by Section 382 of the Internal Revenue Code and the related Treasury regulations. The acquisition restrictions and the Section 382 shareholder rights plan are generally designed to restrict or deter direct and indirect acquisitions of RGA stock if such acquisition would result in an RGA shareholder becoming a 5-percent shareholder or increase the percentage ownership of RGA stock that is treated as owned by an existing 5-percent shareholder.

Although the acquisition restrictions and the Section 382 shareholder rights plan are intended to reduce the likelihood of an ownership change that could adversely affect RGA and its subsidiaries, we can give no assurance that such restrictions would prevent all transfers that could result in such an ownership change. In particular, we have been advised by our counsel that, absent a court determination, there can be no assurance that the acquisition restrictions will be enforceable against all of the RGA shareholders, and that they may be subject to challenge on equitable grounds. In particular, it is possible that the acquisition restrictions may not be enforceable against the RGA shareholders who voted against or abstained from voting on the restrictions at our recent special meeting of shareholders or who do not have notice of the restrictions at the time when they subsequently acquire their shares.

Under certain circumstances, our board of directors may determine it is in the best interest of RGA and its shareholders to exempt certain 5-percent shareholders from the operation of the Section 382 shareholder rights plan, in light of the provisions of the recapitalization and distribution agreement. After the split-off by MetLife, we may, under certain circumstances, incur significant indemnification obligations under the recapitalization and distribution agreement in the event that the Section 382 shareholder rights plan is triggered following the split-off in a manner that would result in MetLife’s divestiture failing to qualify as tax-free. Accordingly, our board of directors may determine that the consequences of enforcing the Section 382 shareholder rights plan and enhancing its deterrent effect by not exempting a 5-percent shareholder in order to provide protection to RGA’s and its subsidiaries’ NOLs and other tax attributes, are more adverse to RGA and its shareholders.

The acquisition restrictions and Section 382 shareholder rights plan also require any person attempting to become a holder of 5% or more (by value) of RGA stock, as determined under the Internal Revenue Code, to seek the approval of our board of directors. This may have an unintended “anti-takeover” effect because our board of directors may be able to prevent any future takeover. Similarly, any limits on the amount of stock that a shareholder may own could have the effect of making it more difficult for shareholders to replace current management. Additionally, because the acquisition restrictions and Section 382 shareholder rights plan have the effect of restricting a shareholder’s ability to dispose of or acquire RGA stock, the liquidity and market value of RGA stock might suffer. The acquisition restrictions and the Section 382 shareholder rights plan will remain in effect for the “restriction period,” which is until the earlier of (a) September 13, 2011, or (b) such other date as our board of directors in good faith determines they are no longer in the best interests of RGA and its shareholders. The acquisition restrictions may be waived by our board of directors. Shareholders are advised to monitor carefully their ownership of RGA stock and consult their own legal advisors and/or RGA to determine whether their ownership of RGA stock approaches the proscribed level.

The occurrence of various events may adversely affect the ability of RGA and its subsidiaries to fully utilize NOLs and other tax attributes.

RGA and its subsidiaries have a substantial amount of NOLs and other tax attributes, for U.S. federal income tax purposes, that are available both currently and in the future to offset taxable income and gains. Events outside of our control may cause RGA (and, consequently, its subsidiaries) to experience an “ownership change” under Section 382 of the Internal Revenue Code and the related Treasury regulations, and limit the ability of RGA and its subsidiaries to utilize fully such NOLs and other tax attributes. Moreover, the MetLife split-off increased the likelihood of RGA experiencing such an ownership change.

In general, an ownership change occurs when, as of any testing date, the percentage of stock of a corporation owned by one or more “5-percent shareholders,” as defined in the Internal Revenue Code and the related Treasury regulations, has increased by more than 50 percentage points over the lowest percentage of stock of the corporation owned by such shareholders at any time during the three-year period preceding such date. In general, persons who own 5% or more (by value) of a corporation’s stock are 5-percent shareholders, and all other persons who own less than 5% (by value) of a corporation’s stock are treated, together, as a single, public group 5-percent shareholder, regardless of whether they own an aggregate of 5% or more (by value) of a corporation’s stock. If a corporation experiences an ownership change, it is generally subject to an annual limitation, which limits its ability to use its NOLs and other tax attributes to an amount equal to the equity value of the corporation multiplied by the federal long-term tax-exempt rate.

If we were to experience an ownership change, we could potentially have in the future higher U.S. federal income tax liabilities than we would otherwise have had and it may also result in certain other adverse consequences to RGA. In this connection, we have adopted the Section 382 shareholder rights plan and the acquisition restrictions set forth in Article Fourteen to our articles of incorporation, in order to reduce the likelihood that RGA and its subsidiaries will experience an ownership change under Section 382 of the Internal Revenue Code. There can be no assurance, however, that these efforts will prevent the MetLife split-off, together with certain other transactions involving our stock, from causing us to experience an ownership change and the adverse consequences that may arise therefrom, as described above under “— The acquisition restrictions contained in our articles of incorporation and our Section 382 shareholder rights plan, which are intended to help preserve RGA and its subsidiaries’ NOLs and other tax attributes, may not be effective or may have unintended negative effects.”

Item 1B. UNRESOLVED STAFF COMMENTS

The Company has no unresolved staff comments from the Securities and Exchange Commission.

Item 2. PROPERTIES

The Company leases its headquarters facility in Chesterfield, Missouri, which consists of approximately 171,000 square feet. In addition, the Company leases approximately 230,000 square feet of office space in 25 locations throughout the U.S., Canada, Europe, South Africa, and the Asia Pacific region.

Most of the Company’s leases in the U.S. and other countries have lease terms of three to five years, although some leases have terms of up to 10 years. As provided in Note 12 – “Lease Commitments” in the Notes to Consolidated Financial Statements, the rental expense on operating leases for office space and equipment totaled \$12.5 million for 2008.

The Company believes its facilities have been generally well maintained and are in good operating condition. The Company believes the facilities are sufficient for its current and projected future requirements.

Item 3. LEGAL PROCEEDINGS

The Company is subject to litigation in the normal course of its business. The Company currently has no material litigation. However, if such material litigation did arise, it is possible that an adverse outcome on any particular arbitration or litigation situation could have a material adverse effect on the Company's consolidated financial position and/or net income in a particular reporting period.

Item 4. SUBMISSION OF MATTERS TO A VOTE OF SECURITY HOLDERS

The Company held a special meeting of shareholders on November 25, 2008. At the special meeting, the following proposals were voted upon by the shareholders as indicated below:

- (1) Proposal to convert class B common stock to class A common stock on a one-for-one basis:

- (1a) Holders of the outstanding shares of RGA common stock:

<u>Voted For</u>	<u>Voted Against</u>	<u>Abstain</u>
28,062,167	22,684	17,722

- (1b) Holders of class B common stock:

<u>Voted For</u>	<u>Voted Against</u>	<u>Abstain</u>
23,062,464	11,409	51,169

- (2) Proposal to approve the amendment and restatement of RGA's Amended and Restated Article of Incorporation.

<u>Voted For</u>	<u>Voted Against</u>	<u>Abstain</u>
51,115,097	33,828	74,790

- (3) Proposal to adjourn the Special Meeting if necessary or appropriate to permit further solicitation of proxies.

<u>Voted For</u>	<u>Voted Against</u>	<u>Abstain</u>
49,009,163	2,155,412	59,140

PART II

Item 5. MARKET FOR REGISTRANT'S COMMON EQUITY, RELATED STOCKHOLDER MATTERS, AND ISSUER PURCHASES OF EQUITY SECURITIES

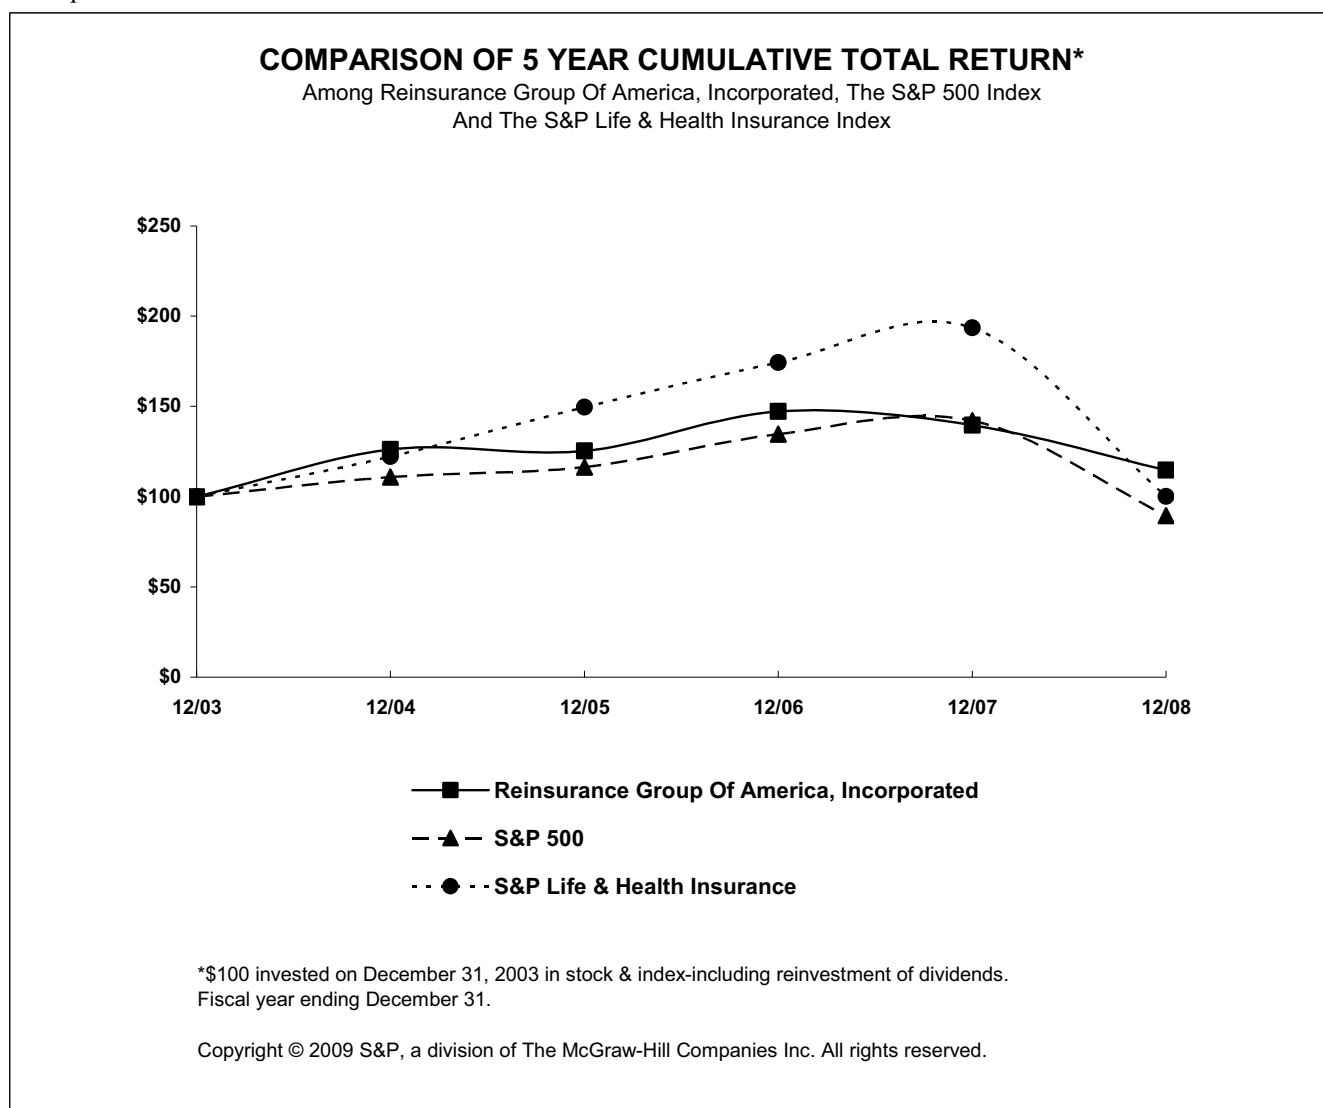

Information about the market price of the Company's common equity, dividends and related stockholder matters is contained in Item 8 under the caption "Quarterly Data (Unaudited)" and in Item 1 under the caption Regulation – "Restrictions on Dividends and Distributions". Additionally, insurance companies are subject to statutory regulations that restrict the payment of dividends. See Item 1 under the caption Regulation – "Restrictions on Dividends and Distributions". See Item 8, Note 3 – "Stock Transactions" in the Notes to Consolidated Financial Statements for information regarding board approved stock repurchase plans.

The following table summarizes information regarding securities authorized for issuance under equity compensation plans:

Plan category	Number of securities to be issued upon exercise of outstanding options, warrants and rights	Weighted-average exercise price of outstanding options, warrants and rights	Number of securities remaining available for future issuance under equity compensation plans
Equity compensation plans approved by security holders	3,205,140 ⁽¹⁾	\$40.84 ⁽²⁾⁽³⁾	2,680,074 ⁽⁴⁾
Equity compensation plans not approved by security holders	--	--	--
Total	3,205,140 ⁽¹⁾	\$40.84 ⁽²⁾⁽³⁾	2,680,074 ⁽⁴⁾

- (1) Includes the number of securities to be issued upon exercises under the following plans: Flexible Stock Plan - 3,142,620; Flexible Stock Plan for Directors – 27,683; and Phantom Stock Plan for Directors – 34,837.
- (2) Does not include 383,119 performance contingent units outstanding under the Flexible Stock Plan or 34,837 phantom units outstanding under the Phantom Stock Plan for Directors because those securities do not have an exercise price (i.e. a unit is a hypothetical share of Company common stock with a value equal to the fair market value of the common stock).
- (3) Reflects the blended weighted-average exercise price of outstanding options under the Flexible Stock Plan (\$40.93) and Flexible Stock Plan for Directors (\$31.27).
- (4) Includes the number of securities remaining available for future issuance under the following plans: Flexible Stock Plan – 2,555,802; Flexible Stock Plan for Directors – 98,253; and Phantom Stock Plan for Directors – 26,019

Set forth below is a graph for the Company’s common stock for the period beginning December 31, 2003 and ending December 31, 2008. The graph compares the cumulative total return on the Company’s common stock, based on the market price of the common stock and assuming reinvestment of dividends, with the cumulative total return of companies in the Standard & Poor’s 500 Stock Index and the Standard & Poor’s Insurance (Life/Health) Index. The indices are included for comparative purposes only. They do not necessarily reflect management’s opinion that such indices are an appropriate measure of the relative performance of the Company’s common stock, and are not intended to forecast or be indicative of future performance of the common stock.

	Cumulative Total Return					
	<u>12/03</u>	<u>12/04</u>	<u>12/05</u>	<u>12/06</u>	<u>12/07</u>	<u>12/08</u>
Reinsurance Group of America, Incorporated	100.0	126.18	125.38	147.27	139.62	114.76
S & P 500	100.0	110.88	116.33	134.70	142.10	89.53
S & P Life & Health Insurance	100.0	122.14	149.64	174.35	193.53	100.02

Item 6. SELECTED FINANCIAL DATA

The selected financial data presented for, and as of the end of, each of the years in the five-year period ended December 31, 2008, have been prepared in accordance with accounting principles generally accepted in the United States of America. All amounts shown are in millions, except per share and operating data. The following data should be read in conjunction with the Consolidated Financial Statements and the Notes to Consolidated Financial Statements appearing in Part II Item 8 and Management's Discussion and Analysis of Financial Condition and Results of Operations appearing in Part II Item 7.

Selected Consolidated Financial and Operating Data

(in millions, except per share and operating data)

As of or For the Years Ended December 31,	2008	2007	2006	2005	2004
Income Statement Data					
Revenues:					
Net premiums	\$ 5,349.3	\$ 4,909.0	\$ 4,346.0	\$ 3,866.8	\$ 3,347.4
Investment income, net of related expenses	871.3	907.9	779.7	639.2	580.5
Investment related gains (losses), net	(647.2)	(178.7)	2.5	21.0	55.6
Other revenues	107.8	80.2	65.5	57.7	55.4
Total revenues	<u>5,681.2</u>	<u>5,718.4</u>	<u>5,193.7</u>	<u>4,584.7</u>	<u>4,038.9</u>
Benefits and expenses:					
Claims and other policy benefits	4,461.9	3,984.0	3,488.4	3,187.9	2,678.5
Interest credited	233.2	246.1	244.8	208.4	198.9
Policy acquisition costs and other insurance expenses	357.9	647.8	716.3	636.3	613.9
Other operating expenses	242.9	236.7	204.4	154.4	140.0
Interest expense	76.2	76.9	62.0	41.4	38.4
Collateral finance facility expense (1)	28.7	52.0	26.4	-	-
Total benefits and expenses	<u>5,400.8</u>	<u>5,243.5</u>	<u>4,742.3</u>	<u>4,228.4</u>	<u>3,669.7</u>
Income from continuing operations before income taxes	280.4	474.9	451.4	356.3	369.2
Provision for income taxes	92.6	166.6	158.1	120.7	123.9
Income from continuing operations	187.8	308.3	293.3	235.6	245.3
Loss from discontinued accident and health operations, net of income taxes	(11.0)	(14.5)	(5.1)	(11.4)	(23.0)
Cumulative effect of change in accounting principle, net of income taxes	-	-	-	-	(0.4)
Net income	<u>\$ 176.8</u>	<u>\$ 293.8</u>	<u>\$ 288.2</u>	<u>\$ 224.2</u>	<u>\$ 221.9</u>
Basic Earnings Per Share					
Continuing operations	\$ 2.94	\$ 4.98	\$ 4.79	\$ 3.77	\$ 3.94

Policy liabilities	16,045.5	15,045.5	13,354.5	11,726.3	10,314.5
Long-term debt	918.2	896.1	676.2	674.4	349.7
Collateral finance facility (1)	850.0	850.4	850.4	-	-
Company-obligated mandatorily redeemable preferred securities of subsidiary trust holding solely junior subordinated debentures of the Company	159.0	158.9	158.7	158.6	158.4
Total stockholders' equity	2,616.8	3,189.8	2,815.4	2,527.5	2,279.0
Total stockholders' equity per share	\$ 36.03	\$ 51.42	\$ 45.85	\$ 41.38	\$ 36.50
Operating Data (in billions)					
Assumed ordinary life reinsurance in force	\$ 2,108.1	\$ 2,119.9	\$ 1,941.4	\$ 1,713.2	\$ 1,458.9
Assumed new business production	305.0	302.4	374.6	364.4	279.1

(1) During 2006, the Company's subsidiary, Timberlake Financial, issued \$850.0 million floating rate insured notes. See Note 16 - "Collateral Finance Facility" in the Notes to Consolidated Financial Statements for additional information.

Item 7. MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS

Forward-Looking and Cautionary Statements

This report contains forward-looking statements within the meaning of the Private Securities Litigation Reform Act of 1995 including, among others, statements relating to projections of the strategies, earnings, revenues, income or loss, ratios, future financial performance, and growth potential of the Company. The words "intend," "expect," "project," "estimate," "predict," "anticipate," "should," "believe," and other similar expressions also are intended to identify forward-looking statements. Forward-looking statements are inherently subject to risks and uncertainties, some of which cannot be predicted or quantified. Future events and actual results, performance, and achievements could differ materially from those set forth in, contemplated by, or underlying the forward-looking statements.

Numerous important factors could cause actual results and events to differ materially from those expressed or implied by forward-looking statements including, without limitation, (1) adverse capital and credit market conditions and their impact on the Company's liquidity, access to capital and cost of capital, (2) the impairment of other financial institutions and its effect on the Company's business, (3) requirements to post collateral or make payments due to declines in market value of assets subject to the Company's collateral arrangements, (4) the fact that the determination of allowances and impairments taken on the Company's investments is highly subjective, (5) adverse changes in mortality, morbidity, lapsation or claims experience, (6) changes in the Company's financial strength and credit ratings and the effect of such changes on the Company's future results of operations and financial condition, (7) inadequate risk analysis and underwriting, (8) general economic conditions or a prolonged economic downturn affecting the demand for insurance and reinsurance in the Company's current and planned markets, (9) the availability and cost of collateral necessary for regulatory reserves and capital, (10) market or economic conditions that adversely affect the value of the Company's investment securities or result in the impairment of all or a portion of the value of certain of the Company's investment securities, that in turn could affect regulatory capital, (11) market or economic conditions that adversely affect the Company's ability to make timely sales of investment securities, (12) risks inherent in the Company's risk management and investment strategy, including changes in investment portfolio yields due to interest rate or credit quality changes, (13) fluctuations in U.S. or foreign currency exchange rates, interest rates, or securities and real estate markets, (14) adverse litigation or arbitration results, (15) the adequacy of reserves, resources and accurate information relating to settlements, awards and terminated and discontinued lines of business, (16) the stability of and actions by governments and economies in the markets in which the Company operates, (17) competitive factors and competitors' responses to the Company's initiatives, (18) the success of the Company's clients, (19) successful execution of the Company's entry into new markets, (20) successful development and introduction of new products and distribution opportunities, (21) the Company's ability to successfully integrate and operate reinsurance business that the Company acquires, (22) regulatory action that may be taken by state Departments of Insurance with respect to the Company, (23) the Company's dependence on third parties, including those insurance companies and reinsurers to which the Company cedes some reinsurance, third-party investment managers and others, (24) the threat of natural disasters, catastrophes, terrorist attacks, epidemics or pandemics anywhere in the world where the Company or its clients do business, (25) changes in laws, regulations, and accounting standards applicable to the Company, its subsidiaries, or its business, (26) the effect of the Company's status as an insurance holding company and regulatory restrictions on its ability to pay principal of and interest on its debt obligations, and (27) other risks and uncertainties described in this document and in the Company's other filings with the Securities and Exchange Commission ("SEC").

Forward-looking statements should be evaluated together with the many risks and uncertainties that affect the Company's business, including those mentioned in this document and the cautionary statements described in the periodic reports the Company files with the SEC. These forward-looking statements speak only as of the date on which they are made. The Company does not undertake any obligations to update these forward-looking statements, even though the Company's situation may change in the future. The Company qualifies all of its forward-looking statements by these cautionary statements. For a discussion of these risks and uncertainties that could cause actual results to differ materially from those contained in the forward-looking statements, you are advised to see Item 1A – "Risk Factors".

Overview

RGA is an insurance holding company that was formed on December 31, 1992. Immediately prior to the Divestiture Date, General American, a Missouri life insurance company, directly owned 32,243,539 shares, or approximately 51.7%, of the outstanding shares of common stock of RGA. General American is a wholly-owned subsidiary of MetLife, a New York-based insurance and financial services holding company. On the Divestiture Date, MetLife disposed of the majority of its

interest in RGA by exchanging 29,243,539 of its shares of RGA common stock to MetLife shareholders for shares of MetLife common stock. As of December 31, 2008, MetLife has a retained interest of 4.1% of RGA common stock.

The consolidated financial statements include the assets, liabilities, and results of operations of RGA, RGA Reinsurance, RGA Barbados, RGA Americas, RGA Canada, RGA Australia, RGA UK and RGA Atlantic as well as several other subsidiaries subject to an ownership position of greater than fifty percent (collectively, the "Company").

The Company is primarily engaged in traditional individual and group life, asset-intensive, critical illness and financial reinsurance. RGA and its predecessor, the Reinsurance Division of General American, have been engaged in the business of life reinsurance since 1973. Approximately 68.0% of the Company's 2008 net premiums were from its more established operations in North America, represented by its U.S. and Canada segments.

The Company derives revenues primarily from renewal premiums from existing reinsurance treaties, new business premiums from existing or new reinsurance treaties, income earned on invested assets, and fees earned from financial reinsurance transactions.

The Company's primary business is life reinsurance, which involves reinsuring life insurance policies that are often in force for the remaining lifetime of the underlying individuals insured, with premiums earned typically over a period of 10 to 30 years. Each year, however, a portion of the business under existing treaties terminates due to, among other things, lapses or voluntary surrenders of underlying policies, deaths of insureds, and the exercise of recapture options by ceding companies.

As is customary in the reinsurance business, life insurance clients continually update, refine, and revise reinsurance information provided to the Company. Such revised information is used by the Company in preparation of its financial statements and the financial effects resulting from the incorporation of revised data are reflected currently.

The Company's profitability primarily depends on the volume and amount of death claims incurred and the ability to adequately price the risks it assumes. Additionally, in 2008 market volatility, changes in risk-free rates and increased credit spreads have resulted in significant losses associated with embedded derivatives in the Company's U.S. Asset-Intensive sub-segment. While death claims are reasonably predictable over a period of many years, claims become less predictable over shorter periods and are subject to significant fluctuation from quarter to quarter and year to year. Effective January 1, 2008, the Company increased the maximum amount of coverage that it retains per life in the U.S. from \$6.0 million to \$8.0 million. This increase does not affect business written prior to January 1, 2008. Claims in excess of this retention amount are retroceded to retrocessionaires; however, the Company remains fully liable to the ceding company for the entire amount of risk it assumes. The increase in the Company's U.S. retention limit from \$6.0 million to \$8.0 million reduces the amount of premiums it pays to retrocessionaires, but increases the maximum effect a single death claim can have on its results and therefore may result in additional volatility to its results. For other countries, particularly those with higher risk factors or smaller books of business, the Company systematically reduces its retention. The Company has a number of retrocession arrangements whereby certain business in force is retroceded on an automatic or facultative basis.

Since December 31, 1998, the Company has formally reported its accident and health division as a discontinued operation. The accident and health business was placed into run-off, and all treaties were terminated at the earliest possible date. Notice was given to all cedants and retrocessionaires that all treaties were being cancelled at the expiration of their terms. The nature of the underlying risks is such that the claims may take several years to reach the reinsurers involved. Thus, the Company expects to pay claims over a number of years as the level of business diminishes. The Company will report a loss to the extent claims and related expenses exceed established reserves. See Note 21 - "Discontinued Operations" in the Notes to Consolidated Financial Statements.

The Company has five main geographic-based operational segments, each of which is a distinct reportable segment: U.S., Canada, Europe & South Africa, Asia Pacific and Corporate and Other. The U.S. operations provide traditional life, asset-intensive, and financial reinsurance primarily to domestic clients. The Canada operations provide insurers with reinsurance of traditional life products as well as creditor reinsurance, group life and health reinsurance and non-guaranteed critical illness products. Europe & South Africa operations include traditional life reinsurance and critical illness business from Europe & South Africa, in addition to other markets the Company is developing. Asia Pacific operations provide primarily traditional and group life reinsurance, critical illness and, to a lesser extent, financial reinsurance. The Corporate and Other segment results include the corporate investment activity, general corporate expenses, interest expense of RGA, operations of RTP, a wholly-owned subsidiary that develops and markets technology solutions for the insurance industry, Argentine business in run-off, and the investment income and expense associated with the Company's collateral finance facility. The Company's discontinued accident and health business is excluded from continuing operations. The Company measures segment performance based on profit or loss from operations before income taxes.

The Company allocates capital to its segments based on an internally developed risk capital model, the purpose of which is to measure the risk in the business and to provide a basis upon which capital is deployed. The economic capital model considers the unique and specific nature of the risks inherent in RGA's businesses. As a result of the economic capital allocation process, a portion of investment income and investment related gains and losses are credited to the segments based on the level of allocated equity. In addition, the segments are charged for excess capital utilized above the allocated economic capital basis. This charge is included in policy acquisition costs and other insurance expenses.

The Company believes it is one of the leading life reinsurers in North America based on premiums and the amount of life reinsurance in force. The Company believes, based on an industry survey of 2007 information prepared by Munich American at the request of the Society of Actuaries Reinsurance Section ("SOA survey"), that it has the second largest market share in North America as measured by life insurance in force. The Company's approach to the North American market has been to:

- focus on large, high quality life insurers as clients;
- provide quality facultative underwriting and automatic reinsurance capacity; and
- deliver responsive and flexible service to its clients.

In 1994, the Company began using its North American underwriting expertise and industry knowledge to expand into international markets and now has subsidiaries, branches or representative offices in Australia, Barbados, Bermuda, China, France, Germany, Hong Kong, India, Ireland, Italy, Japan, Mexico, Poland, South Africa, South Korea, Spain, Taiwan and the United Kingdom. These operations are included in either the Company's Asia Pacific segment or its Europe & South Africa segment. The Company generally starts new operations from the ground up in these markets as opposed to acquiring existing operations, and it often enters these markets to support its North American clients as they expand internationally. Based on information from a nationally recognized rating agency, the Company believes it is the third largest life reinsurer in the world based on 2007 net life reinsurance premiums. While the Company believes information provided by the rating agency is generally reliable, the Company has not independently verified the data. The rating agency does not guarantee the accuracy and completeness of the information. The Company conducts business with the majority of the largest U.S. and international life insurance companies. The Company has also developed its capacity and expertise in the reinsurance of asset-intensive products (primarily annuities and corporate-owned life insurance) and financial reinsurance.

Industry Trends

The Company believes that the following trends in the life insurance industry will continue to create demand for life reinsurance.

Outsourcing of Mortality. The SOA survey indicates that U.S. life reinsurance in force has more than tripled from \$2.2 trillion in 1997 to \$7.5 trillion at year-end 2007. The Company believes this trend reflects the continued utilization by life insurance companies of reinsurance to manage capital and mortality risk and to develop competitive products. However, the survey results indicate a smaller percentage of new business was reinsured in 2007 than previous years, which has caused premium growth rates in the U.S. life reinsurance market to moderate from previous years. The Company believes the decline in new business being reinsured is likely a reaction by ceding companies to a broad-based increase in reinsurance rates in the market and stronger capital positions maintained by ceding companies in recent years. However, the Company believes reinsurers will continue to be an integral part of the life insurance market due to their ability to efficiently aggregate a significant volume of life insurance in force, creating economies of scale and greater diversification of risk. As a result of having larger amounts of data at their disposal compared to primary life insurance companies, reinsurers tend to have better insights into mortality trends, creating more efficient pricing for mortality risk.

Capital Management. Regulatory environments, rating agencies and competitive business pressures are causing life insurers to reinsure as a means to:

- manage risk-based capital by shifting mortality and other risks to reinsurers, thereby reducing amounts of reserves and capital they need to maintain;
- release capital to pursue new business initiatives; and
- unlock the capital supporting, and value embedded in, non-core product lines.

Consolidation and Reorganization Within the Life Reinsurance and Life Insurance Industry. As a result of consolidations in recent years within the life reinsurance industry, there are fewer competitors. According to the

SOA survey, as of December 31, 2007, the top five companies held approximately 75.7% of the market share in North America based on life reinsurance in force, whereas in 1997, the top five companies held approximately 47.7% of the market share. As a consequence, the Company believes the life reinsurance pricing environment will remain attractive for the remaining life reinsurers, particularly those with a significant market presence and strong ratings.

The SOA surveys indicate that the authors obtained information from participating or responding companies and do not guarantee the accuracy and completeness of their information. Additionally, the surveys do not survey all reinsurance companies, but the Company believes most of its principal competitors are included. While the Company believes these surveys to be generally reliable, the Company has not independently verified their data.

Additionally, merger and acquisition transactions within the life insurance industry continue. The Company believes that reorganizations and consolidations of life insurers will continue. As reinsurance services are increasingly used to facilitate these transactions and manage risk, the Company expects demand for its products to continue.

Changing Demographics of Insured Populations. The aging of the population in North America is increasing demand for financial products among "baby boomers" who are concerned about protecting their peak income stream and are considering retirement and estate planning. The Company believes that this trend is likely to result in continuing demand for annuity products and life insurance policies, larger face amounts of life insurance policies and higher mortality risk taken by life insurers, all of which should fuel the need for insurers to seek reinsurance coverage.

The Company continues to follow a two-part business strategy to capitalize on industry trends.

Continue Growth of North American Business. The Company's strategy includes continuing to grow each of the following components of its North American operations:

- **Facultative Reinsurance.** Based on discussions with the Company's clients, an industry survey and informal knowledge about the industry, the Company believes it is a leader in facultative underwriting in North America. The Company intends to maintain that status by emphasizing its underwriting standards, prompt response on quotes, competitive pricing, capacity and flexibility in meeting customer needs. The Company believes its facultative business has allowed it to develop close, long-standing client relationships and generate additional business opportunities with its facultative clients. During both 2007 and 2008, the Company's U.S. facultative operation processed over 100,000 facultative submissions.
- **Automatic Reinsurance.** The Company intends to expand its presence in the North American automatic reinsurance market by using its mortality expertise and breadth of products and services to gain additional market share.
- **In Force Block Reinsurance.** There are occasions to grow the business by reinsuring in force blocks, as insurers and reinsurers seek to exit various non-core businesses and increase financial flexibility in order to, among other things, redeploy capital and pursue merger and acquisition activity.

Continue Expansion Into Selected Markets and Products. The Company's strategy includes building upon the expertise and relationships developed in its North American business platform to continue its expansion into selected markets and products, including:

- **International Markets.** Management believes that international markets offer opportunities for growth, and the Company intends to capitalize on these opportunities by establishing a presence in selected markets. Since 1994, the Company has entered new markets internationally, including, in the mid-to-late 1990's, Australia, Hong Kong, Japan, Malaysia, New Zealand, South Africa, Spain, Taiwan and the UK, and beginning in 2002, China, India and South Korea. The Company received regulatory approval to open a representative office in China in 2005, opened representative offices in Poland and Germany in 2006 and opened new offices in France and Italy in 2007. Before entering new markets, the Company evaluates several factors including:
 - the size of the insured population,
 - competition,
 - the level of reinsurance penetration,

- regulation,
- existing clients with a presence in the market, and
- the economic, social and political environment.

As previously indicated, the Company generally starts new operations in these markets from the ground up as opposed to acquiring existing operations, and it often enters these markets to support its large international clients as they expand into additional markets. Many of the markets that the Company has entered since 1994, or may enter in the future, are not utilizing life reinsurance, including facultative life reinsurance, at the same levels as the North American market, and therefore, the Company believes these markets represent opportunities for increasing reinsurance penetration. In particular, management believes markets such as Japan and South Korea are beginning to realize the benefits that reinsurers bring to the life insurance market. Additionally, the Company believes that in certain European markets, ceding companies may want to reduce counterparty exposure to their existing life reinsurers, creating opportunities for the Company.

- Asset-intensive and Other Products. The Company intends to continue leveraging its existing client relationships and reinsurance expertise to create customized reinsurance products and solutions. Industry trends, particularly the increased pace of consolidation and reorganization among life insurance companies and changes in products and product distribution, are expected to enhance existing opportunities for asset-intensive and other products. The Company began reinsuring annuities with guaranteed minimum benefits on a limited basis in 2007. To date, most of the Company's asset-intensive business and other products have been written in the U.S.; however, the Company believes opportunities outside of the U.S. may further develop in the near future, particularly in Japan.

Results of Operations

Consolidated income from continuing operations decreased \$120.5 million, or 39.1%, and increased \$15.0 million, or 5.1%, in 2008 and 2007, respectively. Diluted earnings per share from continuing operations were \$2.88 for 2008 compared to \$4.80 for 2007 and \$4.65 for 2006. The decrease in income from continuing operations in 2008 reflects an increase in investment related losses due to the recognition of investment impairments and an increase in the unrealized loss due to an unfavorable change in the value of embedded derivatives within the U.S. Asset-Intensive sub-segment due primarily to the impact of widening credit spreads in the U.S. debt markets. Also contributing to the decrease in income in 2008 was unfavorable mortality experience in the U.S. Traditional sub-segment. Offsetting these negative income items in 2008 were increases in premium levels in all segments and favorable mortality experience in the Canada, Europe & South Africa and Asia Pacific segments. The increase in income from continuing operations in 2007 was due to increased premiums in all segments and favorable mortality experience in the U.S. Traditional sub-segment and Canada segment. The increase in 2007 was partially offset by an increase in the unrealized loss due to an unfavorable change in the value of embedded derivatives within the U.S. Asset-Intensive sub-segment due to the impact of widening credit spreads in the U.S. debt markets and unfavorable mortality experience in the Europe & South Africa and Asia Pacific segments. Foreign currency exchange fluctuations resulted in a decrease to income from continuing operations of approximately \$4.2 million in 2008 and an increase of approximately \$8.0 million in 2007.

The unrealized loss due to an unfavorable change in value of embedded derivatives is primarily related to reinsurance treaties written on a modified coinsurance or funds withheld basis and subject to the provisions of Statement of Financial Accounting Standards ("SFAS") No. 133 Implementation Issue No. B36, "Embedded Derivatives: Modified Coinsurance Arrangements and Debt Instruments That Incorporate Credit Risk Exposures That Are Unrelated or Only Partially Related to the Creditworthiness of the Obligor under Those Instruments" ("Issue B36"). Additionally, changes in risk-free rates used in the present value calculations of embedded derivatives associated with equity-indexed annuity treaties ("EIAs") negatively affected income before income taxes in 2008 and 2007. Changes in these two types of embedded derivatives, after adjustment for deferred acquisition costs and retrocession, resulted in a decrease in consolidated income from continuing operations of approximately \$103.2 million and \$26.2 million in 2008 and 2007, respectively. These fluctuations do not affect current cash flows, crediting rates or spread performance on the underlying treaties. Therefore, Company management believes it is helpful to distinguish between the effects of changes in the valuation in these embedded derivatives and the primary factors that drive profitability of the underlying treaties, namely investment income, fee income, and interest credited. Additionally, over the expected life of the underlying treaties, management expects the cumulative effect of the embedded derivatives to be immaterial.

Consolidated net premiums increased \$440.3 million, or 9.0%, and \$563.1 million, or 13.0%, in 2008 and 2007, respectively, due to growth in life reinsurance in force and scheduled premium increases on treaties written on a yearly-renewable-term basis. Consolidated assumed insurance in force was \$2.1 trillion, \$2.1 trillion and \$1.9 trillion as of December 31, 2008, 2007 and 2006, respectively. The Company added new business production, measured by face amount of insurance in force, of \$305.0 billion, \$302.4 billion and \$374.6 billion during 2008, 2007 and 2006, respectively. Management believes industry consolidation and the established practice of reinsuring mortality risks should continue to provide opportunities for growth, albeit at rates less than historically experienced. Foreign currency fluctuations relative to the prior year unfavorably affected net premiums by approximately \$50.3 million in 2008 and favorably affected net premiums by approximately \$116.1 million in 2007.

Consolidated investment income, net of related expenses, decreased \$36.6 million, or 4.0%, and increased \$128.2 million, or 16.4%, in 2008 and 2007, respectively. The decrease in 2008 is primarily due to market value changes related to the Company's funds withheld at interest investment related to the reinsurance of certain equity indexed annuity products, which are substantially offset by a corresponding change in interest credited to policyholder account balances resulting in a negligible effect on net income. Largely offsetting the decrease in investment income in 2008 was a larger invested asset base and a higher effective investment portfolio yield. The increase in 2007 is related to a larger invested asset base and a higher effective investment portfolio yield. The cost basis of invested assets, including funds withheld, were \$16.5 billion, \$15.9 billion and \$14.0 billion at December 31, 2008, 2007 and 2006, respectively. The average yield earned on the cost basis of investments, excluding funds withheld, was 6.02%, 5.96% and 5.81% in 2008, 2007 and 2006, respectively. The Company expects the average yield to vary from year to year depending on a number of variables, including the prevailing interest rate and credit spread environment, changes in the mix of the underlying investments, and the timing of dividends and distributions on certain investments.

Investment related losses, net increased \$468.5 million and \$181.3 million in 2008 and 2007, respectively. The increase in 2008 is due to an increase of \$122.6 million in investment impairments and an increase of \$285.9 million in the loss of the aforementioned embedded derivatives related to Issue B36. Additionally, losses associated with the reinsurance of living benefits on variable annuities increased \$89.1 million, net of related derivative positions. See the discussion of "Investments" in the "Liquidity and Capital Resources" section of Management's Discussion and Analysis for additional information on the impairment losses. Investment income and investment related gains and losses are allocated to the operating segments based upon average assets and related capital levels deemed appropriate to support the segment business volumes.

The consolidated provision for income taxes from continuing operations represents approximately 33.0%, 35.1%, and 35.0% of pre-tax income for 2008, 2007 and 2006, respectively. The Company generally expects the consolidated effective tax rate to be between 34% and 35% primarily due to the effect of taxation in jurisdictions that have a statutory tax rate which is lower than the U.S. statutory tax rate of 35%. In 2008, the consolidated effective tax rate was lower than expected, due to a decrease in the Company's Financial Accounting Standards Board ("FASB") Interpretation ("FIN") No. 48, "Accounting for Uncertainty in Income Taxes — an interpretation of FASB Statement No. 109" ("FIN 48") liability related to transfer pricing. The Company calculated tax benefits related to its discontinued operations of \$5.9 million for 2008, \$7.8 million for 2007, and \$2.7 million for 2006. The effective tax rate on discontinued operations is approximately 35% for each of the three years.

Critical Accounting Policies

The Company's accounting policies are described in Note 2 – "Summary of Significant Accounting Policies" in the Notes to Consolidated Financial Statements. The Company believes its most critical accounting policies include the capitalization and amortization of deferred acquisition costs ("DAC"); the establishment of liabilities for future policy benefits, other policy claims and benefits, including incurred but not reported claims; the valuation of fixed maturity investments, embedded derivatives and investment impairments, if any; accounting for income taxes; and the establishment of arbitration or litigation reserves. The balances of these accounts require extensive use of assumptions and estimates, particularly related to the future performance of the underlying business.

Additionally, for each of the Company's reinsurance contracts, it must determine if the contract provides indemnification against loss or liability relating to insurance risk, in accordance with applicable accounting standards. The Company must review all contractual features, particularly those that may limit the amount of insurance risk to which the Company is subject or features that delay the timely reimbursement of claims. If the Company determines that the possibility of a significant loss from insurance risk will occur only under remote circumstances, it records the contract under a deposit method of accounting with the net amount receivable or payable reflected in premiums receivable and other reinsurance

balances or other reinsurance liabilities on the consolidated balance sheets. Fees earned on the contracts are reflected as other revenues, as opposed to net premiums, on the consolidated statements of income.

Differences in experience compared with the assumptions and estimates utilized in the justification of the recoverability of DAC, in establishing reserves for future policy benefits and claim liabilities, or in the determination of other-than-temporary impairments to investment securities can have a material effect on the Company's results of operations and financial condition.

Deferred Acquisition Costs ("DAC")

Costs of acquiring new business, which vary with and are primarily related to the production of new business, have been deferred to the extent that such costs are deemed recoverable from future premiums or gross profits. DAC amounts reflect the Company's expectations about the future experience of the business in force and include commissions and allowances as well as certain costs of policy issuance and underwriting. Some of the factors that can affect the carrying value of DAC include mortality assumptions, interest spreads and policy lapse rates. For traditional life and related coverages, the Company performs periodic tests to determine that DAC remains recoverable, and the cumulative amortization is re-estimated and, if necessary, adjusted by a cumulative charge or credit to current operations. No such adjustments related to DAC recoverability were made during 2008, 2007 or 2006. For its asset-intensive business, the Company updates the estimated gross profits with actual gross profits each reporting period, resulting in an increase or decrease to DAC to reflect the difference in the actual gross profits versus the previously estimated gross profits. As of December 31, 2008, the Company estimates that approximately 88.9% of its DAC balance is collateralized by surrender fees due to the Company and the reduction of policy liabilities, in excess of termination values, upon surrender or lapse of a policy.

Liabilities for Future Policy Benefits and Other Policy Liabilities

Liabilities for future policy benefits under long-term life insurance policies (policy reserves) are computed based upon expected investment yields, mortality and withdrawal (lapse) rates, and other assumptions, including a provision for adverse deviation from expected claim levels. The Company primarily relies on its own valuation and administration systems to establish policy reserves. The policy reserves the Company establishes may differ from those established by the ceding companies due to the use of different mortality and other assumptions. However, the Company relies upon its ceding company clients to provide accurate data, including policy-level information, premiums and claims, which is the primary information used to establish reserves. The Company's administration departments work directly with its clients to help ensure information is submitted by them in accordance with the reinsurance contracts. Additionally, the Company performs periodic audits of the information provided by ceding companies. The Company establishes reserves for processing backlogs with a goal of clearing all backlogs within a ninety-day period. The backlogs are usually due to data errors the Company discovers or computer file compatibility issues, since much of the data reported to the Company is in electronic format and is uploaded to its computer systems.

The Company periodically reviews actual historical experience and relative anticipated experience compared to the assumptions used to establish aggregate policy reserves. Further, the Company establishes premium deficiency reserves if actual and anticipated experience indicates that existing aggregate policy reserves, together with the present value of future gross premiums, are not sufficient to cover the present value of future benefits, settlement and maintenance costs and to recover unamortized acquisition costs. The premium deficiency reserve is established through a charge to income, as well as a reduction to unamortized acquisition costs and, to the extent there are no unamortized acquisition costs, an increase to future policy benefits. Because of the many assumptions and estimates used in establishing reserves and the long-term nature of the Company's reinsurance contracts, the reserving process, while based on actuarial science, is inherently uncertain. If the Company's assumptions, particularly on mortality, are inaccurate, its reserves may be inadequate to pay claims and there could be a material adverse effect on its results of operations and financial condition.

Other policy claims and benefits include claims payable for incurred but not reported losses, which are determined using case-basis estimates and lag studies of past experience. These estimates are periodically reviewed and any adjustments to such estimates, if necessary, are reflected in current operations. The time lag from the date of the claim or death to the date when the ceding company reports the claim to the Company can be several months and can vary significantly by ceding company and business segment. The Company updates its analysis of incurred but not reported claims, including lag studies, on a periodic basis and adjusts its claim liabilities accordingly. The adjustments in a given period are generally not significant relative to the overall policy liabilities.

Valuation of Fixed Maturity Securities

The Company primarily invests in fixed maturity securities, including bonds and redeemable preferred stocks. These securities are classified as available-for-sale and accordingly are carried at fair value on the consolidated balance sheets. The difference between amortized cost and fair value is reflected as an unrealized gain or loss, less applicable deferred taxes as well as related adjustments to deferred acquisition costs, if applicable, in accumulated other comprehensive income (“AOCI”) in stockholders’ equity. The determinations of fair value may require extensive use of assumptions and inputs.

The Company performs regular analysis and review of the various methodologies, assumptions and inputs utilized in determining fair value to ensure that the valuation approaches utilized are appropriate and consistently applied, and that the various assumptions are reasonable. The Company also utilizes information from third parties, such as pricing services and brokers, to assist in determining fair values for certain assets and liabilities; however, management is ultimately responsible for all fair values presented in the Company’s financial statements. The Company performs analysis and review of the information and prices received from third parties to ensure that the prices represent a reasonable estimate of the fair value. This process involves quantitative and qualitative analysis and is overseen by the Company’s investment and accounting personnel. Examples of procedures performed include, but are not limited to, initial and ongoing review of third party pricing services and methodologies, review of pricing trends and monitoring of recent trade information. In addition, the Company utilizes both internal and external cash flow models to analyze the reasonableness of fair values utilizing credit spread and other market assumptions, where appropriate. As a result of the analysis, if the Company determines there is a more appropriate fair value based upon the available market data, the price received from the third party is adjusted accordingly.

When available, fair values are based on quoted prices in active markets that are regularly and readily obtainable. Generally, these are very liquid investments and the valuation does not require management judgment. When quoted prices in active markets are not available, fair value is based on market standard valuation techniques, primarily a combination of a market approach, including matrix pricing and an income approach. The assumptions and inputs used by management in applying these methodologies include, but are not limited to: interest rates, credit standing of the issuer or counterparty, industry sector of the issuer, coupon rate, call provisions, sinking fund requirements, maturity, estimated duration and assumptions regarding liquidity and future cash flows.

The significant inputs to the market standard valuation methodologies for certain types of securities with reasonable levels of price transparency are inputs that are observable in the market or can be derived principally from or corroborated by observable market data. Such observable inputs include benchmarking prices for similar assets in active, liquid markets, quoted prices in markets that are not active and observable yields and spreads in the market.

When observable inputs are not available, the market standard valuation methodologies for determining the estimated fair value of certain types of securities that trade infrequently, and therefore have little or no price transparency, rely on inputs that are significant to the estimated fair value that are not observable in the market or cannot be derived principally from or corroborated by observable market data. These unobservable inputs can be based in large part on management judgment or estimation, and cannot be supported by reference to market activity. Even though unobservable, these inputs are based on assumptions deemed appropriate given the circumstances and are consistent with what other market participants would use when pricing such securities.

The use of different methodologies, assumptions and inputs may have a material effect on the estimated fair values of the Company’s securities holdings.

Additionally, the Company evaluates its intent and ability to hold securities, along with factors such as the financial condition of the issuer, payment performance, the extent to which the market value has been below amortized cost, compliance with covenants, general market and industry sector conditions, and various other factors. Securities, based on management's judgments, with an other-than-temporary impairment in value are written down to management's estimate of fair value.

Valuation of Embedded Derivatives

The Company reinsures certain annuity products that contain terms that are deemed to be embedded derivatives, primarily equity-indexed annuities and variable annuities with guaranteed minimum benefits. The Company assesses each identified embedded derivative to determine whether it is required to be bifurcated under SFAS No. 133, “Accounting for Derivative Instruments and Hedging Activities” (“SFAS 133”). If the instrument would not be accounted for in its entirety at

fair value and it is determined that the terms of the embedded derivative are not clearly and closely related to the economic characteristics of the host contract, and that a separate instrument with the same terms would qualify as a derivative instrument, the embedded derivative is bifurcated from the host contract and accounted for separately. Such embedded derivatives are carried on the consolidated balance sheets at fair value with the host contract.

The valuation of the various embedded derivatives requires complex calculations based on actuarial and capital market inputs assumptions related to estimates of future cash flows. Such assumptions include, but are not limited to, assumptions regarding equity market performance, equity market volatility, interest rates, credit spreads, benefits and related contract charges, mortality, lapses, withdrawals, benefit selections and non-performance risk. These assumptions have a significant impact on the value of the embedded derivatives. For example, independent future decreases in equity market returns, future decreases in interest rates and future increases in equity market volatilities would increase the value of the embedded derivative associated with guaranteed minimum withdrawal benefits on variable annuities at December 31, 2008, resulting in an increase in investment related losses. See “Market Risk” disclosures in “Management’s Discussion and Analysis of Financial Condition and Results of Operations” for additional information.

Additionally, reinsurance treaties written on a modified coinsurance or funds withheld basis are subject to the provisions of SFAS 133 Implementation Issue No. B36, “Embedded Derivatives: Modified Coinsurance Arrangements and Debt Instruments That Incorporate Credit Risk Exposures That Are Unrelated or Only Partially Related to the Creditworthiness of the Obligor under Those Instruments” (“Issue B36”). The majority of the Company’s funds withheld at interest balances are associated with its reinsurance of annuity contracts, the majority of which were subject to the provisions of Issue B36. Management believes the embedded derivative feature in each of these reinsurance treaties is similar to a total return swap on the assets held by the ceding companies. The valuation of the Issue B36 embedded derivative is sensitive to the credit spread environment. Increases in credit spreads result in a decrease in value of the embedded derivative and therefore an increase in investment related losses. See “Management’s Discussion and Analysis of Financial Condition and Results of Operations” for the U.S. Asset-Intensive Segment for additional information.

Income Taxes

Income taxes represent the net amount of income taxes that the Company expects to pay to or receive from various taxing jurisdictions in connection with its operations. The Company provides for federal, state and foreign income taxes currently payable, as well as those deferred due to temporary differences between the financial reporting and tax bases of assets and liabilities. The Company’s accounting for income taxes represents management’s best estimate of various events and transactions.

Deferred tax assets and liabilities resulting from temporary differences between the financial reporting and tax bases of assets and liabilities are measured at the balance sheet date using enacted tax rates expected to apply to taxable income in the years the temporary differences are expected to reverse.

Due to the recent turmoil in the financial markets, the ability of the Company to realize its deferred tax assets has taken on heightened importance. The realization of deferred tax assets depends upon the existence of sufficient taxable income within the carryback or carryforward periods under the tax law in the applicable tax jurisdiction. The Company has significant deferred tax assets related to net operating and capital losses. Most of the Company’s exposure related to its deferred tax assets are within legal entities that file a consolidated United States federal income tax return. The Company has projected its ability to utilize its net operating losses and has determined that all of these losses will be utilized prior to their expiration. The Company has also done extensive analysis of its capital losses and has determined that sufficient unrealized capital gains exist within its investment portfolios that would offset any capital loss realized. It is also the Company’s intention to hold all unrealized loss securities until maturity or until their market value recovers.

The Company will establish a valuation allowance when management determines, based on available information, that it is more likely than not that deferred income tax assets will not be realized. Significant judgment is required in determining whether valuation allowances should be established as well as the amount of such allowances. When making such determination, consideration is given to, among other things, the following:

- (i) future taxable income exclusive of reversing temporary differences and carryforwards;
- (ii) future reversals of existing taxable temporary differences;
- (iii) taxable income in prior carryback years; and
- (iv) tax planning strategies.

The Company may be required to change its provision for income taxes in certain circumstances. Examples of such circumstances include when the ultimate deductibility of certain items is challenged by taxing authorities or when estimates used in determining valuation allowances on deferred tax assets significantly change or when receipt of new information indicates the need for adjustment in valuation allowances. Additionally, future events such as changes in tax legislation could have an impact on the provision for income tax and the effective tax rate. Any such changes could significantly affect the amounts reported in the consolidated financial statements in the year these changes occur.

Arbitration and Litigation Reserves

The Company at times is a party to various litigation and arbitrations. The Company cannot predict or determine the ultimate outcome of any pending litigation or arbitrations or even provide useful ranges of potential losses. However, it is possible that an adverse outcome on any particular arbitration or litigation situation could have a material adverse effect on the Company's consolidated financial position and/or net income in a particular reporting period.

U.S. OPERATIONS

U.S. operations consist of two major sub-segments: Traditional and Non-Traditional. The Traditional sub-segment primarily specializes in mortality-risk reinsurance. The Non-Traditional sub-segment consists of Asset-Intensive and Financial Reinsurance.

FOR THE YEAR ENDED DECEMBER 31, 2008

(dollars in thousands)	Non-Traditional			Total U.S.
	Traditional	Asset- Intensive	Financial Reinsurance	
Revenues:

Total benefits and expenses	2,661,613	270,982	14,620	2,947,215
Income before income taxes	\$ 287,122	\$ 20,187	\$ 15,039	\$ 322,348

Income before income taxes for the U.S. operations segment decreased by \$261.8 million, or 79.8%, and increased by \$5.6 million, or 1.7%, in 2008 and 2007, respectively. The decrease in income before income taxes in 2008 can primarily be attributed to the impact of increases in credit spreads on the fair value of embedded derivatives subject to Issue B36 and investment related losses associated with investment impairments recognized in the third quarter of 2008. See the discussion of "Investments" in the "Liquidity and Capital Resources" section of Management's Discussion and Analysis for additional information on the 2008 impairment losses. The decrease in income before income taxes in 2008 reflects an increase in investment related losses of \$139.7 million and the negative effect of Issue B36 of \$143.6 million, after adjustment for deferred acquisition costs. Unfavorable mortality experience in the Traditional sub-segment also contributed to the decrease in income before income taxes in 2008 compared to 2007. Somewhat offsetting the 2008 decrease in income was an increase in net premiums due to growth in total business in force. The increase in income before income taxes in 2007 was due to growth in the total U.S. business in force as well as improved mortality results in 2007 compared to 2006.

Traditional Reinsurance

The U.S. Traditional sub-segment provides life and health reinsurance to domestic clients for a variety of products through yearly renewable term, coinsurance and modified coinsurance agreements. These reinsurance arrangements may involve either facultative or automatic agreements. This sub-segment added new business production, measured by face amount of insurance in force, of \$134.4 billion, \$164.2 billion and \$172.1 billion during 2008, 2007 and 2006, respectively. Management believes industry consolidation and the established practice of reinsuring mortality risks should continue to provide opportunities for new business, albeit at rates less than historically experienced.

Income before income taxes for the U.S. Traditional sub-segment decreased by \$106.6 million, or 31.6%, and increased by \$50.5 million, or 17.6% in 2008 and 2007, respectively. The decrease in 2008 was due to an increase in investment related losses of \$58.1 million and adverse mortality experience compared to 2007. The increase in investment related losses in 2008 was due to the aforementioned realized investment losses, recognized primarily in the third quarter of 2008. The increase in income before income taxes in 2007 was due to improved mortality experience together with higher premiums and investment income as compared to 2006.

Net premiums for the U.S. Traditional sub-segment grew \$224.7 million, or 7.8%, and \$221.1 million, or 8.4% in 2008 and 2007, respectively. These increases in net premiums were driven primarily by the growth of total U.S. Traditional business in force, which totaled \$1.3 trillion, \$1.2 trillion and \$1.2 trillion of face amount as of December 31, 2008, 2007 and 2006, respectively.

Net investment income increased \$42.4 million, or 12.0%, and \$47.3 million, or 15.5%, in 2008 and 2007, respectively. These increases can be attributed to growth in the invested asset base and an increase in the average yield earned on investments. Investment related losses increased \$58.1 million and \$9.7 million in 2008 and 2007, respectively.

Investment income and investment related gains and losses are allocated to the various operating segments based on average assets and related capital levels deemed appropriate to support the segment business volumes. Investment performance varies with the composition of investments and the relative allocation of capital to the operating segments.

Claims and other policy benefits as a percentage of net premiums (“loss ratios”) were 86.1%, 81.7% and 82.1% in 2008, 2007 and 2006, respectively. The increase in the 2008 loss ratio over prior year is the result of an increase in the total number of claims, including large claims, in 2008, while mortality experience was favorable in 2007. The positive experience in 2007 was also the reason for the variance compared to 2006. Although reasonably predictable over a period of years, death claims can be volatile over shorter periods. Management views recent experience as normal volatility that is inherent in the business.

Interest credited expense increased \$1.9 million, or 3.2%, and \$8.5 million, or 17.1%, in 2008 and 2007, respectively. The 2008 increase is the result of one treaty that had a slight increase in its asset base with a credited loan rate remaining constant at 5.6% for 2007 and 2008. The 2007 increase is primarily due to one treaty in which the credited loan rate increased from 4.6% in 2006 to 5.6% in 2007. Interest credited in this case relates to amounts credited on cash value products which also have a significant mortality component. The amount of interest credited fluctuates in step with changes in deposit levels, cash surrender values and investment performance. Income before income taxes is affected by the spread between the investment income and the interest credited on the underlying products.

Policy acquisition costs and other insurance expenses as a percentage of net premiums were 13.4%, 14.6% and 14.9% in 2008, 2007 and 2006, respectively. Overall, while these ratios are expected to remain in a predictable range, they may fluctuate from period to period due to varying allowance levels within coinsurance-type arrangements. In addition, the amortization pattern of previously capitalized amounts, which are subject to the form of the reinsurance agreement and the underlying insurance policies, may vary. Finally, the mix of first year coinsurance business versus yearly renewable term business can cause the percentage to fluctuate from period to period.

Other operating expenses decreased \$1.8 million, or 3.6%, and increased \$7.9 million, or 18.8% in 2008 and 2007, respectively. Other operating expenses, as a percentage of net premiums, were 1.6%, 1.7% and 1.6% in 2008, 2007 and 2006, respectively. The expense ratio tends to fluctuate only slightly from period to period due to maturity and scale of this operation.

Asset-Intensive Reinsurance

The U.S. Asset-Intensive sub-segment assumes investment risk within underlying annuities and corporate-owned life insurance policies. Most of these agreements are coinsurance, coinsurance with funds withheld or modified coinsurance of non-mortality risks whereby the Company recognizes profits or losses primarily from the spread between the investment income earned and the interest credited on the underlying deposit liabilities.

Income (loss) before income taxes for this sub-segment decreased by \$154.4 million and \$42.5 million, in 2008 and 2007, respectively. The decreases in income before income taxes can be primarily attributed to the unfavorable change in the value of embedded derivatives, after adjustment for deferred acquisition costs, under Issue B36. The decrease in income before income taxes related to Issue B36 was \$143.6 million and \$40.3 million in 2008 and 2007, respectively. Also contributing to the decrease in income in 2008 was a \$15.2 million increase in the present value calculations of embedded derivative liabilities associated with EIAs, after adjustment for related deferred acquisition costs and retrocession.

In accordance with the provisions of Issue B36, the Company recorded a gross change in value of embedded derivatives of \$(427.8) million, \$(141.9) million and \$6.5 million in 2008, 2007 and 2006, respectively, within investment related losses, net. The amounts represent a non-cash, unrealized change in value, offset in part by a change in policy acquisition costs associated with an adjustment of related deferred acquisition costs totaling \$(246.7) million, \$(104.4) million and \$3.7 million, in 2008, 2007 and 2006, respectively, for a total net contribution to income (loss) before income taxes of \$(181.1) million, \$(37.5) million and \$2.8 million, respectively. Significant fluctuations may occur as the fair value of the embedded derivatives is tied primarily to the movements in credit spreads. The weighted average asset credit spreads widened by approximately 4.33% and 0.82%, in 2008 and 2007, respectively. An additional credit spread widening of 2.0% in 2009 would have an estimated negative impact of approximately \$139.6 million on the gross change in the value of embedded derivatives based on year end funds withheld portfolios. Additionally, the Company uses risk-free rates, in accordance with SFAS No. 157, “Fair Value Measurements” (“SFAS 157”), to discount the fair value of estimated future equity option purchases associated with its reinsurance of EIAs (a component of the embedded derivative), which affects the fair value of the embedded derivative liability. In 2008, the Company recorded an increase in the fair value of the embedded derivative liability of \$60.3 million, which was recorded as expense within interest credited, offset by related deferred acquisition costs and retrocession of \$(45.1) million, for a net loss before income taxes of \$15.2 million. These fluctuations do not affect current cash flows, crediting rates or spread performance on the underlying treaties. Therefore, Company management believes it is helpful to distinguish between the effects of changes in these embedded derivatives and the primary factors that drive profitability of the underlying treaties, namely investment income, fee income, and interest

credited. Additionally, over the expected life of the underlying treaties, management expects the cumulative effect of the impact of changes in risk-free rates and credit spreads used in the present value calculations of embedded derivatives associated with EIAs and Issue B36 to be immaterial.

Excluding the impact of changes in risk-free rates and credit spreads used in the present value calculations of embedded derivatives associated with EIAs and Issue B36, income before income taxes increased \$4.3 million, or 28.6%, and decreased \$2.2 million, or 12.6%, in 2008 and 2007, respectively. The increase in 2008 over prior year can mainly be attributed to the Company's reinsurance of variable annuities with guaranteed living benefits. The turbulent financial markets lead to an increase of \$267.4 million in the fair value of the liability related to guaranteed minimum benefits. The losses associated with the increase in the fair value of the liability were more than offset by gains on derivative instruments of \$178.4 million used to hedge the liability and DAC adjustments of \$94.2 million, therefore resulting in a gain year over year. However, a portion of the increase in the fair value of the liability will put pressure on expected profit margins for the variable annuity business going forward. Offsetting this gain was an increase in realized investment related losses of approximately \$15.4 million, before DAC, in the funds withheld portfolios. In 2007, the first year of reinsuring guaranteed minimum benefits, losses totaled approximately \$9.3 million and were the primary driver of the decrease in income over 2006. Higher benefits due to an increase in benefit claims on a single premium universal life reinsurance treaty also contributed to the year over year loss in 2007. The losses in both 2008 and 2007 were partly offset by higher fees received from mortality and expense charges earned on the variable annuity transactions.

Total revenues, which are comprised primarily of investment income and investment related losses, net, decreased \$443.8 million and \$131.3 million in 2008 and 2007, respectively. The losses associated with embedded derivatives subject to Issue B36, which are included in investment related losses, net, represented \$285.9 million and \$148.4 million of the decreases in 2008 and 2007, respectively. Excluding the losses associated with embedded derivatives subject to Issue B36, revenue decreased \$157.9 million and increased \$17.1 million in 2008 and 2007, respectively. The decrease in 2008 can be primarily attributed to a decrease in investment income related to equity option income on a funds withheld equity-indexed annuity treaty. The decrease in investment income related to equity options is mostly offset by a corresponding decrease in interest credited expense. Also in 2008, investment related losses associated with guaranteed minimum death benefits increased \$79.8 million and investment related losses in the funds withheld portfolios increased approximately \$15.4 million. The increase in 2007 can be primarily attributed to an increase in investment income as a result of a growing asset base and an increase in other revenues resulting from mortality and expense fees earned on variable annuity contracts. Offsetting this was an increase in investment related losses associated with guaranteed minimum benefits.

The average invested asset base supporting this sub-segment was \$5.1 billion, \$4.8 billion and \$4.3 billion for 2008, 2007 and 2006, respectively. The growth in the asset base is primarily driven by new business written on an existing equity-indexed treaty. In addition, the increase in 2008 reflects a new fixed annuity transaction and a new guaranteed investment contract, together adding approximately \$700.0 million to the asset base of this sub-segment. Invested assets outstanding were \$5.1 billion as of December 31, 2008 compared to \$4.9 billion in 2007. As of December 31, 2008, \$3.4 billion of the invested assets were funds withheld at interest, of which 91.1% of the balance was associated with equity-indexed annuity treaties with one client. As of December 31, 2007, \$3.5 billion of the invested assets were funds withheld at interest, of which 90.3% of the balance was associated with equity-indexed annuity treaties with one client.

Total benefits and expenses, which are comprised primarily of interest credited and policy acquisition costs, decreased \$289.4 million and \$88.8 million, in 2008 and 2007, respectively. Contributing to these decreases was a reduction in policy acquisition costs (also referred to as DAC unlocking) related to embedded derivatives subject to Issue B36 of \$142.3 million and \$108.1 million, coupled with decrease in policy acquisition costs (also referred to as DAC unlocking) associated with guaranteed minimum benefits of \$88.2 million and \$5.9 million, in 2008 and 2007, respectively. The current market environment has created a situation in which future losses related to guaranteed minimum benefits will be difficult to offset with future DAC unlocking, and thus result in reduced income for this sub-segment. Interest credited expenses also decreased \$13.4 million and \$6.4 million in 2008 and 2007, respectively. As mentioned above, a large part of the decrease in interest credited relates to equity-indexed annuity products and is offset in investment income.

Financial Reinsurance

The U.S. Financial Reinsurance sub-segment income consists primarily of net fees earned on financial reinsurance transactions. Financial reinsurance risks are assumed by the U.S. segment and a portion are retroceded to other insurance companies or brokered business in which the Company does not participate in the assumption of risk. The fees earned from financial reinsurance contracts are reflected in other revenues, and the fees paid to retrocessionaires are reflected in policy acquisition costs and other insurance expenses. Fees earned on brokered business are reflected in other revenues.

Income before income taxes decreased by \$0.8 million, or 6.3%, and \$2.4 million, or 16.0%, in 2008 and 2007, respectively. The decrease in 2008 can be primarily attributed to one treaty which was recaptured late in 2007. In 2006, both the domestic and a portion of various Asia Pacific financial reinsurance treaties were reflected in this segment. Beginning in 2007, the Asia Pacific-based treaties were included with the Company's Asia Pacific segment with reimbursement to the U.S. segment for costs incurred by U.S. personnel. Fees reflected in Asia Pacific in 2007 totaled \$8.3 million.

At December 31, 2008, 2007 and 2006, the amount of reinsurance assumed from client companies, as measured by pre-tax statutory surplus, was \$0.5 billion, \$0.5 billion and \$1.8 billion, respectively. The decrease in 2007 is a result of the aforementioned change in reporting for Asia Pacific-based treaties and the recapture of one large treaty. The pre-tax statutory surplus includes all business assumed by the Company. Fees resulting from this business can be affected by large transactions and the timing of completion of new transactions and therefore can fluctuate from period to period.

CANADA OPERATIONS

The Company conducts reinsurance business in Canada through RGA Canada, a wholly-owned subsidiary. RGA Canada assists clients with capital management and mortality risk management, and is primarily engaged in traditional individual life reinsurance, as well as creditor, critical illness, and group life and health reinsurance. Creditor insurance covers the outstanding balance on personal, mortgage or commercial loans in the event of death, disability or critical illness and is generally shorter in duration than traditional life insurance.

FOR THE YEAR ENDED DECEMBER 31, (dollars in thousands)

	2008	2007	2006
Revenues:			
Net premiums	\$ 534,271	\$ 487,136	\$ 429,438

Investment related gains (losses), net	(1,089)	7,453	5,506
Other revenues	18,332	182	160
Total revenues	691,948	619,405	542,077
Benefits and expenses:			
Claims and other policy benefits	456,072	425,498	386,221
Interest credited	365	726	831
Policy acquisition costs and other insurance expenses	110,177	91,234	92,936
Other operating expenses	23,068	20,404	16,323
Total benefits and expenses	589,682	537,862	496,311
Income before income taxes	\$ 102,266	\$ 81,543	\$ 45,766

Reinsurance in force for the Canada operation totaled approximately \$209.5 billion, \$217.7 billion, and \$155.4 billion at December 31, 2008, 2007, and 2006, respectively. On a Canadian dollar basis, reinsurance in force for the Canada operation reflected continued growth and totaled approximately C\$255.4 billion, C\$217.4 billion, and C\$181.2 billion at December 31, 2008, 2007, and 2006, respectively.

Income before income taxes increased by \$20.7 million, or 25.4%, and \$35.8 million, or 78.2%, in 2008 and 2007, respectively. The increase in income before income taxes in 2008 was primarily due to higher premium volume, favorable mortality experience and an increase in recapture fees which added \$6.8 million. The 2008 increase was largely offset by a decrease of \$8.5 million in investment related gains and losses. In 2008, strength in the Canadian dollar resulted in an increase in income before income taxes of approximately \$0.7 million. The increase in income before income taxes in 2007 was primarily the result of favorable mortality experience and an increase in investment related gains of \$1.9 million. In 2007, strength in the Canadian dollar resulted in an increase in income before income taxes of approximately \$5.1 million.

Net premiums grew by \$47.1 million, or 9.7%, and \$57.7 million, or 13.4%, in 2008 and 2007, respectively. Premiums from creditor treaties increased by \$14.4 million in 2008 and decreased \$4.7 million in 2007. Creditor and group life and health premiums represented 20.9%, 17.5% and 20.6% of net premiums in 2008, 2007 and 2006, respectively. The remaining increases are primarily due to new business from both new and existing treaties. The segment added new business production, measured by face amount of insurance in force, of \$51.2 billion, \$46.8 billion and \$39.8 billion during 2008, 2007 and 2006, respectively. Management believes industry consolidation and the established practice of reinsuring mortality risks should continue to provide opportunities for new business, albeit at rates less than historically experienced. Additionally, foreign currency exchange fluctuation in the Canadian dollar resulted in an increase in net premiums of

approximately \$2.2 million and \$29.1 million in 2008 and 2007, respectively. Premium levels can be significantly influenced by large transactions, mix of business and reporting practices of ceding companies, and therefore may fluctuate from period to period.

Net investment income increased \$15.8 million, or 12.7%, and \$17.7 million, or 16.5%, in 2008 and 2007, respectively. A stronger Canadian dollar resulted in an increase in net investment income of approximately \$0.9 million and \$7.4 million in 2008 and 2007, respectively. Investment income and investment related gains and losses are allocated to the segments based upon average assets and related capital levels deemed appropriate to support the segment business volumes. Investment performance varies with the composition of investments and the relative allocation of capital to the operating segments. The increase in investment income was mainly the result of an increase in the allocated asset base due to growth in the underlying business volume.

Other revenues increased by \$18.2 million in 2008 but remained virtually unchanged in 2007 compared to 2006. The increase in 2008 was primarily due to a \$16.2 million increase in recapture fees.

Loss ratios for this segment were 85.4%, 87.3% and 89.9% in 2008, 2007 and 2006, respectively. The loss ratios on creditor reinsurance business are normally lower than traditional reinsurance, while allowances (policy acquisition costs) are normally higher as a percentage of premiums. Loss ratios for creditor business were 52.0%, 44.8% and 42.7% in 2008, 2007 and 2006, respectively. Excluding creditor business and the aforementioned recaptures in 2008, the loss ratios for this segment were 92.9%, 96.2% and 102.2% in 2008, 2007 and 2006, respectively. The lower loss ratios for 2008 and 2007 are primarily due to favorable mortality experience compared to the prior years. Historically, the loss ratio increased primarily as the result of several large permanent level premium in force blocks assumed in 1997 and 1998. These blocks are mature blocks of permanent level premium business in which mortality as a percentage of net premiums is expected to be higher than historical ratios. The nature of permanent level premium policies requires the Company to set up actuarial liabilities and invest the amounts received in excess of early-year mortality costs to fund claims in the later years when premiums, by design, continue to be level as compared to expected increasing mortality or claim costs. Claims and other policy benefits, as a percentage of net premiums and investment income were 67.6%, 69.6% and 72.0% in 2008, 2007 and 2006, respectively.

Policy acquisition costs and other insurance expenses as a percentage of net premiums totaled 20.6%, 18.7% and 21.6% in 2008, 2007 and 2006, respectively. Policy acquisition costs and other insurance expenses as a percentage of net premiums for creditor business were 51.6%, 49.6% and 54.2% in 2008, 2007 and 2006, respectively. Excluding foreign exchange and creditor business, policy acquisition costs and other insurance expenses as a percentage of net premiums were 12.4%, 11.6% and 12.8% in 2008, 2007 and 2006, respectively. Overall, while these ratios are expected to remain in a predictable range, they may fluctuate from period to period due to varying allowance levels, significantly caused by the mix of first year coinsurance business versus yearly renewable term business. In addition, the amortization pattern of previously capitalized amounts, which are subject to the form of the reinsurance agreement and the underlying insurance policies, may vary.

Other operating expenses increased \$2.7 million, or 13.1%, and \$4.1 million, or 25.0%, in 2008 and 2007, respectively. A stronger Canadian dollar resulted in an increase in other operating expenses of approximately \$1.1 million in 2007. Other operating expenses as a percentage of net premiums were 4.3%, 4.2% and 3.8% in 2008, 2007 and 2006, respectively.

EUROPE & SOUTH AFRICA OPERATIONS

The Europe & South Africa segment has operations in France, Germany, India, Italy, Mexico, Poland, Spain, South Africa and the UK. The segment provides life reinsurance for a variety of products through yearly renewable term and coinsurance agreements, reinsurance of critical illness coverage and to a lesser extent, the reinsurance of longevity risk on payout annuities. Reinsurance agreements may be either facultative or automatic agreements covering primarily individual risks and in some markets, group risks.

FOR THE YEAR ENDED DECEMBER 31,
(dollars in thousands)

	2008	2007	2006
Revenues:			
Net premiums	\$ 707,768	\$ 678,551	\$ 587,903
Investment income, net of related expenses	32,993	26,167	16,311
Investment related losses, net	(8,687)	(2,183)	(322)
Other revenues (losses)	401	(144)	858
Total revenues	<u>732,475</u>	<u>702,391</u>	<u>604,750</u>
Benefits and expenses:			
Claims and other policy benefits	532,292	515,660	414,855
Interest credited	--	1,019	764
Policy acquisition costs and other insurance expenses	69,422	84,749	90,098
Other operating expenses	65,075	53,496	40,792
Total benefits and expenses	<u>666,789</u>	<u>654,924</u>	<u>546,509</u>
Income before income taxes	<u>\$ 65,686</u>	<u>\$ 47,467</u>	<u>\$ 58,241</u>

Income before income taxes increased by \$18.2 million, or 38.4%, and decreased by \$10.8 million or 18.5%, in 2008 and 2007, respectively. The increase in income before income taxes for 2008 was primarily due to increased net premiums and decreased policy acquisition costs and other insurance expenses partially offset by adverse claims experience. In addition, a block of business was recaptured in 2008 that increased income before income taxes by \$6.1 million. In 2008, unfavorable foreign currency exchange fluctuations resulted in a decrease to income before income taxes totaling approximately \$8.6 million. The decrease in income before income taxes for 2007 was due primarily to adverse mortality and morbidity experience in the UK in 2007 versus favorable experience in 2006. In 2007, favorable foreign currency exchange fluctuations resulted in an increase to income before income taxes totaling approximately \$2.3 million.

Net premiums grew by \$29.2 million, or 4.3%, and \$90.6 million, or 15.4%, in 2008 and 2007, respectively. These increases were primarily the result of new business from both new and existing treaties. The segment added new business production, measured by face amount of insurance in force, of \$87.5 billion, \$61.3 billion and \$105.1 billion during 2008, 2007 and 2006, respectively. During 2008, there was an unfavorable foreign currency exchange fluctuation, particularly from the British pound and the South African rand weakening against the U.S. dollar, which decreased net premiums by approximately \$47.7 million. However, in 2007, a large part of the increase in net premiums was due to favorable foreign currency exchange fluctuations, particularly the British pound and the euro strengthening against the U.S. dollar, which increased net premiums by approximately \$41.9 million.

A significant portion of the net premiums for the segment, in each period presented, relates to reinsurance of critical illness coverage, primarily in the UK. This coverage provides a benefit in the event of the diagnosis of a pre-defined critical illness. Net premiums earned from this coverage totaled \$236.4 million, \$235.2 million and \$208.8 million in 2008, 2007 and 2006, respectively. Premium levels are significantly influenced by large transactions and reporting practices of ceding companies and therefore can fluctuate from period to period.

Net investment income increased \$6.8 million, or 26.1%, and \$9.9 million, or 60.4%, in 2008 and 2007, respectively. These increases can be attributed to growth in the invested asset base and increased portfolio return. Investment income and investment related gains and losses are allocated to the various operating segments based on average assets and related capital levels deemed appropriate to support the segment business volumes. Investment performance varies with the composition of investments and the relative allocation of capital to the operating segments.

Loss ratios for this segment were 75.2%, 76.0% and 70.6% in 2008, 2007 and 2006, respectively. During 2008, a block of business was recaptured which had the effect of lowering the loss ratio. Excluding this recapture, the loss ratio for 2008 was 77.0%. The increase in the loss ratios for 2008 and 2007 was primarily due to unfavorable claims experience in the UK and South Africa. Policy acquisition costs and other insurance expenses as a percentage of net premiums represented 9.8%, 12.5% and 15.3% for 2008, 2007 and 2006, respectively. Excluding the aforementioned recapture, policy acquisition costs and other insurance expenses as a percentage of net premiums was 8.8% in 2008. These percentages fluctuate due to timing of client company reporting, variations in the mixture of business being reinsured and the relative maturity of the business. In addition, as the segment grows, renewal premiums, which have lower allowances than first-year premiums, represent a greater percentage of the total net premiums.

Policy acquisition costs are capitalized and charged to expense in proportion to premium revenue recognized. Acquisition costs, as a percentage of premiums, associated with some treaties in the UK are typically higher than those experienced in the Company's other segments. Future recoverability of the capitalized policy acquisition costs on this business is primarily sensitive to mortality and morbidity experience. If actual experience suggests higher mortality and morbidity rates going forward than currently contemplated in management's estimates, the Company may record a charge to income, due to a reduction in the DAC asset and, to the extent there are no unamortized acquisition costs, an increase in future policy benefits. As of December 31, 2008, the Company estimates that a 12% increase in anticipated mortality and morbidity experience would have no effect while a 15% or 18% increase would result in pre-tax income charges of approximately \$63.5 million and \$163.3 million, respectively.

Other operating expenses increased \$11.6 million, or 21.6%, and \$12.7 million, or 31.1%, in 2008 and 2007, respectively. Other operating expenses as a percentage of net premiums totaled 9.2%, 7.9% and 6.9% in 2008, 2007 and 2006, respectively. These increases were due to higher costs associated with maintaining and supporting the segment's increase in business over the past several years and the Company's recent expansion into Central Europe. The Company believes that sustained growth in net premiums should lessen the burden of start-up expenses and expansion costs over time.

ASIA PACIFIC OPERATIONS

The Asia Pacific segment has operations in Australia, Hong Kong, Japan, Malaysia, Singapore, New Zealand, South Korea, Taiwan and mainland China. The principal types of reinsurance for this segment include life, critical illness, disability income, superannuation, and financial reinsurance. Superannuation is the Australian government mandated compulsory retirement savings program. Superannuation funds accumulate retirement funds for employees, and, in addition, offer life and disability insurance coverage. Reinsurance agreements may be either facultative or automatic agreements covering primarily individual risks and in some markets, group risks.

FOR THE YEAR ENDED DECEMBER 31,
(dollars in thousands)

	2008	2007	2006
Revenues:			
Net premiums	\$ 1,000,814	\$ 864,550	\$ 673,179
Investment income, net of related expenses	47,400	36,388	28,105
Investment related losses, net	(2,661)	(1,529)	(372)
Other revenues	12,320	9,197	6,465
Total revenues	<u>1,057,873</u>	<u>908,606</u>	<u>707,377</u>
Benefits and expenses:			
Claims and other policy benefits	799,376	692,859	512,740
Policy acquisition costs and other insurance expenses	107,076	99,285	93,614
Other operating expenses	65,912	56,372	42,432
Total benefits and expenses	<u>972,364</u>	<u>848,516</u>	<u>648,786</u>
Income before income taxes	<u>\$ 85,509</u>	<u>\$ 60,090</u>	<u>\$ 58,591</u>

Income before income taxes increased by \$25.4 million, or 42.3%, and by \$1.5 million, or 2.6%, in 2008 and 2007, respectively. The increase in income before income taxes in 2008 was due to favorable results from operations throughout the segment, primarily due to increased net premiums and favorable mortality experience. Also in 2008, favorable foreign currency exchange fluctuations resulted in an increase to income before income taxes totaling approximately \$3.6 million. The increase in income before income taxes in 2007 was the result of strong net premium growth in the Australia, Japan and Korea operations offset by increases in claims and other policy benefits. The increase in claims and other policy benefits in 2007 was primarily attributable to favorable mortality experience in 2006. In 2007, favorable foreign currency exchange fluctuations resulted in an increase to income before income taxes totaling approximately \$3.8 million.

Net premiums grew by \$136.3 million, or 15.8%, and \$191.4 million, or 28.4%, in 2008 and 2007, respectively. The premium growth in 2008 was primarily the result of increases in the volume of business in Australia, Korea, Taiwan and Japan, collectively adding approximately \$121.4 million to net premiums compared to 2007. Growth in Australia was driven by broad-based success in both the individual and group markets. Growth in premium volume in Korea was driven by an increase in volume from existing clients. In Taiwan and Japan premium increases were primarily related to isolated new clients. The premium growth in 2007 was primarily the result of increases in the volume of business in Australia, Japan, and Korea, collectively adding approximately \$152.0 million to net premiums compared to 2006. Growth in Australia was driven by broad-based success in both the individual and group markets. Growth in premium volume in Japan was primarily related to one new client and in Korea premium growth was driven by an increase in volume from existing clients. The segment

added new business production, measured by face amount of insurance in force, of \$31.9 billion, \$30.1 billion and \$57.6 billion during 2008, 2007 and 2006, respectively. Premium levels are significantly influenced by large transactions and reporting practices of ceding companies and can fluctuate from period to period.

During 2008, there was an unfavorable foreign currency fluctuation, particularly in the Korean won, offset by a favorable fluctuation in the Japanese yen, against the U.S. dollar. The overall effect of changes in local Asia Pacific segment currencies was a decrease in 2008 net premiums of approximately \$5.0 million compared to 2007. During 2007, there was a favorable foreign currency fluctuation, particularly in the Australian dollar, the New Zealand dollar, and the Japanese yen, against the U.S. dollar. The overall effect of the changes in local Asia Pacific segment currencies was an increase in 2007 net premiums of approximately \$45.1 million compared to 2006.

A portion of the net premiums for the segment, in each period presented, relates to reinsurance of critical illness coverage. This coverage provides a benefit in the event of the diagnosis of a pre-defined critical illness. Reinsurance of critical illness in the Asia Pacific operations is offered primarily in South Korea, Australia and Hong Kong. Net premiums earned from this coverage totaled \$213.8 million, \$189.8 million, and \$140.2 million in 2008, 2007 and 2006, respectively.

Net investment income increased \$11.0 million, or 30.3%, and \$8.3 million, or 29.5%, in 2008 and 2007, respectively. These increases can be attributed to growth in the invested asset base and increased portfolio return. Investment income and investment related gains and losses are allocated to the various operating segments based on average assets and related capital levels deemed appropriate to support the segment business volumes. Investment performance varies with the composition of investments and the relative allocation of capital to the operating segments.

Other revenues increased by \$3.1 million, or 34.0%, and \$2.7 million, or 42.3%, in 2008 and 2007, respectively. The primary source of other revenues is fees from financial reinsurance treaties in Japan. Beginning in 2007, the Asia Pacific-based financial reinsurance treaties are included in the Company's Asia Pacific segment with reimbursement to the U.S. segment for costs incurred by U.S. personnel. At December 31, 2008 and 2007, the amount of reinsurance assumed from client companies, as measured by pre-tax statutory surplus, was \$0.6 billion and \$0.7 billion, respectively. Fees earned from this business can vary significantly depending on the size of the transactions and the timing of their completion and therefore can fluctuate from period to period.

Loss ratios for this segment were 79.9%, 80.1% and 76.2% for 2008, 2007 and 2006, respectively. The decrease in the loss ratio in 2008 when compared with 2007 can be attributed to all locations within the segment with the exception of Korea, where benefits increased as a percentage of net premiums. The increase in the 2007 loss ratio compared to 2006 was attributable primarily to loss experience in Korea and increased policy reserves in Japan related to one new client. Loss ratios will fluctuate due to timing of client company reporting, variations in the mixture of business being reinsured and the relative maturity of the business.

Policy acquisition costs and other insurance expenses as a percentage of net premiums were 10.7%, 11.5% and 13.9% for 2008, 2007 and 2006, respectively. The ratio of policy acquisition costs and other insurance expenses as a percentage of net premiums should generally decline as the business matures; however, the percentage does fluctuate periodically due to timing of client company reporting and variations in the mixture of business being reinsured.

Other operating expenses increased \$9.5 million, or 16.9%, and \$13.9 million, or 32.9%, in 2008 and 2007, respectively. Other operating expenses as a percentage of net premiums totaled 6.6%, 6.5% and 6.3% in 2008, 2007 and 2006, respectively. The timing of premium flows and the level of costs associated with the entrance into and development of new markets in the growing Asia Pacific segment may cause other operating expenses as a percentage of net premiums to fluctuate over periods of time.

CORPORATE AND OTHER

Corporate and Other revenues include investment income from invested assets not allocated to support segment operations and undeployed proceeds from the Company's capital raising efforts, in addition to unallocated investment related gains and losses. Corporate expenses consist of the offset to capital charges allocated to the operating segments within the policy acquisition costs and other insurance expenses line item, unallocated overhead and executive costs, and interest expense related to debt and the \$225.0 million of 5.75% Company-obligated mandatorily redeemable trust preferred securities. Additionally, Corporate and Other includes results from RTP, a wholly-owned subsidiary that develops and markets technology solutions for the insurance industry, the Company's Argentine privatized pension business, which is currently in run-off, the investment income and expense associated with the Company's collateral finance facility and an insignificant amount of direct insurance operations in Argentina.

FOR THE YEAR ENDED DECEMBER 31,
(dollars in thousands)

	2008	2007	2006
Revenues:			
Net premiums	\$ 6,816	\$ 4,030	\$ 1,937
Investment income, net of related expenses	78,838	96,577	56,147
Investment related gains (losses), net	(39,217)	(12,522)	4,014
Other revenues	4,346	8,867	7,826
Total revenues	<u>50,783</u>	<u>96,952</u>	<u>69,924</u>
Benefits and expenses:			
Claims and other policy benefits (income)	988	43	(156)
Interest credited	--	--	1,025
Policy acquisition costs and other insurance expenses (income)	(46,124)	(35,305)	(36,356)
Other operating expenses	30,192	45,387	50,508
Interest expense	76,161	76,906	62,033
Collateral finance facility expense	28,723	52,031	26,428
Total benefits and expenses	<u>89,940</u>	<u>139,062</u>	<u>103,482</u>
Loss before income taxes	<u>\$ (39,157)</u>	<u>\$ (42,110)</u>	<u>\$ (33,558)</u>

Loss before income taxes decreased by \$3.0 million, or 7.0%, and increased by \$8.6 million, or 25.5%, in 2008 and 2007, respectively. The decrease in the loss before income taxes in 2008 is primarily due to a \$26.7 million increase in investment related losses, due to investment impairments, a \$17.7 million decrease in investment income, largely offset by a \$23.3 million decrease in collateral finance facility expense, a \$10.8 million decrease in policy acquisition costs and other insurance expenses and a \$15.2 million decrease in other operating expenses. The increase in loss before income taxes in 2007 is primarily due to a \$14.9 million increase in interest expense, a \$25.6 million increase in collateral finance facility expense, and a \$16.5 million decrease in investment related gains, offset by a \$40.4 million increase in net investment income and a decrease of \$5.1 million in other operating expenses.

Total revenues decreased \$46.2 million, or 47.6%, and increased \$27.0 million, or 38.7%, in 2008 and 2007, respectively. The decrease in revenues in 2008 was due to a \$17.7 million decrease in net investment income largely due to lower investment returns on floating rate investments used to fund the Company's collateral finance facility and a \$26.7 million increase in investment related losses due to realized investment losses as compared to the recognition of a \$10.5 million currency translation loss recognized in 2007 related to the Company's decision to sell its direct insurance operations in Argentina. The increase in revenues in 2007 is due to an increase in investment income of \$40.4 million primarily related to the Company's investment of the proceeds from its collateral finance facility along with the investment of the proceeds from the issuance of \$300 million in senior notes in March 2007. Investment related losses in 2007 reflect the recognition of the aforementioned \$10.5 million currency translation loss related to the Company's decision to sell its direct insurance operations in Argentina.

Total benefits and expenses decreased \$49.1 million or 35.3%, and increased \$35.6 million or 34.4%, in 2008 and 2007, respectively. The decrease in total benefits and expenses in 2008 was primarily due to a \$23.3 million decrease in collateral finance facility expense due to substantially reduced variable interest rates in the current year. Additionally, other operating expenses decreased \$15.2 million in 2008 primarily related to a decrease in equity based compensation; policy acquisition costs and other insurance expenses decreased \$10.8 million, primarily due to increased charges to the operating segments for the use of capital. The increase in 2007 is due to a \$25.6 million increase in collateral finance facility expense which reflects a full year of expense in 2007 compared to six months in 2006. Interest expense also increased \$14.9 million related to a higher level of debt outstanding during 2007 due to the issuance of the aforementioned \$300 million in senior notes along with accrued interest expense associated with certain tax positions, as required under FIN 48, which contributed \$3.9 million to the increase in 2007. These increases in 2007 were slightly offset by a decrease in other operating expenses of \$5.1 million primarily due to lower expenses related to equity based compensation plans.

Discontinued Operations

Since December 31, 1998, the Company has formally reported its accident and health division as a discontinued operation. The accident and health business was placed into run-off, and all treaties were terminated at the earliest possible date. Notice was given to all cedants and retrocessionaires that all treaties were being cancelled at the expiration of their terms. The nature of the underlying risks is such that the claims may take several years to reach the reinsurers involved.

Thus, the Company expects to pay claims over a number of years as the level of business diminishes. The Company will report a loss to the extent claims exceed established reserves.

At the time it was accepting accident and health risks, the Company directly underwrote certain business provided by brokers using its own staff of underwriters. Additionally, it participated in pools of risks underwritten by outside managing general underwriters, and offered high level common account and catastrophic protection coverages to other reinsurers and retrocessionaires. Types of risks covered included a variety of medical, disability, workers' compensation carve-out, personal accident, and similar coverages.

The reinsurance markets for several accident and health risks, most notably involving workers' compensation carve-out and personal accident business, have been quite volatile over the past several years. Certain programs are alleged to have been inappropriately underwritten by third party managers, and some of the reinsurers and retrocessionaires involved have alleged material misrepresentation and non-disclosures by the underwriting managers. In particular, over the past several years a number of disputes have arisen in the accident and health reinsurance markets with respect to London market personal accident excess of loss reinsurance programs that involved alleged "manufactured" claims spirals designed to transfer claims losses to higher-level reinsurance layers. While the Company did not underwrite workers' compensation carve-out business directly, it did offer certain indirect high-level common account coverages to other reinsurers and retrocessionaires, which could result in exposure to workers' compensation carve-out risks. The Company and other reinsurers and retrocessionaires involved have raised substantial defenses upon which to contest claims arising from these coverages, including defenses based upon the failure of the ceding company to disclose the existence of manufactured claims spirals, inappropriate or unauthorized underwriting procedures and other defenses. As a result, there have been a significant number of claims for rescission, arbitration, and litigation among a number of the parties involved in these various coverages. This has had the effect of significantly slowing the reporting of claims between parties, as the various outcomes of a series of arbitrations and similar actions affect the extent to which higher level reinsurers and retrocessionaires may ultimately have exposure to claims.

The loss from discontinued accident and health operations, net of income taxes, decreased to \$11.0 million in 2008 from \$14.4 million in 2007 due primarily to fewer settlements arising out of previously contested matters. The comparable loss in 2006 was \$5.1 million.

The calculation of the claim reserve liability for the entire portfolio of accident and health business requires management to make estimates and assumptions that affect the reported claim reserve levels. Management must make estimates and assumptions based on historical loss experience, changes in the nature of the business, anticipated outcomes of claim disputes and claims for rescission, anticipated outcomes of arbitrations, and projected future premium run-off, all of which may affect the level of the claim reserve liability. The accident and health business generated claims higher than those anticipated and therefore, during the fourth quarter of 2008, the Company increased the claim reserve liability related to its discontinued accident and health operations by \$9.0 million. The consolidated statements of income for all periods presented reflect this line of business as a discontinued operation. Revenues associated with discontinued operations, which are not reported on a gross basis in the Company's consolidated statements of income, totaled \$2.1 million, \$2.0 million and \$2.7 million for 2008, 2007 and 2006, respectively.

Deferred Acquisition Costs

DAC related to interest-sensitive life and investment-type contracts are amortized over the lives of the contracts, in relation to the present value of estimated gross profits ("EGP") from mortality, investment income, and expense margins. The EGP for asset-intensive products include the following components: (1) estimates of fees charged to policyholders to cover mortality, surrenders and maintenance costs; (2) expected interest rate spreads between income earned and amounts credited to policyholder accounts; and (3) estimated costs of administration. EGP is also reduced by the Company's estimate of future losses due to defaults in fixed maturity securities as well as the change in reserves for embedded derivatives. DAC is sensitive to changes in assumptions regarding these EGP components, and any change in such an assumption could have an effect on the Company's profitability.

The Company periodically reviews the EGP valuation model and assumptions so that the assumptions reflect a view of the future believed to be reasonable. Two assumptions are considered to be most significant: (1) estimated interest spread, and (2) estimated future policy lapses. The following table reflects the possible change that would occur in a given year if assumptions, as a percentage of current deferred policy acquisition costs related to asset-intensive products (\$1,341.2 million as of December 31, 2008), are changed as illustrated:

<u>Quantitative Change in Significant Assumptions:</u>	<u>One-Time Increase in DAC</u>	<u>One-Time Decrease in DAC</u>
Estimated interest spread increasing (decreasing) 25 basis points from the current spread	1.53%	(1.73%)
Estimated future policy lapse rates decreasing (increasing) 20% on a permanent basis (including surrender charges)	0.43%	(0.36%)

In general, a change in assumption that improves the Company's expectations regarding EGP is going to have the effect of deferring the amortization of DAC into the future, thus increasing earnings and the current DAC balance. DAC can be no greater than the initial DAC balance plus interest and would be subject to recoverability testing which is ignored for purposes of this analysis. Conversely, a change in assumption that decreases EGP will have the effect of speeding up the amortization of DAC, thus reducing earnings and lowering the DAC balance. The Company also adjusts DAC to reflect changes in the unrealized gains and losses on available-for-sale fixed maturity securities since this affects EGP. This adjustment to DAC is reflected in accumulated other comprehensive income.

The DAC associated with the Company's non-asset-intensive business is less sensitive to changes in estimates for investment yields, mortality and lapses. In accordance with Statement of Financial Accounting Standards No. 60, "Accounting and Reporting by Insurance Enterprises," the estimates include provisions for the risk of adverse deviation and are not adjusted unless experience significantly deteriorates to the point where a premium deficiency exists.

The following table displays DAC balances for asset-intensive business and non-asset-intensive business by segment as of December 31, 2008:

<u>(dollars in thousands)</u>	<u>Asset-Intensive DAC</u>	<u>Non-Asset-Intensive DAC</u>	<u>Total DAC</u>
U.S.	\$ 1,341,187	\$ 1,266,787	\$ 2,607,974
Canada	--	259,524	259,524
Europe & South Africa	--	414,709	414,709
Asia Pacific	--	326,411	326,411
Corporate and Other	--	1,716	1,716
Total	\$ 1,341,187	\$ 2,269,147	\$ 3,610,334

As of December 31, 2008, the Company estimates that approximately 88.9% of its DAC balance is collateralized by surrender fees due to the Company and the reduction of policy liabilities, in excess of termination values, upon surrender or lapse of a policy.

Liquidity and Capital Resources

Current Market Environment

During 2008, the capital and credit markets experienced extreme volatility and disruption. Since September 2008, the volatility and disruptions intensified significantly with a severity and speed that was not anticipated. This was driven by, among other things, heightened concerns over conditions in the U.S. housing and mortgage markets, the availability and cost of credit, the health of U.S. and global financial institutions, a decline in business and consumer confidence and increased unemployment. Turmoil in the U.S. and global financial markets resulted in bankruptcies, consolidations and government interventions.

The recent market conditions have adversely affected the Company's results of operations and financial position. During the third quarter of 2008, the Company incurred significant investment related losses as a result of impairments. In addition, results of operations in 2008 reflected a significant increase in unrealized losses due to an unfavorable change in the value of embedded derivatives which are a direct result of widening credit spreads and changes in the risk-free rates in the U.S. debt markets. Additionally, gross unrealized losses in the Company's fixed maturity and equity securities available-for-sale increased significantly to \$1,416.4 million at December 31, 2008 from \$198.2 million at December 31, 2007.

The Company continues to be in a position to hold its investment securities until recovery, provided it remains comfortable with the credit of the issuer. The Company's operations do not rely on short-term funding or commercial paper, and therefore, to date, it has experienced no liquidity pressure, nor does it anticipate such pressure in the foreseeable future.

The Company has selectively reduced its exposure to distressed security issuers through security sales. In addition, the U.S. government, and governments in many foreign markets where the Company operates, have responded to address market imbalances and taken meaningful steps intended to eventually restore confidence. Although management believes the Company's current capital base is adequate to support its business at current operating levels, it continues to monitor new business opportunities and any associated new capital needs that could arise from the changing financial landscape.

The Holding Company

RGA is an insurance holding company whose primary uses of liquidity include, but are not limited to, the immediate capital needs of its operating companies associated with the Company's primary businesses, dividends paid to its shareholders, interest payments on its indebtedness (See Note 15 - "Debt and Trust Preferred Securities" in the Notes to Consolidated Financial Statements), and repurchases of RGA common stock under a board of directors approved plan. The primary sources of RGA's liquidity include proceeds from its capital raising efforts, interest income on undeployed corporate investments, interest income received on surplus notes with RGA Reinsurance and RCM, and dividends from operating subsidiaries. As the Company continues its expansion efforts, RGA will continue to be dependent upon these sources of liquidity.

The Company believes that it has sufficient liquidity, for the next 12 months, to fund its cash needs under various scenarios that include the potential risk of the early recapture of a reinsurance treaty by the ceding company and significantly higher than expected death claims. Historically, the Company has generated positive net cash flows from operations. However, in the event of significant unanticipated cash requirements beyond normal liquidity, the Company has multiple liquidity alternatives available based on market conditions and the amount and timing of the liquidity need. These options include borrowings under committed credit facilities, secured borrowings, the ability to issue long-term debt, preferred securities or common equity and, if necessary, the sale of invested assets subject to market conditions.

On November 4, 2008, RGA completed a public offering of 10,235,000 shares of RGA class A common stock, \$0.01 par value per share. The price per share was \$33.89, and the aggregate value of the transaction was approximately \$346.9 million. The public offering was made in conjunction with the decision by the Standard & Poor's Corporation to include the Company in the S&P MidCap 400 Index. The Company expects to use the net proceeds from the offering to pursue reinsurance opportunities and for general corporate purposes.

RGA has repurchased shares in the open market in the past primarily to satisfy obligations under its stock option program. In 2001, the board of directors approved a repurchase program authorizing RGA to purchase up to \$50 million of its shares of stock, as conditions warrant. During 2002, RGA purchased approximately 0.2 million shares of treasury stock under the program at an aggregate cost of \$6.6 million. The common shares repurchased were placed into treasury to be used for general corporate purposes.

See Note 3 - "Stock Transactions" in the Notes to Consolidated Financial Statements for additional information regarding the Company's stock transactions.

Statutory Dividend Limitations

RCM and RGA Reinsurance are subject to Missouri statutory provisions that restrict the payment of dividends. They may not pay dividends in any 12-month period in excess of the greater of the prior year's statutory net gain from operations or 10% of statutory capital and surplus at the preceding year-end, without regulatory approval. The applicable statutory provisions only permit an insurer to pay a shareholder dividend from unassigned surplus. Any dividends paid by RGA Reinsurance would be paid to RCM, its parent company, which in turn has restrictions related to its ability to pay dividends to RGA. The assets of RCM consist primarily of its investment in RGA Reinsurance. As of January 1, 2009, RCM and RGA Reinsurance could pay maximum dividends, without prior approval, of approximately \$110.4 million and \$110.4 million, respectively. The MDI allows RCM to pay a dividend to RGA to the extent RCM received the dividend from RGA Reinsurance, without limitation related to the level of unassigned surplus. Dividend payments from other subsidiaries are subject to regulations in the jurisdiction of domicile.

The dividend limitations for RCM and RGA Reinsurance are based on statutory financial results. Statutory accounting practices differ in certain respects from accounting principles used in financial statements prepared in conformity with GAAP. The significant difference relates primarily to deferred acquisition costs, deferred income taxes, required investment reserves, reserve calculation assumptions, and surplus notes.

Valuation of Life Insurance Policies Model Regulation (Regulation XXX)

The Valuation of Life Insurance Policies Model Regulation, commonly referred to as Regulation XXX, was implemented in the U.S. for various types of life insurance business beginning January 1, 2000. Regulation XXX significantly increased the level of reserves that U.S. life insurance and life reinsurance companies must hold on their statutory financial statements for various types of life insurance business, primarily certain level premium term life products. The reserve levels required under Regulation XXX increase over time and are normally in excess of reserves required under GAAP. In situations where primary insurers have reinsured business to reinsurers that are unlicensed and unaccredited in the U.S., the reinsurer must provide collateral equal to its reinsurance reserves in order for the ceding company to receive statutory financial statement credit. Reinsurers have historically utilized letters of credit for the benefit of the ceding company, or have placed assets in trust for the benefit of the ceding company as the primary forms of collateral. The increasing nature of the statutory reserves under Regulation XXX will likely require increased levels of collateral from reinsurers in the future to the extent the reinsurer remains unlicensed and unaccredited in the U.S.

In order to manage the effect of Regulation XXX on its statutory financial statements, RGA Reinsurance has retroceded a majority of Regulation XXX reserves to unaffiliated and affiliated unlicensed reinsurers. RGA Reinsurance's statutory capital may be significantly reduced if the unaffiliated or affiliated reinsurer is unable to provide the required collateral to support RGA Reinsurance's statutory reserve credits and RGA Reinsurance cannot find an alternative source for collateral.

Shareholder Dividends

Historically, RGA has paid quarterly dividends ranging from \$0.027 per share in 1993 to \$0.09 per share in 2008. All future payments of dividends are at the discretion of RGA's board of directors and will depend on the Company's earnings, capital requirements, insurance regulatory conditions, operating conditions, and such other factors as the board of directors may deem relevant. The amount of dividends that RGA can pay will depend in part on the operations of its reinsurance subsidiaries. Under certain circumstances, RGA may be contractually prohibited from paying dividends on common stock, see discussion below in "Debt and Trust Preferred Securities".

Debt and Trust Preferred Securities

Certain of the Company's debt agreements contain financial covenant restrictions related to, among others, liens, the issuance and disposition of stock of restricted subsidiaries, minimum requirements of net worth, maximum ratios of debt to capitalization and change in control provisions. A material ongoing covenant default could require immediate payment of the amount due, including principal, under the various agreements. Additionally, the Company's debt agreements contain cross-default covenants, which would make outstanding borrowings immediately payable in the event of a material covenant default under any of the agreements which remains uncured, including, but not limited to, non-payment of indebtedness when due for an amount of \$100.0 million, bankruptcy proceedings, and any event which results in the acceleration of the maturity of indebtedness. The facility fee and interest rate for the Company's credit facilities is based on its senior long-term debt ratings. A decrease in those ratings could result in an increase in costs for the credit facilities. As of December 31, 2008, the Company had \$918.2 million in outstanding borrowings under its short- and long-term debt agreements and was in compliance with all covenants under those agreements. The ability of the Company to make debt principal and interest payments depends primarily on the earnings and surplus of subsidiaries, investment earnings on undeployed capital proceeds, and the Company's ability to raise additional funds.

In September 2007, the Company entered into a five-year, syndicated revolving credit facility with an overall capacity of \$750.0 million, replacing its \$600.0 million five-year revolving credit facility, which was scheduled to mature in September 2010. The Company may borrow cash and may obtain letters of credit in multiple currencies under the facility. Interest on borrowings is based either on the prime, federal funds or LIBOR rates plus a base rate margin defined in the agreement. Fees payable for the credit facility depend upon the Company's senior unsecured long-term debt rating. As of December 31, 2008, the Company had no cash borrowings outstanding and \$389.7 million in issued, but undrawn, letters of credit under this new facility. The credit agreement is unsecured but contains affirmative, negative and financial covenants customary for financings of this type. The Company's other credit facilities consist of a £15.0 million credit facility that expires in May 2010, with an outstanding balance of £15.0 million, or \$21.9 million, as of December 31, 2008, and an A\$50.0 million Australian credit facility that expires in March 2011, with no outstanding balance as of December 31, 2008.

In March 2007, RGA issued 5.625% Senior Notes due March 15, 2017 with a face amount of \$300.0 million. These senior notes have been registered with the Securities and Exchange Commission. The net proceeds from the offering were approximately \$295.3 million, a portion of which were used to pay down \$50.0 million of indebtedness under a U.S. bank

credit facility. The remaining net proceeds are designated for general corporate purposes. Capitalized issue costs were approximately \$2.4 million.

As of December 31, 2008, the average interest rate on long-term and short-term debt outstanding, excluding the Company-obligated mandatorily redeemable preferred securities of subsidiary trust holding solely junior subordinated debentures of the Company ("Trust Preferred Securities"), was 6.39% compared to 6.40% at the end of 2007. Interest is expensed on the face amount, or \$225.0 million, of the Trust Preferred Securities at a rate of 5.75%.

Based on the historic cash flows and the current financial results of the Company, subject to any dividend limitations which may be imposed by various insurance regulations, management believes RGA's cash flows from operating activities, together with undeployed proceeds from its capital raising efforts, including interest and investment income on those proceeds, interest income received on surplus notes with RGA Reinsurance and RCM, and its ability to raise funds in the capital markets, will be sufficient to enable RGA to make dividend payments to its shareholders, make interest payments on its senior indebtedness, trust preferred securities and junior subordinated notes, repurchase RGA common stock under the board of director approved plan, and meet its other obligations for at least the next 12 months.

A general economic downturn or a downturn in the equity and other capital markets could adversely affect the market for many annuity and life insurance products and RGA's ability to raise new capital. Because the Company obtains substantially all of its revenues through reinsurance arrangements that cover a portfolio of life insurance products, as well as annuities, its business would be harmed if the market for annuities or life insurance was adversely affected.

Collateral Finance Facility

On June 28, 2006, RGA's subsidiary, Timberlake Financial, issued \$850.0 million of Series A Floating Rate Insured Notes due June 2036 in a private placement. The notes were issued to fund the collateral requirements for statutory reserves required by the U.S. Valuation of Life Policies Model Regulation (commonly referred to as Regulation XXX) on specified term life insurance policies reinsured by RGA Reinsurance. Proceeds from the notes, along with a \$112.8 million direct investment by the Company, collateralize the notes and are not available to satisfy the general obligations of the Company. As of December 31, 2008, the Company held assets in trust of \$875.7 million for this purpose. In addition, the Company held \$9.7 million in custody as of December 31, 2008. Interest on the notes accrues at an annual rate of 1-month LIBOR plus a base rate margin, payable monthly and totaled \$28.7 million and \$52.0 million in 2008 and 2007, respectively. The payment of interest and principal on the notes is insured through a financial guaranty insurance policy with a third party. The notes represent senior, secured indebtedness of Timberlake Financial with no recourse to RGA or its other subsidiaries. Timberlake Financial will rely primarily upon the receipt of interest and principal payments on a surplus note and dividend payments from its wholly-owned subsidiary, Timberlake Re, a South Carolina captive insurance company, to make payments of interest and principal on the notes. The ability of Timberlake Re to make interest and principal payments on the surplus note and dividend payments to Timberlake Financial is contingent upon South Carolina regulatory approval and the performance of specified term life insurance policies with guaranteed level premiums retroceded by RGA's subsidiary, RGA Reinsurance, to Timberlake Re.

In accordance with FASB Interpretation No. 46(r), "Consolidation of Variable Interest Entities – An Interpretation of ARB No. 51," Timberlake Financial is considered to be a variable interest entity and the Company is deemed to hold the primary beneficial interest. As a result, Timberlake Financial has been consolidated in the Company's financial statements. The Company's consolidated balance sheets include the assets of Timberlake Financial recorded as fixed maturity investments and other invested assets, which consists of restricted cash and cash equivalents, with the liability for the notes recorded as collateral finance facility. The Company's consolidated statements of income include the investment return of Timberlake Financial as investment income and the cost of the facility is reflected in collateral finance facility expense.

Reinsurance Operations

Reinsurance agreements, whether facultative or automatic, may provide for recapture rights on the part of the ceding company. Recapture rights permit the ceding company to reassume all or a portion of the risk formerly ceded to the reinsurer after an agreed-upon period of time, generally 10 years, or in some cases due to changes in the financial condition or ratings of the reinsurer. Recapture of business previously ceded does not affect premiums ceded prior to the recapture of such business, but would reduce premiums in subsequent periods.

Assets in Trust

Some treaties give ceding companies the right to request that the Company place assets in trust for the benefit of the cedant to support statutory reserve credits in the event of a downgrade of the Company's ratings to specified levels. As of December 31, 2008, these treaties had approximately \$751.5 million in statutory reserves. Assets placed in trust continue to

be owned by the Company, but their use is restricted based on the terms of the trust agreement. Securities with an amortized cost of \$1,217.6 million were held in trust for the benefit of certain subsidiaries of the Company to satisfy collateral requirements for reinsurance business at December 31, 2008. Additionally, securities with an amortized cost of \$1,560.1 million as of December 31, 2008 were held in trust to satisfy collateral requirements under certain third-party reinsurance treaties. Under certain conditions, RGA may be obligated to move reinsurance from one RGA subsidiary company to another RGA subsidiary or make payments under the treaty. These conditions include change in control or ratings of the subsidiary, insolvency, nonperformance under a treaty, or loss of reinsurance license of such subsidiary. If RGA was ever required to perform under these obligations, the risk to the consolidated company under the reinsurance treaties would not change; however, additional capital may be required due to the change in jurisdiction of the subsidiary reinsuring the business and may create a strain on liquidity.

Proceeds from the notes issued by Timberlake Financial and the Company's direct investment in Timberlake Financial have been deposited into a series of trust accounts as collateral and are not available to satisfy the general obligations of the Company. As of December 31, 2008 the Company held deposits in trust of \$875.7 million for this purpose, which is not included above. In addition, the Company held \$9.7 million in custody as of December 31, 2008. See "Collateral Finance Facility" above for additional information on the Timberlake notes.

Guarantees

RGA has issued guarantees to third parties on behalf of its subsidiaries' performance for the payment of amounts due under certain credit facilities, reinsurance treaties and office lease obligations, whereby if a subsidiary fails to meet an obligation, RGA or one of its other subsidiaries will make a payment to fulfill the obligation. In limited circumstances, treaty guarantees are granted to ceding companies in order to provide them additional security, particularly in cases where RGA's subsidiary is relatively new, unrated, or not of a significant size, relative to the ceding company. Liabilities supported by the treaty guarantees, before consideration for any legally offsetting amounts due from the guaranteed party, totaled \$273.6 million and \$325.1 million as of December 31, 2008 and 2007, respectively, and are reflected on the Company's consolidated balance sheets in future policy benefits. Potential guaranteed amounts of future payments will vary depending on production levels and underwriting results. Guarantees related to trust preferred securities and credit facilities provide additional security to third parties should a subsidiary fail to make principal and/or interest payments when due. As of December 31, 2008, RGA's exposure related to these guarantees was \$159.0 million. RGA has issued payment guarantees on behalf of two of its subsidiaries in the event the subsidiaries fail to make payment under their office lease obligations, the exposure of which was \$4.2 million as of December 31, 2008.

In addition, the Company indemnifies its directors and officers as provided in its charters and by-laws. Since this indemnity generally is not subject to limitation with respect to duration or amount, the Company does not believe that it is possible to determine the maximum potential amount due under this indemnity in the future.

Balance Sheet Arrangements

The Company has commitments to fund investments in limited partnerships in the amount of \$124.6 million at December 31, 2008. The Company anticipates that the majority of these amounts will be invested over the next five years, however, contractually these commitments could become due at the request of the counterparties. Investments in limited partnerships are carried at cost after consideration of any other-than-temporary impairments and included in other invested assets in the consolidated balance sheets.

In order to reduce the level of statutory reserves, primarily in the U.S. and Canada, which may be significantly in excess of reserves required on an economic basis, the Company has entered into various reinsurance agreements with affiliated and unaffiliated reinsurers. In order for the Company to receive statutory reserve credit, the reinsurer must provide collateral for the benefit of the Company, usually in the form of assets in trust or letters of credit.

The Company has not engaged in trading activities involving non-exchange-traded contracts reported at fair value, nor has it engaged in relationships or transactions with persons or entities that derive benefits from their non-independent relationship with the Company.

Cash Flows

The Company's principal cash inflows from its reinsurance operations are premiums and deposit funds received from ceding companies. The primary liquidity concern with respect to these cash flows is early recapture of the reinsurance contract by the ceding company and lapses of annuity products reinsured by the Company. The Company's principal cash inflows from its investing activities result from investment income, maturity and sales of invested assets, and repayments of

principal. The primary liquidity concern with respect to these cash inflows relates to the risk of default by debtors and interest rate volatility. The Company manages these risks very closely. See “Investments” and “Interest Rate Risk” below.

Additional sources of liquidity to meet unexpected cash outflows in excess of operating cash inflows and current cash and equivalents on hand include selling short-term investments or fixed maturity securities and drawing funds under existing credit facilities, under which the Company had availability of \$395.4 million as of December 31, 2008. The Company also has \$751.6 million of funds available through collateralized borrowings from the Federal Home Loan Bank of Des Moines (“FHLB”).

The Company's principal cash outflows primarily relate to the payment of claims liabilities, interest credited, operating expenses, income taxes, and principal and interest under debt and other financing obligations. The Company seeks to limit its exposure to loss on any single insured and to recover a portion of benefits paid by ceding reinsurance to other insurance enterprises or reinsurers under excess coverage and coinsurance contracts (See Note 2, "Summary of Significant Accounting Policies" of the Notes to Consolidated Financial Statements). The Company performs annual financial reviews of its retrocessionaires to evaluate financial stability and performance. The Company has never experienced a material default in connection with retrocession arrangements, nor has it experienced any difficulty in collecting claims recoverable from retrocessionaires; however, no assurance can be given as to the future performance of such retrocessionaires or as to the recoverability of any such claims. The Company's management believes its current sources of liquidity are adequate to meet its cash requirements for the next 12 months.

The financial information presented has been revised to reflect the impact of the restatement of the Company's consolidated statement of cash flows for the year ended December 31, 2007, more fully described in Note 2 – “Summary of Significant Accounting Policies” in the Notes to Consolidated Financial Statements.

The Company's net cash flows provided by operating activities for the years ended December 31, 2008, 2007 and 2006, were \$727.0 million, \$1,099.3 million and \$846.2 million, respectively. Cash flows from operating activities are affected by the timing of premiums received, claims paid and working capital changes. Operating cash decreased \$372.3 million during 2008 as cash from premiums increased \$357.2 million but was more than offset by decreased investment income of \$40.7 million and higher operating net cash outlays of \$688.8 million. During 2007, operating cash increased \$253.1 million as cash from premiums and investment income increased \$660.5 million and \$125.3 million, respectively, and was largely offset by higher operating net cash outlays of \$532.7 million. The Company believes the short-term cash requirements of its business operations will be sufficiently met by the positive cash flows generated. Additionally, the Company believes it maintains a high-quality fixed maturity portfolio with positive liquidity characteristics. These securities are available-for-sale and could be sold if necessary to meet the Company's short- and long-term obligations, subject to market conditions.

Net cash used in investing activities was \$1,073.2 million, \$976.9 million and \$1,634.4 million in 2008, 2007 and 2006, respectively. Changes in cash used in investing activities primarily relate to the management of the Company's investment portfolios and the investment of excess cash generated by operating and financing activities. The increase in net cash used in investing activities in 2008 was due to the investment of proceeds from excess deposits on universal life and other investment type policies and contracts. The decrease in net cash used in investing activities in 2007 reflects the investment of approximately \$837.5 million of net proceeds from the Company's collateral finance facility in 2006. Cash used in investing activities in 2007 includes the investment of approximately \$295.3 million net proceeds from the Company's issuance of senior notes in 2007.

Net cash provided by financing activities was \$841.2 million, \$116.6 million and \$817.9 million in 2008, 2007 and 2006, respectively. Changes in cash provided by financing activities primarily relate to the issuance of equity or debt securities, borrowings or payments under the Company's existing credit agreements, collateral finance facility activity, treasury stock activity and excess deposits (payments) under investment-type contracts.

Contractual Obligations

The following table displays the Company's contractual obligations, including obligations arising from its reinsurance business (in millions):

Payment Due by Period

	Payment Due by Period				
	Total	Less than 1 Year	1 - 3 Years	4 - 5 Years	After 5 Years
Future policy benefits ¹	\$(198.2)	\$(760.3)	\$(1,322.6)	\$(1,058.0)	\$2,942.7
Interest-sensitive contract liabilities ²	12,025.6	772.8	1,566.5	1,632.6	8,053.7
Long - term debt, including interest	2,647.0	58.9	337.2	87.8	2,163.1
Fixed Rate Trust Pref Sec., including interest ³	771.6	12.9	25.9	25.9	706.9
Collateral finance facility, including interest	923.3	6.5	13.1	85.5	818.2
Other policy claims and benefits	1,923.0	1,923.0	--	--	--
Operating leases	36.9	9.7	12.2	8.5	6.5
Limited partnerships	124.6	124.6	--	--	--
Structured investment contracts	8.5	8.5	--	--	--
Payables for collateral received under derivative transactions	159.8	159.8	--	--	--
Total	\$18,422.1	\$2,316.4	\$632.3	\$782.3	\$14,691.1

¹Future policyholder benefits include liabilities related primarily to the Company's reinsurance of life and health insurance products. Amounts presented in the table above represent the estimated obligations as they become due both to and from ceding companies for benefits under such contracts including future premiums, allowances and other amounts due as the result of assumptions related to mortality, morbidity, policy lapse and surrender as appropriate to the respective product. The expected premiums exceed expected policy benefit payments and allowances, resulting in negative obligations.

²Interest-sensitive contract liabilities include amounts related to the Company's reinsurance of asset-intensive products, primarily deferred annuities and corporate-owned life insurance. Amounts presented in the table above represent the estimated obligations as they become due both to and from ceding companies relating to activity of the underlying policyholders. Amounts presented in the table above represent the estimated obligations under such contracts undiscounted as to interest, including assumptions related to surrenders, withdrawals, premium persistency, partial withdrawals, surrender charges, annuitizations, mortality, future interest credited rates and policy loan utilization. The sum of the obligations shown for all years in the table of \$12.0 billion exceeds the liability amount of \$7.7 billion included on the consolidated balance sheet principally due to the lack of discounting and accounting for separate account contracts.

³Assumes that all securities will be held until the stated maturity date of March 18, 2051. For additional information on these securities, see "Company-Obligated Mandatorily Redeemable Preferred Securities of Subsidiary Trust Holding Solely Junior Subordinated Debentures of the Company" in Note 2 – "Summary of Significant Accounting Policies" in the Notes to Consolidated Financial Statements.

Excluded from the table above are deferred income tax liabilities, unrecognized tax benefits, and accrued interest of \$310.4 million, \$206.7 million, and \$36.2 million, respectively, for which the Company cannot reliably determine the timing of payment. Current income tax payable is also excluded from the table.

The net funded status of the Company's pension and other postretirement liabilities included within other liabilities has been excluded from the amounts presented in the table above. As of December 31, 2008, the Company had a net unfunded balance of \$40.0 million related to pension and other postretirement liabilities. See Note 10 – "Employee Benefit Plans" in the Notes to Consolidated Financial Statements for information related to the Company's obligations and funding requirements for pension and other post-employment benefits.

Letters of Credit

The Company has obtained letters of credit, issued by banks, in favor of various affiliated and unaffiliated insurance companies from which the Company assumes business. These letters of credit represent guarantees of performance under the reinsurance agreements and allow ceding companies to take statutory reserve credits. Certain of these letters of credit contain financial covenant restrictions similar to those described in the "Debt and Trust Preferred Securities" discussion above. At December 31, 2008, there were approximately \$26.6 million of outstanding bank letters of credit in favor of third parties. Additionally, the Company utilizes letters of credit to secure statutory reserve credits when it retrocedes business to its

reinsurance subsidiaries, including offshore subsidiaries RGA Americas, RGA Barbados and RGA Worldwide. The Company cedes business to its offshore affiliates to help reduce the amount of regulatory capital required in certain jurisdictions such as the U.S. and the UK. The capital required to support the business in the offshore affiliates reflects more realistic expectations than the original jurisdiction of the business, where capital requirements are often considered to be quite conservative. As of December 31, 2008, \$428.8 million in letters of credit from various banks were outstanding, but undrawn between the various subsidiaries of the Company.

Based on the growth of the Company's business and the pattern of reserve levels under Regulation XXX associated with term life business, the amount of ceded reserve credits is expected to grow. This growth will require the Company to obtain additional letters of credit, put additional assets in trust, or utilize other mechanisms to support the reserve credits. If the Company is unable to support the reserve credits, the regulatory capital levels of several of its subsidiaries may be significantly reduced. The reduction in regulatory capital would not directly affect the Company's consolidated shareholders' equity under GAAP; however, it could affect the Company's ability to write new business and retain existing business.

In September 2007, the Company entered into a five-year, syndicated revolving credit facility with an overall capacity of \$750.0 million, replacing its \$600.0 million five-year revolving credit facility, which was scheduled to mature in September 2010. The Company may borrow cash and may obtain letters of credit in multiple currencies under the facility. At December 31, 2008, the Company had \$389.7 million in issued, but undrawn, letters of credit under this facility, which is included in the total above. Applicable letter of credit fees and fees payable for the credit facility depend upon the Company's senior unsecured long-term debt rating. Fees associated with the Company's other letters of credit are not fixed for periods in excess of one year and are based on the Company's ratings and the general availability of these instruments in the marketplace.

In 2006, the Company entered into a reinsurance agreement that requires it to post collateral for a portion of the business being reinsured. As part of the collateral requirements, a third party financial institution has issued a letter of credit for the benefit of the ceding company (the "beneficiary"), which may draw on the letter of credit to be reimbursed for valid claim payments not made by RGA pursuant to the reinsurance treaty. RGA is not a direct obligor under the letter of credit. To the extent the letter of credit is drawn by the beneficiary, reimbursement to the third party financial institution will be through reduction in amounts owed to RGA by the third party financial institution under a secured structured loan. RGA's liability under the reinsurance agreement will be reduced by any amount drawn by the ceding company under the letter of credit. As of December 31, 2008, the structured loan totaled \$101.4 million and the amount of the letter of credit totaled \$101.4 million. The structured loan is recorded in "other invested assets" on RGA's consolidated balance sheet.

Asset / Liability Management

The Company manages its assets using an approach that is intended to balance quality, diversification, asset/liability matching, liquidity and investment return. The goals of the investment process are to optimize after-tax, risk-adjusted investment income and after-tax, risk-adjusted total return while managing the assets and liabilities on a cash flow and duration basis.

The Company has established target asset portfolios for each major insurance product, which represent the investment strategies intended to profitably fund its liabilities within acceptable risk parameters. These strategies include objectives for effective duration, yield curve sensitivity and convexity, liquidity, asset sector concentration and credit quality.

The Company's liquidity position (cash and cash equivalents and short-term investments) was \$933.5 million and \$479.4 million at December 31, 2008 and December 31, 2007, respectively. Liquidity needs are determined from valuation analyses conducted by operational units and are driven by product portfolios. Periodic evaluations of demand liabilities and short-term liquid assets are designed to adjust specific portfolios, as well as their durations and maturities, in response to anticipated liquidity needs.

The Company has entered into sales of investment securities under agreements to repurchase the same securities. These arrangements are used for purposes of short-term financing. There were no securities subject to these agreements outstanding at December 31, 2008. At December 31, 2007, the book value of securities subject to these agreements, and included in fixed maturity securities was \$30.1 million, while the repurchase obligations of \$30.1 million were reported in other liabilities in the consolidated statement of financial position. The Company also occasionally enters into arrangements to purchase securities under agreements to resell the same securities. Amounts outstanding, if any, are reported in cash and cash equivalents. These agreements are primarily used as yield enhancement alternatives to other cash equivalent investments. There were no agreements outstanding at December 31, 2008 and 2007. Further, the Company often enters into securities lending agreements whereby certain securities are loaned to third parties, primarily major brokerage firms, in order

to earn additional yield. The Company requires a minimum of 102% of the fair value of the loaned securities as collateral in the form of either cash or securities held by the Company or a trust. The cash collateral is reported in cash and the offsetting collateral re-payment obligation is reported in other liabilities. There were no securities lending agreements outstanding at December 31, 2008 and 2007.

RGA Reinsurance is a member of the FHLB and holds \$18.9 million of common stock of the FHLB, which is included in other invested assets on the Company's consolidated balance sheets. RGA Reinsurance occasionally enters into traditional funding agreements with the FHLB but had no outstanding traditional funding agreements with the FHLB at December 31, 2008 or 2007.

In addition, RGA Reinsurance has also entered into a funding agreement with the FHLB under a guaranteed investment contract whereby RGA Reinsurance has issued the funding agreement in exchange for cash and for which the FHLB has been granted a blanket lien on RGA Reinsurance's commercial mortgage-backed securities used to collateralize RGA Reinsurance's obligations under the funding agreement. RGA Reinsurance maintains control over these pledged assets, and may use, commingle, encumber or dispose of any portion of the collateral as long as there is no event of default and the remaining qualified collateral is sufficient to satisfy the collateral maintenance level. The funding agreement and the related security agreement represented by this blanket lien provide that upon any event of default by RGA Reinsurance, the FHLB's recovery is limited to the amount of RGA Reinsurance's liability under the outstanding funding agreement. The amount of the Company's liability for the funding agreements with the FHLB under guaranteed investment contracts was \$199.3 million at December 31, 2008, which is included in interest sensitive contract liabilities. The advance on this agreement is collateralized primarily by commercial mortgage-backed securities. The Company had no outstanding funding agreements with the FHLB under guaranteed investment contracts at December 31, 2007.

The Company's asset-intensive products are primarily supported by investments in fixed maturity securities reflected on the Company's balance sheet and under funds withheld arrangements with the ceding company. Investment guidelines are established to structure the investment portfolio based upon the type, duration and behavior of products in the liability portfolio so as to achieve targeted levels of profitability. The Company manages the asset-intensive business to provide a targeted spread between the interest rate earned on investments and the interest rate credited to the underlying interest-sensitive contract liabilities. The Company periodically reviews models projecting different interest rate scenarios and their effect on profitability. Certain of these asset-intensive agreements, primarily in the U.S. operating segment, are generally funded by fixed maturity securities that are withheld by the ceding company.

Investments

The Company had total cash and invested assets of \$16.5 billion and \$16.8 billion at December 31, 2008 and 2007, respectively, as illustrated below (dollars in thousands):

<u>As of December 31,</u>	<u>2008</u>	<u>2007</u>
Fixed maturity securities, available-for-sale	\$8,531,804	\$9,397,916
Mortgage loans on real estate	775,050	831,557
Policy loans	1,096,713	1,059,439
Funds withheld at interest	4,520,398	4,749,496
Short-term investments	58,123	75,062
Other invested assets	628,649	284,220
Cash and cash equivalents	875,403	404,351
Total cash and invested assets	<u>\$16,486,140</u>	<u>\$16,802,041</u>

The following table presents consolidated invested assets, net investment income and investment yield, excluding funds withheld. Funds withheld assets are primarily associated with the reinsurance of annuity contracts on which the Company earns a spread. Fluctuations in the yield on funds withheld assets are generally offset by a corresponding adjustment to the interest credited on the liabilities (dollars in thousands).

	Increase / (Decrease)				
	<u>2008</u>	<u>2007</u>	<u>2006</u>	<u>2008</u>	<u>2007</u>
Average invested assets at amortized cost	\$11,653,879	\$10,637,020	\$9,044,194	9.6 %	17.6%
Net investment income	701,039	633,621	525,118	10.6 %	20.7%
Investment yield (ratio of net investment income to average invested assets)	6.02%	5.96%	5.81%	6 bps	15 bps

Investment yields increased in 2008 and 2007 as the economic environment allowed the Company to invest in securities with higher spreads than those already held in the portfolio. In addition, new mandates with longer duration targets allowed the Company to invest in securities with longer maturities than what was held in the portfolio, which, in a positively-sloped yield curve environment, has also contributed to the increase in the average yields of the portfolio.

All investments held by RGA and its subsidiaries are monitored for conformance to the qualitative and quantitative limits prescribed by the applicable jurisdiction's insurance laws and regulations. In addition, the operating companies' boards of directors periodically review their respective investment portfolios. The Company's investment strategy is to maintain a predominantly investment-grade, fixed maturity portfolio, to provide adequate liquidity for expected reinsurance obligations, and to maximize total return through prudent asset management. The Company's asset/liability duration matching differs between operating segments. Based on Canadian reserve requirements, the Canadian liabilities are matched with long-duration Canadian assets. The duration of the Canadian portfolio exceeds twenty years. The duration for all the Company's portfolios, when consolidated, ranges between eight and ten years. See Note 4 – "Investments" in the Notes to Consolidated Financial Statements for additional information regarding the Company's investments.

Fixed maturity securities and equity securities available-for-sale

The amortized cost, gross unrealized gains and losses, and estimated fair values of investments in fixed maturity securities and equity securities, the percentage that each sector represents by the total fixed maturity securities holdings and by the total equity securities holdings at December 31, 2008 and 2007 are as follows (dollars in thousands):

	<u>Amortized</u>	<u>Unrealized</u>	<u>Unrealized</u>	<u>Estimated</u>	<u>% of</u>
	<u>Cost</u>	<u>Gains</u>	<u>Losses</u>	<u>Fair</u>	<u>Total</u>

Total equity securities	\$ 156,425	\$ 988	\$ 20,185	\$ 137,228	100.0%

The Company's fixed maturity securities are invested primarily in U.S. and foreign corporate bonds, mortgage- and asset-backed securities, and Canadian government securities. As of December 31, 2008 and 2007, approximately 96.7% and 97.2%, respectively, of the Company's consolidated investment portfolio of fixed maturity securities was investment-grade.

Important factors in the selection of investments include diversification, quality, yield, total rate of return potential and call protection. The relative importance of these factors is determined by market conditions and the underlying product or portfolio characteristics. Cash equivalents are primarily invested in high-grade money market instruments. The largest asset class in which fixed maturities were invested was in corporate securities, which represented approximately 46.7% of total fixed maturities at December 31, 2008, compared to 46.5% at December 31, 2007. The tables below show the major industry types and weighted average credit ratings, which comprise the U.S. and foreign corporate fixed maturity holdings at December 31, 2008 and 2007 (dollars in thousands):

December 31, 2008				
	<u>Amortized Cost</u>	<u>Estimated Fair Value</u>	<u>% of Total</u>	<u>Average Credit Ratings</u>
Finance	\$1,475,205	\$1,155,906	29.0%	A

(1) Includes U.S. dollar-denominated debt obligations of foreign obligors and other foreign investments.

The National Association of Insurance Commissioners (“NAIC”) assigns securities quality ratings and uniform valuations called “NAIC Designations” which are used by insurers when preparing their annual statements. The NAIC assigns designations to publicly traded as well as privately placed securities. The designations assigned by the NAIC range from class 1 to class 6, with designations in classes 1 and 2 generally considered investment grade (BBB or higher rating agency designation). NAIC designations in classes 3 through 6 are generally considered below investment grade (BB or lower rating agency designation).

The quality of the Company’s available-for-sale fixed maturity securities portfolio, as measured at fair value and by the percentage of fixed maturity securities invested in various ratings categories, relative to the entire available-for-sale fixed maturity security portfolio, at December 31, 2008 and 2007 was as follows (dollars in thousands):

NAIC Designation	Rating Agency Designation	December 31, 2008			December 31, 2007		
		Amortized Cost	Estimated Fair Value	% of Total	Amortized Cost	Estimated Fair Value	% of Total
1	AAA/AA/A	\$7,001,968	\$6,607,730	77.4%	\$7,022,497	\$7,521,177	80.0%

	Total	\$9,382,848	\$8,531,804	100.0%	\$8,916,692	\$9,397,916	100.0%

The Company’s fixed maturity portfolio includes structured securities. The following table shows the types of structured securities the Company held at December 31, 2008 and 2007 (dollars in thousands):

	December 31, 2008		December 31, 2007	
	Amortized Cost	Estimated Fair Value	Amortized Cost	Estimated Fair Value
Residential mortgage-backed securities:				
Agency	\$851,507	\$868,479	\$1,069,998	\$1,076,780
Non-agency	379,616	280,706	344,189	337,497
Total residential mortgage-backed securities	1,231,123	1,149,185	1,414,187	1,414,277
Commercial mortgage-backed securities	1,085,062	760,590	641,479	645,227
Asset-backed securities	484,577	339,378	494,458	464,254
Total	\$2,800,762	\$2,249,153	\$2,550,124	\$2,523,758

The residential mortgage-backed securities include agency-issued pass-through securities, collateralized mortgage obligations, a majority of which are guaranteed or otherwise supported by the Federal Home Loan Mortgage Corporation, Federal National Mortgage Association, or the Government National Mortgage Association. The weighted average credit rating of the residential mortgage-backed securities was “AA+” and “AAA” at December 31, 2008 and 2007, respectively. The principal risks inherent in holding mortgage-backed securities are prepayment and extension risks, which will affect the timing of when cash will be received and are dependent on the level of mortgage interest rates. Prepayment risk is the unexpected increase in principal payments, primarily as a result of owner refinancing. Extension risk relates to the unexpected slowdown in principal payments. In addition, mortgage-backed securities face default risk should the borrower be unable to pay the contractual interest or principal on their obligation. The Company monitors its mortgage-backed securities to mitigate exposure to the cash flow uncertainties associated with these risks.

As of December 31, 2008, the Company had exposure to commercial mortgage-backed securities with amortized costs totaling \$1,573.4 million and an estimated fair value of \$1,143.3 million. Those amounts include exposure to commercial mortgage-backed securities held directly in the Company’s investment portfolios within fixed maturity securities, as well as securities held by ceding companies that support the Company’s funds withheld at interest investment. The securities are highly rated with weighted average S&P credit ratings of approximately “AA+” at December 31, 2008, with approximately 76.3% in the “AAA” category. The following table summarizes the securities by rating and underwriting year at December 31, 2008 (dollars in thousands):

December 31, 2008

Underwriting Year	AAA		AA		A

Asset-backed securities include credit card and automobile receivables, sub-prime and alternative residential mortgage loan (“Alt-A”) securities, home equity loans, manufactured housing bonds and collateralized debt obligations. The Company's asset-backed securities are diversified by issuer and contain both floating and fixed rate securities and had a weighted average credit rating of “AA” at December 31, 2008 and 2007. The Company owns floating rate securities that represent approximately 20.0% and 19.2% of the total fixed maturity securities at December 31, 2008 and 2007, respectively. These investments have a higher degree of income variability than the other fixed income holdings in the portfolio due to the floating rate nature of the interest payments. The Company holds these investments to match specific floating rate liabilities primarily reflected in the consolidated balance sheets as collateral finance facility. In addition to the risks associated with floating rate securities, principal risks in holding asset-backed securities are structural, credit and capital market risks. Structural risks include the securities’ priority in the issuer's capital structure, the adequacy of and ability to realize proceeds from collateral, and the potential for prepayments. Credit risks include consumer or corporate credits such as credit card holders, equipment lessees, and corporate obligors. Capital market risks include general level of interest rates and the liquidity for these securities in the marketplace.

As of December 31, 2008 and 2007, the Company held investments in securities with sub-prime mortgage exposure with amortized costs totaling \$230.1 million and \$267.7 million, and estimated fair values of \$147.8 million and \$246.8 million, respectively. Those amounts include exposure to sub-prime mortgages through securities held directly in the Company’s investment portfolios within asset-backed securities, as well as securities backing the Company’s funds withheld at interest investment. The securities are highly rated with weighted average S&P credit ratings of approximately “AA-” at December 31, 2008 and “AA+” at December 31, 2007. Additionally, the Company has largely avoided investing in securities originated since the second half of 2005, which management believes was a period of lessened underwriting quality. During 2008, the Company recorded \$11.6 million of other-than-temporary write-downs in its sub-prime portfolio due primarily to the increased likelihood that some or all of the remaining scheduled principal and interest payments on certain securities will not be received. The following tables summarize the securities by rating and underwriting year at December 31, 2008 and 2007 (dollars in thousands):

Alt-A is a classification of mortgage loans where the risk profile of the borrower falls between prime and sub-prime. At December 31, 2008 and 2007, the Company's Alt-A securities exposure was \$197.7 million and \$102.4 million, respectively, with an unrealized loss of \$39.9 million and \$3.2 million, respectively. 64.2% of the Alt-A securities were rated "AA" or better as of December 31, 2008. This amount includes securities directly held by the Company and securities held by ceding companies that support the Company's funds withheld at interest investment. For the year ended December 31,

2008, the Company recorded other-than-temporary impairments of \$16.5 million in its Alt-A securities portfolio due primarily to the increased likelihood that some or all of the remaining scheduled principal and interest payments on certain securities will not be received.

The Company's fixed maturity and funds withheld portfolios at December 31, 2008 include approximately \$538.2 million in estimated fair value of securities that are insured by various financial guarantors, or less than five percent of consolidated investments. The securities are diversified between municipal bonds and asset-backed securities with well diversified collateral pools. The Company invests in insured collateralized debt obligation ("CDO") structures backing sub-prime investments of approximately \$0.1 million at December 31, 2008. The insured securities are primarily investment grade without the benefit of the insurance provided by the financial guarantor and therefore the Company does not expect to incur significant realized losses as a result of the financial difficulties encountered in 2008 by several of the financial guarantors. In addition to the insured securities, the Company held investment-grade securities issued by five of the financial guarantors totaling \$13.4 million in amortized cost at December 31, 2008.

The Company does not invest in the common equity securities of Fannie Mae and Freddie Mac, both government sponsored entities; however, as of December 31, 2008, the Company holds in its general portfolio of \$6.8 million amortized cost in direct exposure in the form of senior unsecured and preferred securities. Additionally, as of December 31, 2008, the portfolios held by the Company's ceding companies that support its funds withheld asset contain approximately \$359.6 million in amortized cost of direct unsecured holdings and no equity exposure. As of December 31, 2008, indirect exposure in the form of secured, structured mortgage securities issued by Fannie Mae and Freddie Mac totals approximately \$1.1 billion in amortized cost across the Company's general and funds withheld portfolios. Including the funds withheld portfolios, the Company's direct holdings in the form of preferred securities total a book value of \$0.7 million at December 31, 2008. As a result of the U.S. government intervention and cessation of dividend payments, the Company recorded an other-than-temporary impairment of its preferred holdings of Fannie Mae and Freddie Mac totaling \$12.2 million in 2008.

The Company monitors its fixed maturity securities and equity securities to determine impairments in value and evaluates factors such as financial condition of the issuer, payment performance, the length of time and the extent to which the market value has been below amortized cost, compliance with covenants, general market conditions and industry sector, current intent and ability to hold securities and various other subjective factors. Based on management's judgment, securities determined to have an other-than-temporary impairment in value are written down to fair value. See "Investments – Fixed Maturity Securities" in Note 2 – "Summary of Significant Accounting Policies" in the Notes to Consolidated Financial Statements for additional information. The Company recorded \$130.5 million, \$8.5 million and \$2.3 million in other-than-temporary write-downs on fixed maturity securities and equity securities in 2008, 2007 and 2006, respectively. The 2008 write-downs are due primarily to the recent turmoil in the U.S. and global financial markets which has resulted in bankruptcies, consolidations and government interventions.

At December 31, 2008 and 2007 the Company owned non-income producing securities with amortized costs of \$25.7 million and \$13.3 million, and estimated fair values of \$20.4 million and \$14.7 million, respectively. During 2008 and 2007, the Company sold fixed maturity securities and equity securities with fair values of \$536.7 million and \$1,085.2 million at losses of \$22.5 million and \$39.1 million, respectively, or at 96.0% and 96.5% of book value, respectively. Generally, such losses are insignificant in relation to the cost basis of the investment and are largely due to changes in interest rates from the time the security was purchased. The securities are classified as available-for-sale in order to meet the Company's operational and other cash flow requirements. The Company does not engage in short-term buying and selling of securities to generate gains or losses.

At December 31, 2008 and 2007, the Company had \$1,416.4 million and \$198.2 million, respectively, of gross unrealized losses related to its fixed maturity and equity securities. These securities are concentrated, calculated as a percentage of gross unrealized losses, as follows:

	December 31,	
	2008	2007
Sector:		
U.S. corporate securities	46%	59%
Canadian and Canada provincial governments	1	1

Total	100%	100%

The following table presents the total gross unrealized losses for 1,716 and 1,105 fixed maturity securities and equity securities at December 31, 2008 and 2007, respectively, where the estimated fair value had declined and remained below amortized cost by the indicated amount (dollars in thousands):

	December 31, 2008			December 31, 2007		
	Number of Securities	Gross Unrealized Losses	% of Total	Number of Securities	Gross Unrealized Losses	% of Total
Less than 20%	980	\$324,390	22.9%	1,039	\$159,563	80.5%
20% or more for less than six months	561	796,747	56.3	59	35,671	18.0
20% or more for six months or greater	175	295,302	20.8	7	2,981	1.5
Total	1,716	\$1,416,439	100.0%	1,105	\$198,215	100.0%

The investment securities in an unrealized loss position as of December 31, 2008 consisted of 1,716 securities accounting for unrealized losses of \$1,416.4 million. Of these unrealized losses 92.7% were investment grade and 22.9% were less than 20% below cost. The amount of the unrealized loss on these securities was primarily attributable to increases in interest rates, including a widening of credit default spreads.

While all of these securities are monitored for potential impairment, the Company's experience indicates that the first two categories do not present as great a risk of impairment, and often, fair values recover over time. These securities have generally been adversely affected by overall economic conditions, primarily a significant widening of credit default spreads. Securities with an unrealized loss position of 20% or more of amortized cost for greater than six months increased to \$295.3 million at December 31, 2008. These securities were included in the regular evaluation of whether such securities are other-than-temporarily impaired. Based upon the Company's current evaluation of these securities in accordance with its impairment policy, the cause of the decline being primarily attributable to a rise in market yields caused principally by an extensive widening of credit spreads which resulted from a lack of market liquidity and a short-term market dislocation versus a long-term deterioration in credit quality, and the Company's current intent and ability to hold the securities with unrealized losses for a period of time sufficient for them to recover, the Company has concluded that these securities are not other-than-temporarily impaired.

The following tables present the estimated fair values and gross unrealized losses for the 1,716 and 1,105 fixed maturity securities and equity securities that have estimated fair values below amortized cost at December 31, 2008 and 2007, respectively. These investments are presented by class and grade of security, as well as the length of time the estimated fair value has remained below amortized cost.

As of December 31, 2008, the Company has the ability and intent to hold these investment securities for the potential recovery of the fair value up to the current cost of the investment, which may be maturity. However, from time to time, the Company may sell securities in the ordinary course of managing its portfolio to meet diversification, credit quality, yield enhancement, asset-liability management and liquidity requirements.

Mortgage Loans on Real Estate

Mortgage loans represented approximately 4.7% and 4.9% of the Company's cash and invested assets as of December 31, 2008 and 2007, respectively. As of December 31, 2008, all mortgages were U.S. based with approximately 87.5% invested in mortgages on commercial offices, industrial properties and retail locations. The Company's mortgage loans generally range in size up to \$15.0 million, with the average mortgage loan investment as of December 31, 2008 totaling approximately \$4.4 million. The mortgage loan portfolio was diversified by geographic region and property type as discussed further in Note 4 - "Investments" in the Notes to Consolidated Financial Statements.

Valuation allowances on mortgage loans are established based upon losses expected by management to be realized in connection with future dispositions or settlement of mortgage loans, including foreclosures. The valuation allowances are established after management considers, among other things, the value of underlying collateral and payment capabilities of debtors. Any subsequent adjustments to the valuation allowances will be treated as investment gains or losses. RGA has established a valuation allowance of \$0.5 million as of December 31, 2008. No valuation allowance was considered necessary as of December 31, 2007.

Policy Loans

Policy loans comprised approximately 6.7% and 6.3% of the Company's cash and invested assets as of December 31, 2008 and 2007, respectively, substantially all of which are associated with one client. These policy loans present no credit risk because the amount of the loan cannot exceed the obligation due the ceding company upon the death of the insured or surrender of the underlying policy. The provisions of the treaties in force and the underlying policies determine the policy loan interest rates. Because policy loans represent premature distributions of policy liabilities, they have the effect of reducing future disintermediation risk. In addition, the Company earns a spread between the interest rate earned on policy loans and the interest rate credited to corresponding liabilities.

Funds Withheld at Interest

The majority of the Company's funds withheld at interest balances are associated with its reinsurance of annuity contracts. The funds withheld receivable balance totaled \$4.5 billion and \$4.7 billion at December 31, 2008 and 2007,

respectively, of which \$3.1 billion and \$3.3 billion, respectively, were subject to the provisions of Issue B36. Under Issue B36, the Company's funds withheld receivable under certain reinsurance arrangements incorporate credit risk exposures that are unrelated or only partially related to the creditworthiness of the obligor and include an embedded derivative feature that is not clearly and closely related to the host contract. Therefore, the embedded derivative feature must be measured at fair value on the consolidated balance sheets and changes in fair value reported in income. See "Embedded Derivatives" in Note 2 – "Summary of Significant Accounting Policies" in the Notes to Consolidated Financial Statements for further discussion.

Funds withheld at interest comprised approximately 27.4% and 28.3% of the Company's cash and invested assets as of December 31, 2008 and 2007, respectively. Of the \$4.5 billion funds withheld at interest balance as of December 31, 2008, \$3.1 billion of the balance is associated with one client. For agreements written on a modified coinsurance basis and certain agreements written on a coinsurance basis, assets equal to the net statutory reserves are withheld and legally owned and managed by the ceding company, and are reflected as funds withheld at interest on the Company's consolidated balance sheets. In the event of a ceding company's insolvency, the Company would need to assert a claim on the assets supporting its reserve liabilities. However, the risk of loss to the Company is mitigated by its ability to offset amounts it owes the ceding company for claims or allowances with amounts owed by the ceding company. Interest accrues to these assets at rates defined by the treaty terms and the Company estimated the yields were approximately 3.54%, 6.42% and 7.08% for the years ended December 31, 2008, 2007 and 2006, respectively. The Company is subject to the investment performance on the withheld assets, although it does not directly control them. These assets are primarily fixed maturity investment securities and pose risks similar to the fixed maturity securities the Company owns. To mitigate this risk, the Company helps set the investment guidelines followed by the ceding company and monitors compliance. Ceding companies with funds withheld at interest had an average rating of "A+" at December 31, 2008 and 2007. Certain ceding companies maintain segregated portfolios for the benefit of the Company.

Based on data provided by ceding companies at December 31, 2008 and 2007, funds withheld at interest were approximately (dollars in thousands):

<u>Underlying Security Type:</u>	December 31, 2008

Below investment grade U.S. corporate securities	116,155	113,822	3.3
Structured securities	1,022,788	984,464	28.6
Foreign corporate securities	40,095	40,420	1.2
U.S. government and agency debentures	742,123	774,804	22.6
Derivatives ⁽¹⁾	58,241	34,772	1.0
Other	1,664	1,664	--
Total segregated portfolios	<u>3,503,557</u>	<u>3,437,557</u>	<u>100.0%</u>
Non-segregated portfolios	1,331,029	1,331,029	
Embedded derivatives ⁽²⁾	(85,090)	--	
Total funds withheld at interest	<u>\$4,749,496</u>	<u>\$4,768,586</u>	

(1) Derivatives primarily consist of S&P 500 options which are used to hedge liabilities and interest credited for equity-indexed annuity contracts reinsured by the Company.

(2) Represents the fair value of embedded derivatives related to reinsurance written on a modified coinsurance or funds withheld basis and subject to the provisions of Issue B36 for the segregated portfolios. When the segregated portfolios are presented on a fair value basis in the "Estimated Fair Value" column, the calculation of a separate embedded derivative for Issue B36 is not applicable.

Based on data provided by the ceding companies at December 31, 2008, the maturity distribution of the segregated portfolio portion of funds withheld at interest was approximately (dollars in thousands):

December 31, 2008			
<u>Maturity:</u>	<u>Book Value</u>	<u>Estimated Fair Value</u>	<u>% of Total Estimated Fair Value</u>
Within one year	\$72,666	\$59,074	1.6%
More than one, less than five years	406,195	357,829	9.6
More than five, less than ten years	898,140	757,711	20.3
Ten years or more	2,900,697	2,564,514	68.5
Subtotal	<u>4,277,698</u>	<u>3,739,128</u>	<u>100.0%</u>
Less: Reverse repurchase agreements	(516,878)	(516,878)	
Total all years	<u>\$3,760,820</u>	<u>\$3,222,250</u>	

Securities Lending and Other

During the year, the Company participated in a securities lending program whereby blocks of securities, which were included in investments, were loaned to third parties, primarily major brokerage firms. The Company required a minimum of 102% of the fair value of the loaned securities to be separately maintained as collateral for the loans. The Company terminated the program and all loaned securities were returned prior to December 31, 2008. There were no securities loaned to third parties as of December 31, 2007. The Company also occasionally enters into arrangements to purchase securities under agreements to resell the same securities. Amounts outstanding, if any, are reported in cash and cash equivalents. These transactions are primarily used as yield enhancement alternatives to other cash equivalent investments. There were no agreements outstanding at December 31, 2008 and 2007. Both securities lending and securities purchase arrangements under agreements to resell are accounted for as investing activities on the Company's consolidated balance sheets and consolidated statements of cash flow, and the income associated with the program is reported in net investment income since such transactions are entered into for income generation purposes, not funding purposes.

Other Invested Assets

Other invested assets represented approximately 3.8% and 1.7% of the Company's cash and invested assets as of December 31, 2008 and 2007, respectively. Other invested assets include derivative contracts, equity securities, non-redeemable preferred stocks, structured loans and limited partnership interests. The Company recorded other-than-temporary

write-downs on other invested assets of \$17.2 in 2008, consisting of preferred stock. The Company recorded other-than-temporary write-downs on other invested assets of \$1.0 million and \$4.3 million in 2007 and 2006, respectively, consisting of limited partnership interests.

The Company has utilized derivative financial instruments, primarily to protect the Company against possible changes in the fair value of its investment portfolio as a result of interest rate changes and to manage the portfolio's effective yield, maturity and duration. In addition, the Company has used derivative financial instruments to reduce the risk associated with fluctuations in foreign currency exchange rates. The Company uses both exchange-traded and customized over-the-counter derivative financial instruments. The Company's use of derivative financial instruments historically has not been significant to its financial position.

The following table presents the notional amounts and fair value of investment related derivative instruments held at December 31, 2008 and 2007 (dollars in thousands):

	December 31, 2008			December 31, 2007		
	Notional <u>Amount</u>	Carrying Value/ Fair Value		Notional <u>Amount</u>	Carrying Value/ Fair Value	
		<u>Assets</u>	<u>Liabilities</u>		<u>Assets</u>	<u>Liabilities</u>
Interest rate swaps	\$ 694,499	\$ 155,189	\$ 2,484	\$ 109,345	\$ 923	\$ 208
Financial futures	260,568	--	--	12,564	--	--
Foreign currency swaps	296,497	48,943	--	197,044	--	5,104
Foreign currency forwards	31,300	2,209	--	13,100	98	--
Credit default swaps	290,000	--	7,705	225,000	--	1,750
Total	<u>\$ 1,572,864</u>	<u>\$ 206,341</u>	<u>\$ 10,189</u>	<u>\$ 557,053</u>	<u>\$ 1,021</u>	<u>\$ 7,062</u>

The Company may be exposed to credit-related losses in the event of non-performance by counterparties to derivative financial instruments. Generally, the current credit exposure of the Company's derivative contracts is limited to the fair value at the reporting date less collateral held by the Company. The credit exposure of the Company's derivative transactions is represented by the fair value of contracts with a net positive fair value position at the reporting date. At December 31, 2008, the Company had credit exposure of \$206.3 million related to its derivative contracts of which \$159.8 million was collateralized with cash collateral from the counterparty.

The Company manages its credit risk related to over-the-counter derivatives by entering into transactions with creditworthy counterparties, maintaining collateral arrangements and through the use of master agreements that provide for a single net payment to be made by one counterparty to another at each due date and upon termination. Because exchange-traded futures are affected through regulated exchanges, and positions are marked to market on a daily basis, the Company has minimal exposure to credit-related losses in the event of nonperformance by counterparties to such derivative instruments. See Note 5 – "Derivative Instruments" in the Notes to Consolidated Financial Statements for more information regarding the Company's derivative instruments.

Corporate Risk Management

RGA maintains a corporate risk management framework which is responsible for assessing, measuring and monitoring risks facing the enterprise. This includes development and implementation of mitigation strategies to reduce exposures to these risks to acceptable levels. Risk management is an integral part of the Company's culture and every day activities. It includes guidelines and controls in areas such as pricing, underwriting, currency, administration, investments, asset liability management, counterparty exposure, financing, regulatory change, business continuity planning, human resources, liquidity, sovereign risks and technology development.

The corporate risk management framework is directed by the corporate actuarial department, which reports to the chief financial officer. Risk management officers from all areas of the Company support the corporate actuarial department in this effort. The corporate actuarial department provides quarterly risk management updates to the board of directors, executive management and the internal risk management officers.

Specific risk assessments and descriptions can be found below and in Item 1A – "Risk Factors".

Mortality Risk Management

In the event that mortality or morbidity experience develops in excess of expectations, some reinsurance treaties allow for increases to future premium rates. Other treaties include experience refund provisions, which may also help reduce RGA's mortality risk. In the normal course of business, the Company seeks to limit its exposure to loss on any single insured and to recover a portion of claims paid by ceding reinsurance to other insurance enterprises or retrocessionaires under excess coverage and coinsurance contracts. In the U.S., the Company retains a maximum of \$8.0 million of coverage per individual life. In certain limited situations, due to the acquisition of in force blocks of business, the Company has retained more than \$8.0 million per individual policy. In total, there are 19 such cases of over-retained policies, for amounts averaging \$2.1 million over the Company's normal retention limit. The largest amount in excess of the Company's retention on any one life is \$10.1 million. The Company enters into agreements with other reinsurers to mitigate the risk related to the over-retained policies, which renew annually in September and October. For other countries, particularly those with higher risk factors or smaller books of business, the Company systematically reduces its retention. The Company has a number of retrocession arrangements whereby certain business in force is retroceded on an automatic or facultative basis.

The Company maintains a catastrophe insurance program ("Program") that renews on September 7th of each year. The current Program began September 7, 2008, and covers events involving 10 or more insured deaths from a single occurrence. The Company retains the first \$10 million in claims, the Program covers the next \$50 million in claims, and the Company retains all claims in excess of \$60 million. The Program covers reinsurance programs worldwide and includes losses due to acts of terrorism, including terrorism losses due to nuclear, chemical and/or biological events. The Program excludes losses from earthquakes occurring in California and also excludes losses from pandemics. The Program is insured by eleven insurance companies and Lloyd's Syndicates, with no single entity providing more than \$10 million of coverage.

Counterparty Risk - Reinsurance

In the normal course of business, the Company seeks to limit its exposure to reinsurance contracts by ceding a portion of the reinsurance to other insurance companies or reinsurers. Should a counterparty not be able to fulfill its obligation to the Company under a reinsurance agreement, the impact could be material to the Company's financial condition and results of operations.

Generally, RGA's insurance subsidiaries retrocede amounts in excess of their retention to RGA Reinsurance, RGA Barbados, RGA Americas or RGA Atlantic. External retrocessions are arranged through the Company's retrocession pools for amounts in excess of its retention. As of December 31, 2008, all retrocession pool members in this excess retention pool reviewed by the A.M. Best Company were rated "A-", the fourth highest rating out of fifteen possible ratings, or better. For a majority of the retrocessionaires that were not rated, letters of credit or trust assets have been given as additional security in favor of RGA Reinsurance. In addition, the Company performs annual financial and in force reviews of its retrocessionaires to evaluate financial stability and performance.

The Company has never experienced a material default in connection with retrocession arrangements, nor has it experienced any material difficulty in collecting claims recoverable from retrocessionaires; however, no assurance can be given as to the future performance of such retrocessionaires or as to the recoverability of any such claims.

The Company relies upon its clients to provide timely, accurate information. The Company may experience volatility in its earnings as a result of erroneous or untimely reporting from its clients. The Company works closely with its clients and monitors this risk in an effort to minimize its exposure.

Market Risk

Market risk is the risk of loss that may occur when fluctuation in interest and currency exchange rates and equity and commodity prices change the value of a financial instrument. Both derivative and non-derivative financial instruments have market risk so the Company's risk management extends beyond derivatives to encompass all financial instruments held that are sensitive to market risk. The Company is primarily exposed to interest rate risk and foreign currency risk.

Interest Rate Risk

This risk arises from many of the Company's primary activities, as the Company invests substantial funds in interest-sensitive assets and also has certain interest-sensitive contract liabilities. The Company manages interest rate risk and credit risk to maximize the return on the Company's capital effectively and to preserve the value created by its business operations. As such, certain management monitoring processes are designed to minimize the effect of sudden and/or sustained changes in interest rates on fair value, cash flows, and net interest income. The Company manages its exposure to interest rates principally by matching floating rate liabilities with corresponding floating rate assets and by matching fixed rate liabilities

with corresponding fixed rate assets. On a limited basis, the Company uses equity options to minimize its exposure to movements in equity markets that have a direct correlation with certain of its reinsurance products.

The Company's exposure to interest rate price risk and interest rate cash flow risk is reviewed on a quarterly basis. Interest rate price risk exposure is measured using interest rate sensitivity analysis to determine the change in fair value of the Company's financial instruments in the event of a hypothetical change in interest rates. Interest rate cash flow risk exposure is measured using interest rate sensitivity analysis to determine the Company's variability in cash flows in the event of a hypothetical change in interest rates. If estimated changes in fair value, net interest income, and cash flows are not within the limits established, management may adjust its asset and liability mix to bring interest rate risk within board-approved limits.

In order to reduce the exposure of changes in fair values from interest rate fluctuations, the Company has developed strategies to manage its liquidity and increase the interest rate sensitivity of its asset base. From time to time, the Company has utilized the swap market to manage the volatility of cash flows to interest rate fluctuations.

Interest rate sensitivity analysis is used to measure the Company's interest rate price risk by computing estimated changes in fair value of fixed rate assets and liabilities in the event of a hypothetical 10% change (increase or decrease) in market interest rates. The Company does not have fixed rate instruments classified as trading securities. The Company's projected loss in fair value of financial instruments in the event of a 10% unfavorable change in market interest rates at its fiscal years ended December 31, 2008 and 2007 was \$169.6 million and \$361.6 million, respectively.

The calculation of fair value is based on the net present value of estimated discounted cash flows expected over the life of the market risk sensitive instruments, using market prepayment assumptions and market rates of interest provided by independent broker quotations and other public sources, with adjustments made to reflect the shift in the treasury yield curve as appropriate.

At December 31, 2008, the Company's estimated changes in fair value were within the targets outlined in the Company's investment policy.

Interest rate sensitivity analysis is also used to measure the Company's interest rate cash flow risk by computing estimated changes in the cash flows expected in the near term attributable to floating rate assets and liabilities in the event of a range of assumed changes in market interest rates. This analysis assesses the risk of loss in cash flows in the near term in market risk sensitive floating rate instruments in the event of a hypothetical 10% change (increase or decrease) in market interest rates. The Company does not have variable rate instruments classified as trading securities. The Company's projected decrease in cash flows in the near term associated with floating rate instruments in the event of a 10% unfavorable change in market interest rates at its fiscal years ended December 31, 2008 and 2007 was \$2.7 million and \$4.1 million, respectively.

The cash flows from interest payments move in the same direction as interest rates for the Company's floating rate instruments. The volatility in mortgage prepayments partially offsets the cash flows from interest. At December 31, 2008, the Company's estimated changes in cash flows were within the targets outlined in the Company's investment policy.

Computations of prospective effects of hypothetical interest rate changes are based on numerous assumptions, including relative levels of market interest rates, and mortgage prepayments, and should not be relied on as indicative of future results. Further, the computations do not contemplate any actions management could undertake in response to changes in interest rates.

Certain shortcomings are inherent in the method of analysis presented in the computation of the estimated fair value of fixed rate instruments and the estimated cash flows of floating rate instruments, which constitute forward-looking statements. Actual values may differ materially from those projections presented due to a number of factors, including, without limitation, market conditions varying from assumptions used in the calculation of the fair value. In the event of a change in interest rates, prepayments could deviate significantly from those assumed in the calculation of fair value. Finally, the desire of many borrowers to repay their fixed rate mortgage loans may decrease in the event of interest rate increases.

Foreign Currency Risk

The Company is subject to foreign currency translation, transaction, and net income exposure. The Company manages its exposure to currency principally by matching invested assets with the underlying reinsurance liabilities to the extent possible. The Company has in place net investment hedges for a portion of its investment in Canada operations. Translation differences resulting from translating foreign subsidiary balances to U.S. dollars are reflected in stockholders' equity on the consolidated balance sheets. The Company generally does not hedge the foreign currency exposure of its subsidiaries transacting business in currencies other than their functional currency (transaction exposure). The majority of

the Company's foreign currency transactions are denominated in Canadian dollars, British pounds, Australian dollars, Japanese yen, Korean won, euros, and the South African rand.

Market Risk Associated with Annuities with Guaranteed Minimum Benefits

The Company reinsures variable annuities including those with guaranteed minimum benefits and guaranteed minimum death benefits (“GMDB”), guaranteed minimum income benefits (“GMIB”), guaranteed minimum accumulation benefits (“GMAB”) and guaranteed minimum withdrawal benefits (“GMWB”). The table below provides a summary of variable annuity account values and the fair value of the guaranteed benefits as of December 31, 2008 and 2007.

(dollars in millions)

	December 31,	
	2008	2007
No guaranteed minimum benefits	\$1,063.1	\$1,418.6
GMDB only	53.5	17.6
GMIB only	3.9	2.5
GMAB only	43.7	23.4
GMWB only	795.0	239.7
GMDB / WB	287.1	83.0
Other	24.3	12.1
Total variable annuity account values	<u>\$2,270.6</u>	<u>\$1,796.9</u>
Fair value of guaranteed living benefits	\$276.4	\$9.0

During 2008, poor investment fund performance, increases in capital market implied volatility and reductions in interest rates resulted in a significant increase in the fair value of liabilities associated with guaranteed minimum living benefits. The following table presents the Company’s estimates of the effect from variable annuity business on 2009 pretax income based on various levels of the S&P 500 Index and the Company’s net hedging results. The calculations assume that all investment funds underlying the variable annuities, including bonds and money markets, move in line with the S&P 500 Index performance. The net hedging results included in the table can be independent of the capital market movements, and are calculated as the difference between the change in fair value of the guaranteed minimum living benefit liabilities and the change in the fair value of the derivative instruments used to economically hedge the guaranteed minimum living benefit liabilities. Additionally, the projected results include the Company’s estimate of related DAC amortization and unlocking. These estimates are based upon the recorded liabilities for guaranteed minimum living benefits as of December 31, 2008 and do not include projections for new business. In addition to the assumptions about the S&P 500 Index and net hedging results, the estimates below include the Company’s expectations regarding policyholder behavior, mortality, internal allocation of expenses and investment income, as well as other actuarial assumptions.

The Company expects that profits typically associated with increases in the S&P 500 Index and positive net hedging results will be more than offset by increased DAC amortization. Conversely, in certain cases, losses typically associated with decreases in the S&P 500 Index and negative net hedging results may be more than offset by decreased DAC amortization. However, a combination of poor investment fund performance and net hedging losses similar to the relative performance experienced in 2008 would not be offset by DAC adjustments. For example, the Company estimates that it would incur a pretax loss in 2009 of approximately \$235 million if the S&P 500 Index decreases to 600 at December 31, 2009 (a 34% decrease from the December 31, 2008 close of 903) and the Company incurs net hedging losses of \$90 million. This estimate and the estimates below require complex calculations based on actuarial and capital market inputs. Actual results could differ materially from the Company’s estimates.

2009 Projected Pretax Income Effect from Variable Annuity Business⁽¹⁾

(dollars in millions)

<u>2009 Net Hedging Results</u>	<u>S&P 500 Index at December 31, 2009⁽²⁾</u>				
	<u>700</u>	<u>800</u>	<u>900</u>	<u>1000</u>	<u>1100</u>
-\$50	\$(34.2)	\$(32.4)	\$(30.8)	\$(29.1)	\$(27.5)
-\$25	(9.2)	(7.4)	(5.8)	(4.1)	(2.5)
\$0	15.8	9.9	(2.5)	(10.6)	(15.9)
\$25	(21.0)	(24.4)	(26.2)	(27.0)	(27.1)
\$50	(36.4)	(34.0)	(31.5)	(29.0)	(26.6)

- (1) The table depicts the estimated effect on pretax income from base policies and guaranteed minimum benefits associated with variable annuity transactions under multiple scenarios. These estimates are based upon the recorded liabilities for guaranteed minimum living benefits as of December 31, 2008 and do not include projections for new business.
- (2) The calculations presented in the table assume that all investment funds underlying the variable annuities, including bonds and money markets, move in line with the S&P 500 Index performance.

Inflation

The primary, direct effect on the Company of inflation is the increase in operating expenses. A large portion of the Company's operating expenses consists of salaries, which are subject to wage increases at least partly affected by the rate of inflation. The rate of inflation also has an indirect effect on the Company. To the extent that a government's policies to control the level of inflation result in changes in interest rates, the Company's investment income is affected.

New Accounting Standards

In January 2009, the FASB issued Staff Position ("FSP") Emerging Issues Task Force ("EITF") Issue 99-20-1, "Amendments to the Impairment Guidance of EITF Issue No. 99-20" ("EITF 99-20-1"). EITF 99-20-1 provides guidance on determining other-than-temporary impairments on securities subject to EITF Issue No. 99-20, "Recognition of Interest Income and Impairment on Purchased Beneficial Interests and Beneficial Interests That Continue to Be Held by a Transferor in Securitized Financial Assets". The primary effect of EITF 99-20-1 was to remove the requirement that a holder attempt to determine the underlying cash flows on an asset-backed security based on the assumptions that a market participant would make in determining the current fair value of the instrument. Instead, the focus has been placed on determining the estimated cash flows as determined by the holder for all sources including its own comprehensive credit analysis. The provisions of EITF 99-20-1 were required to be applied prospectively for interim periods and fiscal years ending after December 15, 2008. The Company's adoption of EITF 99-20-1 did not have a significant impact on how the Company values its structured investment securities.

In December 2008, the FASB issued FSP No. FAS 132(r)-1, "Employers Disclosures about Postretirement Benefit Plan Assets" ("FSP 132(r)-1"). FSP 132(r)-1 provides guidance for disclosure of the types of assets and associated risks in retirement plans. The new disclosures are designed to provide additional insight into the major categories of plan assets, the inputs and valuation techniques used to measure the fair value of plan assets, the effect of fair value measurements using significant unobservable inputs on changes in plan assets for the period, significant concentrations of risk within plan assets and how investment decisions are made, including factors necessary to understanding investment policies and strategies. The disclosures about plan assets required by FSP 132(r)-1 is effective for financial statements with fiscal years ending after December 15, 2009. The Company is currently evaluating the impact of FSP 132(r)-1 on its consolidated financial statements.

In October 2008, the FASB issued FSP No. FAS 157-3, "Determining the Fair Value of a Financial Asset When the Market for That Asset Is Not Active" ("FSP 157-3"). FSP 157-3 clarifies the application of SFAS 157 in a market that is not active and provides an example to illustrate key considerations in determining the fair value of a financial asset when the market for that financial asset is not active. FSP 157-3 was effective upon issuance on October 10, 2008, including prior periods for which financial statements had not been issued. The Company did not consider it necessary to change any valuation techniques as a result of FSP 157-3. The Company will also adopt FSP No. FAS 157-2, "Effective Date of FASB Statement No. 157" ("FSP 157-2") which delays the effective date of SFAS 157 for certain nonfinancial assets and liabilities that are recorded at fair value on a nonrecurring basis. The effective date is delayed until January 1, 2009 and impacts balance sheet items including nonfinancial assets and liabilities in a business combination and the impairment testing of goodwill and long-lived assets. The Company is currently evaluating the impact of FSP 157-2 on its consolidated financial statements.

In March 2008, the FASB issued SFAS No. 161, "Disclosures about Derivative Instruments and Hedging Activities — An Amendment of FASB Statement No. 133" ("SFAS 161"). SFAS 161 requires enhanced qualitative disclosures about objectives and strategies for using derivatives, quantitative disclosures about fair value amounts of and gains and losses on derivative instruments, and disclosures about credit-risk-related contingent features in derivative agreements. SFAS 161 is effective for financial statements issued for fiscal years and interim periods beginning after November 15, 2008. The Company is currently evaluating the impact of SFAS 161 on its consolidated financial statements.

In February 2008, the FASB issued FSP No. FAS 140-3, "Accounting for Transfers of Financial Assets and Repurchase Financing Transactions" ("FSP 140-3"). FSP 140-3 provides guidance for evaluating whether to account for a transfer of a financial asset and repurchase financing as a single transaction or as two separate transactions. FSP 140-3 is

effective prospectively for financial statements issued for fiscal years beginning after November 15, 2008. The Company is currently evaluating the impact of FSP 140-3 on its consolidated financial statements.

In December 2007, the FASB issued SFAS No. 141 (revised 2007), “Business Combinations — A Replacement of FASB Statement No. 141” (“SFAS 141(r)”) and SFAS No. 160, “Noncontrolling Interests in Consolidated Financial Statements — An Amendment of ARB No. 51” (“SFAS 160”). SFAS 141(r) establishes principles and requirements for how an acquirer recognizes and measures certain items in a business combination, as well as disclosures about the nature and financial effects of a business combination. SFAS 160 establishes accounting and reporting standards surrounding noncontrolling interest, or minority interests, which are the portions of equity in a subsidiary not attributable, directly or indirectly, to a parent. The pronouncements are effective for fiscal years beginning on or after December 15, 2008 and apply prospectively to business combinations. Presentation and disclosure requirements related to noncontrolling interests must be retrospectively applied. The Company is currently evaluating the impact of SFAS 141(r) on its accounting for future acquisitions and the impact of SFAS 160 on its consolidated financial statements.

In February 2007, the FASB issued SFAS No. 159, “The Fair Value Option for Financial Assets and Financial Liabilities” (“SFAS 159”). SFAS 159 permits all entities the option to measure most financial instruments and certain other items at fair value at specified election dates and to report related unrealized gains and losses in earnings. The fair value option will generally be applied on an instrument-by-instrument basis and is generally an irrevocable election. SFAS 159 is effective for fiscal years beginning after November 15, 2007. The Company did not elect to apply the fair value option available under SFAS 159 for any of its eligible financial instruments.

In September 2006, the FASB ratified the Emerging Issues Task Force (“EITF”) consensus on Issue 06-5. This issue titled “Accounting for the Purchases of Life Insurance – Determining the Amount That Could Be Realized in Accordance with FASB Technical Bulletin No. 85-4”, clarified that the amount of the DAC receivable beyond one year generally must be discounted to present value under Accounting Principles Board Opinion 21. The Company adopted the provisions of EITF Issue 06-05 effective January 1, 2007. The adoption of EITF Issue 06-05 did not have a material impact on the Company’s consolidated financial statements.

In September 2006, the SEC issued Staff Accounting Bulletin (“SAB”) No. 108, “Considering the Effects of Prior Year Misstatements when Quantifying Misstatements in Current Year Financial Statements” (“SAB 108”). SAB 108 provides guidance on how prior year misstatements should be considered when quantifying misstatements in current year financial statements for purposes of assessing materiality. SAB 108 requires that a registrant assess the materiality of a current period misstatement by determining how the current period’s balance sheet would be affected in correcting a misstatement without considering the year(s) in which the misstatement originated and how the current period’s income statement is misstated, including the reversing effect of prior year misstatements. SAB 108 is effective for fiscal years ending after November 15, 2006. The cumulative effect of applying SAB 108 may be recorded by adjusting current year beginning balances of the affected assets and liabilities with a corresponding adjustment to the current year opening balance in retained earnings if certain criteria are met. The adoption of SAB 108 did not have a material impact on the Company’s consolidated financial statements.

In September 2006, the FASB issued SFAS 158, “Employers’ Accounting for Defined Benefit Pension and Other Postretirement Plans - an amendment of FASB Statements No. 87, 88, 106, and 132(r)” (“SFAS 158”). The pronouncement revises financial reporting standards for defined benefit pension and other postretirement plans by requiring the (i) recognition in the statement of financial position of the funded status of defined benefit plans measured as the difference between the fair value of plan assets and the benefit obligation, which is the projected benefit obligation for pension plans and the accumulated postretirement benefit obligation for other postretirement plans; (ii) recognition as an adjustment to accumulated other comprehensive income (loss), net of income taxes, those amounts of actuarial gains and losses, prior service costs and credits, and transition obligations that have not yet been included in net periodic benefit costs as of the end of the year of adoption; (iii) recognition of subsequent changes in funded status as a component of other comprehensive income; (iv) measurement of benefit plan assets and obligations as of the date of the statement of financial position; and (v) disclosure of additional information about the effects on the employer’s statement of financial position. The Company adopted SFAS 158 on December 31, 2006 increasing other liabilities by \$17.4 million, decreasing deferred income taxes by \$6.1 million, and reducing the Company’s total stockholder’s equity by \$11.3 million.

In September 2006, the FASB issued SFAS No. 157 which defines fair value, establishes a framework for measuring fair value, establishes a fair value hierarchy based on the quality of inputs used to measure fair value and enhances disclosure requirements for fair value measurements. The Company adopted SFAS 157 effective January 1, 2008. The Company’s adoption of SFAS 157 resulted in a pre-tax gain of approximately \$3.9 million, included in interest credited, related primarily to the decrease in the fair value of embedded derivative liabilities associated with equity-indexed annuity

products primarily from the incorporation of nonperformance risk, also referred to as the Company's own credit risk, into the fair value calculation.

In June 2006, the FASB issued FIN 48 which clarifies the accounting for uncertainty in income tax recognized in a company's financial statements. FIN 48 requires companies to determine whether it is "more likely than not" that a tax position will be sustained upon examination by the appropriate taxing authorities before any part of the benefit can be recorded in the financial statements. It also provides guidance on the recognition, measurement and classification of income tax uncertainties, along with any related interest and penalties. Previously recorded income tax benefits that no longer meet this standard are required to be charged to earnings in the period that such determination is made. The Company adopted FIN 48 effective January 1, 2007. As a result of adoption of FIN 48, the Company recognized a \$17.3 million increase in the liability for unrecognized tax benefits, a \$5.3 million increase in the interest liability for unrecognized tax benefits, and a corresponding reduction to the January 1, 2007 balance of retained earnings of \$22.6 million. The Company's total amount of unrecognized tax benefits upon adoption of FIN 48 was \$196.3 million.

In December 2004, the FASB revised SFAS No. 123 "Accounting for Stock Based Compensation" ("SFAS 123") to "Share-Based Payment" ("SFAS 123(r)"). SFAS 123(r) provides additional guidance on determining whether certain financial instruments awarded in share-based payment transactions are liabilities. SFAS 123(r) also requires that the cost of all share-based transactions be recorded in the financial statements. The revised pronouncement was adopted by the Company during the first quarter of 2006 increasing compensation cost by approximately \$1.7 million. See Note 18 – "Equity Based Compensation" in the Notes to Consolidated Financial Statements for additional information.

Reinsurance Group of America, Incorporated
Notes to consolidated financial statements
For the years ended December 31, 2008, 2007 and 2006

Note 1 ORGANIZATION

Reinsurance Group of America, Incorporated ("RGA") is an insurance holding company that was formed on December 31, 1992. Immediately prior to September 12, 2008 ("the Divestiture Date"), General American Life Insurance Company ("General American"), a Missouri life insurance company, directly owned 32,243,539 shares, or approximately 51.7%, of the outstanding shares of common stock of RGA. General American is a wholly-owned subsidiary of MetLife, Inc. ("MetLife"), a New York-based insurance and financial services holding company. On the Divestiture Date, MetLife disposed of the majority of its interest in RGA by exchanging 29,243,539 of its shares of RGA common stock to MetLife shareholders for shares of MetLife common stock. As of December 31, 2008, MetLife has a retained interest of 4.1% of RGA common stock.

The consolidated financial statements include the assets, liabilities, and results of operations of RGA, RGA Reinsurance Company ("RGA Reinsurance"), Reinsurance Company of Missouri, Incorporated ("RCM"), RGA Reinsurance Company (Barbados) Ltd. ("RGA Barbados"), RGA Americas Reinsurance Company, Ltd. ("RGA Americas"), RGA Life Reinsurance Company of Canada ("RGA Canada"), RGA Reinsurance Company of Australia, Limited ("RGA Australia"), RGA Reinsurance UK Limited ("RGA UK") and RGA Atlantic Reinsurance Company, Ltd. ("RGA Atlantic") as well as other subsidiaries, subject to an ownership position of greater than fifty percent (collectively, the "Company").

The Company is primarily engaged in life reinsurance. Reinsurance is an arrangement under which an insurance company, the reinsurer, agrees to indemnify another insurance company, the ceding company, for all or a portion of the insurance risks underwritten by the ceding company. Reinsurance is designed to (i) reduce the net liability on individual risks, thereby enabling the ceding company to increase the volume of business it can underwrite, as well as increase the maximum risk it can underwrite on a single life or risk; (ii) stabilize operating results by leveling fluctuations in the ceding company's loss experience; (iii) assist the ceding company to meet applicable regulatory requirements; and (iv) enhance the ceding company's financial strength and surplus position.

Note 2 SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES

Consolidation and Basis of Presentation

The consolidated financial statements of the Company have been prepared in accordance with accounting principles generally accepted in the United States of America. The preparation of financial statements in conformity with accounting principles generally accepted in the United States of America requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities and the reported amounts of revenues and expenses during the reporting period. The most significant estimates include those used in determining deferred policy acquisition costs, premiums receivable, future policy benefits, other policy claims and benefits, including incurred but not reported claims, provision for adverse litigation, income taxes, and valuation of investments and investment impairments. Actual results could differ materially from the estimates and assumptions used by management.

For each of its reinsurance contracts, the Company must determine if the contract provides indemnification against loss or liability relating to insurance risk, in accordance with applicable accounting standards. The Company must review all contractual features, particularly those that may limit the amount of insurance risk to which the Company is subject to or features that delay the timely reimbursement of claims. If the Company determines that a contract does not expose it to a reasonable possibility of a significant loss from insurance risk, the Company records the contract on a deposit method of accounting with the net amount payable/receivable reflected in other reinsurance assets or liabilities on the consolidated balance sheets. Fees earned on the contracts are reflected as other revenues, as opposed to premiums, on the consolidated statements of income.

The accompanying consolidated financial statements include the accounts of RGA and its subsidiaries, both direct and indirect, subject to an ownership position greater than fifty percent, and any variable interest entities where the Company is the primary beneficiary. Entities in which the Company has an ownership position greater than twenty percent, but less than or equal to fifty percent are reported under the equity method of accounting. The Company evaluates variable interest entities in accordance with Financial Accounting Standards Board ("FASB") Interpretation No. 46(r) "Consolidation of Variable Interest Entities - An Interpretation of ARB No. 51". Intercompany balances and transactions have been eliminated.

Investments

Fixed Maturity Securities

Fixed maturity securities available-for-sale are reported at fair value and are so classified based upon the possibility that such securities could be sold prior to maturity if that action enables the Company to execute its investment philosophy and appropriately match investment results to operating and liquidity needs.

Unrealized gains and losses on fixed maturity securities classified as available-for-sale, less applicable deferred income taxes as well as related adjustments to deferred acquisition costs, if applicable, are reflected as a direct charge or credit to accumulated other comprehensive income (“AOCI”) in stockholders’ equity on the consolidated balance sheets.

Mortgage Loans on Real Estate

Mortgage loans on real estate are carried at unpaid principal balances, net of any unamortized premium or discount and valuation allowances. Valuation allowances on mortgage loans are established based upon losses expected by management to be realized in connection with future dispositions or settlement of mortgage loans, including foreclosures. The Company establishes valuation allowances for estimated impairments as of the balance sheet date. Such valuation allowances are based on the excess carrying value of the loan over the present value of expected future cash flows discounted at the loan’s original effective interest rate, the value of the loan’s collateral if the loan is in the process of foreclosure or otherwise collateral dependent, or the loan’s market value if the loan is being sold. Any subsequent adjustments to the valuation allowances will be treated as investment gains (losses), net. The Company will continue to accrue interest on loans until it is probable the Company will not receive interest or the loan is 90 days past due. Any interest accrued or received on the net carrying amount of the impaired loan will be included in investment income or applied to the principal of the loan and all other changes in the net carrying amount of the loan will be an adjustment to bad-debt expense.

Short-term Investments

Short-term investments represent investments with original maturities of greater than three months but less than twelve months and are stated at amortized cost, which approximates fair value.

Policy Loans

Policy loans are reported at the unpaid principal balance. Interest income on such loans is recorded as earned using the contractually agreed upon interest rate.

Funds Withheld at Interest

Funds withheld at interest represent amounts contractually withheld by ceding companies in accordance with reinsurance agreements. For agreements written on a modified coinsurance basis and agreements written on a coinsurance funds withheld basis, assets equal to the net statutory reserves are withheld and legally owned by the ceding company. Interest accrues to these assets at rates defined by the treaty terms.

For reinsurance transactions executed through December 31, 1994, assets and liabilities related to treaties written on a modified coinsurance basis with funds withheld are reported on a gross basis. For modified coinsurance reinsurance transactions with funds withheld executed on or after December 31, 1994, assets and liabilities are reported on a net or gross basis, depending on the specific details within each treaty. Reinsurance agreements reported on a net basis, where a legal right of offset exists, are generally included in other reinsurance balances on the consolidated balance sheets.

Other Invested Assets

In addition to derivative contracts discussed below, other invested assets include equity securities and preferred stocks, carried at fair value, and limited partnership interests and structured loans, primarily carried at cost. Changes in fair value of equity securities and preferred stocks are recorded through AOCI.

Other-than-Temporary Impairment

The cost of investment securities and other invested assets are adjusted for impairments in value deemed to be other-than-temporary in the period in which the determination is made. These impairments are included within investment related gains

(losses), net and the cost basis of the investment securities is reduced accordingly. The Company does not change the revised cost basis for subsequent recoveries in value.

The assessment of whether impairments have occurred is based on management's case-by-case evaluation of the underlying reasons for the decline in fair value. The Company's review of its fixed maturity and equity securities for impairments includes an analysis of the total gross unrealized losses by three categories of securities: (i) securities where the estimated fair value had declined and remained below cost or amortized cost by less than 20%; (ii) securities where the estimated fair value had declined and remained below cost or amortized cost by 20% or more for less than six months; and (iii) securities where the estimated fair value had declined and remained below cost or amortized cost by 20% or more for six months or greater.

Additionally, management considers a wide range of factors about the security issuer and uses its best judgment in evaluating the cause of the decline in the estimated fair value of the security and in assessing the prospects for near-term recovery. Inherent in management's evaluation of the security are assumptions and estimates about the operations of the issuer and its future earnings potential. Considerations used by the Company in the impairment evaluation process include, but are not limited to: (i) the length of time and the extent to which the estimated fair value has been below cost or amortized cost; (ii) the potential for impairments of securities when the issuer is experiencing significant financial difficulties; (iii) the potential for impairments in an entire industry sector or sub-sector; (iv) the potential for impairments in certain economically depressed geographic locations; (v) the potential for impairments of securities where the issuer, series of issuers or industry has suffered a catastrophic type of loss or has exhausted natural resources; (vi) the Company's ability and intent to hold the security for a period of time sufficient to allow for the recovery of its value to an amount equal to or greater than cost or amortized cost (See Note 4 - "Investments"); (vii) unfavorable changes in forecasted cash flows on asset-backed securities; and (viii) other subjective factors, including concentrations and information obtained from regulators and rating agencies.

Derivative Instruments

Overview

Derivatives are financial instruments whose values are derived from interest rates, foreign currency exchange rates, or other financial indices. The Company utilizes a variety of derivative instruments including swaps, forwards and futures, primarily to manage or hedge interest rate risk, foreign currency risk and various other market risks associated with its business. The Company does not invest in derivatives for speculative purposes. It is the Company's policy to enter into derivative contracts primarily with highly rated parties. See Note 5 – "Derivative Instruments" for additional detail on the Company's derivative positions.

Accounting and Financial Statement Presentation of Derivatives

Derivatives are carried on the Company's consolidated balance sheets in other invested assets or as liabilities within other liabilities, at fair value. On the date a derivative contract is executed, the Company designates the derivative as (1) a fair value hedge, (2) a cash flow hedge, (3) a foreign currency hedge, (4) a net investment hedge in a foreign operation or (5) held for other risk management purposes, which primarily involve managing asset or liability risks associated with the Company's reinsurance treaties which do not qualify for hedge accounting.

Under a fair value hedge, changes in the fair value of the hedging derivative, including amounts measured as ineffectiveness, and changes in the fair value of the hedged item related to the designated risk being hedged, are reported within investment related gains (losses), net. The fair values of the hedging derivatives are exclusive of any accruals that are separately reported in the consolidated statement of income within interest income or interest expense to match the location of the hedged item.

Under a cash flow hedge, changes in the fair value of the hedging derivative measured as effective are reported within AOCI, a separate component of stockholders' equity, and the deferred gains or losses on the derivative are reclassified into the consolidated statement of income when the Company's earnings are affected by the variability in cash flows of the hedged item. Changes in the fair value of the hedging instrument measured as ineffectiveness are reported within investment related gains (losses), net. The fair values of the hedging derivatives are exclusive of any accruals that are separately reported in the consolidated statement of income within interest income or interest expense to match the location of the hedged item.

Changes in the fair value of derivatives that are designated and qualify as foreign currency hedges are recorded in either current period earnings or AOCI, depending on whether the hedged transaction is a fair value hedge or a cash flow hedge, respectively. Any hedge ineffectiveness is recorded immediately in current period earnings as investment related gains (losses), net. Periodic derivative net coupon settlements are recorded in the line item of the consolidated statements of income in which the cash flows of the hedged item are recorded.

In a hedge of a net investment in a foreign operation, changes in the fair value of the hedging derivative that are measured as effective are reported within AOCI consistent with the translation adjustment for the hedged net investment in the foreign operation. Changes in the fair value of the hedging instrument measured as ineffectiveness are reported within investment related gains (losses), net.

Changes in the fair value of free-standing derivative instruments not accounted for as hedges are reflected in investment related gains (losses), net.

Hedge Documentation and Hedge Effectiveness

To qualify for hedge accounting, at the inception of the hedging relationship, the Company formally documents its risk management objective and strategy for undertaking the hedging transaction, as well as its designation of the hedge as either (i) a fair value hedge; (ii) a cash flow hedge; (iii) a foreign currency hedge; or (iv) a hedge of a net investment in a foreign operation. In this documentation, the Company sets forth how the hedging instrument is expected to hedge the designated risks related to the hedged item and sets forth the method that will be used to retrospectively and prospectively assess the hedging instrument's effectiveness and the method which will be used to measure ineffectiveness. A derivative designated as a hedging instrument must be assessed as being highly effective in offsetting the designated risk of the hedged item. Hedge effectiveness is formally assessed at inception and periodically throughout the life of the designated hedging relationship. Assessments and measurement of hedge effectiveness are also subject to interpretation and estimation and different interpretations or estimates may have a material effect on the amount reported in net income.

As of December 31, 2008, the Company holds a net investment hedge of a portion of its investment in its Canada operations and fair value hedges that convert fixed rate investments to floating rate investments. Changes in the fair value derivatives used to hedge the net investment, to the extent effective as a hedge, are recorded in the foreign currency translation account within AOCI. Cumulative changes in the fair value recorded in AOCI are reclassified into earnings upon the sale or complete, or substantially complete, liquidation of the foreign entity. Any hedge ineffectiveness is recorded immediately in the current period earnings as investment related gains (losses), net. Changes in the fair value of the derivatives used in fair value hedges, including amounts measured as ineffectiveness, and changes in the fair value of the hedged item related to the designated risk being hedged, are reported within investment related gains (losses), net. The fair values of the hedging derivatives are exclusive of any accruals that are separately reported in the consolidated statement of income within interest income to match the location of the hedged item.

The accounting for derivatives is complex and interpretations of the primary accounting standards continue to evolve in practice. Judgment is applied in determining the availability and application of hedge accounting designations and the appropriate accounting treatment under these accounting standards. If it was determined that hedge accounting designations were not appropriately applied, reported net income could be materially affected. Differences in judgment as to the availability and application of hedge accounting designations and the appropriate accounting treatment may result in a differing impact on the consolidated financial statements of the Company from that previously reported.

Embedded Derivatives

The Company reinsures certain annuity products that contain terms that are deemed to be embedded derivatives, primarily equity-indexed annuities and variable annuities with guaranteed minimum benefits. The Company assesses each identified embedded derivative to determine whether it is required to be bifurcated under Statement of Financial Accounting Standards ("SFAS") No. 133, "Accounting for Derivative Instruments and Hedging Activities" ("SFAS 133"). If the instrument would not be reported for in its entirety at fair value and it is determined that the terms of the embedded derivative are not clearly and closely related to the economic characteristics of the host contract, and that a separate instrument with the same terms would qualify as a derivative instrument, the embedded derivative is bifurcated from the host contract and accounted for separately. Such embedded derivatives are carried on the consolidated balance sheets at fair value with the host contract. Changes in the fair value of embedded derivatives associated with equity-indexed annuities are reflected in interest credited on the consolidated statements of income and changes in the fair value of embedded derivatives associated with variable annuity guaranteed minimum benefits are reflected in investment related gains (losses), net on the consolidated statements of income. The Company has implemented a hedging strategy to mitigate the volatility associated with its reinsurance of variable annuity guaranteed minimum benefits. The hedging strategy is designed such that changes in the fair value of the hedge contracts, primarily future and swap contracts, move in the opposite direction of changes in the fair value of the embedded derivatives, except for those changes associated with market implied volatility. While the Company actively manages its hedging program, it does not hedge market implied volatility, and the hedges that are in place may not be totally effective in offsetting the embedded derivative changes due to the many variables that must be managed.

Additionally, reinsurance treaties written on a modified coinsurance or funds withheld basis are subject to the provisions of SFAS 133 Implementation Issue No. B36, “Embedded Derivatives: Modified Coinsurance Arrangements and Debt Instruments That Incorporate Credit Risk Exposures That Are Unrelated or Only Partially Related to the Creditworthiness of the Obligor under Those Instruments” (“Issue B36”).

The majority of the Company’s funds withheld at interest balances are associated with its reinsurance of annuity contracts, the majority of which were subject to the provisions of Issue B36. Management believes the embedded derivative feature in each of these reinsurance treaties is similar to a total return swap on the assets held by the ceding companies. The valuation of the Issue B36 embedded derivative is sensitive to the credit spread environment. During 2008, in accordance with SFAS No. 157, “Fair Value Measurements” (“SFAS 157”), the Company began including an estimate of its own credit spreads in the calculation of the fair value of the embedded derivative for Issue B36. The adjustment associated with the Company’s own credit risk resulted in a decrease in the liability and corresponding investment related loss of \$376.3 million, pretax, for the year ended December 31, 2008. The change in fair value, which is a non-cash item, also affects the amortization of deferred acquisition costs since the Company is required to include it in its expectation of gross profits. The fair value of the embedded derivatives is included in the funds withheld at interest line item on the consolidated balance sheets. The change in the fair value of the embedded derivatives is recorded in investment related gains (losses), net on the consolidated income statements.

In addition to its reinsured annuity contracts, the Company has entered into various financial reinsurance treaties on a funds withheld and modified coinsurance basis. These treaties do not transfer significant insurance risk and are recorded on a deposit method of accounting with the Company earning a net fee. As a result of the experience refund provisions contained in these treaties, the value of the embedded derivatives in these contracts is currently considered immaterial. The Company monitors the performance of these treaties on a quarterly basis. Significant adverse performance or losses on these treaties may result in a loss associated with the embedded derivative.

Fair Value Measurements

Effective January 1, 2008, the Company adopted SFAS 157 which defines fair value, establishes a framework for measuring fair value, establishes a fair value hierarchy based on the quality of inputs used to measure fair value and enhances disclosure requirements for fair value measurements. In compliance with SFAS No. 157, the Company has categorized its financial instruments, based on the priority of the inputs to the valuation technique, into a three level hierarchy. The fair value hierarchy gives the highest priority to quoted prices in active markets for identical assets or liabilities (Level 1) and the lowest priority to unobservable inputs (Level 3).

If the inputs used to measure fair value fall within different levels of the hierarchy, the category level is based on the lowest priority level input that is significant to the fair value measurement of the instrument.

In accordance with SFAS 157, assets and liabilities recorded at fair value on the consolidated balance sheets are categorized as follows:

- Level 1 Unadjusted quoted prices in active markets for identical assets or liabilities.
- Level 2 Quoted prices in markets that are not active or inputs that are observable either directly or indirectly. Level 2 inputs include quoted prices for similar assets or liabilities other than quoted prices in Level 1; quoted prices in markets that are not active; or other inputs that are observable or can be derived principally from or corroborated by observable market data for substantially the full term of the assets or liabilities.
- Level 3 Unobservable inputs that are supported by little or no market activity and are significant to the fair value of the assets or liabilities. Unobservable inputs reflect the reporting entity’s own assumptions about the assumptions that market participants would use in pricing the asset or liability. Level 3 assets and liabilities include financial instruments whose value is determined using pricing models, discounted cash flow methodologies, or similar techniques, as well as instruments for which the determination of fair value requires significant management judgment or estimation.

See Note 6 - “Fair Value of Financial Instruments” for further details on the Company’s assets and liabilities recorded at fair value.

Cash and Cash Equivalents

The Company considers all investments purchased with an original maturity of three months or less to be cash equivalents.

Additional Information Regarding Statements of Cash Flows

Cash and cash equivalents include cash on deposit and highly liquid debt instruments purchased with an original maturity of three months or less. The consolidated statements of cash flows includes the results of discontinued operations in net cash from operations for all years presented, as the effect of the discontinued operations on cash flows is not considered material.

Premiums Receivable

Premiums are accrued when due and in accordance with information received from the ceding company. When a ceding company fails to report information on a timely basis, the Company records accruals based on the terms of the reinsurance treaty as well as historical experience. Other management estimates include adjustments for lapsed premiums given historical experience, the financial health of specific ceding companies, collateral value and the legal right of offset on related amounts (i.e. allowances and claims) owed to the ceding company. Under the legal right of offset provisions in its reinsurance treaties, the Company can withhold payments for allowances and claims for unpaid premiums. Based on its review of these factors and historical experience, the Company did not believe a provision for doubtful accounts was necessary as of December 31, 2008 or 2007.

Deferred Policy Acquisition Costs

Costs of acquiring new business, which vary with and are primarily related to the production of new business, have been deferred to the extent that such costs are deemed recoverable from future premiums or gross profits. Such costs include commissions and allowances as well as certain costs of policy issuance and underwriting. The Company performs periodic tests to establish that Deferred Policy Acquisition Costs (“DAC”) remains recoverable, and if financial performance significantly deteriorates to the point where a premium deficiency exists, a cumulative charge to current operations will be recorded. No such adjustments related to DAC recoverability were made during 2008, 2007 or 2006. Deferred costs related to traditional life insurance contracts, substantially all of which relate to long-duration contracts, are amortized over the premium-paying period of the related policies in proportion to the ratio of individual period premium revenues to total anticipated premium revenues over the life of the policy. Such anticipated premium revenues are estimated using the same assumptions used for computing liabilities for future policy benefits.

Deferred costs related to interest-sensitive life and investment-type policies are amortized over the lives of the policies, in relation to the present value of estimated gross profits from mortality, investment income less interest credited, and expense margins.

Other Reinsurance Balances

The Company assumes and retrocedes financial reinsurance contracts that represent low mortality risk reinsurance treaties. These contracts are reported as deposits and are included in other reinsurance assets/liabilities. The amount of revenue reported in other revenues on these contracts represents fees and the cost of insurance under the terms of the reinsurance agreement. Balances resulting from the assumption and/or subsequent transfer of benefits and obligations resulting from cash flows related to variable annuities have also been classified as other reinsurance balance assets and/or liabilities.

Goodwill and Value of Business Acquired

Goodwill and certain intangibles are not amortized into results of operations, but instead are reviewed at least annually for impairment and written down and charged to results of operations only in the periods in which the recorded value of goodwill and certain intangibles is more than its fair value. From 2006 through 2008, there were no changes to goodwill as a result of acquisitions or disposals. Goodwill as of December 31, 2008 and 2007 totaled \$7.0 million including accumulated amortization of \$1.0 million, and was related to the purchase by the Company’s U.S. operations of RGA Financial Group L.L.C. in 2000. The value of business acquired is amortized in proportion to the ratio of annual premium revenues to total anticipated premium revenues or in relation to the present value of estimated profits. Anticipated premium revenues have been estimated using assumptions consistent with those used in estimating reserves for future policy benefits. The carrying value is reviewed at least annually for indicators of impairment in value. The value of business acquired was approximately \$1.7 million and \$2.1 million, including accumulated amortization of \$11.7 million and \$11.3 million, as of December 31, 2008 and 2007, respectively. The value of business acquired amortization expense for the years ended December 31, 2008, 2007 and 2006 was \$0.4 million, \$0.6 million, and \$0.8 million, respectively. These amortized balances are included in other assets on the consolidated balance sheets. Amortization of the value of business acquired is estimated to be \$0.4 million, \$0.3 million, \$0.2 million, \$0.2 million and \$0.1 million during 2009, 2010, 2011, 2012 and 2013, respectively.

Other Assets

In addition to the goodwill and value of business acquired previously discussed, other assets primarily includes separate accounts, unamortized debt issuance costs, capitalized software, and other capitalized assets. Capitalized software is stated at cost, less accumulated amortization. Purchased software costs, as well as internal and external costs incurred to develop internal-use computer software during the application development stage, are capitalized. As of December 31, 2008 and 2007, the Company had unamortized computer software costs of approximately \$13.3 million and \$15.9 million, respectively. During 2008, 2007 and 2006, the Company amortized computer software costs of \$3.4 million, \$4.4 million, and \$3.0 million, respectively. Amortization of software costs is recorded on a straight-line basis over periods ranging from three to ten years. Carrying values are reviewed periodically for indicators of impairment in value.

Future Policy Benefits and Interest-Sensitive Contract Liabilities

Liabilities for future benefits on life policies are established in an amount adequate to meet the estimated future obligations on policies in force. Liabilities for future policy benefits under long-term life insurance policies have been computed based upon expected investment yields, mortality and withdrawal (lapse) rates, and other assumptions. These assumptions include a margin for adverse deviation and vary with the characteristics of the plan of insurance, year of issue, age of insured, and other appropriate factors. Interest rates range from 4.0% to 6.3%. The mortality and withdrawal assumptions are based on the Company's experience as well as industry experience and standards. Liabilities for future benefits on interest-sensitive life and investment-type contract liabilities are carried at the accumulated contract holder values without reduction for potential surrender or withdrawal charges.

The Company periodically reviews actual and anticipated experience compared to the assumptions used to establish policy benefits. The Company establishes premium deficiency reserves if actual and anticipated experience indicates that existing policy liabilities together with the present value of future gross premiums will not be sufficient to cover the present value of future benefits, settlement and maintenance costs and to recover unamortized acquisition costs. The premium deficiency reserve is established by a charge to income, as well as a reduction in unamortized acquisition costs and, to the extent there are no unamortized acquisition costs, an increase in future policy benefits.

In establishing reserves for future policy benefits, the Company assigns policy liability assumptions to particular time frames (eras) in such a manner as to be consistent with the underlying assumptions and economic conditions at the time the risks are assumed. The Company generally maintains a consistent level of provision for adverse deviation between eras.

The reserving process includes normal periodic reviews of assumptions used and adjustments of reserves to incorporate the refinement of the assumptions. Any such adjustments relate only to policies assumed in recent periods and the adjustments are reflected by a cumulative charge or credit to current operations.

The Company establishes future policy benefits for guaranteed minimum death benefits ("GMDB") relating to the reinsurance of certain variable annuity contracts by estimating the expected value of death benefits in excess of the projected account balance and recognizing the excess proportionally over the accumulation period based on total expected assessments. The Company regularly evaluates estimates used and adjusts the additional liability balance, with a related charge or credit to claims and other policy benefits, if actual experience or other evidence suggests that earlier assumptions should be revised. The assumptions used in estimating the GMDB liabilities are consistent with those used for amortizing DAC, and are thus subject to the same variability and risk. The Company's GMDB liabilities at December 31, 2008 were not material.

The Company reinsures asset-intensive products, including annuities and corporate-owned life insurance. The investment portfolios for these products are segregated for management purposes within the general account of RGA Reinsurance. The liabilities under asset-intensive reinsurance contracts reinsured on a coinsurance basis are included in interest-sensitive contract liabilities on the consolidated balance sheets. Investment-type contracts principally include traditional individual fixed annuities in the accumulation phase, equity-indexed annuities, non-variable group annuity contracts and individual variable annuity contracts. Interest-sensitive contract liabilities are equal to (i) policy account values, which consist of an accumulation of gross premium payments; (ii) credited interest less expenses, mortality charges, and withdrawals; and (iii) fair value adjustments relating to business combinations. Additionally, certain annuity contracts the Company reinsures contain terms, such as guaranteed minimum benefits and equity participation options, which are deemed to be embedded derivatives and are accounted for based on the provisions of SFAS 133.

The Company establishes liabilities for guaranteed minimum living benefits relating to certain variable annuity products as follows:

Guaranteed minimum income benefits ("GMIB") provide the contract holder, after a specified period of time determined at the time of issuance of the variable annuity contract, with a minimum level of income (annuity) payments. Under the

reinsurance treaty, the Company makes a payment to the ceding company equal to the GMIB net amount-at-risk at the time of annuitization and thus these contracts meet the net settlement criteria of SFAS 133 and the Company assumes no mortality risk. Accordingly, the GMIB is considered an embedded derivative, which is measured at fair value separately from the host variable annuity product.

Guaranteed minimum withdrawal benefits (“GMWB”) guarantee the contract holder a return of their purchase payment via partial withdrawals, even if the account value is reduced to zero, provided that the contract holder’s cumulative withdrawals in a contract year do not exceed a certain limit. The initial guaranteed withdrawal amount is equal to the initial benefit base as defined in the contract (typically, the initial purchase payments plus applicable bonus amounts). The GMWB is also an embedded derivative, which is measured at fair value separately from the host variable annuity product.

Guaranteed minimum accumulation benefits (“GMAB”) provide the contract holder, after a specified period of time determined at the time of issuance of the variable annuity contract, with a minimum accumulation of their purchase payments even if the account value is reduced to zero. The initial guaranteed accumulation amount is equal to the initial benefit base as defined in the contract (typically, the initial purchase payments plus applicable bonus amounts). The GMAB is also an embedded derivative, which is measured at fair value separately from the host variable annuity product.

For GMIB, GMWB and GMAB, the initial benefit base is increased by additional purchase payments made within a certain time period and decreased by benefits paid and/or withdrawal amounts. After a specified period of time, the benefit base may also increase as a result of an optional reset as defined in the contract.

The fair values of the GMIB, GMWB and GMAB liabilities are reflected in interest-sensitive contract liabilities on the consolidated balance sheets and are calculated based on actuarial and capital market assumptions related to the projected cash flows, including benefits and related contract charges, over the lives of the contracts, incorporating expectations concerning policyholder behavior, such as lapses, withdrawals and benefit selections. In measuring the fair value of GMIBs, GMWBs and GMABs, the Company attributes a portion of the fees collected from the policyholder equal to the present value of expected future guaranteed minimum income, withdrawal and accumulation benefits (at inception). The changes in fair value are reported in investment related gains (losses), net. Any additional fees represent “excess” fees and are reported in other revenues on the consolidated statements of income. These variable annuity guaranteed living benefits may be more costly than expected in volatile or declining markets, causing an increase in interest-sensitive contract liabilities, negatively affecting net income.

The Company reinsures equity-indexed annuity contracts. These contracts allow the contract holder to elect an interest rate return or an equity market component where interest credited is based on the performance of common stock market indices, such as the S&P 500 Index®, the Dow Jones Industrial Average, or the NASDAQ. The equity market option is considered an embedded derivative, similar to a call option, which is reflected at fair value on the consolidated balance sheets in interest-sensitive contract liabilities. The fair value of embedded derivatives is computed based on a projection of future equity option costs using a budget methodology, discounted back to the balance sheet date using current market indicators of volatility and interest rates. Changes in the fair value of the embedded derivatives are included as a component of interest credited on the consolidated statements of income.

The Company periodically reviews its estimates of actuarial liabilities for interest-sensitive contract liabilities and compares them with its actual experience. Differences between actual experience and the assumptions used in pricing these guarantees and benefits and in the establishment of the related liabilities result in variances in profit and could result in losses. The effects of changes in such estimated liabilities are included in the results of operations in the period in which the changes occur.

Other Policy Claims and Benefits

Claims payable for incurred but not reported losses are determined using case-basis estimates and lag studies of past experience. The time lag from the date of the claim or death to when the ceding company reports the claim to the Company can vary significantly by ceding company and business segment, but generally averages around 2.8 months on a consolidated basis. The Company updates its analysis of incurred but not reported, including lag studies, on a quarterly basis and adjusts its claim liabilities accordingly.

Other Liabilities

Other liabilities primarily includes investments in transit, separate accounts, employee benefits, current federal income taxes payable, and payables related to securities lending collateral and repurchase agreements. The Company requires cash collateral to be paid on securities lending transactions. The cash collateral is reported in cash and cash equivalents, while the offsetting collateral re-payment obligation is reported in other liabilities. There were no securities lending agreements

outstanding at December 31, 2008 and 2007. The Company utilizes sales of investment securities with agreements to repurchase the same securities for purposes of short-term financing. The repurchase obligation is a component of other liabilities. There were no securities subject to these agreements outstanding at December 31, 2008. At December 31, 2007, the book value of securities subject to these agreements, and included in fixed maturity securities was \$30.1 million, while the repurchase obligations of \$30.1 million were reported in other liabilities in the consolidated statement of financial position.

Income Taxes

RGA and its eligible U.S. subsidiaries file a consolidated federal income tax return. The U.S. consolidated tax return includes the operations of RGA, RGA Americas, RGA Reinsurance, RGA Barbados, RGA Technology Partners, Inc., RCM, RGA Sigma Reinsurance SPC, Timberlake Financial L.L.C. ("Timberlake Financial"), Timberlake Reinsurance Company II ("Timberlake Re"), Reinsurance Partners, Inc., RGA Worldwide Reinsurance Company, Ltd. ("RGA Worldwide"), formerly Triad Re, Ltd., and Parkway Reinsurance Company. The Company's Argentine, Australian, Barbadian, Bermudian, Canadian, South African, Indian, Irish, and United Kingdom subsidiaries are taxed under applicable local statutes.

For all years presented the Company uses the asset and liability method to record deferred income taxes. Accordingly, deferred income tax assets and liabilities are recognized for the future tax consequences attributable to differences between the financial statement carrying amounts of existing assets and liabilities and their respective tax bases, using enacted tax rates.

As described more fully in "New Accounting Pronouncements", the Company adopted FASB Interpretation FIN No. 48, "Accounting for Uncertainty in Income Taxes — an interpretation of FASB Statement No. 109" ("FIN 48") effective January 1, 2007. Under FIN 48, the Company determines whether it is more-likely-than-not that a tax position will be sustained upon examination by the appropriate taxing authorities before any part of the benefit can be recorded in the financial statements. A tax position is measured at the largest amount of benefit that is greater than 50 percent likely of being realized upon settlement. Unrecognized tax benefits due to tax uncertainties that do not meet the threshold are included within other liabilities and are charged to earnings in the period that such determination is made.

The Company classifies interest recognized as interest expense and penalties recognized as a component of income tax.

Collateral Finance Facility

Collateral finance facility represents notes issued to fund collateral requirements for statutory reserves on specified term life insurance policies reinsured by RGA Reinsurance. The cost of the facility is reflected in collateral finance facility expense. See Note 16 - "Collateral Finance Facility" for additional information.

Company-Obligated Mandatorily Redeemable Preferred Securities of Subsidiary Trust Holding Solely Junior Subordinated Debentures of the Company

During December 2001, RGA Capital Trust I (the "Trust"), a wholly-owned subsidiary of RGA, sold Preferred Income Equity Redeemable Securities ("PIERS") Units. Each unit consists of a preferred security ("Preferred Securities") issued by the Trust with a detachable warrant to purchase 1.2508 shares of RGA common stock. The Trust sold 4.5 million PIERS units. The fair value of the Preferred Securities on the date issued, \$158.1 million, was recorded in liabilities on the consolidated balance sheets under the caption "Company-obligated mandatorily redeemable preferred securities of subsidiary trust holding solely junior subordinated debentures". The coupon rate of the Preferred Securities is 5.75% on a face amount of \$225.0 million.

Warrants

The fair value of the detachable warrants on the date the PIERS units were issued is recorded in stockholders' equity on the consolidated balance sheets under the caption "Warrants". In the aggregate as of December 31, 2008, 4.5 million warrants to purchase approximately 5.6 million shares of Company common stock at a price per share of \$39.98 were outstanding. If on any date after December 18, 2004, the closing price of RGA common stock exceeds and has exceeded a price per share equal to \$47.97 for at least 20 trading days within the immediately preceding 30 consecutive trading days, the Company may redeem the warrants in whole for cash, RGA common stock, or a combination of cash and RGA common stock.

Foreign Currency Translation

The translation of the foreign currency into U.S. dollars is performed for balance sheet accounts using current exchange rates in effect at the balance sheet date and for revenue and expense accounts using a weighted-average exchange rate during each year. Gains or losses, net of applicable deferred income taxes, resulting from such translation are included in accumulated

currency translation adjustments, in AOCI on the consolidated balance sheets until the underlying subsidiary is sold or substantially liquidated. The Company's material functional currencies are the Australian dollar, the British pound, the Canadian dollar, the Japanese yen, the Korean won, the South African rand and euros.

Retrocession Arrangements and Reinsurance Ceded Receivables

The Company generally reports retrocession activity on a gross basis. Amounts paid or deemed to have been paid for reinsurance are reflected in reinsurance ceded receivables. The cost of reinsurance related to long-duration contracts is recognized over the terms of the reinsured policies on a basis consistent with the reporting of those policies.

In the normal course of business, the Company seeks to limit its exposure to loss on any single insured and to recover a portion of benefits paid by ceding reinsurance to other insurance enterprises or reinsurers under excess coverage and coinsurance contracts. Effective January 1, 2008, the Company increased the maximum amount of coverage that it retains per life in the U.S. from \$6.0 million to \$8.0 million. This increase does not affect business written prior to January 1, 2008, unless the Company elects to recapture eligible business previously ceded at a lower retention level. Claims in excess of this retention amount are retroceded to retrocessionaires; however, the Company remains fully liable to the ceding company for the entire amount of risk it assumes. The increase in the Company's U.S. retention limit from \$6.0 million to \$8.0 million reduces the amount of premiums it pays to retrocessionaires, but increases the maximum effect a single death claim can have on its results and therefore may result in additional volatility to its results. In certain limited situations, due to the acquisition of in force blocks of business, the Company has retained more than \$8.0 million per individual policy. In total, there are 19 such cases of over-retained policies, for amounts averaging \$2.1 million over the Company's normal retention limit. The largest amount in excess of the Company's retention on any one life is \$10.1 million. The Company has mitigated the risk related to the over-retained policies by entering into one-year agreements with other reinsurers that commenced in September and October of 2007. For other countries, particularly those with higher risk factors or smaller books of business, the Company systematically reduces its retention. The Company has a number of retrocession arrangements whereby certain business in force is retroceded on an automatic or facultative basis.

Retrocessions are arranged through the Company's retrocession pools for amounts in excess of the Company's retention limit. As of December 31, 2008, all rated retrocession pool participants followed by the A.M. Best Company were rated "A-" or better. For a majority of the retrocessionaires that were not rated, security in the form of letters of credit or trust assets has been given as additional security in favor of RGA Reinsurance. In addition, the Company performs annual financial reviews of its retrocessionaires to evaluate financial stability and performance. In addition to its third party retrocessionaires, various RGA reinsurance subsidiaries retrocede amounts in excess of their retention to RGA Reinsurance, RGA Barbados, RGA Americas or RGA Atlantic.

The Company has never experienced a material default in connection with retrocession arrangements, nor has it experienced any difficulty in collecting claims recoverable from retrocessionaires; however, no assurance can be given as to the future performance of such retrocessionaires or as to recoverability of any such claims.

Recognition of Revenues and Related Expenses

Life and health premiums are recognized as revenue when due from the insured, and are reported net of amounts retroceded. Benefits and expenses are reported net of amounts retroceded and are associated with earned premiums so that profits are recognized over the life of the related contract. This association is accomplished through the provision for future policy benefits and the amortization of deferred policy acquisition costs. Other revenue includes items such as treaty recapture fees, fees associated with financial reinsurance and policy changes on interest-sensitive and investment-type products that the Company reinsures. Any fees that are collected in advance of the period benefited are deferred and recognized over the period benefited. Initial reserve changes are netted against premiums when an in force block of business is reinsured.

For certain reinsurance transactions involving in force blocks of business, the ceding company pays a premium equal to the initial required reserve (future policy benefit). In such transactions, for income statement presentation, the Company nets the expense associated with the establishment of the reserve on the consolidated balance sheet against the premiums from the transaction.

Revenues for interest-sensitive and investment-type products consist of investment income, policy charges for the cost of insurance, policy administration, and surrenders that have been assessed against policy account balances during the period. Interest-sensitive contract liabilities for these products represent policy account balances before applicable surrender charges. Deferred policy acquisition costs are recognized as expenses over the term of the policies. Policy benefits and claims that are charged to expenses include claims incurred in the period in excess of related policy account balances and interest credited to policy account balances. The weighted average interest-crediting rates for interest-sensitive products were 3.3%, 3.8% and

4.3%, during 2008, 2007 and 2006, respectively. The weighted average interest-crediting rates for U.S. dollar-denominated investment-type contracts ranged from 1.9% to 5.5% during 2008, 3.1% to 9.5% during 2007 and 2.5% to 4.8% during 2006.

Investment income is recognized as it accrues or is legally due. Realized gains and losses on sales of investments are included in net income, as are write-downs of investments where declines in value are deemed to be other-than-temporary in nature. The cost of investments sold is determined based upon the specific identification method.

Net Earnings Per Share

Basic earnings per share exclude any dilutive effects of any outstanding options, warrants or units. Diluted earnings per share include the dilutive effects assuming outstanding stock options, warrants or units were exercised.

New Accounting Pronouncements

In January 2009, the FASB issued Staff Position (“FSP”) Emerging Issues Task Force (“EITF”) Issue 99-20-1, “Amendments to the Impairment Guidance of EITF Issue No. 99-20” (“EITF 99-20-1”). EITF 99-20-1 provides guidance on determining other-than-temporary impairments on securities subject to EITF Issue No. 99-20, “Recognition of Interest Income and Impairment on Purchased Beneficial Interests and Beneficial Interests That Continue to Be Held by a Transferor in Securitized Financial Assets”. The primary effect of EITF 99-20-1 was to remove the requirement that a holder attempt to determine the underlying cash flows on an asset-backed security based on the assumptions that a market participant would make in determining the current fair value of the instrument. Instead, the focus has been placed on determining the estimated cash flows as determined by the holder for all sources including its own comprehensive credit analysis. The provisions of EITF 99-20-1 were required to be applied prospectively for interim periods and fiscal years ending after December 15, 2008. The Company’s adoption of EITF 99-20-1 did not have a significant impact on how the Company values its structured securities.

In December 2008, the FASB issued FSP No. FAS 132(r)-1, “Employers Disclosures about Postretirement Benefit Plan Assets” (“FSP 132(r)-1”). FSP 132(r)-1 provides guidance for disclosure of the types of assets and associated risks in retirement plans. The new disclosures are designed to provide additional insight into the major categories of plan assets, the inputs and valuation techniques used to measure the fair value of plan assets, the effect of fair value measurements using significant unobservable inputs on changes in plan assets for the period, significant concentrations of risk within plan assets and how investment decisions are made, including factors necessary to understanding investment policies and strategies. The disclosures about plan assets required by FSP 132(r)-1 is effective for financial statements with fiscal years ending after December 15, 2009. The Company is currently evaluating the impact of FSP 132(r)-1 on its consolidated financial statements.

In October 2008, the FASB issued FSP No. FAS 157-3, “Determining the Fair Value of a Financial Asset When the Market for That Asset Is Not Active” (“FSP 157-3”). FSP 157-3 clarifies the application of SFAS 157 in a market that is not active and provides an example to illustrate key considerations in determining the fair value of a financial asset when the market for that financial asset is not active. FSP 157-3 was effective upon issuance on October 10, 2008, including prior periods for which financial statements had not been issued. The Company did not consider it necessary to change any valuation techniques as a result of FSP 157-3. The Company will also adopt FSP No. FAS 157-2, “Effective Date of FASB Statement No. 157” (“FSP 157-2”) which delays the effective date of SFAS 157 for certain nonfinancial assets and liabilities that are recorded at fair value on a nonrecurring basis. The effective date is delayed until January 1, 2009 and impacts balance sheet items including nonfinancial assets and liabilities in a business combination and the impairment testing of goodwill and long-lived assets. The Company is currently evaluating the impact of FSP 157-2 on its consolidated financial statements.

In March 2008, the FASB issued SFAS No. 161, “Disclosures about Derivative Instruments and Hedging Activities — An Amendment of FASB Statement No. 133” (“SFAS 161”). SFAS 161 requires enhanced qualitative disclosures about objectives and strategies for using derivatives, quantitative disclosures about fair value amounts of and gains and losses on derivative instruments, and disclosures about credit-risk-related contingent features in derivative agreements. SFAS 161 is effective for financial statements issued for fiscal years and interim periods beginning after November 15, 2008. The Company is currently evaluating the impact of SFAS 161 on its consolidated financial statements.

In February 2008, the FASB issued FSP No. FAS 140-3, “Accounting for Transfers of Financial Assets and Repurchase Financing Transactions” (“FSP 140-3”). FSP 140-3 provides guidance for evaluating whether to account for a transfer of a financial asset and repurchase financing as a single transaction or as two separate transactions. FSP 140-3 is effective prospectively for financial statements issued for fiscal years beginning after November 15, 2008. The Company is currently evaluating the impact of FSP 140-3 on its consolidated financial statements.

In December 2007, the FASB issued SFAS No. 141 (revised 2007), “Business Combinations — A Replacement of FASB Statement No. 141” (“SFAS 141(r)”) and SFAS No. 160, “Noncontrolling Interests in Consolidated Financial Statements — An Amendment of ARB No. 51” (“SFAS 160”). SFAS 141(r) establishes principles and requirements for how an acquirer recognizes and measures certain items in a business combination, as well as disclosures about the nature and financial effects of a business combination. SFAS 160 establishes accounting and reporting standards surrounding noncontrolling interest, or minority interests, which are the portions of equity in a subsidiary not attributable, directly or indirectly, to a parent. The pronouncements are effective for fiscal years beginning on or after December 15, 2008 and apply prospectively to business combinations. Presentation and disclosure requirements related to noncontrolling interests must be retrospectively applied. The Company is currently evaluating the impact of SFAS 141(r) on its accounting for future acquisitions and the impact of SFAS 160 on its consolidated financial statements.

In February 2007, the FASB issued SFAS No. 159, “The Fair Value Option for Financial Assets and Financial Liabilities” (“SFAS 159”). SFAS 159 permits all entities the option to measure most financial instruments and certain other items at fair value at specified election dates and to report related unrealized gains and losses in earnings. The fair value option will generally be applied on an instrument-by-instrument basis and is generally an irrevocable election. SFAS 159 is effective for fiscal years beginning after November 15, 2007. The Company did not elect to apply the fair value option available under SFAS 159 for any of its eligible financial instruments.

In September 2006, the FASB ratified the Emerging Issues Task Force (“EITF”) consensus on Issue 06-5. This issue titled “Accounting for the Purchases of Life Insurance – Determining the Amount That Could Be Realized in Accordance with FASB Technical Bulletin No. 85-4”, clarified that the amount of the DAC receivable beyond one year generally must be discounted to present value under Accounting Principles Board Opinion 21. The Company adopted the provisions of EITF Issue 06-05 effective January 1, 2007. The adoption of EITF Issue 06-05 did not have a material impact on the Company’s consolidated financial statements.

In September 2006, the SEC issued Staff Accounting Bulletin (“SAB”) No. 108, “Considering the Effects of Prior Year Misstatements when Quantifying Misstatements in Current Year Financial Statements” (“SAB 108”). SAB 108 provides guidance on how prior year misstatements should be considered when quantifying misstatements in current year financial statements for purposes of assessing materiality. SAB 108 requires that a registrant assess the materiality of a current period misstatement by determining how the current period’s balance sheet would be affected in correcting a misstatement without considering the year(s) in which the misstatement originated and how the current period’s income statement is misstated, including the reversing effect of prior year misstatements. SAB 108 is effective for fiscal years ending after November 15, 2006. The cumulative effect of applying SAB 108 may be recorded by adjusting current year beginning balances of the affected assets and liabilities with a corresponding adjustment to the current year opening balance in retained earnings if certain criteria are met. The adoption of SAB 108 did not have a material impact on the Company’s consolidated financial statements.

In September 2006, the FASB issued SFAS 158, “Employers’ Accounting for Defined Benefit Pension and Other Postretirement Plans - an amendment of FASB Statements No. 87, 88, 106, and 132(r)” (“SFAS 158”). The pronouncement revises financial reporting standards for defined benefit pension and other postretirement plans by requiring the (i) recognition in the statement of financial position of the funded status of defined benefit plans measured as the difference between the fair value of plan assets and the benefit obligation, which is the projected benefit obligation for pension plans and the accumulated postretirement benefit obligation for other postretirement plans; (ii) recognition as an adjustment to accumulated other comprehensive income (loss), net of income taxes, those amounts of actuarial gains and losses, prior service costs and credits, and transition obligations that have not yet been included in net periodic benefit costs as of the end of the year of adoption; (iii) recognition of subsequent changes in funded status as a component of other comprehensive income; (iv) measurement of benefit plan assets and obligations as of the date of the statement of financial position; and (v) disclosure of additional information about the effects on the employer’s statement of financial position. The Company adopted SFAS 158 on December 31, 2006 increasing other liabilities by \$17.4 million, decreasing deferred income taxes by \$6.1 million, and reducing the Company’s total stockholder’s equity by \$11.3 million.

In September 2006, the FASB issued SFAS No. 157, “Fair Value Measurements” (“SFAS 157”). SFAS 157 defines fair value, establishes a framework for measuring fair value, establishes a fair value hierarchy based on the quality of inputs used to measure fair value and enhances disclosure requirements for fair value measurements. The Company adopted SFAS 157 effective January 1, 2008. The Company’s adoption of SFAS 157 resulted in a pre-tax gain of approximately \$3.9 million, included in interest credited, related primarily to the decrease in the fair value of embedded derivative liabilities associated with equity-indexed annuity products primarily from the incorporation of nonperformance risk, also referred to as the Company’s own credit risk, into the fair value calculation.

In June 2006, the FASB issued FIN 48 which clarifies the accounting for uncertainty in income tax recognized in a company's financial statements. FIN 48 requires companies to determine whether it is "more likely than not" that a tax position will be sustained upon examination by the appropriate taxing authorities before any part of the benefit can be recorded in the financial statements. It also provides guidance on the recognition, measurement and classification of income tax uncertainties, along with any related interest and penalties. Previously recorded income tax benefits that no longer meet this standard are required to be charged to earnings in the period that such determination is made. The Company adopted FIN 48 effective January 1, 2007. As a result of adoption of FIN 48, the Company recognized a \$17.3 million increase in the liability for unrecognized tax benefits, a \$5.3 million increase in the interest liability for unrecognized tax benefits, and a corresponding reduction to the January 1, 2007 balance of retained earnings of \$22.6 million. The Company's total amount of unrecognized tax benefits upon adoption of FIN 48 was \$196.3 million.

In December 2004, the FASB revised SFAS No. 123 "Accounting for Stock Based Compensation" ("SFAS 123") to "Share-Based Payment" ("SFAS 123(r)"). SFAS 123(r) provides additional guidance on determining whether certain financial instruments awarded in share-based payment transactions are liabilities. SFAS 123(r) also requires that the cost of all share-based transactions be recorded in the financial statements. The revised pronouncement was adopted by the Company during the first quarter of 2006 increasing compensation cost by approximately \$1.7 million. See Note 18 – "Equity Based Compensation" for additional information.

Reclassification

The Company has reclassified the presentation of certain prior period information to conform to the 2008 presentation.

Consolidated Statements of Cash Flows Restatement

Subsequent to the issuance of the Company's consolidated financial statements for the year ended December 31, 2007, the Company identified an error in its consolidated statements of cash flows. The Company has restated its consolidated statement of cash flows for the year ended December 31, 2007 to correctly reflect the non-cash impact of certain embedded derivatives. The adjustments resulted in an increase in investment related losses, net and net cash provided by operating activities and a decrease in excess deposits on universal life and other investment type policies and contracts and net cash provided by financing activities by \$141.9 million in 2007.

Note 3 STOCK TRANSACTIONS

On September 5, 2008, the shareholders of RGA approved a recapitalization and distribution agreement by and between RGA and MetLife. In the recapitalization, each issued and outstanding share of RGA common stock was reclassified as RGA class A common stock. The recapitalization was completed on September 12, 2008. Immediately after the recapitalization, MetLife and its subsidiaries, which held 32,243,539 shares of RGA's outstanding stock, exchanged 29,243,539 shares of RGA class A common stock for 29,243,539 shares of RGA class B common stock, which featured enhanced voting rights. In turn, MetLife exchanged all of its RGA class B common stock to MetLife shareholders for shares of MetLife common stock.

On November 4, 2008, RGA completed a public offering of 10,235,000 shares of RGA class A common stock, \$0.01 par value per share. The price per share was \$33.89, and the aggregate value of the transaction was approximately \$346.9 million. The Company expects to use the net proceeds from the offering to pursue reinsurance opportunities and for general corporate purposes.

On November 25, 2008, the shareholders of RGA approved a proposal to convert RGA class B common stock into RGA class A common stock on a one-for-one basis, with such class A common stock being automatically redesignated as "common stock". In addition, the shareholders approved a proposal to amend and restate RGA's articles of incorporation to eliminate provisions relating to Class B common stock and RGA's dual-class common stock structure. As a result of the approval of the proposals, all holders of the new single class of common stock have identical voting rights in all respects.

In February 2008, the Company issued 218,240 shares of common stock from treasury and repurchased from recipients 56,129 of its common shares at \$55.10 per share in settlement of income tax withholding requirements incurred by recipients of an equity incentive award. In April 2008, the Company issued 650 shares of common stock from treasury and repurchased from recipients 210 of its common shares at \$53.60 per share in settlement of income tax withholding requirements incurred by recipients of an equity incentive award.

On January 23, 2002, the board of directors approved a stock repurchase program authorizing the Company to purchase up to \$50 million of its shares of stock, as conditions warrant. The board's action allows management, at its discretion, to purchase shares on the open market. During 2002, the Company purchased 225,500 shares under this program at an aggregate cost of \$6.6 million. Purchased shares are held as treasury stock. The Company generally uses treasury shares to support the future exercise of options or settlement of awards granted under its stock plans.

Note 4 INVESTMENTS

Investment Income, Net of Related Expenses

Major categories of investment income, net of related expenses consist of the following (dollars in thousands):

<u>Years Ended December 31,</u>	<u>2008</u>	<u>2007</u>	<u>2006</u>
Fixed maturity securities available-for-sale	\$ 554,230	\$ 496,187	\$ 408,603
Mortgage loans on real estate	49,324	49,961	42,674
Policy loans	64,962	62,736	54,322
Funds withheld at interest	175,228	276,741	256,566
Short-term investments	4,343	9,573	5,142
Other invested assets	38,218	25,533	24,848
Investment revenue	886,305	920,731	792,155
Investment expense	15,029	12,827	12,500
Investment income, net of related expenses	\$ 871,276	\$ 907,904	\$ 779,655

Investment Related Gains (Losses), Net

Investment related gains (losses), net consist of the following (dollars in thousands):

<u>Years Ended December 31,</u>	<u>2008</u>	<u>2007</u>	<u>2006</u>
Fixed maturities and equity securities available-for-sale:			
Gain on investment activity	\$ 32,381	\$ 23,570	\$ 27,094
Loss on investment activity	(24,061)	(31,509)	(28,813)
Investment impairments	(130,545)	(8,481)	(2,291)
Foreign currency loss	--	(10,492)	--
Derivatives and other, net	(524,980)	(151,804)	6,600
Net gains (losses)	\$ (647,205)	\$ (178,716)	\$ 2,590

The Company monitors its investment securities to identify impairments in value. The Company evaluates factors such as financial condition of the issuer, payment performance, the length of time and the extent to which the estimated fair value has been below amortized cost, compliance with covenants, general market conditions and industry sector, intent and ability to hold securities, and various other subjective factors. Based on management's judgment, securities with an other-than-temporary impairment in value are written down to management's estimate of fair value. Included in investment related losses are other-than-temporary write-downs of fixed maturity and equity securities of approximately \$130.5 million, \$8.5 million, and \$2.3 million in 2008, 2007 and 2006, respectively. The circumstances that gave rise to these impairments were management's intention to sell certain securities which were trading at amounts less than the then carrying value, bankruptcy proceedings on the part of the issuer or deterioration in collateral value supporting certain asset-backed securities. The 2008 write-downs are due primarily to the recent turmoil in the U.S. and global financial markets which has resulted in bankruptcies, consolidations and government interventions.

During 2007, the Company recognized a \$10.5 million foreign currency translation loss related to its decision to sell its direct insurance operations in Argentina. The Company does not expect the ultimate sale of that subsidiary to generate a material financial impact. Investment income and a portion of investment related gains and losses are allocated to the segments based upon average assets and related capital levels deemed appropriate to support the segment business volumes.

At December 31, 2008 and 2007 the Company owned non-income producing securities with amortized costs of \$25.7 million and \$13.3 million, and estimated fair values of \$20.4 million and \$14.7 million, respectively. During 2008, 2007 and 2006 the Company sold fixed maturity securities and equity securities with fair values of \$536.7 million, \$1,085.2 million, and \$997.0 million, which were below amortized cost, at losses of \$22.5 million, \$39.1 million and \$31.5 million, respectively. Generally, such losses are insignificant in relation to the cost basis of the investment and are largely due to changes in interest rates and credit spreads from the time the security was purchased. The securities are classified as available-for-sale in order to meet the Company's operational and other cash flow requirements. The Company does not engage in short-term buying and selling of securities to generate gains or losses.

Fixed Maturities and Equity Securities Available-for-Sale

The amortized cost, gross unrealized gains and losses, and estimated fair values of investments in fixed maturity securities and equity securities, the percentage that each sector represents by the total fixed maturity securities holdings and by the total equity securities holdings at December 31, 2008 and 2007 are as follows (dollars in thousands):

	Amortized Cost	Unrealized Gains	Unrealized Losses	Estimated Fair Value	% of Total
2008					
Available-for-sale:					
U.S. corporate securities	\$ 3,577,116	\$ 34,262	\$ 598,745	\$ 3,012,633	35.3%

Other foreign government securities	325,609	3,300	4,512	324,397	3.5
Total fixed maturity securities	\$ 8,916,692	\$ 659,254	\$ 178,030	\$ 9,397,916	100.0%
Non-redeemable preferred stock	\$ 144,942	\$ 986	\$ 19,953	\$ 125,975	91.8%
Common stock	11,483	2	232	11,253	8.2
Total equity securities	\$ 156,425	\$ 988	\$ 20,185	\$ 137,228	100.0%

As of December 31, 2008, the Company held securities with a fair value of \$383.0 million issued by the Federal Home Loan Mortgage Corporation, \$396.2 million issued by the Federal National Mortgage Corporation, \$661.2 million that were issued by a Canadian province, \$521.5 million in one entity that were guaranteed by a Canadian province, and \$275.1 million issued by a Canadian province, all of which exceeded 10% of consolidated stockholders' equity. As of December 31, 2007, the Company held securities with an estimated fair value of \$474.7 million issued by the Federal Home Loan Mortgage Corporation, \$419.8 million issued by the Federal National Mortgage Corporation, \$741.3 million in one entity were

guaranteed by a Canadian province, and \$618.0 million in one entity that were guaranteed by a Canadian province, all of which exceeded 10% of consolidated stockholders' equity.

The amortized cost and estimated fair value of fixed maturity securities available-for-sale at December 31, 2008 are shown by contractual maturity for all securities except certain U.S. government agencies securities, which are distributed to maturity year based on the Company's estimate of the rate of future prepayments of principal over the remaining lives of the securities. These estimates are developed using prepayment rates provided in broker consensus data. Such estimates are derived from prepayment rates experienced at the interest rate levels projected for the applicable underlying collateral and can be expected to vary from actual experience. Actual maturities can differ from contractual maturities because borrowers may have the right to call or prepay obligations with or without call or prepayment penalties.

At December 31, 2008, the contractual maturities of investments in fixed maturity securities were as follows (dollars in thousands):

	Amortized Cost	Fair Value
Available-for-sale:		
Due in one year or less	\$ 83,452	\$ 81,429
Due after one year through five years	1,184,091	1,114,041
Due after five years through ten years	1,743,701	1,545,199
Due after ten years	3,570,842	3,541,982
Asset and mortgage-backed securities	2,800,762	2,249,153
Total	<u>\$ 9,382,848</u>	<u>\$ 8,531,804</u>

Corporate Fixed Maturity Securities

The tables below show the major industry types and weighted average credit ratings, which comprise the U.S. and foreign corporate fixed maturity holdings at December 31, 2008 and 2007 (dollars in thousands):

December 31, 2008				
	Amortized Cost	Estimated Fair Value	% of Total	Average Credit Ratings
Finance	\$1,475,205	\$1,155,906	29.0%	A
Industrial	1,520,330	1,339,200	33.6	BBB+
Foreign ⁽¹⁾	1,112,018	973,433	24.4	A
Utility	542,737	480,809	12.1	BBB+
Other	38,844	36,718	0.9	AA-
Total	<u>\$4,689,134</u>	<u>\$3,986,066</u>	<u>100.0%</u>	<u>A-</u>

December 31, 2007				
	Amortized Cost	Estimated Fair Value	% of Total	Average Credit Ratings
Finance	\$1,394,562	\$1,343,539	30.8%	A
Industrial	1,069,727	1,060,236	24.3	BBB+

Utility	504,678	503,969	11.5	BBB+
Other	413,977	405,871	9.3	A-
Total	<u>\$4,423,761</u>	<u>\$4,363,620</u>	<u>100.0%</u>	<u>A-</u>

(1) Includes U.S. dollar-denominated debt obligations of foreign obligors and other foreign investments.

Unrealized Losses for Fixed Maturities and Equity Securities Available-for-Sale

At December 31, 2008 and 2007 the Company held fixed maturity securities that were below investment grade with book values of \$389.6 million and \$265.8 million, and estimated fair values of \$274.6 million and \$258.8 million, respectively.

The following table presents the total gross unrealized losses for 1,716 and 1,105 fixed maturity securities and equity securities at December 31, 2008 and 2007, respectively, where the estimated fair value had declined and remained below amortized cost by the indicated amount (dollars in thousands):

	December 31, 2008			December 31, 2007		
	Number of Securities	Gross Unrealized Losses	% of Total	Number of Securities	Gross Unrealized Losses	% of Total
Less than 20%	980	\$324,390	22.9%	1,039	\$159,563	80.5%
20% or more for less than six months	561	796,747	56.3	59	35,671	18.0
20% or more for six months or greater	175	295,302	20.8	7	2,981	1.5
Total	1,716	\$1,416,439	100.0%	1,105	\$198,215	100.0%

The investment securities in an unrealized loss position as of December 31, 2008 consisted of 1,716 securities accounting for unrealized losses of \$1,416.4 million. Of these unrealized losses 92.7% were investment grade and 22.9% were less than 20% below cost. The amount of the unrealized loss on these securities was primarily attributable to increases in interest rates, including a widening of credit default spreads.

While all of these securities are monitored for potential impairment, the Company's experience indicates that the first two categories do not present as great a risk of impairment, and often, fair values recover over time. These securities have generally been adversely affected by overall economic conditions, primarily an increase in the interest rate environment, including a widening of credit default spreads.

The following tables present the estimated fair values and gross unrealized losses for the 1,716 and 1,105 fixed maturity securities and equity securities that have estimated fair values below amortized cost at December 31, 2008 and 2007, respectively. These investments are presented by class and grade of security, as well as the length of time the estimated fair value has remained below amortized cost.

(dollars in thousands)	December 31, 2008					
	Less than 12 months		Equal to or greater than 12 months		Total

As of December 31, 2008, the Company expects these investments to continue to perform in accordance with their original contractual terms and the Company has the ability and intent to hold these investment securities until the recovery of the fair value up to the cost of the investment, which may be maturity. Accordingly, the Company does not consider these investments to be other-than-temporarily impaired at December 31, 2008. However, from time to time, the Company may sell securities in the ordinary course of managing its portfolio to meet diversification, credit quality, yield enhancement, asset-liability management and liquidity requirements.

At December 31, 2008 and 2007, the Company had \$1,416.4 million and \$198.2 million, respectively, of gross unrealized losses related to its fixed maturity and equity securities. These securities are concentrated, calculated as a percentage of gross unrealized losses, as follows:

	December 31,	
	<u>2008</u>	<u>2007</u>

As described more fully in Note 2 – “Summary of Significant Accounting Policies”, the Company performs a regular evaluation, on a security-by-security basis, of its investment holdings in accordance with its impairment policy in order to evaluate whether such securities are other-than-temporarily impaired. One of the criteria which the Company considers in its other-than-temporary impairment analysis is its intent and ability to hold securities for a period of time sufficient to allow for the recovery of their value to an amount equal to or greater than cost or amortized cost. The Company’s intent and ability to hold securities considers broad portfolio management objectives such as asset/liability duration management, issuer and industry segment exposures, interest rate views and the overall total return focus. In following these portfolio management objectives, changes in facts and circumstances that were present in past reporting periods may trigger a decision to sell securities that were held in prior reporting periods. Decisions to sell are based on current conditions or the Company’s need to shift the portfolio to maintain its portfolio management objectives, including liquidity needs or duration targets on asset/liability managed portfolios. The Company attempts to anticipate these types of changes and if a sale decision has been made on an impaired security and that security is not expected to recover prior to the expected time of sale, the security will be deemed other-than-temporarily impaired in the period that the sale decision was made and an other-than-temporary impairment loss will be recognized.

Based upon the Company’s current evaluation of the securities in accordance with its impairment policy, the cause of the decline being principally attributable to credit spread widening during the holding period, and the Company’s current intent and ability to hold the fixed maturity and equity securities with unrealized losses for a period of time sufficient for them to recover, the Company has concluded that the aforementioned securities are not other-than-temporarily impaired.

Securities Lending and Other

During the year, the Company participated in a securities lending program whereby blocks of securities, which were included in investments, were loaned to third parties, primarily major brokerage firms. The Company required a minimum of 102% of the fair value of the loaned securities to be separately maintained as collateral for the loans. The Company terminated the program and all loaned securities were returned prior to December 31, 2008. There were no securities loaned to third parties as of December 31, 2007. The Company also occasionally enters into arrangements to purchase securities under agreements to resell the same securities. Amounts outstanding, if any, are reported in cash and cash equivalents. These transactions are primarily used as yield enhancement alternatives to other cash equivalent investments. There were no agreements outstanding at December 31, 2008 and 2007. Both securities lending and securities purchase arrangements under agreements to resell are accounted for as investing activities on the Company’s consolidated balance sheets and consolidated statements

of cash flow, and the income associated with the program is reported in net investment income since such transactions are entered into for income generation purposes, not funding purposes.

Mortgage Loans

The Company makes mortgage loans on income producing properties, such as apartments, retail and office buildings, light warehouses and light industrial facilities. Loan to value ratios at the time of loan approval are 75% or less for domestic mortgages. The distribution of mortgage loans by property type is as follows as of December 31, 2008 and 2007 (dollars in thousands):

Property type:	2008		2007	
	Carrying Value	Percentage of Total	Carrying Value	Percentage of Total
Apartment	\$ 65,362	9%	\$ 66,559	8%
Retail	207,328	27	222,156	27
Office building	227,836	29	247,086	30
Industrial	242,424	31	258,114	31
Other commercial	32,100	4	37,642	4
Total	\$ 775,050	100%	\$ 831,557	100%

All of the Company's mortgage loans are amortizing loans. As of December 31, 2008 and 2007, the Company's mortgage loans were distributed throughout the United States as follows (dollars in thousands):

	2008		2007	
	Carrying Value	Percentage of Total	Carrying Value	Percentage of Total
South Atlantic	\$ 240,750	31%	\$ 251,190	30%
Pacific	164,397	21	180,739	22
East North Central	80,778	11	89,874	11
Mountain	80,092	10	83,681	10
West North Central	64,260	8	71,881	9
Middle Atlantic	62,336	8	66,653	8
New England	34,055	4	35,175	4
West South Central	27,145	4	30,652	4
East South Central	21,237	3	21,712	2
Total	\$ 775,050	100%	\$ 831,557	100%

The maturities of the mortgage loans as of December 31, 2008 and 2007 are as follows (dollars in thousands):

	2008	2007
Due one year through five years	\$ 238,945	\$ 122,384
Due after five years	416,220	562,501
Due after ten years	119,885	146,672
Total	\$ 775,050	\$ 831,557

Information regarding the Company's loan valuation allowances for mortgage loans as of December 31, 2008 is as follows (dollars in thousands):

	2008
Balance at January 1,	\$ --
Additions	526
Deductions	--
Balance at December 31,	\$ 526

Information regarding the portion of the Company's mortgage loans that were impaired as of December 31, 2008 is as follows (dollars in thousands):

	2008	
Impaired loans with valuation allowances	\$	3,853
Impaired loans without valuation allowances		18,125
Subtotal		21,978
Less: Valuation allowances on impaired loans		526
Impaired loans	\$	21,452

The Company's average investment in impaired loans was \$3.7 million for the year ended December 31, 2008. Interest income on impaired loans was \$1.3 million for the year ended December 31, 2008. There were no impaired loans for the years ended December 31, 2007 and 2006.

Policy Loans

Policy loans comprised approximately 6.7% and 6.3% of the Company's cash and invested assets as of December 31, 2008 and 2007, respectively, substantially all of which are associated with one client. These policy loans present no credit risk because the amount of the loan cannot exceed the obligation due to the ceding company upon the death of the insured or surrender of the underlying policy. The provisions of the treaties in force and the underlying policies determine the policy loan interest rates. Because policy loans represent premature distributions of policy liabilities, they have the effect of reducing future disintermediation risk. In addition, the Company earns a spread between the interest rate earned on policy loans and the interest rate credited to corresponding liabilities.

Funds Withheld at Interest

For reinsurance agreements written on a modified coinsurance basis and certain agreements written on a coinsurance funds withheld basis, assets equal to the net statutory reserves are withheld and legally owned and managed by the ceding company and are reflected as funds withheld at interest on the Company's consolidated balance sheets. Funds withheld at interest comprised approximately 27.4% and 28.3% of the Company's cash and invested assets as of December 31, 2008 and 2007, respectively. Of the \$4.5 billion funds withheld at interest balance as of December 31, 2008, \$3.1 billion of the balance is associated with one client. In the event of a ceding company's insolvency, the Company would need to assert a claim on the assets supporting its reserve liabilities. However, the risk of loss to the Company is mitigated by its ability to offset amounts it owes the ceding company for claims or allowances with amounts owed to the Company from the ceding company. Interest accrues to these assets at rates defined by the treaty terms and the Company estimates the yield was approximately 3.54%, 6.42% and 7.08% for the years ended December 31, 2008, 2007 and 2006, respectively. In most cases, the Company is subject to the investment performance on the funds withheld assets, although it does not control them. To mitigate this risk, the Company helps set the investment guidelines followed by the ceding company and monitors compliance.

Other Invested Assets

Other invested assets include equity securities, non-redeemable preferred stocks, limited partnership interests, structured loans and derivative contracts. Other invested assets represented approximately 3.8% and 1.7% of the Company's cash and invested assets as of December 31, 2008 and 2007, respectively. Carrying values of these assets as of December 31, 2008 and 2007 are as follows (dollars in thousands):

	December 31,	
	<u>2008</u>	<u>2007</u>
Equity securities	\$35,975	\$11,253
Non-redeemable preferred stock	123,399	125,975
Limited partnerships	140,077	95,953
Structured loans	101,380	38,740
Derivatives	206,341	(6,041)
Other	21,477	18,340
Total other invested assets	\$628,649	\$284,220

Note 5 DERIVATIVE INSTRUMENTS

The following table presents the notional amounts and fair value of derivative instruments (dollars in thousands):

	December 31, 2008			December 31, 2007

- (1) Carried on the Company's consolidated balance sheets in other invested assets or as liabilities within other liabilities, at fair value.
- (2) Embedded is included on the consolidated balance sheets with the host contract in funds withheld at interest, at fair value.
- (3) Embedded liability is included on the consolidated balance sheets with the host contract in interest-sensitive contract liabilities, at fair value. Embedded asset is included on the consolidated balance sheets in reinsurance ceded receivables.

Accounting for Derivative Instruments and Hedging Activities

As of December 31, 2008 the Company held interest rate swaps that were designated and qualified as a fair value hedge of interest rate risk. As of December 31, 2008 and 2007, the Company held foreign currency swaps that were designated and qualified as a hedge of a portion of its net investment in its Canada operation. As of December 31, 2008 and 2007, the Company also had derivative instruments that were not designated as hedging instruments. See Note 2 – "Summary of Significant Accounting Policies" for a detailed discussion of the accounting treatment for derivative instruments, including embedded derivatives.

For the years ended December 31, 2008, 2007 and 2006, the Company recognized as investment related gains (losses), net, excluding embedded derivatives, changes in fair value of \$170.7 million, \$(3.4) million and \$1.0 million, respectively, related to derivatives that do not qualify for hedge accounting.

Fair Value Hedges

The Company designates and accounts for interest rate swaps that convert fixed rate investments to floating rate investments as fair value hedges when they have met the requirements of SFAS 133.

The Company recognized net investment gains (losses) representing the ineffective portion of all fair value hedges of \$0.3 million for the year ended December 31, 2008. The Company had no fair value hedges for the year ended December 31, 2007.

All components of each derivative's gain or loss were included in the assessment of hedge effectiveness. There were no instances in which the Company discontinued fair value hedge accounting due to a hedged firm commitment no longer qualifying as a fair value hedge.

Hedges of Net Investments in Foreign Operations

The Company uses foreign currency swaps to hedge a portion of its net investment in its Canadian operation against adverse movements in exchange rates. The Company measures ineffectiveness on the foreign currency swaps based upon the change in forward rates. There was no ineffectiveness recorded for the years ended December 31, 2008 and 2007.

The Company's consolidated statements of stockholders' equity for the years ended December 31, 2008 and 2007, include gains (losses) of \$53.7 million and \$(5.1) million, respectively, related to foreign currency swaps used to hedge its net investment in its Canada operation. The cumulative foreign currency translation gain (loss) recorded in accumulated other comprehensive income related to these hedges was \$48.6 million and \$(5.1) million at December 31, 2008 and 2007, respectively. When net investments in foreign operations are sold or substantially liquidated, the amounts in accumulated other comprehensive income are reclassified to the consolidated statements of income. A pro rata portion will be reclassified upon partial sale of the net investments in foreign operations.

Non-qualifying Derivatives and Derivatives for Purposes Other Than Hedging

The Company uses various other derivative instruments for risk management purposes that either do not qualify for hedge accounting treatment or have not currently been qualified by the Company for hedge accounting treatment, including derivatives used to economically hedge changes in the fair value of liabilities associated with the reinsurance of variable annuities with guaranteed living benefits. The gain or loss related to the change in fair value for these derivative instruments is recognized in investment related gains (losses), in the consolidated statements of income, except where otherwise noted.

Interest Rate Swaps

Interest rate swaps are used by the Company primarily to reduce market risks from changes in interest rates and to alter interest rate exposure arising from mismatches between assets and liabilities (duration mismatches). In an interest rate swap, the Company agrees with another party to exchange, at specified intervals, the difference between fixed rate and floating rate interest amounts as calculated by reference to an agreed notional principal amount. These transactions are entered into pursuant to master agreements that provide for a single net payment or individual gross payments to be made by the counterparty at each due date.

Financial Futures

Exchange-traded equity futures are used primarily to economically hedge liabilities embedded in certain variable annuity products assumed by the Company. In exchange-traded equity futures transactions, the Company agrees to purchase or sell a specified number of contracts, the value of which is determined by the different stock indices, and to post variation margin on a daily basis in an amount equal to the difference in the daily estimated fair values of those contracts. The Company enters into exchange-traded equity futures with regulated futures commission merchants that are members of the exchange.

Foreign Currency Swaps

Foreign currency swaps are used by the Company to reduce the risk from fluctuations in foreign currency exchange rates associated with its assets and liabilities denominated in foreign currencies. In a foreign currency swap transaction, the Company agrees with another party to exchange, at specified intervals, the difference between one currency and another at a forward exchange rate calculated by reference to an agreed upon principal amount. The principal amount of each currency is exchanged at the inception and termination of the currency swap by each party. The Company also uses foreign currency swaps to hedge the foreign currency risk associated with certain of its net investments in foreign operations.

Foreign Currency Forwards

Foreign currency forwards are used by the Company to reduce the risk from fluctuations in foreign currency exchange rates associated with its assets and liabilities denominated in foreign currencies. In a foreign currency forward transaction, the Company agrees with another party to deliver a specified amount of an identified currency at a specified future date. The price is agreed upon at the time of the contract and payment for such a contract is made in a different currency at the specified future date.

Credit Default Swaps

Certain credit default swaps are used by the Company to diversify its credit risk exposure in certain portfolios. The Company's current credit default swap transactions are over-the-counter instruments in which the Company receives payments at specified intervals to insure credit risk on a portfolio of 125 U.S. investment-grade securities. If a credit event, as defined by the contract, occurs, generally the contract will require the swap to be settled gross by the delivery of par quantities or value of the referenced investment securities equal to the specified swap notional amount in exchange for the

payment of cash amounts by the Company equal to the par value of the investment security surrendered.

Embedded Derivatives

The Company has certain embedded derivatives which are required to be separated from their host contracts and reported as derivatives. These host contracts include reinsurance treaties structured on a modified coinsurance or funds withheld basis. Additionally, the Company reinsures equity-indexed annuity and variable annuity contracts with benefits that are considered embedded derivatives, including guaranteed minimum withdrawal benefits, guaranteed minimum accumulation benefits, and guaranteed minimum income benefits. The amounts related to embedded derivatives in modified coinsurance or funds withheld arrangements and variable annuity contracts included in investment related gains (losses), during the years ended December 31, 2008, 2007 and 2006 were gains (losses) of \$(695.3) million, \$(150.9) million and \$6.5 million, respectively. After the associated amortization of DAC and taxes, the related amounts included in net income during the years ended December 31, 2008, 2007 and 2006 were gains (losses) of \$(124.4) million, \$(30.2) million and \$1.8 million, respectively. The amounts related to embedded derivatives in equity-indexed annuities included in benefits and expenses during the years ended December 31, 2008, 2007 and 2006 were gains (losses) of \$0.1 million, \$(66.3) million and \$(79.8) million, respectively. After the associated amortization of DAC and taxes, the related amounts included in net income during the years ended December 31, 2008, 2007 and 2006 were gains (losses) of \$24.7 million, \$(43.1) million and \$51.9 million, respectively.

Credit Risk

The Company may be exposed to credit-related losses in the event of nonperformance by counterparties to derivative financial instruments. Generally, the current credit exposure of the Company's derivative contracts is limited to the fair value at the reporting date. The credit exposure of the Company's derivative transactions is represented by the fair value of contracts after consideration of any collateral received with a net positive fair value at the reporting date.

The Company manages its credit risk related to over-the-counter derivatives by entering into transactions with creditworthy counterparties, maintaining collateral arrangements and through the use of master agreements that provide for a single net payment to be made by one counterparty to another at each due date and upon termination. Because exchange-traded futures are affected through regulated exchanges, and positions are marked to market on a daily basis, the Company has minimal exposure to credit-related losses in the event of nonperformance by counterparties to such derivative instruments.

The Company enters into various collateral arrangements, which require both the pledging and accepting of collateral in connection with its derivative instruments. As of December 31, 2008, the Company held cash collateral under its control of \$159.8 million. The Company held no cash collateral in connection with derivative instruments as of December 31, 2007. This unrestricted cash collateral is included in cash and cash equivalents and the obligation to return it is included in other liabilities in the consolidated balance sheets. From time to time, the Company has accepted collateral consisting of various securities, however there were no securities held as collateral as of December 31, 2008 and 2007.

In addition, the Company has exchange-traded futures, which require the pledging of collateral. As of December 31, 2008 and 2007, the Company pledged collateral of \$25.9 million and \$0.6 million, respectively, which is included in cash and cash equivalents.

NOTE 6 FAIR VALUE OF FINANCIAL INSTRUMENTS

The following table presents the carrying amounts and estimated fair values of the Company's financial instruments at December 31, 2008 and 2007. Fair values have been determined by using available market information and the valuation methodologies described below. Considerable judgment is often required in interpreting market data to develop estimates of fair value. Accordingly, the estimates presented herein may not necessarily be indicative of amounts that could be realized in a current market exchange. The use of different assumptions or valuation methodologies may have a material effect on the estimated fair value amounts (dollars in thousands):

	2008		2007	
	Carrying Value	Estimated Fair Value	Carrying Value	Estimated Fair Value
Assets:				
Fixed maturity securities	\$ 8,531,804	\$ 8,531,804	\$ 9,397,916	\$ 9,397,916

Reinsurance ceded receivables	115,445	11,233	111,172	32,044
Liabilities:				
Interest-sensitive contract liabilities	\$ 5,664,488	\$ 4,890,669	\$ 4,941,858	\$ 4,196,617
Long-term and short-term debt	918,246	606,890	925,838	873,614
Collateral finance facility	850,035	493,000	850,361	761,111
Company-obligated mandatorily redeemable preferred securities	159,035	186,082	158,861	177,523

Publicly traded fixed maturity securities are valued based upon quoted market prices or estimates from independent pricing services, independent broker quotes and pricing matrices. Private placement fixed maturity securities are valued based on the credit quality and duration of marketable securities deemed comparable by the Company's investment advisor, which may be of another issuer. The fair value of mortgage loans on real estate is estimated using discounted cash flows. Policy loans typically carry an interest rate that is adjusted annually based on a market index and therefore carrying value approximates fair value. The carrying value of funds withheld at interest approximates fair value except where the funds withheld are specifically identified in the agreement. When funds withheld are specifically identified in the agreement, the fair value is based on the fair value of the underlying assets which are held by the ceding company. The carrying values of cash and cash equivalents and short-term investments approximates fair values due to the short-term maturities of these instruments. Common and preferred equity investments and derivative financial instruments included in other invested assets are reflected at fair value on the consolidated balance sheets based primarily on quoted market prices, while limited partnership interests are carried at cost. The fair value of limited partnerships is based on net asset values. The carrying value for accrued investment income approximates fair value.

The carrying and fair values of interest-sensitive contract liabilities exclude contracts with significant mortality risk. The fair value of the Company's interest-sensitive contract liabilities and related reinsurance ceded receivables is based on the cash surrender value of the liabilities, adjusted for recapture fees. The fair value of the Company's long-term debt is estimated based on either quoted market prices or quoted market prices for the debt of corporations with similar credit quality. The fair values of the Company's collateral finance facility and company-obligated mandatorily redeemable preferred securities are estimated using discounted cash flows.

SFAS 157 defines fair value as the exchange price that would be received for an asset or paid to transfer a liability (an exit price) in the principal or most advantageous market for the asset or liability in an orderly transaction between market participants on the measurement date. In accordance with SFAS 157, valuation techniques utilized by management for invested assets and embedded derivatives reported at fair value are generally categorized into three types:

Market Approach. Market approach valuation techniques use prices and other relevant information from market transactions involving identical or comparable assets or liabilities. Valuation techniques consistent with the market approach include comparables and matrix pricing. Comparables use market multiples, which might lie in ranges with a different multiple for each comparable. The selection of where within the range the appropriate multiple falls requires judgment, considering both quantitative and qualitative factors specific to the measurement. Matrix pricing is a mathematical technique used principally to value certain securities without relying exclusively on quoted prices for the specific securities but comparing the securities to benchmark or comparable securities.

Income Approach. Income approach valuation techniques convert future amounts, such as cash flows or earnings, to a single present amount, or a discounted amount. These techniques rely on current expectations of future amounts. Examples of income approach valuation techniques include present value techniques, option-pricing models and binomial or lattice models that incorporate present value techniques.

Cost Approach. Cost approach valuation techniques are based upon the amount that, at present, would be required to replace the service capacity of an asset, or the current replacement cost. That is, from the perspective of a market participant (seller), the price that would be received for the asset is determined based on the cost to a market participant (buyer) to acquire or construct a substitute asset of comparable utility.

The three approaches described within SFAS 157 are consistent with generally accepted valuation methodologies. While all three approaches are not applicable to all assets or liabilities reported at fair value, where appropriate and possible, one or more valuation techniques may be used. The selection of the valuation method(s) to apply considers the definition of an exit price and the nature of the asset or liability being valued, and significant expertise and judgment is required. The Company performs regular analysis and review of the various methodologies utilized in determining fair value to ensure that the valuation approaches utilized are appropriate and consistently applied, and that the various assumptions are reasonable. The Company also utilizes information from third parties, such as pricing services and brokers, to assist in determining fair values for certain assets and liabilities; however, management is ultimately responsible for all fair values presented in the Company's financial statements. The Company performs analysis and review of the information and prices received from third parties to ensure that the prices represent a reasonable estimate of the fair value. This process involves quantitative and qualitative analysis and is overseen by the Company's investment and accounting personnel. Examples of procedures performed include, but are not limited to, initial and ongoing review of third party pricing services and methodologies, review of pricing trends and monitoring of recent trade information. In addition, the Company utilizes both internal and external cash flow models to analyze the reasonableness of fair values utilizing credit spread and other market assumptions, where appropriate. As a result of the analysis, if the Company determines there is a more appropriate fair value based upon the available market data, the price received from the third party is adjusted accordingly.

For invested assets reported at fair value, when available, fair values are based on quoted prices in active markets that are regularly and readily obtainable. Generally, these are very liquid investments and the valuation does not require management judgment. When quoted prices in active markets are not available, fair value is based on the market valuation techniques described above, primarily a combination of the market approach, including matrix pricing and the income approach. The assumptions and inputs used by management in applying these methodologies include, but are not limited to: interest rates, credit standing of the issuer or counterparty, industry sector of the issuer, coupon rate, call provisions, sinking fund requirements, maturity, estimated duration and assumptions regarding liquidity and future cash flows.

The significant inputs to the market standard valuation methodologies for certain types of securities with reasonable levels of price transparency are inputs that are observable in the market or can be derived principally from or corroborated by observable market data. Such observable inputs include benchmarking prices for similar assets in active, liquid markets, quoted prices in markets that are not active and observable yields and spreads in the market.

When observable inputs are not available, the market standard valuation methodologies for determining the estimated fair value of certain types of securities that trade infrequently, and therefore have little or no price transparency, rely on inputs that are significant to the estimated fair value that are not observable in the market or cannot be derived principally from or corroborated by observable market data. These unobservable inputs can be based in large part on management judgment or estimation, and cannot be supported by reference to market activity. Even though unobservable, these inputs are based on assumptions deemed appropriate given the circumstances and are consistent with what other market participants would use when pricing such securities.

The use of different methodologies, assumptions and inputs may have a material effect on the estimated fair values of the Company's securities holdings.

For embedded derivative liabilities associated with the underlying products in reinsurance treaties, primarily equity-indexed annuity treaties, the Company utilizes a market standard method, which includes an estimate of future equity option purchases and an adjustment for the Company's own credit risk that takes into consideration the Company's financial strength rating, also commonly referred to as a claims paying rating. The capital market inputs to the model, such as equity indexes, equity volatility, interest rates and the Company's credit adjustment, are generally observable. However, the valuation models also use inputs requiring certain actuarial assumptions such as future interest margins, policyholder behavior, including future equity participation rates, and explicit risk margins related to non-capital market inputs, that are generally not observable and may require use of significant management judgment. Changes in interest rates, equity indices, equity volatility, the Company's own credit risk, and actuarial assumptions regarding policyholder behavior may result in significant fluctuations in the value of embedded derivatives liabilities associated with equity-indexed annuity reinsurance treaties.

The fair value of embedded derivatives associated with funds withheld reinsurance treaties is determined based upon a total return swap methodology with reference to the fair value of the investments held by the ceding company that support the Company's funds withheld at interest asset. The fair value of the underlying assets is generally based on market observable inputs using market standard valuation methodologies. However, the valuation also requires certain significant inputs based on actuarial assumptions about policyholder behavior, which are generally not observable.

For the year ended December 31, 2008, the application of valuation methodologies applied to similar assets and liabilities has been consistent.

SFAS 157 also establishes a fair value hierarchy which requires an entity to maximize the use of observable inputs and minimize the use of unobservable inputs when measuring fair value. The standard describes three levels of inputs that may be used to measure fair value:

Level 1 Quoted prices in active markets for identical assets or liabilities. The Company's Level 1 assets and liabilities include investment securities and derivative contracts that are traded in exchange markets.

Level 2 Observable inputs other than Level 1 prices such as quoted prices for similar assets or liabilities; quoted prices in markets that are not active; or market standard valuation methodologies and assumptions with significant inputs that are observable or can be corroborated by observable market data for substantially the full term of the assets or liabilities. Such observable inputs include benchmarking prices for similar assets in active, liquid markets, quoted prices in markets that are not active and observable yields and spreads in the market. The Company's Level 2 assets and liabilities include investment securities with quoted prices that are traded less frequently than exchange-traded instruments and derivative contracts whose values are determined using market standard valuation methodologies. This category primarily includes U.S. and foreign corporate securities, Canadian and Canadian provincial government securities, and residential and commercial mortgage-backed securities, among others. Management values most of these securities using inputs that are market observable.

Level 3 Unobservable inputs that are supported by little or no market activity and that are significant to the fair value of the related assets or liabilities. Level 3 assets and liabilities include financial instruments whose value is determined using market standard valuation methodologies described above. When observable inputs are not available, the market standard methodologies for determining the estimated fair value of certain securities that trade infrequently, and therefore have little transparency, rely on inputs that are significant to the estimated fair value and that are not observable in the market or cannot be derived principally from or corroborated by observable market data. These unobservable inputs can be based in large part on management judgment or estimation and cannot be supported by reference to market activity. Even though unobservable, management believes these inputs are based on assumptions deemed appropriate given the circumstances and consistent with what other market participants would use when pricing similar assets and liabilities. For the Company's invested assets, this category generally includes U.S. and foreign corporate securities (primarily private placements), asset-backed securities (including those with exposure to sub-prime mortgages), and to a lesser extent, certain residential and commercial mortgage-backed securities, among others. Additionally, the Company's embedded derivatives, all of which are associated with reinsurance treaties, are classified in Level 3 since their values include significant unobservable inputs associated with actuarial assumptions regarding policyholder behavior. Embedded derivatives are reported with the host instruments on the consolidated balance sheet.

As required by SFAS 157, when inputs used to measure fair value fall within different levels of the hierarchy, the level within which the fair value measurement is categorized is based on the lowest priority level input that is significant to the fair value measurement in its entirety. For example, a Level 3 fair value measurement may include inputs that are observable (Levels 1 and 2) and unobservable (Level 3). Therefore, gains and losses for such assets and liabilities categorized within Level 3 may include changes in fair value that are attributable to both observable inputs (Levels 1 and 2) and unobservable inputs (Level 3).

Assets and liabilities measured at fair value on a recurring basis are summarized below (dollars in thousands).

Assets:	December 31, 2008			
	Total	Fair Value Measurements Using:		
		Level 1	Level 2	Level 3
Fixed maturity securities – available-for-sale:				
U.S. corporate securities	\$3,012,633	\$--	\$2,196,348	\$816,285
Canadian and Canadian provincial governments	1,891,239	--	1,881,274	9,965
Residential mortgage-backed securities	1,149,185	--	1,118,761	30,424
Foreign corporate securities	973,433	1,714	795,111	176,608
Asset-backed securities	339,378	--	107,509	231,869
Commercial mortgage-backed securities	760,590	--	701,549	59,041
U.S. government and agencies securities	8,431	3,072	5,359	--
State and political subdivision securities	38,654	6,167	--	32,487
Other foreign government securities	358,261	85,606	167,216	105,439
Total fixed maturity securities – available-for-sale	8,531,804	96,559	6,973,127	1,462,118
Funds withheld at interest – embedded derivatives	(512,888)	--	--	(512,888)
Short-term investments	570	--	218	352
Other invested assets – equity securities	159,374	104,526	37,399	17,449
Other invested assets – derivatives	206,341	--	206,341	--
Reinsurance ceded receivable – embedded derivatives	66,716	--	--	66,716
Total	<u>\$8,451,917</u>	<u>\$201,085</u>	<u>\$7,217,085</u>	<u>\$1,033,747</u>
Liabilities:				
Interest sensitive contract liabilities – embedded derivatives	\$(807,431)	\$--	\$--	\$(807,431)
Other liabilities – derivatives	(10,189)	--	(10,189)	--
Total	<u>\$(817,620)</u>	<u>\$--</u>	<u>\$(10,189)</u>	<u>\$(807,431)</u>

As of December 31, 2008, the Company classified approximately 17.1% of its fixed maturity securities in the Level 3 category in accordance with SFAS 157. These securities primarily consist of private placement corporate securities with an inactive trading market. Additionally, the Company has included asset-backed securities with sub-prime exposure in the Level 3 category due to the current market uncertainty associated with these securities and the Company's utilization of information from third parties.

The table below presents a reconciliation for all assets and liabilities measured at fair value on a recurring basis using significant unobservable inputs (Level 3) for the year ended December 31, 2008 (dollars in thousands).

Assets:	Total Fair Value Measurements for the year ended December 31, 2008					
	Total gains/losses					
	(realized/unrealized) included in:					
	Balance January 1, 2008	Earnings, net	Other comprehensive loss	Purchases, issuances and disposals	Transfers in and/or out of Level 3	Balance December 31, 2008
Fixed maturity securities available-for-sale	\$1,500,054	\$(60,300)	\$(285,202)	\$200,919	\$106,647	\$1,462,118
Funds withheld at interest – embedded derivatives	(85,090)	(427,798)	--	--	--	(512,888)
Short-term investments	--	(36)	(568)	(20)	976	352
Other invested assets – equity securities	13,950	(63)	(6,498)	26,107	(16,047)	17,449
Reinsurance ceded receivable – embedded derivatives	68,298	(1,919)	--	337	--	66,716
Total	<u>\$1,497,212</u>	<u>\$(490,116)</u>	<u>\$(292,268)</u>	<u>\$227,343</u>	<u>\$91,576</u>	<u>\$1,033,747</u>
Liabilities:

Other invested assets – equity securities	2	(65)	--	--	--	(63)
Reinsurance ceded receivable – embedded derivatives	--	--	--	--	(1,919)	(1,919)
Total	\$1,198	\$(489,395)	\$--	\$--	\$(1,919)	\$(490,116)
Liabilities:						
Interest sensitive contract liabilities – embedded derivatives	\$--	\$(267,482)	\$(176)	\$(13,100)	\$--	\$(280,758)
Total	\$--	\$(267,482)	\$(176)	\$(13,100)	\$--	\$(280,758)

The table below summarizes changes in unrealized gains or losses recorded in earnings for the year ended December 31, 2008 for Level 3 assets and liabilities that are still held at December 31, 2008 (dollars in thousands).

	Changes in Unrealized Gains and Losses					
	Changes in unrealized gains/losses relating to assets and liabilities still held at the reporting date for the year ended December 31, 2008					
	Investment income, net of related expenses	Investment related gains (losses), net	Claims and other policy benefits	Interest credited	Policy acquisition costs and other insurance expenses	Total
Assets:						
Fixed maturity securities – available-for-sale	\$1,020	\$(63,561)	\$--	\$--	\$--	\$(62,541)
Funds withheld at interest – embedded derivatives	--	(427,798)	--	--	--	(427,798)
Short-term investments	(1)	(35)	--	--	--	(36)
Other invested assets – equity securities	2	(65)	--	--	--	(63)
Reinsurance ceded receivable – embedded derivatives	--	--	--	--	2,538	2,538
Total	\$1,021	\$(491,459)	\$--	\$--	\$2,538	\$(487,900)
Liabilities:						
Interest sensitive contract liabilities – embedded derivatives	\$--	\$(267,482)	\$3,885	\$(70,710)	\$--	\$(334,307)
Total	\$--	\$(267,482)	\$3,885	\$(70,710)	\$--	\$(334,307)

Note 7 REINSURANCE

Retrocession reinsurance treaties do not relieve the Company from its obligations to direct writing companies. Failure of retrocessionaires to honor their obligations could result in losses to the Company. Consequently, allowances would be

established for amounts deemed uncollectible. At December 31, 2008 and 2007, no allowances were deemed necessary. The Company regularly evaluates the financial condition of its reinsurers and retrocessionaires.

The effect of reinsurance on net premiums is as follows (dollars in thousands):

<u>Years Ended December 31,</u>	<u>2008</u>	<u>2007</u>	<u>2006</u>
Direct	\$ 2,433	\$ 2,539	\$ 2,958
Reinsurance assumed	5,836,556	5,370,970	4,732,491
Reinsurance ceded	(489,688)	(464,483)	(389,480)
Net premiums	<u>\$ 5,349,301</u>	<u>\$ 4,909,026</u>	<u>\$ 4,345,969</u>

The effect of reinsurance on claims and other policy benefits is as follows (dollars in thousands):

<u>Years Ended December 31,</u>	<u>2008</u>	<u>2007</u>	<u>2006</u>
Direct	\$ 4,075	\$ 3,705	\$ 3,602
Reinsurance assumed	4,753,401	4,231,436	3,667,795
Reinsurance ceded	(295,544)	(251,145)	(183,009)
Net claims and other policy benefits	<u>\$ 4,461,932</u>	<u>\$ 3,983,996</u>	<u>\$ 3,488,388</u>

At December 31, 2008 and 2007, there were no reinsurance ceded receivables associated with a single reinsurer with a carrying value in excess of 5% of total assets.

The effect of reinsurance on life insurance in force is shown in the following schedule (in millions):

<u>Life Insurance In Force:</u>	<u>Direct</u>	<u>Assumed</u>	<u>Ceded</u>	<u>Net</u>	<u>Assumed/Net %</u>
December 31, 2008	\$ 70	\$ 2,108,130	\$ 46,267	\$ 2,061,933	102.24%
December 31, 2007	79	2,119,890	48,108	2,071,861	102.32%
December 31, 2006	78	1,941,449	47,458	1,894,069	102.50%

At December 31, 2008, the Company's U.S. and Asia Pacific segments provided approximately \$1.1 billion of statutory financial reinsurance, as measured by pre-tax statutory surplus, to other insurance companies under financial reinsurance transactions to assist ceding companies in meeting applicable regulatory requirements. Generally, such financial reinsurance is provided by the Company committing cash or assuming insurance liabilities, which are collateralized by future profits on the reinsured business. The Company earns a fee based on the amount of net outstanding financial reinsurance.

Reinsurance agreements, whether facultative or automatic, may provide for recapture rights on the part of the ceding company. Recapture rights permit the ceding company to reassume all or a portion of the risk formerly ceded to the reinsurer after an agreed-upon period of time, generally 10 years, or in some cases due to changes in the financial condition or ratings of the reinsurer. Recapture of business previously ceded does not affect premiums ceded prior to the recapture of such business, but would reduce premiums in subsequent periods. Additionally, some treaties give the ceding company the right to request the Company to place assets in trust for their benefit to support their reserve credits, in the event of a downgrade of the Company's ratings to specified levels. As of December 31, 2008, these treaties had approximately \$751.5 million in statutory reserves. Assets placed in trust continue to be owned by the Company, but their use is restricted based on the terms of the trust agreement. Securities with an amortized cost of \$1,217.6 million were held in trust to satisfy collateral requirements for reinsurance business for the benefit of certain subsidiaries of the Company at December 31, 2008. In addition, the Company's collateral finance facility has asset in trust requirements. See Note 16 – "Collateral Finance Facility" for additional information. Securities with an amortized cost of \$1,560.1 million, as of December 31, 2008, were held in trust to satisfy collateral requirements under certain third-party reinsurance treaties. Additionally, under certain conditions, RGA may be obligated to move reinsurance from one RGA subsidiary company to another or make payments under the treaty. These conditions include change in control or ratings of the subsidiary, insolvency, nonperformance under a treaty, or loss of reinsurance license of such subsidiary. See Note 16 - "Collateral Finance Facility" for additional information on assets in trust.

Note 8 DEFERRED POLICY ACQUISITION COSTS

The following reflects the amounts of policy acquisition costs deferred and amortized (dollars in thousands):

<u>As of December 31,</u>	<u>2008</u>	<u>2007</u>	<u>2006</u>
Deferred policy acquisition costs:			
Assumed	\$ 3,679,002	\$ 3,247,901	\$ 2,900,181
Retroceded	(68,668)	(85,950)	(92,128)
Net	<u>\$ 3,610,334</u>	<u>\$ 3,161,951</u>	<u>\$ 2,808,053</u>
<u>Years Ended December 31,</u>	<u>2008</u>	<u>2007</u>	<u>2006</u>
Beginning of year	\$ 3,161,951	\$ 2,808,053	\$ 2,465,630
Capitalized:			
Assumed	961,847	849,139	891,597
Retroceded	(4,851)	(6,433)	(7,252)
Amortized:			
Assumed	(823,897)	(676,538)	(630,574)
Allocated to change in value of embedded derivatives	541,752	104,381	(3,735)
Retroceded	22,133	12,611	6,762
Foreign currency changes	(248,601)	70,738	85,625
End of year	<u>\$ 3,610,334</u>	<u>\$ 3,161,951</u>	<u>\$ 2,808,053</u>

Some reinsurance agreements involve reimbursing the ceding company for allowances and commissions in excess of first-year premiums. These amounts represent acquisition costs and are capitalized to the extent deemed recoverable from the future premiums and amortized against future profits of the business. This type of agreement presents a risk to the extent that the business lapses faster than originally anticipated, resulting in future profits being insufficient to recover the Company's investment.

Note 9 INCOME TAX

The provision for income tax expense attributable to income from continuing operations consists of the following (dollars in thousands):

<u>Years Ended December 31,</u>	<u>2008</u>	<u>2007</u>	<u>2006</u>
Current income tax expense	\$ 18,876	\$ 45,157	\$ 853
Deferred income tax expense	20,281	83,057	114,708
Foreign current tax expense	26,085	16,947	23,449
Foreign deferred tax expense	27,335	21,484	19,117
Provision for income taxes	<u>\$ 92,577</u>	<u>\$ 166,645</u>	<u>\$ 158,127</u>

Provision for income tax expense differed from the amounts computed by applying the U.S. federal income tax statutory rate of 35% to pre-tax income as a result of the following (dollars in thousands):

<u>Years Ended December 31,</u>	<u>2008</u>	<u>2007</u>	<u>2006</u>
Tax provision at U.S. statutory rate	\$ 98,137	\$ 166,221	\$ 157,986
Increase (decrease) in income taxes resulting from:			
Foreign tax rate differing from U.S. tax rate	(7,289)	(3,824)	(4,123)
Travel and entertainment	335	248	198
Deferred tax valuation allowance	230	2,664	274
Amounts related to tax audit contingencies	(241)	1,230	3,780
Change in cash surrender value of insurance policies	1,750	(573)	--
Other, net	(345)	679	12
Total provision for income taxes	<u>\$ 92,577</u>	<u>\$ 166,645</u>	<u>\$ 158,127</u>

Total income taxes were as follows (dollars in thousands):

<u>Years Ended December 31,</u>	<u>2008</u>	<u>2007</u>	<u>2006</u>
Income taxes from continuing operations	\$ 92,577	\$ 166,645	\$ 158,127
Tax benefit on discontinued operations	(5,933)	(7,775)	(2,720)
Income tax from stockholders' equity:			
Net unrealized holding loss on debt and equity securities recognized for financial reporting purposes	(468,719)	(20,768)	(8,223)
Exercise of stock options	(3,785)	(4,476)	(2,821)
Foreign currency translation	5,861	6,557	1,727
Unrealized pension and post retirement	(3,418)	1,642	(6,083)
Total income taxes provided	<u>\$ (383,417)</u>	<u>\$ 141,825</u>	<u>\$ 140,007</u>

The tax effects of temporary differences that give rise to significant portions of the deferred income tax assets and liabilities at December 31, 2008 and 2007, are presented in the following tables (dollars in thousands):

<u>As of December 31,</u>	<u>2008</u>	<u>2007</u>
Deferred income tax assets:		
Nondeductible accruals	\$ 43,072	\$ 42,095
Differences between tax and financial reporting amounts concerning certain reinsurance transactions	195,167	126,943
Differences in the tax basis of cash and invested assets	302,949	--
Deferred acquisition costs capitalized for tax	59,625	58,159
Net operating loss carryforward	259,137	325,119
Capital loss and foreign tax credit carryforwards	37,530	7,943
Subtotal	897,480	560,259
Valuation allowance	(7,895)	(7,665)
Total deferred income tax assets	<u>889,585</u>	<u>552,594</u>
Deferred income tax liabilities:		
Deferred acquisition costs capitalized for financial reporting	1,032,347	868,085
Reserve for policies and investment income differences	134,978	262,797
Differences in foreign currency translation	32,620	18,469
Differences in the tax basis of cash and invested assets	--	163,876
Total deferred income tax liabilities	<u>1,199,945</u>	<u>1,313,227</u>
Net deferred income tax liabilities	<u>\$ 310,360</u>	<u>\$ 760,633</u>

As of December 31, 2008 and 2007, a valuation allowance for deferred tax assets of approximately \$7.9 million and \$7.7 million, respectively, was provided on the foreign tax credits, net operating and capital losses of General American Argentina Seguros de Vida, S.A., RGA South Africa Holdings, RGA Financial Products Limited, RGA UK Services Limited, and RGA Reinsurance Company. The Company utilizes valuation allowances when it believes, based on the weight of the available evidence, that it is more likely than not that the deferred income taxes will not be realized. Except for RGA International Reinsurance Company Ltd., and RGA Global Reinsurance Company Limited, the Company has not recognized a deferred tax liability for the undistributed earnings of its wholly owned foreign subsidiaries because the Company considers these earnings to be permanently reinvested and does not expect these earnings to be repatriated in the foreseeable future.

During 2008, 2007, and 2006, the Company received federal and foreign income tax refunds of approximately \$31.0 million, \$1.9 million and \$46.3 million, respectively. The Company made cash income tax payments of approximately \$54.2 million, \$26.1 million and \$12.9 million in 2008, 2007 and 2006, respectively. At December 31, 2008 and 2007, the Company recognized gross deferred tax assets associated with net operating losses of approximately \$743.5 million and \$932.4 million, respectively, that will expire between 2019 and 2028. However, these net operating losses are expected to be utilized in the normal course of business during the period allowed for carryforwards and in any event, will not be lost, due to the application of tax planning strategies that management would utilize.

The Company files income tax returns with the U.S. federal government and various state and foreign jurisdictions. The Company is under continuous examination by the Internal Revenue Service and is subject to audit by taxing authorities in other foreign jurisdictions in which the Company has significant business operations. The income tax years under examination vary by jurisdiction. With a few exceptions, the Company is no longer subject to U.S. federal, state and foreign tax examinations by tax authorities for years prior to 2004.

As a result of the adoption of FIN 48 on January 1, 2007, the Company recognized a \$17.3 million increase in the liability for unrecognized tax benefits, a \$5.3 million increase in the interest liability for unrecognized tax benefits, and a corresponding reduction to the January 1, 2007 balance of retained earnings of \$22.6 million. The Company's total amount of unrecognized tax benefits upon adoption of FIN 48 was \$196.3 million. The Company reclassified, at adoption, \$9.1 million of current income tax payables to the liability for unrecognized tax benefits, included within other liabilities. The Company also reclassified, at adoption, \$169.9 million of deferred income tax liabilities for which the ultimate deductibility is highly certain but for which there is uncertainty about the timing of such deductibility, to the liability for unrecognized tax benefits. Because of the impact of deferred tax accounting, other than interest and penalties, the disallowance of the shorter deductibility period would not affect the annual effective tax rate but would accelerate the payment of cash to the taxing authority to an earlier period. The total amount of unrecognized tax benefits as of January 1, 2007 that would affect the effective tax rate if recognized was \$26.4 million. The Company also had \$29.8 million of accrued interest, included within other liabilities, as of January 1, 2007. The Company classifies interest accrued related to unrecognized tax benefits in interest expense, while penalties are included within income tax expense.

As of December 31, 2008, the Company's total amount of unrecognized tax benefits was \$206.7 million and the total amount of unrecognized tax benefits that would affect the effective tax rate, if recognized, was \$28.1 million. It is not anticipated that the Company's liability for unrecognized tax benefits will change significantly over the next 12 months due to the fact that most of the Company's unrecognized tax benefits are timing in nature and even if recognized, would be offset by the addition of uncertain tax benefits that the Company does not consider effectively settled. Management believes there will be no material impact to the Company's effective tax rate related to unrecognized tax benefits over the next 12 months.

A reconciliation of the beginning and ending amount of unrecognized tax benefits for the years ended December 31, 2008 and 2007, is as follows (dollars in thousands):

	Total Unrecognized Tax Benefits	
	2008	2007
Beginning Balance, January 1	\$198,240	\$196,317
Additions for tax positions of prior years	7,996	--
Reductions for tax positions of prior years	(3,984)	(5,795)
Additions for tax positions of current year	4,413	7,718
Reductions for tax positions of current year	--	--
Settlements with tax authorities	--	--
Ending Balance, December 31	<u>\$206,665</u>	<u>\$198,240</u>

During the years ended December 31, 2008 and 2007, the Company recognized \$2.5 million and \$3.9 million, respectively, in interest expense. As of December 31, 2008 and 2007, the Company had \$36.2 million and \$33.7 million, respectively, of accrued interest related to unrecognized tax benefits. The net increase of \$2.5 million from December 31, 2007 was related to accrued interest on uncertain tax positions offset by reductions in accrued interest on effectively settled positions.

Note 10 EMPLOYEE BENEFIT PLANS

Certain subsidiaries of the Company are sponsors or administrators of both qualified and non-qualified defined benefit pension plans ("Pension Plans"). The largest of these plans is a non-contributory qualified defined benefit pension plan sponsored by RGA Reinsurance that covers U.S. employees. The benefits under the Pension Plans are generally based on years of service and compensation levels.

The Company also provides certain health care and life insurance benefits for retired employees. The health care benefits are provided through a self-insured welfare benefit plan. Employees become eligible for these benefits if they meet minimum age and service requirements. The retiree's cost for health care benefits varies depending upon the credited years of service. The Company recorded benefits expense of approximately \$1.4 million, \$1.4 million, and \$1.6 million in 2008, 2007 and 2006, respectively that are related to these postretirement plans. Virtually all retirees, or their beneficiaries, contribute a portion of the total cost of postretirement health benefits.

A December 31 measurement date is used for all of the defined benefit and postretirement plans.

Obligations, Funded Status and Net Periodic Benefit Costs

(dollars in thousands)	December 31,			
	Pension Benefits		Other Benefits	
	<u>2008</u>	<u>2007</u>	<u>2008</u>	<u>2007</u>
Change in benefit obligation:				
Benefit obligation at beginning of year	\$ 44,685	\$ 42,252	\$ 10,754	\$ 12,305
Service cost	3,459	3,082	631	630

Net prior service cost	3,536	4,335	--	--
Total	<u>\$ 20,801</u>	<u>\$ 10,312</u>	<u>\$ 1,715</u>	<u>\$ 2,479</u>

The following table presents additional year-end information for pension plans based on the excess or shortfall of plan assets as compared to the accumulated benefit obligation (“ABO”) as of December 31, 2008 and 2007 (dollars in thousands):

	<u>2008</u>		<u>2007</u>	
	ABO in Excess of Plan Assets	Plan Assets in Excess of ABO	ABO in Excess of Plan Assets	Plan Assets in Excess of ABO
Aggregate projected benefit obligation	\$ 49,872	\$ --	\$ 18,645	\$ 26,040
Aggregate fair value of plan assets	21,044	--	--	24,184
Accumulated benefit obligation	45,715	--	16,103	22,617

The components of net periodic benefit cost and other changes in plan assets and benefit obligations recognized in other comprehensive income were as follows (dollars in thousands):

	<u>Pension Benefits</u>			<u>Other Benefits</u>		
	<u>2008</u>	<u>2007</u>	<u>2006</u>	<u>2008</u>	<u>2007</u>	<u>2006</u>
Net periodic benefit cost:						
Service cost	\$3,459	\$3,082	\$2,662	\$631	\$630	\$687
Interest cost	2,836	2,303	1,975	638	582	632
Expected return on plan assets	(2,190)	(1,876)	(1,516)	--	--	--
Amortization of prior actuarial losses	512	341	377	92	141	279
Amortization of prior service cost	366	363	316	--	--	--
Net periodic benefit cost	<u>4,983</u>	<u>4,213</u>	<u>\$3,814</u>	<u>1,361</u>	<u>1,353</u>	<u>\$1,598</u>
Other changes in plan assets and benefit obligations recognized in other comprehensive income:						
Net actuarial (gains) losses	11,544	(2,508)		(670)	(2,627)	
Prior service cost	320	--		--	--	
Amortization of actuarial (gains) losses	(512)	(341)		(92)	(141)	
Amortization of prior service cost (credit)	(366)	(363)		--	--	
Foreign exchange translations and other adjustments	(498)	751		(2)	641	
Total recognized in other comprehensive income	<u>10,488</u>	<u>(2,461)</u>		<u>(764)</u>	<u>(2,127)</u>	
Total recognized in net periodic benefit cost and other comprehensive income	<u>\$15,471</u>	<u>\$1,752</u>		<u>\$597</u>	<u>\$(774)</u>	

The Company expects to contribute to the plans \$4.6 million in pension benefits and \$0.2 million in other benefits during 2009.

The following benefit payments, which reflect expected future service as appropriate, are expected to be paid (dollars in thousands):

	<u>Pension Benefits</u>	<u>Other Benefits</u>
2009	\$2,603	\$203
2010	3,186	234
2011	4,061	258
2012	4,910	284
2013	5,068	323
2014 -2018	30,188	2,421

The estimated net loss and prior service cost for the defined benefit pension plans and post-retirement plans that will be amortized from accumulated other comprehensive income into net periodic benefit cost over the next fiscal year are \$1.3 million and \$0.5 million, respectively.

Assumptions

Weighted average assumptions used to determine the accumulated benefit obligation and net benefit cost or income for the year ended December 31:

	Pension Benefits			Other Benefits		
	<u>2008</u>	<u>2007</u>	<u>2006</u>	<u>2008</u>	<u>2007</u>	<u>2006</u>
Discount rate used to determine benefit obligations	6.20%	5.81%	5.75%	6.30%	6.00%	5.75%
Discount rate used to determine net benefit cost or income	6.19%	5.70%	5.75%	6.00%	5.75%	5.75%
Expected long-term rate of return on plan assets	8.50%	8.50%	8.50%	--	--	--
Rate of compensation increase	4.22%	4.20%	4.25%	--	--	--

The expected rate of return on plan assets is based on anticipated performance of the various asset sectors in which the plan invests, weighted by target allocation percentages. Anticipated future performance is based on long-term historical returns of the plan assets by sector, adjusted for the long-term expectations on the performance of the markets. While the precise expected return derived using this approach may fluctuate from year to year, the policy is to hold this long-term assumption constant as long as it remains within reasonable tolerance from the derived rate.

The assumed health care cost trend rates used in measuring the accumulated non-pension post-retirement benefit obligation were as follows:

	December 31,	
	<u>2008</u>	<u>2007</u>
Pre-Medicare eligible claims	8% down to 5% in 2012	9% down to 5% in 2012
Medicare eligible claims	8% down to 5% in 2012	9% down to 5% in 2012

Assumed health care cost trend rates may have a significant effect on the amounts reported for health care plans. A one-percentage point change in assumed health care cost trend rates would have the following effects (dollars in thousands):

	<u>One Percent Increase</u>	<u>One Percent Decrease</u>
Effect on total of service and interest cost components	\$315	\$(238)
Effect on accumulated postretirement benefit obligation	\$2,371	\$(1,830)

Results for the Pension and Other Benefits Plans are measured at December 31 for each year presented.

Allocation of the Pension Plan's total plan fair value and target allocations by asset type:

Asset Category:	<u>Fair Value</u>		<u>Target Allocation</u>	
	<u>2008</u>	<u>2007</u>	<u>2008</u>	<u>2007</u>
Equity securities	71%	75%	75%	75%
Debt securities	29%	25%	25%	25%
Total	100%	100%	100%	100%

Target allocations of assets are determined with the objective of maximizing returns and minimizing volatility of net assets through adequate asset diversification and partial liability immunization. Adjustments are made to target allocations based on the Company's assessment of the effect of economic factors and market conditions.

Savings and Investment Plans

Certain subsidiaries of the Company also sponsor saving and investment plans under which a portion of employee contributions are matched. Subsidiary contributions to these plans, which are partially tied to RGA's financial results, were \$3.4 million, \$2.8 million and \$1.8 million in 2008, 2007 and 2006, respectively.

Note 11 RELATED PARTY TRANSACTIONS

General American and MetLife have historically provided certain administrative services to RGA and RGA Reinsurance. Such services include risk management and corporate travel. The cost of these services for the years ended December 31, 2008, 2007 and 2006 was approximately \$1.8 million (through the Divestiture Date), \$2.8 million and \$2.4 million, respectively, included in other expenses. Management does not believe that the various amounts charged for these services would be materially different if they had been incurred from an unrelated third party.

RGA Reinsurance also has a product license and service agreement with MetLife. Under this agreement, RGA has licensed the use of its electronic underwriting product to MetLife and provides internet hosting services, installation and

modification services for the product. The Company recorded revenue under the agreement for the years ended December 31, 2008, 2007 and 2006 of approximately \$0.6 million (through the Divestiture Date), \$0.6 million and \$0.7 million, respectively.

The Company also had arms-length direct policies and reinsurance agreements with MetLife and certain of its subsidiaries. These direct policies and reinsurance agreements with MetLife and certain of its subsidiaries continue to be in place after the Divestiture Date. As of December 31, 2007, the Company had reinsurance-related assets, excluding investments allocated to support the business, and liabilities from these agreements totaling \$105.9 million and \$277.6 million, respectively. Additionally, the Company reflected net premiums from these agreements of approximately \$163.5 million (through the Divestiture Date), \$250.9 million, and \$227.8 million in 2008, 2007 and 2006, respectively. The premiums reflect the net of business assumed from and ceded to MetLife and its subsidiaries. The pre-tax income, excluding investment income allocated to support the business, was approximately \$15.8 million (through the Divestiture Date), \$16.0 million, and \$10.9 million in 2008, 2007 and 2006, respectively.

Note 12 LEASE COMMITMENTS

The Company leases office space and furniture and equipment under non-cancelable operating lease agreements, which expire at various dates. Future minimum office space annual rentals under non-cancelable operating leases at December 31, 2008 are as follows:

2009	\$9.7 million
2010	7.3 million
2011	4.9 million
2012	4.3 million
2013	4.2 million
Thereafter	6.5 million

The amounts above are net of expected sublease income of approximately \$0.3 million annually through 2010. Rent expenses amounted to approximately \$12.5 million, \$11.8 million and \$7.5 million for the years ended December 31, 2008, 2007 and 2006, respectively.

Note 13 FINANCIAL CONDITION AND NET INCOME ON A STATUTORY BASIS – SIGNIFICANT SUBSIDIARIES

The following table presents selected statutory financial information for the Company's primary life reinsurance legal entities, as of or for the years ended December 31, 2008, 2007, and 2006 (dollars in thousands):

	Statutory Capital & Surplus			Statutory Net Income (Loss)		
	<u>2008</u>	<u>2007</u>		<u>2008</u>	<u>2007</u>	<u>2006</u>
RCM	\$ 1,107,899	\$ 1,184,135	\$	(2,276)	\$ 5,167	\$ 68,484
RGA Reinsurance	1,103,753	1,184,134		(41,750)	(41,535)	(61,466)
RGA Canada	372,441	413,354		9,915	12,244	12,802
RGA Barbados	226,572	234,466		32,738	54,293	27,065
Timberlake Re	102,854	89,651		(112,859)	(69,621)	(574,694)
RGA Americas	100,535	319,693		(84,712)	31,804	54,978
Other reinsurance subsidiaries	550,744	465,202		117,992	(88,523)	52,002

The total capital and surplus positions of RCM, RGA Reinsurance and RGA Canada exceed the risk-based capital requirements of the applicable regulatory bodies. RCM and RGA Reinsurance are subject to Missouri statutory provisions that restrict the payment of dividends. They may not pay dividends in any 12-month period in excess of the greater of the prior year's statutory operating income or 10% of capital and surplus at the preceding year-end, without regulatory approval. The applicable statutory provisions only permit an insurer to pay a shareholder dividend from unassigned surplus. Any dividends paid by RGA Reinsurance would be paid to RCM, its parent company, which in turn has restrictions related to its ability to pay dividends to RGA. The assets of RCM consist primarily of its investment in RGA Reinsurance. As of January

1, 2009, RCM and RGA Reinsurance could pay maximum dividends, without prior approval, of approximately \$110.4 million and \$110.4 million, respectively. The Missouri Department of Insurance, Financial Institution and Professional Registration, allows RCM to pay a dividend to RGA to the extent RCM received the dividend from RGA Reinsurance, without limitation related to the level of unassigned surplus. Dividend payments by other subsidiaries are subject to regulations in the jurisdiction of domicile.

Note 14 COMMITMENTS AND CONTINGENT LIABILITIES

The Company has commitments to fund investments in limited partnerships in the amount of \$124.6 million at December 31, 2008. The Company anticipates that the majority of these amounts will be invested over the next five years, however, contractually these commitments could become due at the request of the counterparties. Investments in limited partnerships are carried at cost and included in other invested assets in the consolidated balance sheets.

The Company is subject to litigation in the normal course of its business. The Company currently has no material litigation. However, if such material litigation did arise, it is possible that an adverse outcome on any particular arbitration or litigation situation could have a material adverse effect on the Company's consolidated financial position and/or net income in a particular reporting period.

The Company has obtained letters of credit, issued by banks, in favor of various affiliated and unaffiliated insurance companies from which the Company assumes business. These letters of credit represent guarantees of performance under the reinsurance agreements and allow ceding companies to take statutory reserve credits. Certain of these letters of credit contain financial covenant restrictions. At December 31, 2008 and 2007, there were approximately \$26.6 million and \$22.6 million, respectively, of outstanding bank letters of credit in favor of third parties. Additionally, the Company utilizes letters of credit to secure reserve credits when it retrocedes business to its subsidiaries, including offshore subsidiaries RGA Americas, RGA Barbados and RGA Atlantic. The Company cedes business to its offshore affiliates to help reduce the amount of regulatory capital required in certain jurisdictions such as the U.S. and the United Kingdom. The capital required to support the business in the offshore affiliates reflects more realistic expectations than the original jurisdiction of the business, where capital requirements are often considered to be quite conservative. As of December 31, 2008 and 2007, \$428.8 million and \$459.6 million, respectively, in letters of credit from various banks were outstanding between the various subsidiaries of the Company. In September 2007, the Company entered into a five-year, syndicated revolving credit facility with an overall capacity of \$750.0 million, replacing its \$600.0 million five-year revolving credit facility, which was scheduled to mature in September 2010. The Company may borrow cash and may obtain letters of credit in multiple currencies under the new facility. At December 31, 2008, the Company had \$389.7 million in issued, but undrawn, letters of credit under this new facility, which is included in the total above. Applicable letter of credit fees and fees payable for the credit facility depend upon the Company's senior unsecured long-term debt rating. Fees associated with the Company's other letters of credit are not fixed for periods in excess of one year and are based on the Company's ratings and the general availability of these instruments in the marketplace.

RGA has issued guarantees to third parties on behalf of its subsidiaries' performance for the payment of amounts due under certain credit facilities, reinsurance treaties and office lease obligations, whereby if a subsidiary fails to meet an obligation, RGA or one of its other subsidiaries will make a payment to fulfill the obligation. In limited circumstances, treaty guarantees are granted to ceding companies in order to provide them additional security, particularly in cases where RGA's subsidiary is relatively new, unrated, or not of a significant size, relative to the ceding company. Liabilities supported by the treaty guarantees, before consideration for any legally offsetting amounts due from the guaranteed party, totaled \$273.6 million and \$325.1 million as of December 31, 2008 and 2007, respectively, and are reflected on the Company's consolidated balance sheets in future policy benefits. Potential guaranteed amounts of future payments will vary depending on production levels and underwriting results. Guarantees related to trust preferred securities and credit facilities provide additional security to third parties should a subsidiary fail to make principal and/or interest payments when due. As of December 31, 2008, RGA's exposure related to these guarantees was \$159.0 million. RGA has issued payment guarantees on behalf of two of its subsidiaries in the event the subsidiaries fail to make payment under their office lease obligations, the exposure of which was \$4.2 million as of December 31, 2008.

In addition, the Company indemnifies its directors and officers as provided in its charters and by-laws. Since this indemnity generally is not subject to limitation with respect to duration or amount, the Company does not believe that it is possible to determine the maximum potential amount due under this indemnity in the future.

Note 15 DEBT AND TRUST PREFERRED SECURITIES

The Company's debt and trust preferred securities consist of the following (dollars in thousands):

	2008	2007
\$400 million 6.75% Junior Subordinated Debentures due 2065	\$398,646	\$398,644
\$200 million 6.75% Senior Notes due 2011	199,954	199,938
\$300 million 5.625% Senior Notes due 2017	297,757	297,483
Revolving Credit Facilities	21,889	29,773
Total Debt	918,246	925,838
Less portion due in less than one year (short-term debt)	--	(29,773)
Long-term Debt	\$918,246	\$896,065
\$225.0 million 5.75% Preferred Securities due 2051	\$159,035	\$158,861

In March 2007, RGA issued 5.625% Senior Notes due March 15, 2017 with a face amount of \$300.0 million. These senior notes have been registered with the Securities and Exchange Commission. The net proceeds from the offering were approximately \$295.3 million, a portion of which were used to pay down \$50.0 million of indebtedness under a U.S. bank credit facility. The remaining net proceeds were designated for general corporate purposes. Capitalized issue costs were approximately \$2.4 million.

The Company has three revolving credit facilities under which it may borrow up to approximately \$807.0 million in cash. As of December 31, 2008, the Company had drawn approximately \$21.9 million in cash under these facilities. During 2008, the interest rates on the Company's revolving credit facilities ranged from 3.11% to 6.13%. The Company may borrow up to \$750.0 million in cash and obtain letters of credit in multiple currencies on its revolving credit facility that expires in September 2012. As of December 31, 2008, the Company had no cash borrowings outstanding and \$389.7 million in issued, but undrawn, letters of credit under this facility. The Company's other credit facilities consist of a £15.0 million credit facility that expires in May 2010, with an outstanding balance of £15 million, or \$21.9 million, as of December 31, 2008, and an A\$50.0 million Australian credit facility that expires in March 2011, with no outstanding balance as of December 31, 2008. Terminations of revolving credit facilities and maturities of senior notes over the next five years total \$21.9 million in 2010 and \$200.0 million in 2011.

Certain of the Company's debt agreements contain financial covenant restrictions related to, among others, liens, the issuance and disposition of stock of restricted subsidiaries, minimum requirements of consolidated net worth, maximum ratios of debt to capitalization, change of control provisions, and minimum rating requirements. A material ongoing covenant default could require immediate payment of the amount due, including principal, under the various agreements. Additionally, the Company's debt agreements contain cross-default covenants, which would make outstanding borrowings immediately payable in the event of a material uncured covenant default under any of the agreements, including, but not limited to, non-payment of indebtedness when due for an amount of \$100.0 million, bankruptcy proceedings, and any other event which results in the acceleration of the maturity of indebtedness. As of December 31, 2008, the Company had \$918.2 million in outstanding borrowings under its debt agreements and was in compliance with all covenants under those agreements. The ability of the Company to make debt principal and interest payments depends on the earnings and surplus of subsidiaries, investment earnings on undeployed capital proceeds, and the Company's ability to raise additional funds.

RGA guarantees the payment of amounts outstanding under the credit facility maintained by its subsidiary operation in Australia. At December 31, 2008 there was no debt outstanding under this credit facility.

In December 2001, RGA, through its wholly-owned trust, RGA Capital Trust I, issued \$225.0 million face amount in Preferred Securities due 2051 at a discounted value of \$158.1 million. RGA fully and unconditionally guarantees, on a subordinated basis, the obligations of the Trust under the Preferred Securities.

Note 16 COLLATERAL FINANCE FACILITY

On June 28, 2006, RGA's subsidiary, Timberlake Financial, issued \$850.0 million of Series A Floating Rate Insured Notes due June 2036 in a private placement. The notes were issued to fund the collateral requirements for statutory reserves required by the U.S. Valuation of Life Policies Model Regulation (commonly referred to as Regulation XXX) on specified term life insurance policies reinsured by RGA Reinsurance. Proceeds from the notes, along with a \$112.8 million direct investments by the Company, collateralize the notes and are not available to satisfy the general obligations of the Company. As of December 31, 2008, the Company held assets in trust of \$875.7 million for this purpose. In addition, the Company

held \$9.7 million in custody as of December 31, 2008. Interest on the notes accrues at an annual rate of 1-month LIBOR plus a base rate margin, payable monthly and totaled \$28.7 million and \$52.0 million in 2008 and 2007, respectively. The payment of interest and principal on the notes is insured through a financial guaranty insurance policy with a third party. The notes represent senior, secured indebtedness of Timberlake Financial with no recourse to RGA or its other subsidiaries. Timberlake Financial will rely primarily upon the receipt of interest and principal payments on a surplus note and dividend payments from its wholly-owned subsidiary, Timberlake Re, a South Carolina captive insurance company, to make payments of interest and principal on the notes. The ability of Timberlake Re to make interest and principal payments on the surplus note and dividend payments to Timberlake Financial is contingent upon South Carolina regulatory approval and the performance of specified term life insurance policies with guaranteed level premiums retroceded by RGA's subsidiary, RGA Reinsurance, to Timberlake Re.

In accordance with FASB Interpretation No. 46(r), "Consolidation of Variable Interest Entities – An Interpretation of ARB No. 51," Timberlake Financial is considered to be a variable interest entity and the Company is deemed to hold the primary beneficial interest. As a result, Timberlake Financial has been consolidated in the Company's financial statements. The Company's consolidated balance sheets include the assets of Timberlake Financial recorded as fixed maturity investments and other invested assets, which consists of restricted cash and cash equivalents, with the liability for the notes recorded as collateral finance facility. The Company's consolidated statements of income include the investment return of Timberlake Financial as investment income and the cost of the facility is reflected in collateral finance facility expense.

Note 17 SEGMENT INFORMATION

The Company has five main geographic-based operational segments, each of which is a distinct reportable segment: U.S., Canada, Europe & South Africa, Asia Pacific and Corporate and Other. The U.S. operations market traditional life reinsurance, reinsurance of asset-intensive products and financial reinsurance, primarily to large U.S. market life insurance companies. Asset-intensive products primarily include reinsurance of corporate-owned life insurance and annuities. The Canada operations provide insurers with reinsurance of traditional individual life products as well as creditor reinsurance, group life and health reinsurance and non-guaranteed critical illness products. Europe & South Africa operations include traditional life reinsurance and critical illness business from Europe & South Africa, in addition to other markets being developed by the Company. Asia Pacific operations provide primarily traditional life reinsurance, critical illness and, to a lesser extent, financial reinsurance through RGA Australia and RGA Reinsurance. The Company's discontinued accident and health operations are not reflected in the continuing operations of the Company. The Company measures segment performance based on income or loss before income taxes.

The accounting policies of the segments are the same as those described in the Summary of Significant Accounting Policies in Note 2. The Company measures segment performance primarily based on profit or loss from operations before income taxes. There are no intersegment reinsurance transactions and the Company does not have any material long-lived assets.

The Company allocates capital to its segments based on an internally developed risk capital model, the purpose of which is to measure the risk in the business and to provide a basis upon which capital is deployed. The economic capital model considers the unique and specific nature of the risks inherent in RGA's businesses. As a result of the economic capital allocation process, a portion of investment income and investment related gains and losses are credited to the segments based on the level of allocated equity. In addition, the segments are charged for excess capital utilized above the allocated economic capital basis. This charge is included in policy acquisition costs and other insurance expenses.

The Company's reportable segments are strategic business units that are primarily segregated by geographic region. Information related to revenues, income (loss) before income taxes, interest expense, depreciation and amortization, and assets of the Company's continuing operations are summarized below (dollars in thousands).

<u>For the Years Ended December 31,</u>	<u>2008</u>	<u>2007</u>	<u>2006</u>
Revenues:			
U.S.	\$3,148,124	\$3,391,007	\$3,269,563
Canada	691,948	619,405	542,077
Europe & South Africa	732,475	702,391	604,750
Asia Pacific	1,057,873	908,606	707,377
Corporate and Other	50,783	96,952	69,924
Total from continuing operations	<u>\$5,681,203</u>	<u>\$5,718,361</u>	<u>\$5,193,691</u>

<u>For the Years Ended December 31,</u>	<u>2008</u>	<u>2007</u>	<u>2006</u>
Income (loss) from continuing operations before income taxes:			
U.S.	\$66,088	\$327,928	\$322,348
Canada	102,266	81,543	45,766
Europe & South Africa	65,686	47,467	58,241
Asia Pacific	85,509	60,090	58,591
Corporate and Other	(39,157)	(42,110)	(33,558)
Total from continuing operations	<u>\$280,392</u>	<u>\$474,918</u>	<u>\$451,388</u>

<u>For the Years Ended December 31,</u>	<u>2008</u>	<u>2007</u>	<u>2006</u>
Interest expense:			
Corporate and Other	\$76,161	\$76,906	\$62,033
Total from continuing operations	<u>\$76,161</u>	<u>\$76,906</u>	<u>\$62,033</u>

<u>For the Years Ended December 31,</u>	<u>2008</u>	<u>2007</u>	<u>2006</u>
Depreciation and amortization:			
U.S.	\$162,944	\$426,713	\$489,581
Canada	109,826	86,800	94,246
Europe & South Africa	97,791	120,772	121,385
Asia Pacific	122,031	113,108	105,428
Corporate and Other	7,423	6,990	4,545
Total from continuing operations	<u>\$500,015</u>	<u>\$754,383</u>	<u>\$815,185</u>

The table above includes amortization of deferred acquisition costs, including the effect from investment related gains and losses.

<u>As of December 31,</u>	<u>2008</u>	<u>2007</u>
Assets:		
U.S.	\$15,061,753	\$13,779,284
Canada	2,710,187	2,738,005
Europe & South Africa	1,134,990	1,345,900
Asia Pacific	1,413,611	1,355,111
Corporate and Other and discontinued operations	1,338,277	2,379,709
Total assets	<u>\$21,658,818</u>	<u>\$21,598,009</u>

Companies in which RGA has an ownership position greater than twenty percent, but less than or equal to fifty percent, are reported on the equity basis of accounting. The equity in the net income of such subsidiaries is not material to the results of operations or financial position of individual segments or the Company taken as a whole. Capital expenditures of each reporting segment were immaterial in the periods noted.

During 2008, three clients generated \$297.8 million or 39.6% of gross premiums for the Canada operations. Five clients of the Company's United Kingdom operations generated approximately \$473.4 million, or 63.3% of the total gross premiums for the Europe & South Africa operations. Ten clients, six in Australia, two in Korea and two in Japan, generated approximately \$578.7 million, or 56.3% of the total gross premiums for the Asia Pacific operations. There were no significant concentrations of gross premiums with clients in the U.S.

Note 18 EQUITY BASED COMPENSATION

The Company adopted the RGA Flexible Stock Plan (the "Plan") in February 1993, as amended, and the Flexible Stock Plan for Directors (the "Directors Plan") in January 1997, as amended, (collectively, the "Stock Plans"). The Stock Plans provide for the award of benefits (collectively "Benefits") of various types, including stock options, stock appreciation rights ("SARs"), restricted stock, performance shares, cash awards, and other stock-based awards, to key employees, officers, directors and others performing significant services for the benefit of the Company or its subsidiaries. As of December 31, 2008, shares authorized for the granting of Benefits under the Plan and the Directors Plan totaled 9,260,077 and 212,500

respectively. The Company generally uses treasury shares to support the future exercise of options or settlement of awards granted under its stock plans.

Equity-based compensation expense of \$10.7 million, \$18.3 million, and \$22.0 million related to grants or awards under the Stock Plans was recognized in 2008, 2007 and 2006, respectively. Equity-based compensation expense is principally related to the issuance of stock options, performance contingent restricted units, and restricted stock.

In general, options granted under the Plan become exercisable over vesting periods ranging from one to eight years while options granted under the Directors Plan become exercisable after one year. Options are generally granted with an exercise price equal to the stock's fair value at the date of grant and expire 10 years after the date of grant. Information with respect to grants under the Stock Plans follows.

	Stock Options			
	<u>Options</u>	<u>Weighted-Average Exercise Price</u>	<u>Aggregate Intrinsic Value (in millions)</u>	<u># of Performance Contingent Units</u>
Outstanding January 1, 2006	2,798,760	\$31.90		249,959
Granted	336,725	\$47.47		144,097
Exercised / Lapsed	(329,794)	\$26.55		--
Forfeited	(6,140)	\$39.49		(1,876)
Outstanding December 31, 2006	2,799,551	\$34.39		392,180
Granted	319,487	\$59.63		105,453
Exercised / Lapsed	(455,901)	\$29.97		(121,307)
Forfeited	(67,884)	\$45.81		(22,177)
Outstanding December 31, 2007	2,595,253	\$37.98		354,149
Granted	434,622	\$56.03		160,968
Exercised / Lapsed	(189,229)	\$33.60		(113,667)
Forfeited	(53,462)	\$51.01		(18,331)
Outstanding December 31, 2008	2,787,184	\$40.84	\$5.5	383,119
Options exercisable	1,930,005	\$23.98	\$36.4	

The intrinsic value of options exercised was \$1.7 million, \$10.3 million, and \$9.6 million for 2008, 2007 and 2006, respectively.

	Options Outstanding			Options Exercisable	
	<u>Outstanding as of 12/31/2008</u>	<u>Weighted-Average Remaining Contractual Life</u>	<u>Weighted-Average Exercise Price</u>	<u>Exercisable as of 12/31/2008</u>	<u>Weighted-Average Exercise Price</u>
Range of Exercise Prices					
\$00.00 - \$24.99	125,849	1.0	\$23.19	125,849	\$23.19

\$45.00 - \$54.99	553,217	6.5	\$47.46	338,038	\$47.46
\$55.00 +	715,039	8.6	\$57.50	73,039	\$59.63
Totals	2,787,184	5.3	\$40.84	1,930,005	\$23.98

The Black-Scholes model was used to determine the fair value of stock options granted and recognized in the financial statements. The Company used daily historical volatility when calculating stock option values. The risk-free rate is based on observed interest rates for instruments with maturities similar to the expected term of the stock options. Dividend yield is determined based on historical dividend distributions compared to the price of the underlying common stock as of the valuation date and held constant over the life of the stock options. The Company estimated expected life using the historical average years to exercise or cancellation. The per share weighted-average fair value of stock options granted during 2008, 2007 and 2006 was \$14.02, \$18.72 and \$16.06 on the date of grant using the Black-Scholes option-pricing model with the following weighted-average assumptions: 2008-expected dividend yield of 0.6%, risk-free interest rate of 3.23%, expected life of 6.0 years, and an expected rate of volatility of the stock of 20.0% over the expected life of the options; 2007-expected dividend yield of 0.6%, risk-free interest rate of 4.67%, expected life of 6.0 years, and an expected rate of volatility of the stock of 23.4% over the expected life of the options; and 2006-expected dividend yield of 0.76%, risk-free interest rate of

4.35%, expected life of 6.0 years, and an expected rate of volatility of the stock of 28.4% over the expected life of the options.

In general, restrictions lapse on restricted stock awards at the end of a three- or ten-year vesting period. Restricted stock awarded under the plan generally has no strike price and is included in the Company's shares outstanding. As of December 31, 2008, 13,096 shares of restricted stock were outstanding.

During 2008, 2007 and 2006 the Company also issued 160,968, 105,453 and 144,097 performance contingent units ("PCUs") to key employees at a weighted average fair value per unit of \$56.03, \$59.63 and \$47.47, respectively. As of December 31, 2008, 156,674, 96,960 and 129,485 PCUs were outstanding from the 2008, 2007 and 2006 grants, respectively. Each PCU represents the right to receive up to two shares of Company common stock, depending on the results of certain performance measures over a three-year period. The compensation expense related to the PCUs is recognized ratably over the requisite performance period. In February 2009, 2008 and 2007, the board approved a 1.33, 1.92 and 2.0 share payout for each PCU granted in 2006, 2005 and 2004, resulting in the issuance of 164,630, 218,240 and 242,613 shares of common stock from treasury, respectively.

As of December 31, 2008, there was \$14.3 million of unrecognized compensation costs related to equity-based grants or awards. It is estimated that these costs will vest over a weighted average period of 1.6 years.

Prior to January 1, 2003, the Company applied APB Opinion No. 25 in accounting for its Stock Plans and, accordingly, no compensation cost was recognized for its stock options in the consolidated financial statements. For grants from 2003 through 2005, the Company determined compensation cost based on the fair value at the grant date for its stock options using the "prospective" approach under FASB Statement No. 123, as amended by SFAS No. 148, "Accounting for Stock-Based Compensation — Transition and Disclosure, an amendment of FASB Statement No. 123". Beginning January 1, 2006, the Company was required to use the "modified prospective" method for recording compensation expense in accordance with SFAS 123(r), a revision of SFAS 123. The modified prospective approach requires compensation cost on all unvested options to be recorded in the income statement over its remaining vesting period, regardless of when the options were granted. Had the Company applied the modified prospective approach in the comparable prior-year periods, net income and earnings per share would not have changed by a material amount.

In February 2009, the board approved an incentive compensation package including 742,234 incentive stock options at \$32.20 per share and 308,684 PCUs under the Plan. In addition, non-employee directors received 7,600 shares of common stock under the Directors Plan.

Note 19 EARNINGS PER SHARE

The following table sets forth the computation of basic and diluted earnings per share from continuing operations (in thousands, except per share information):

Earnings:	2008	2007	2006
Income from continuing operations (numerator for basic and diluted calculations)	\$187,815	\$308,273	\$293,261
Shares:			
Weighted average outstanding shares (denominator for basic calculation)	63,918	61,857	61,250
Equivalent shares from outstanding stock options and warrants	1,353	2,374	1,812
Diluted shares (denominator for diluted calculation)	65,271	64,231	63,062
Earnings per share from continuing operations:			
Basic	\$2.94	\$4.98	\$4.79
Diluted	\$2.88	\$4.80	\$4.65

The calculation of equivalent shares from outstanding stock options does not include the effect of options having a strike price that exceeds the average stock price for the earnings period, as the result would be antidilutive. The calculation of common equivalent shares also excludes the impact of outstanding performance contingent shares, as the conditions necessary for their issuance have not been satisfied as of the end of the reporting period. Approximately 1.6 million and 0.3 million outstanding stock options were not included in the calculation of common equivalent shares during 2008 and 2007, respectively. During 2006, all outstanding options were included in the calculation of common equivalent shares.

Approximately 0.4 million performance contingent shares were excluded from the calculation of common equivalent shares during 2008, 2007 and 2006.

Note 20 COMPREHENSIVE INCOME

The following table presents the components of the Company's other comprehensive income (loss) for the years ended December 31, 2008, 2007 and 2006 (dollars in thousands):

For the year ended December 31, 2008:

	Before-Tax Amount	Tax (Expense) Benefit	After-Tax Amount
Foreign currency translation adjustments:			
Change arising during year	\$(250,052)	\$12,941	\$(237,111)
Foreign currency swap	53,720	(18,802)	34,918
Net foreign currency translation adjustments	<u>(196,332)</u>	<u>(5,861)</u>	<u>(202,193)</u>
Unrealized losses on securities:			
Unrealized net holding losses arising during the year	(1,458,293)	511,768	(946,525)
Less: Reclassification adjustment for net losses realized in net income	(122,997)	43,049	(79,948)
Net unrealized losses	<u>(1,335,296)</u>	<u>468,719</u>	<u>(866,577)</u>
Unrealized pension and postretirement benefits:			
Net prior service cost arising during the year	799	(284)	515
Net loss arising during the period	(10,523)	3,701	(6,822)
Unrealized pension and postretirement benefits, net	<u>(9,724)</u>	<u>3,417</u>	<u>(6,307)</u>
Other comprehensive loss	<u>\$(1,541,352)</u>	<u>\$466,275</u>	<u>\$(1,075,077)</u>

For the year ended December 31, 2007:

	Before-Tax Amount	Tax (Expense) Benefit	After-Tax Amount
Foreign currency translation adjustments:			
Change arising during year	\$124,581	\$(8,343)	\$116,238
Foreign currency swap	(5,104)	1,786	(3,318)
Net foreign currency translation adjustments	<u>119,477</u>	<u>(6,557)</u>	<u>112,920</u>
Unrealized losses on securities:			
Unrealized net holding losses arising during the year	(79,990)	33,608	(46,382)
Less: Reclassification adjustment for net losses realized in net income	(36,811)	12,840	(23,971)
Net unrealized losses	<u>(43,179)</u>	<u>20,768</u>	<u>(22,411)</u>
Unrealized pension and postretirement benefits:			
Net prior service cost arising during the year	(265)	70	(195)
Net gain arising during the period	4,853	(1,712)	3,141
Unrealized pension and postretirement benefits, net	<u>4,588</u>	<u>(1,642)</u>	<u>2,946</u>
Other comprehensive income	<u>\$80,886</u>	<u>\$12,569</u>	<u>\$93,455</u>

For the year ended December 31, 2006:

	Before-Tax Amount	Tax (Expense) Benefit	After-Tax Amount
Foreign currency translation adjustments:			
Change arising during year	\$25,667	\$(1,727)	\$23,940
Unrealized losses on securities:			
Unrealized net holding losses arising during the year	(38,410)	9,801	(28,609)
Less: Reclassification adjustment for net losses realized in net income	(3,953)	1,578	(2,375)
Net unrealized losses	<u>(34,457)</u>	<u>8,223</u>	<u>(26,234)</u>
Other comprehensive loss	<u>\$(8,790)</u>	<u>\$6,496</u>	<u>\$(2,294)</u>

A summary of the components of net unrealized appreciation (depreciation) of balances carried at fair value is as follows (dollars in thousands):

Years Ended December 31,	2008	2007
Change in net unrealized appreciation on:		
Fixed maturity securities available-for-sale	\$(1,332,268)	\$(23,019)
Other investments	(50,229)	(23,712)
Effect of unrealized appreciation on:		
Deferred policy acquisition costs	47,201	3,552
Net unrealized appreciation (depreciation)	<u>\$(1,335,296)</u>	<u>\$(43,179)</u>

Note 21 DISCONTINUED OPERATIONS

Since December 31, 1998, the Company has formally reported its accident and health division as a discontinued operation. The accident and health business was placed into run-off, and all treaties were terminated at the earliest possible date. Notice was given to all cedants and retrocessionaires that all treaties were being cancelled at the expiration of their terms. The nature of the underlying risks is such that the claims may take several years to reach the reinsurers involved. Thus, the Company expects to pay claims over a number of years as the level of business diminishes. The Company will report a loss to the extent claims exceed established reserves.

At the time it was accepting accident and health risks, the Company directly underwrote certain business provided by brokers using its own staff of underwriters. Additionally, it participated in pools of risks underwritten by outside managing general underwriters, and offered high level common account and catastrophic protection coverages to other reinsurers and retrocessionaires. Types of risks covered included a variety of medical, disability, workers' compensation carve-out, personal accident, and similar coverages.

The reinsurance markets for several accident and health risks, most notably involving workers' compensation carve-out and personal accident business, have been quite volatile over the past several years. Certain programs are alleged to have been inappropriately underwritten by third party managers, and some of the reinsurers and retrocessionaires involved have alleged material misrepresentation and non-disclosures by the underwriting managers. In particular, over the past several years a number of disputes have arisen in the accident and health reinsurance markets with respect to London market personal accident excess of loss reinsurance programs that involved alleged "manufactured" claims spirals designed to transfer claims losses to higher-level reinsurance layers. While the Company did not underwrite workers' compensation carve-out business directly, it did offer certain indirect high-level common account coverages to other reinsurers and retrocessionaires, which could result in exposure to workers' compensation carve-out risks. The Company and other reinsurers and retrocessionaires involved have raised substantial defenses upon which to contest claims arising from these coverages, including defenses based upon the failure of the ceding company to disclose the existence of manufactured claims spirals, inappropriate or unauthorized underwriting procedures and other defenses. As a result, there have been a significant number of claims for rescission, arbitration, and litigation among a number of the parties involved in these various coverages. This has had the effect of significantly slowing the reporting of claims between parties, as the various outcomes of a series of arbitrations and similar actions affect the extent to which higher level reinsurers and retrocessionaires may ultimately have exposure to claims.

The calculation of the claim reserve liability for the entire portfolio of accident and health business requires management to make estimates and assumptions that affect the reported claim reserve levels. Management must make estimates and

assumptions based on historical loss experience, changes in the nature of the business, anticipated outcomes of claim disputes and claims for rescission, anticipated outcomes of arbitrations, and projected future premium run-off, all of which may affect the level of the claim reserve liability. The accident and health business generated claims higher than those anticipated and therefore, during the fourth quarter of 2008, the Company increased the claim reserve liability related to its discontinued accident and health operations by \$9.0 million. The consolidated statements of income for all periods presented reflect this line of business as a discontinued operation. Revenues associated with discontinued operations, which are not reported on a gross basis in the Company's consolidated statements of income, totaled \$2.1 million, \$2.0 million and \$2.7 million for 2008, 2007 and 2006, respectively.

REPORT OF INDEPENDENT REGISTERED PUBLIC ACCOUNTING FIRM

To the Board of Directors and Stockholders of
Reinsurance Group of America, Incorporated
St. Louis, Missouri

We have audited the accompanying consolidated balance sheets of Reinsurance Group of America, Incorporated and subsidiaries (the "Company") as of December 31, 2008 and 2007, and the related consolidated statements of income, stockholders' equity, and cash flows for each of the three years in the period ended December 31, 2008. Our audits also included the financial statement schedules listed in the Index at Item 15. These consolidated financial statements and financial statement schedules are the responsibility of the Company's management. Our responsibility is to express an opinion on the consolidated financial statements and financial statement schedules based on our audits.

We conducted our audits in accordance with the standards of the Public Company Accounting Oversight Board (United States). Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the consolidated financial statements are free of material misstatement. An audit includes examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements. An audit also includes assessing the accounting principles used and significant estimates made by management, as well as evaluating the overall financial statement presentation. We believe that our audits provide a reasonable basis for our opinion.

In our opinion, such consolidated financial statements present fairly, in all material respects, the financial position of Reinsurance Group of America, Incorporated and subsidiaries as of December 31, 2008 and 2007, and the results of their operations and their cash flows for each of the three years in the period ended December 31, 2008, in conformity with accounting principles generally accepted in the United States of America. Also, in our opinion, such financial statement schedules, when considered in relation to the basic consolidated financial statements taken as a whole, present fairly, in all material respects, the information set forth therein.

As discussed in Note 2, the Company changed its method of accounting for income taxes, as required by accounting guidance adopted on January 1, 2007, and changed its method of accounting for defined benefit pension and other postretirement plans as required by accounting guidance which the Company adopted on December 31, 2006.

We have also audited, in accordance with the standards of the Public Company Accounting Oversight Board (United States), the Company's internal control over financial reporting as of December 31, 2008, based on the criteria established in Internal Control—Integrated Framework issued by the Committee of Sponsoring Organizations of the Treadway Commission and our report dated February 27, 2009 expressed an unqualified opinion on the Company's internal control over financial reporting.

Item 9. CHANGES IN AND DISAGREEMENTS WITH ACCOUNTANTS
ON ACCOUNTING AND FINANCIAL DISCLOSURE

None.

Item 9A. CONTROLS AND PROCEDURES

The Chief Executive Officer and the Chief Financial Officer have evaluated the effectiveness of the design and operation of the Company's disclosure controls and procedures as defined in Exchange Act Rule 13a-15(e) as of the end of the period covered by this report. Based on that evaluation, the Chief Executive Officer and the Chief Financial Officer concluded that these disclosure controls and procedures were effective.

There was no change in the Company's internal control over financial reporting as defined in Exchange Act Rule 13a-15(f) during the quarter ended December 31, 2008, that has materially affected, or is reasonably likely to materially affect, the Company's internal control over financial reporting.

Management's Annual Report on Internal Control Over Financial Reporting

Management of Reinsurance Group of America, Incorporated and subsidiaries (collectively, the "Company") is responsible for establishing and maintaining adequate internal control over financial reporting. In fulfilling this responsibility, estimates and judgments by management are required to assess the expected benefits and related costs of control procedures. The objectives of internal control include providing management with reasonable, but not absolute, assurance that assets are safeguarded against loss from unauthorized use or disposition, and that transactions are executed in accordance with management's authorization and recorded properly to permit the preparation of consolidated financial statements in conformity with accounting principles generally accepted in the United States of America.

Financial management has documented and evaluated the effectiveness of the internal control of the Company as of December 31, 2008 pertaining to financial reporting in accordance with the criteria established in "Internal Control – Integrated Framework" issued by the Committee of Sponsoring Organizations of the Treadway Commission.

In the opinion of management, the Company maintained effective internal control over financial reporting as of December 31, 2008.

Deloitte & Touche LLP, an independent registered public accounting firm, has issued an attestation report on the effectiveness of the Company's internal control over financial reporting.

REPORT OF INDEPENDENT REGISTERED PUBLIC ACCOUNTING FIRM

To the Board of Directors and Stockholders of
Reinsurance Group of America, Incorporated
St. Louis, Missouri

We have audited the internal control over financial reporting of Reinsurance Group of America, Incorporated and subsidiaries (the "Company") as of December 31, 2008, based on criteria established in Internal Control — Integrated Framework issued by the Committee of Sponsoring Organizations of the Treadway Commission. The Company's management is responsible for maintaining effective internal control over financial reporting and for its assessment of the effectiveness of internal control over financial reporting, included in the accompanying Management's Annual Report on Internal Control over Financial Reporting. Our responsibility is to express an opinion on the Company's internal control over financial reporting based on our audit.

We conducted our audit in accordance with the standards of the Public Company Accounting Oversight Board (United States). Those standards require that we plan and perform the audit to obtain reasonable assurance about whether effective internal control over financial reporting was maintained in all material respects. Our audit included obtaining an understanding of internal control over financial reporting, assessing the risk that a material weakness exists, testing and evaluating the design and operating effectiveness of internal control based on the assessed risk, and performing such other procedures as we considered necessary in the circumstances. We believe that our audit provides a reasonable basis for our opinion.

A company's internal control over financial reporting is a process designed by, or under the supervision of, the company's principal executive and principal financial officers, or persons performing similar functions, and effected by the company's board of directors, management, and other personnel to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with generally accepted accounting principles. A company's internal control over financial reporting includes those policies and procedures that (1) pertain to the maintenance of records that, in reasonable detail, accurately and fairly reflect the transactions and dispositions of the assets of the company; (2) provide reasonable assurance that transactions are recorded as necessary to permit preparation of financial statements in accordance with generally accepted accounting principles, and that receipts and expenditures of the company are being made only in accordance with authorizations of management and directors of the company; and (3) provide reasonable assurance regarding prevention or timely detection of unauthorized acquisition, use, or disposition of the company's assets that could have a material effect on the financial statements.

Because of the inherent limitations of internal control over financial reporting, including the possibility of collusion or improper management override of controls, material misstatements due to error or fraud may not be prevented or detected on a timely basis. Also, projections of any evaluation of the effectiveness of the internal control over financial reporting to future periods are subject to the risk that the controls may become inadequate because of changes in conditions, or that the degree of compliance with the policies or procedures may deteriorate.

In our opinion, the Company maintained, in all material respects, effective internal control over financial reporting as of December 31, 2008, based on the criteria established in Internal Control — Integrated Framework issued by the Committee of Sponsoring Organizations of the Treadway Commission.

We have also audited, in accordance with the standards of the Public Company Accounting Oversight Board (United States), the consolidated financial statements and financial statement schedules as of and for the year ended December 31, 2008 of the Company and our report dated February 27, 2009 expressed an unqualified opinion on those financial statements and financial statement schedules.

Item 9B. OTHER INFORMATION

None.

Part III

Item 10. DIRECTORS, EXECUTIVE OFFICERS, AND CORPORATE GOVERNANCE

Information with respect to Directors of the Company is incorporated by reference to the Proxy Statement under the captions "Nominees and Continuing Directors" and "Section 16(a) Beneficial Ownership Reporting Compliance". The Proxy Statement will be filed pursuant to Regulation 14A within 120 days of the end of the Company's fiscal year.

Executive Officers

The following is certain additional information concerning each executive officer of the Company.

Todd C. Larson, 45, is Senior Vice President, Controller and Treasurer. Prior to joining the Company in 1995, Mr. Larson was Assistant Controller at Northwestern Mutual Life Insurance Company from 1994 through 1995 and prior to that position was an accountant for KPMG. Mr. Larson also serves as a director and officer of several RGA subsidiaries.

Jack B. Lay, 54, is Senior Executive Vice President and Chief Financial Officer. Prior to joining the Company in 1994, Mr. Lay served as Second Vice President and Associate Controller at General American. In that position, he was responsible for all external financial reporting as well as merger and acquisition support. Before joining General American in 1991, Mr. Lay was a partner in the financial services practice with the St. Louis office of KPMG. Mr. Lay also serves as a director and officer of several RGA subsidiaries.

Alain Néemeh, 41, is President and Chief Executive Officer of RGA Life Reinsurance Company of Canada. He served as Executive Vice President of Operations, and Chief Financial Officer from 2001 until he attained his current position in 2006. He joined the finance area at RGA Canada in 1997 from KPMG where he provided audit and other services to a variety of clients in the financial services, manufacturing and retail sectors.

Paul Nitsou, 47, is President of RGA International Corporation. He served as Executive Vice President prior to attaining his current position in June 2004. He joined RGA in 1996 and began his life insurance career in 1985 at Manulife Financial where he held numerous actuarial-related positions.

Paul A. Schuster, 54, is Senior Executive Vice President, U.S. Division and became Chairman President and Chief Executive Officer of RGA Reinsurance Company, effective May 1, 2008. He served as Senior Vice President, U.S. Division from January 1997 to December 1998. Mr. Schuster was Reinsurance Actuarial Vice President in 1995 and Senior Vice President & Chief Actuary of the Company in 1996. Prior to the formation of RGA, Mr. Schuster served as Second Vice President and Reinsurance Actuary of General American. Prior to joining General American in 1991, he served as Vice President and Assistant Director of Reinsurance Operations of the ITT Lyndon Insurance Group from 1988 to 1991 and in a variety of actuarial positions with General Reassurance Corporation from 1976 to 1988. Mr. Schuster also serves as a director and officer of several RGA subsidiaries.

James E. Sherman, 55, is Executive Vice President, General Counsel and Secretary of the Company. Prior to joining the Company in 2001, Mr. Sherman served as Associate General Counsel of General American Life Insurance Company from 1995 until 2000. Mr. Sherman also serves as an officer of several RGA subsidiaries.

Graham S. Watson, 59, is Senior Executive Vice President, International and Chief Marketing Officer of RGA, and Chief Executive Officer of RGA International Corporation. Upon joining RGA in 1996, Mr. Watson was President and CEO of RGA Australia. Prior to joining RGA in 1996, Mr. Watson was the President and CEO of Intercedent Limited in Canada and has held various positions of increasing responsibility for other life insurance companies. Mr. Watson also serves as a director and officer of several RGA subsidiaries.

A. Greig Woodring, 57, is President and Chief Executive Officer of the Company. Mr. Woodring also is an executive officer of General American Life Insurance Company ("General American"). He headed General American's reinsurance business from 1986 until the Company's formation in December 1992. He also serves as a director and officer of a number of subsidiaries of the Company.

Corporate Governance

The Company has adopted an Employee Code of Business Conduct and Ethics (the “Employee Code”), a Directors’ Code of Conduct (the “Directors’ Code”), and a Financial Management Code of Professional Conduct (the “Financial Management Code”). The Employee Code applies to all employees and officers of the Company and its subsidiaries. The Directors’ Code applies to directors of the Company and its subsidiaries. The Financial Management Code applies to the Company’s chief executive officer, chief financial officer, corporate controller, chief financial officers in each business unit, and all professionals in finance and finance-related departments. The Company intends to satisfy its disclosure obligations under Item 10 of Form 8-K by posting on its website information about amendments to, or waivers from a provision of the Financial Management Code that applies to the Company’s chief executive officer, chief financial officer, and corporate controller. Each of the three Codes described above is available on the Company’s website at www.rgare.com.

Also available on the Company’s website are the following other items: Corporate Governance Guidelines, Audit Committee Charter, Compensation Committee Charter, and Nominating and Corporate Governance Committee Charter (collectively “Governance Documents”).

The Company will provide without charge upon written or oral request, a copy of any of the Codes of Conduct or Governance Documents. Requests should be directed to Investor Relations, Reinsurance Group of America, Incorporated, 1370 Timberlake Manor Parkway, Chesterfield, MO 63017 by electronic mail (investrelations@rgare.com) or by telephone (636-736-7243).

In accordance with the Securities Exchange Act of 1934, the Company’s board of directors has established a standing audit committee. The board of directors has determined, in its judgment, that all of the members of the audit committee are independent within the meaning of SEC regulations and the listing standards of the New York Stock Exchange (“NYSE”). The board of directors has determined, in its judgment, that Messrs. Bartlett, Greenbaum and Henderson are qualified as audit committee financial experts within the meaning of SEC regulations and the board has determined that each of them has accounting and related financial management expertise within the meaning of the listing standards of the NYSE. The audit committee charter provides that members of the audit committee may not simultaneously serve on the audit committee of more than two other public companies unless a committee member demonstrates that he or she has the ability to devote the time and attention that are required to serve on multiple audit committees.

Additional information with respect to Directors and Executive Officers of the Company is incorporated by reference to the Proxy Statement under the captions “Nominees and Continuing Directors”, “Board of Directors and Committees”, and “Section 16(a) Beneficial Ownership Reporting Compliance”. The Proxy Statement will be filed pursuant to Regulation 14A within 120 days of the end of the Company’s fiscal year.

Item 11. EXECUTIVE COMPENSATION

Information on this subject is found in the Proxy Statement under the captions “Compensation Discussion and Analysis”, “Executive Compensation” and “Director Compensation” and is incorporated herein by reference. The Proxy Statement will be filed pursuant to Regulation 14A within 120 days of the end of the Company’s fiscal year.

Item 12. SECURITY OWNERSHIP OF CERTAIN BENEFICIAL OWNERS AND MANAGEMENT AND RELATED STOCKHOLDERS MATTERS

Information of this subject is found in the Proxy Statement under the captions “Securities Ownership of Directors, Management and Certain Beneficial Owners”, “Nominees and Continuing Directors”, and “Equity Compensation Plan Information” and is incorporated herein by reference. The Proxy Statement will be filed pursuant to Regulations 14A within 120 days of the end of the Company’s fiscal year.

Item 13. CERTAIN RELATIONSHIPS AND RELATED TRANSACTIONS, AND DIRECTOR INDEPENDENCE

Information on this subject is found in the Proxy Statement under the captions “Certain Relationships and Related Person Transactions” and “Director Independence” and incorporated herein by reference. The Proxy Statement will be filed pursuant to Regulation 14A within 120 days of the end of the Company’s fiscal year.

Item 14. PRINCIPAL ACCOUNTANT FEES AND SERVICES

Information on this subject is found in the Proxy Statement under the caption "Independent Auditor" and incorporated herein by reference. The Proxy Statement will be filed pursuant to Regulation 14A within 120 days of the end of the Company's fiscal year.
